QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following reports for the first calendar quarter of 1990 were received too late to be included in the published reports for that quarter:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings. This page (Page 1) is designed to supply identifying data, and Page 2 deals with financial data.)

PLEASE RETURN 1 ORIGINAL TO: THE CLERK OF THE HOUSE OF REPRESENTATIVES, OFFICE OF RECORDS AND REGISTRATION, 1036 LONGWORTH HOUSE OFFICE BUILDING, WASHINGTON, D.C. 20515

PLEASE RETURN 1 ORIGINAL TO: THE SECRETARY OF THE SENATE, OFFICE OF PUBLIC RECORDS, 232 HART SENATE OFFICE BUILDING, WASHINGTON, D.C. 20510

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19 . . . . .

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

IDENTIFICATION NUMBER

Is this an Amendment? ☐ YES ☐ NO

NOTE on ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) *"Employee".*—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) *"Employer".*—To file as an "employer", write "None" in answer to Item "B".

(*b*) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

☐ CHECK IF ADDRESS IS DIFFERENT THAN PREVIOUSLY REPORTED

NOTE on ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER—State name, address, and nature of business. If there is no employer, write "None."

NOTE on ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) description, (*b*) quantity distributed, (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and, if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly Report."

STATEMENT OF VERIFICATION

[Omitted in printing]

NOTE on ITEM "D."—*(a)* IN GENERAL. The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—§ 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In general.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in connection with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multi-purpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In general.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received—"The term 'contribution' includes a . . . *loan* . . ."—§ 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $....."Expense Money" and Reimbursements received this Quarter.

Contributors of $500 or More (from Jan. 1 through this Quarter)

13. Have there been such contributors?
    Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last day of this Quarter, total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* (*"Period"* from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE on ITEM "E".—*(a)* IN GENERAL. "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—§ 302 (b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) IN CONNECTION WITH LEGISLATIVE INTERESTS:

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than Item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from Jan. 1 through this Quarter (Add "9" and "10")

Loans Made to Others—"The term 'expenditure' includes a . . . *loan* . . ."—§ 302 (b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayments received during this Quarter

15. *Recipients of Expenditures of $10 or More*_____

If there were no single expenditures of $10 or more, please so indicate by using the word "NONE".

In the case of expenditures made during this Quarter by, or on behalf of, the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

SENATE—*Friday, August 3, 1990*

(Legislative day of Tuesday, July 10, 1990)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the Honorable KENT CONRAD, a Senator from the State of North Dakota.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Gracious God our Father, we find comfort and confidence in Your promise, "The Lord shall preserve thy going out and thy coming in from this time forth, and even for evermore."—Psalm 121:8. As the Senators and their families disperse for the August recess, may this promise from the psalms be an encouragement to them. Protect from harm those who travel, bless the purposes for which they journey, and return them safely home. Prosper their activities when they are busy with campaigns and constituent relationships. Guide them in the stewardship of their time that there will be ample opportunity for deepening and strengthening family relationships. And help them, Father, to get rest in preparation for the weeks before adjournment. Let them go in peace and return renewed, ready for the final achievements of the 101st Congress.

We pray in the name of Jesus, Light of the world. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, August 3, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KENT CONRAD, a Senator from the State of North Dakota, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. CONRAD thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 9 a.m., and the Senator from Texas [Mr. BENTSEN] will be recognized for a speech not to exceed 10 minutes.

IRAQ

Mr. BENTSEN. Mr. President, when the Iraqi tanks rolled into Kuwait yesterday, they posed one of the most major economic threats that this country has seen since World War II.

We should understand the magnitude of the problem that we are facing. Kuwait has fallen, taken overnight. Saudi Arabia is the next big bull's-eye in the target and can well be the real objective of Saddam Hussein.

This is an unusual man. I have heard some say he is a madman. I do not believe that at all. He wants to be the Nasser of the Middle East, but with a great difference. This is a man who practices deception, deceit, who meets with one of the recognized leaders of the Middle East, President Mubarak, gives him all kinds of assurances and then acts to the contrary. He takes a country, Kuwait, which has been his major benefactor, principal financial source in his war against Iran, which gave years of that kind of support, and he turns on it overnight, even after Kuwait had acquiesced in virtually every demand that he had made. That was not enough.

This is not a man in the Middle East who is seeking a place in Beverly Hills, a spot in London, not one that is looking just for the personal satisfaction of luxury or planes or yachts.

This is a man that seeks power. And he is ready to pay any price to get it including the lives of his own people, as he has shown by practicing genocide on his own people and resorting to chemical warfare. This man is rabid about power.

If he takes Saudi Arabia then he really will have achieved enormous influence over the economic destiny of Europe, of Japan, and, yes, of this country. He has battle-hardened Iraqi forces, well over 100,000 of them in Kuwait already. He has several divisions massed, ready to move, and it is obvious he would not hesitate to do it.

Right now 12 percent of our oil comes from the Persian Gulf, 5 percent comes from Iraq and Kuwait alone. The nations in the Persian Gulf account for almost 40 percent of Europe's oil, virtually all of Japan's.

I was meeting with the then Prime Minister of Japan, Mr. Takeshita, with members of what was tantamount to their U.S. Chamber of Commerce, talking to them about some of our economic concerns. He said the major problem you have is that, "You cannot control your own economy; that you cannot take care of your deficit, that you will not turn that around." I stated, "Well, you know, if we spent the same amount of our GNP as you spend, which is 1 percent, on defense forces, we would have ourselves a balanced budget." And that year we would have. "But what you would have, you would have economic chaos because you get so much of your oil from the Persian Gulf and you would not have the U.S. Navy down there to break that blockade. Your industrial might would grind to a halt."

When I look at the kind of situation the world is facing and I make the comment that 12 percent of our oil comes from the Persian Gulf, there are some that say, "Well, then that is not so bad for us. We can get by without that 12 percent; hurt, but get by."

But that is not the way it works out. If you have virtually all of Japan's and 40 percent of Europe's and that is then denied them or is put at some unacceptable price that results in enormous inflation or pushes them into a recession, we are involved with them at the same time. We would compete for whatever oil is left. That is the kind of power that he has.

Today, 50 percent of our oil is now imported. Time and time again, I have warned this body of the dangers of growing dependence on Middle East oil, one of the most volatile areas, the risks that it poses to our economy and to our own security. And I regret that we did not take the preventive measures that I have recommended previously.

Now we have to respond internationally and domestically. Together with other nations, we need to punish Iraq, try to force an end to that kind of aggression. And as a first step, of course, we need to have a worldwide boycott against the purchase of anything from Iraq. Military options preserved—of course we have to preserve them—preserved as long as we are assured we can get support from other countries throughout Europe and the region.

But I want to tell you, a military option would be an extremely expen-

sive and difficult one. There is a better way to do it and that is with the kind of economic blockade that the President is trying to bring about.

Saddam Hussein owes enormous amounts of money. That is his vulnerability. If he cannot sell his product—and oil is virtually the only product he has that we in the West have any interest in—if he cannot sell it, that brings him to his knees and that gets the message across. But there is no other way it could be accomplished. And that is not going to be easy for other nations, to stand fast on that point and not to cheat and not to try to get around a boycott.

We have to consult with those other countries to try and see what other defensive measures which we can take to guard against further Iraqi attacks, because I am convinced they will come about, be it Saudi Arabia, the Emirates, whatever he thinks he can mop up.

We also need to strengthen our energy security here at home. We need to accelerate our efforts to develop alternative sources of energy which are available here in the United States.

I look at my own State. I look at the fact that the price of oil going up $3 boosts our economy, creates jobs, and in the short term helps us. But in the long term, that kind of a transfer of power and control abroad is highly dangerous to my State and to the Nation.

Time and time again, I have introduced oil and gas incentive packages, including such items as credit for production of nonconventional fuels, making tight sands production more feasible, and enhanced oil recovery. A breakthrough in those enhanced recovery techniques that would yield a mere 10 percent of the oil that is now considered unrecoverable would double U.S. domestic reserves.

One means of pursuing that kind of breakthrough is an aggressive Federal research and development program, centered on enhanced tertiary recovery. The idea is to bring all the scientific resources of this Nation to bear in a coordinated fashion.

This has to be a long-term effort. It cannot be sustained by short-term spikes in the international price of oil. For our domestic oil and gas industry to rebound there has to be some sense of stability and only the President and the Congress can provide it. It requires a national strategy and time for rational planning by the private sector.

But we need to take such an approach. This week's news makes us even more vulnerable and makes it more evident that our response has to be urgent. Hindsight is always clearer than foresight, but a lot of us, 41 of us in this body 3 years ago, voted for the Bentsen peril point legislation, arguing that we were imperiled because of increasing dependence on foreign oil. We voted for my Emergency Energy Security Act, which would have required the President, in the event that we saw our dependence on oil reaching 50 percent—which I forecast it would and now it has—required the President to submit to the Congress a plan to prevent imports from reaching that dangerous level.

Well, we are there and we do not have such a plan. No one knows when this crisis is going to be over or what we may have to suffer to regain some measure of energy security.

When I offered my forward-looking legislation 3 years ago, the administration weighed in with vigorous opposition. Six of the votes we had changed against us in the last 2 days. We were accused of offering a supposed tax on imported oil, but that was a straw man. We simply asked the administration for a realistic energy policy and we retained the right of the Congress to review it and decide it.

Since that turning point 3 years ago we have continued in the wrong direction. Oil imports have increased, as I said they would, and still no comprehensive policy. The domestic energy industry remains in a slump.

Conservation—here is a fellow from Texas talking about conservation; we need it—once an all-purpose answer to energy needs, has not lived up to its promise. The Federal Government has relaxed its own conservation standards as if the problem had permanently vanished. We used to have temperature controls in the Government buildings to save energy. Now Government offices are cooler in the summer and warmer in the winter because they think the threat to energy security has faded away.

The administration has rolled back the corporate average fuel economy [CAFE] standards for the auto industry. They have done it in each of the past 4 years. We did not have to roll back those standards. They were working. Since they were first enacted in 1975, our cars have doubled their fuel efficiency. We had a relatively painless, safe, and successful method of conservation. What short memories.

Mr. President, why do we have to wait for a crisis in order to face up to our vulnerabilities? Why can we not anticipate and then be prepared? By failing to learn from the lessons of history, we are condemning ourselves to repeat it.

Mr. President, I will be offering additional incentives to encourage domestic production and to do those things that are necessary to get conservation back on track in this country and to once again try to develop alternative sources of energy.

I yield the floor.

OIL POLLUTION ACT OF 1990

Mr. BIDEN. One and one-half years ago, the Nation's eyes were opened to the devastation that can be brought by oilspills. The wreck of the *Exxon Valdez* in Prince William Sound in Alaska tore into the national consciousness, starting an irresistible drive toward reform of our Federal oilspill laws that is near culmination today.

But this bill is much more than the result of a year and one-half of work. It is closer to the result of a decade and a half of effort and, up to now, frustration. For although the Nation as a whole awoke to the threat and damage of oilspills as the *Exxon Valdez'* cargo slipped into Prince William Sound, there are many of us who have witnessed far too many smaller spills over the years and are well aware of the need for a stronger Federal program.

The Delaware River is heavily traveled by oil tankers. As is the habit of tankers, from time to time one of them strayed out of the shipping lane and had its tanks ripped open by rocks. Well before the *Exxon Valdez*, ships like the *Grand Eagle, Intermar Alliance, Viking Osprey*, and *Corinthos* provided proof to Delawareans of the risks associated with oil transportation.

Fifteen years ago, I introduced one of the first bills to establish a Federal oilspill liability and compensation program. The basic structure of proposals has not changed dramatically over the years. What has changed is the public's awareness of the damage these spills do to the environment.

There has been another important change. Until recently, many Americans viewed oilspills as an unfortunate but inevitable and uncontrollable part of doing business. But the *Exxon Valdez* came along at a time when many people were starting to question the underlying assumption about what should be considered normal.

The fact is that the oil industry can improve its performance. Those who suffer at the hands of the careless captains or inattentive owners should not have to wait years for compensation. Some of our Nation's most valuable yet fragile natural resources—wetlands and coastal areas—should not be left to fend for themselves when oil oozes in.

The conference report we will soon pass addresses the many shortcomings of the existing patchwork of laws on oilspills. Increases in insurance requirements will focus greater industry attention on operating practices and conditions. A $1 billion compensation fund will speed reimbursement to individuals damaged by spills.

States will have access to a portion of the fund so that they can start cleanup operations immediately after

a spill, when the chances of containment are greatest. Compensation will also be allowed for damage to natural resources, so that the wetland areas and wildlife refuges of the Delaware Bay will not suffer interminably from the effects of spills.

A research and development program is established to look at new methods to cleanup spills. This is perhaps the clearest failure of the current system. Most oilspills contingency plans expect to pull only a very small amount of oil out of the water. The vast majority is allowed to evaporate or simply "go away" through dispersal into the water. That is not what the public was led to believe would be the case with spills. This program will seek to improve the last line of defense, cleanup equipment, in oilspills.

The change in the public's attitude, I believe, was also an important factor in adoption of several other provisions that would have been considered impossible a few years ago. Among those are the requirement for double hulls and the rejection of preemption of State laws explicitly and through rejection of participation in an international agreement, developed by shipowners, that would have unduly limited liability.

This bill represents a tremendous step forward, one that is long overdue but most welcome. The *Exxon Valdez* may have served as the catalyst for passage of this bill, and the public may measure its success or failure by the number of huge spills in the future. But many of us will look to a different measure, the number of smaller spills that do not capture national attention, but cumulatively devastate our Nation's rivers and bays. Victims of those spills, which I hope will shrink in number, will be the ones best served by this bill.

DOWNWINDERS BILL

Mr. REID. Mr. President, I am pleased that Senator HATCH's bill, the National Atmospheric Nuclear Testing Compensation Act, has passed the Senate. I believe this is a giant step forward for justice.

When I was growing up in Searchlight, NV, we could see the flashes light up the dark morning from tests being conducted at the Nevada Nuclear Test Site. But we were lucky. The wind was blowing the other way.

Others were not so lucky. Kent Carroll was tending sheep when a bomb was set off in 1953. He was 17. After 9 years of acute suffering, he died of pancreatic cancer. Nobody told him to take cover. Nobody told him about the dangers.

The horror stories are endless. And they are the result of Government negligence and the negligence of contractors conducting the tests.

The Government and contractors knew the dangers, but they did nothing to protect either their employees or innocent civilians living downwind from the tests.

Senator HATCH's bill, of which I was a cosponsor, is a start. But it is just the first step. My bill, S. 982, the Radiation Victims Fair Treatment Act, is the important second step.

S. 982 would repeal the Warner amendment, which prohibits radiation victims from suing the Government contractors who conducted the tests. This bill has 38 cosponsors, and I look forward to bringing it to the floor in the near future.

Again, I want to congratulate Senator HATCH for his efforts, and I want to congratulate the Senate for seeing to it that justice is done.

COLLEGE WORK STUDY—COMMUNITY SERVICE LEARNING PROGRAM

Mr. BUMPERS. Mr. President, the Department of Education has recently pledged to me that it will take action suggested by me to enhance the effectiveness of the Community Service Learning Program. This pledge is consistent with the President's professed interest in promoting voluntary service in our communities and I am delighted to report it to my Senate colleagues.

The Community Service Learning Program is one component of the College Work Study Program. Most students who participate in the Work Study Program work for the colleges and universities that they attend. But, under the Work Study Program the college or university may place its students in a Community Service Learning Program designed to develop, improve, or expand services for low-income individuals and families, to solve particular programs related to the needs of low-income individuals. The college or university may use up to 10 percent of its work study funds for this program. This is the Community Service Learning Program.

The Work Study Program is a program that includes a matching requirement. Colleges and universities that participate in the program are required to contribute 25 percent of the compensation of the student, a matching requirement that rises to 30 percent for 1990-91. But, with the Community Service Learning component of the program, the share that must be paid by the college and university is only 10 percent.

Many students participating in the Community Service Learning Program are employed by local, private sector, nonprofit community service organizations. When this is the case, colleges and universities are required to insist that the community service organization pay the part of the student's compensation that is not covered by the Federal payment. In addition, the community service organization must pay the employer's share of Social Security taxes or workman's compensation.

It has come to my attention that some colleges and universities have required that the community service organization pay an additional amount that would, in effect, subsidize the fringe benefits of the college or university paid to its employees who are not participating in a work study program. This additional payment corresponds to the cost of the fringe benefits that the university pays to its employees, an overhead cost.

On March 20 of this year I wrote to Education Secretary Cavazos to inquire whether this additional payment requirement is appropriate. I asked why a college or university should be able to impose this additional payment if the fringe benefits that are involved are not being paid to the work study student.

I said that this additional payment would reduce the utilization of the Community Service Learning Program as it would raise the cost of the program to the community service that would employ the students participating in the Service Learning Program.

On June 6, Secretary Cavazos responded to my inquiry by stating that, "An institution is not authorized to require such excess matching amounts—that force a community service organization to make payments that subsidize the fringe benefits of the institutions—non-CWSP—employees—as a means of covering the costs of fringe benefits of its other employees."

In a second letter of July 17, Larry Oxendine, Director of the Division of Policy and Program Development, pledged that the Department of Education would exercise its administrative responsibilities by issuing a "Dear Colleague" letter to the institutions participating in the work study program reminding "the financial aid community of the work study matching requirements and limitations, particularly with respect to community service organizations."

This is welcome news from the Department of Education. We should do all that we can to encourage utilization of the Community Service Learning Program. This information from the Department should end the misuse of the work study matching requirements and increase the number of community service organizations that will employ students in community service projects.

The issue I have raised here is related to the pending national service legislation. The Senate version of this bill would eliminate the matching requirement for the Community Service Learning Program. Section 221 of S.

1430. The current program and this new proposal are both undermined if colleges and universities can require the additional payments that I have described. Mr. Oxendine's letter was written to me in part to obviate the need for me to address the additional matching requirement issue with an amendment to the national service bill. With his pledge, there is no need for me to pursue a legislative solution to this problem.

I ask unanimous consent that the three letters to which I have referred in this statement be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON SMALL BUSINESS,
Washington, DC, March 20, 1990.

Hon. LAURO F. CAVAZOS,
Secretary, Department of Education,
Washington, DC.

DEAR MR. SECRETARY: I am continuing to work on a variety of issues connected with promoting community service and I am writing here to inquire about the terms of the current college work-study program as it relates to students who work for non-profit community service organizations.

As I understand it, the current college work-study program permits colleges and universities to require that non-profit community service organizations contribute 25% of the wages of a student receiving a college work-study grant under the community service-learning program. This matching requirement rises to 30% for C.W.S. grants in 1990–1991.

Of course, non-profit community service organizations have a difficult time making this contribution due to the financial constraints that are common with such organizations and, for this reason, this matching payment requirement is eliminated in the national and community service legislation that was recently adopted by the Senate.

It has come to my attention, however, that in addition to this 25% to 30% matching contribution some colleges and universities may also be requiring that the non-profit community service organization for which the student works pay an additional amount to the college or university equal to the cost of the fringe benefits that the university provides to its own employees.

This payment apparently is required to be made to the university even though these college or university fringe benefits are not being provided to the student receiving the college work-study grant. In effect, this requirement forces the community service organization to subsidize the fringe benefits of the college or university's own employees.

These additional payments can equal or exceed the 25% to 30% matching contribution that the community service organization is already required to make, which makes it even more difficult for the non-profit organization to hire the student under the community service-learning program.

My first question is whether the Department's regulations and policies permit colleges and universities to require off-campus, non-profit community service organizations to pay an amount in addition to the 25%–30% matching requirement to cover the cost of fringe benefits that are provided by the college or university to its own employees.

If the answer to this question is that this practice is permitted, my second question is whether the Higher Education Act gives the Department the discretion to adopt policies and issue regulations that would bar or modify this practice.

My third question is whether the Department will, in fact, proceed to amend its policies and regulations to bar or modify this practice. If the Department chooses not to adopt such policies and regulations, I would appreciate a full explanation of the basis for this decision.

Finally, I am interested in the Department's position on the college work-study provision in the Senate national service bill, which would eliminate the matching requirement. Specifically, I need to know if the provision in the Senate bill eliminating the matching requirement is sufficient to address the issue raised in this letter, which concerns additional matching requirements and not the basic matching requirement.

Requiring non-profit community service organizations to make this additional matching contribution will certainly reduce the utilization of the community service-learning component of the college work-study program. The Bush Administration has stated its firm support for community service and, if this is the case, it should proceed to implement currently authorized federal government programs to further this commitment. I see no basis for the college or university requiring this payment for fringe benefits when the fringe benefits are not being provided to the student.

These questions regarding the college work study program are similar to the questions I have raised several times with you regarding the Department's implementation of the current deferment for student borrowers who perform community service. In that regard, I appreciate your March 8 response to my letter of June 8 regarding the regulations regarding the current deferment program.

I need your response to the issues raised in this letter no later than April 20. The college-work study issue is one we could and may need to address in the national service legislation and I need your answers to determine how best to proceed.

If you have any questions about these issues, please have your staff contact Chuck Ludlam of my staff at 224–3095.

I look forward to working with you on the community service issue. Thank you very much for your cooperation.

Sincerely,

DALE BUMPERS.

DEPARTMENT OF EDUCATION,
THE SECRETARY,
Washington, DC, June 6, 1990.

Hon. DALE BUMPERS,
U.S. Senate,
Washington, DC.

DEAR SENATOR BUMPERS: This is in response to your letters concerning the College Work-Study Program (CWSP) with particular reference to the practices of postsecondary institutions in requiring matching funds from community service organizations.

Section 443(b)(5) of the Higher Education Act of 1965, as amended (HEA), and 34 CFR 675.26 provide that the Federal share of compensation of students employed in the CWSP will not exceed 75 percent for academic year 1989–90 and 70 percent for academic year 1990–91 and succeeding years. One exception to the Federal share requirement is that an institution may use an amount, up to 10 percent of its award period allocation, to pay a Federal share not to exceed 90 percent of the compensation to students employed under the CWSP for community service-learning programs.

The regulations governing the CWSP, in 34 CFR 675.20, provide that the agreement between the institution and the employing agency or nonprofit organization may require the employer to pay the non-Federal share of the student's earnings and other required employer costs. Required employer costs in this context may include the employer's share of social security taxes or workers' compensation, fringe benefits, retirement, or any other welfare or insurance program costs which must be paid on account of the student employee. However, an institution itself may (and may also require an off-campus organization to) provide a greater non-Federal share of student compensation than is required by the statute. Some institutions use this means to increase the amounts available for student financial assistance. Because the statute and regulations require only that the Federal share not exceed a specified percentage of a student's compensation, this practice of requiring a greater non-Federal share is not in violation of the governing statutes or regulations.

The regulations also provide, in 34 CFR 675.26, that an institution may not include the required employer costs in calculating the Federal share of a student's compensation. Further, if an institution receives more money under an employment agreement from an off-campus employer than the required employer costs, the employer's non-Federal share of a student's compensation, and any administrative costs that the employer had agreed to share, the institution must: (1) use the excess funds to reduce the Federal share on a dollar-for-dollar basis, (2) hold the funds for off-campus student employment for the next year, or (3) provide a refund to the off-campus employer. It would appear, therefore, that the practice whereby some institutions of postsecondary education apparently force community service organizations to subsidize the fringe benefits of the institution's (non-CWSP) employees is not in compliance with the CWSP regulations. If you are able to provide me with specific information regarding this practice or can otherwise identify the institutions involved, please notify me, and I will follow up with the institutions directly.

In summary response to your questions, an institution would be permitted to require an off-campus agency or organization to pay a non-Federal share of compensation under the CWSP in excess of the 25 or 30 percent matching amount. The HEA does not authorize the Department to adopt policies and issue regulations which would bar this practice. However, an institution is not authorized to require such excess matching amounts as a means of covering the costs of fringe benefits for its other employees.

Finally, the Department has not yet taken a position on the College Work-Study provision in the Senate's national service bill which would eliminate the matching requirements. However, we would like to note that the elimination of the statutory minimum matching requirement would not prevent an institution from requiring a contribution from the employing organization. Furthermore, if the participating institution were prevented, by statute, from requiring the full employer match—or any match—from community service-learning employers, such a prohibition may well serve as a disin-

centive to the institution for placing students in these jobs. Institutions generally want to generate as much student aid as possible from their Federal allocations.

If we can provide further information, please let me know.

Sincerely,

LAURO F. CAVAZOS.

DEPARTMENT OF EDUCATION,
Washington, DC, July 17, 1990.

Hon. DALE BUMPERS,
U.S. Senate, Washington, DC.

DEAR SENATOR BUMPERS: This letter responds to your follow-up letter of June 8 and also confirms the substance of a telephone conversation between Frank Williar of my staff and Chuck Ludlam of your staff.

As was learned during that telephone conversation, you had just received Secretary Cavazos' response to your earlier letters concerning the College Work-Study Program (CWSP). Inasmuch as your particular concern (on practices of some institutions in requiring excessive CWSP matching funds from community service organizations) is already addressed in the CWSP regulations, Messrs. Ludlam and Williar agreed that your concern would be more appropriately addressed by the Department exercising its administrative responsibilities as opposed to recommending legislative remedies. Therefore, the Department will, at our next opportunity through a "Dear Colleague" letter or other communication, remind the financial aid community of the CWSP matching requirements and limitations, particularly with respect to community service organizations.

If we can be of further assistance, please let us know.

Sincerely,

LARRY OXENDINE,
Director, Division of Policy and Program Development.

WOMEN'S HEALTH EQUITY ACT

Mr. KENNEDY. Mr. President, I would like to express my support for the Women's Health Equity Act. This initiative addresses a number of pressing women's health concerns, including adolescent pregnancy, infant mortality, breast and cervical cancer, AIDS in women, infertility and contraception, and continuation of health insurance coverage for displaced spouses. Many Members of the Senate have been involved in this legislative package. I would like to thank Senator MIKULSKI for her leadership in the area as well as Senators HARKIN, SIMON, ADAMS, and PELL.

This act contains three titles, which address the key areas of health research, health services, and prevention. The seven research bills include legislation which would establish important new programs in women's health research at the National Institutes of Health and ensure that women are included in clinical research in appropriate numbers. The five service bills include bills which will improve Medicaid coverage for pregnant women and children, expand services for adolescent pregnancy, and extend the health insurance coverage guaranteed under COBRA to women over age 50 who are widowed, divorced, or legally separated. There are six prevention bills, including a bill which would improve screening for breast cancer, and an AIDS initiative which would target high risk and HIV infected women for education to be done through family planning and public health clinics.

It has been noted that in research, the health problems of women often do not receive the same attention as those of men. Some examples of this are a lack of research on the health effects of menopause, the lack of research on the different responses of women to alcohol, and the absence of women from important clinical trials on the prevention and treatment of heart disease.

Yesterday, the Labor and Human Resources Committee marked up a bill, the reauthorization of the National Institutes of Health, which addresses these problems and attempts to increase the responsiveness of the Nation's leading research institutes to women's health concerns. The committee's bill will establish an Office of Women's Health Research and entrust it with the task of developing plans for a new Center for Women's Health Research to open in 1993. The committee also directs the NIH to establish a new intramural research program in gynecology and to concentrate more resources on contraceptive and infertility research through the funding of extramural research centers.

The 18 bills in this package merit serious attention. The measures have impressive bipartisan support. They offer great promise for all aspects of health care for women. I intend to give them high priority on the Labor and Human Resources Committee, and I hope that many of them can be enacted before adjournment of this Congress.

RETIREMENT OF BERTIE BOWMAN

Mr. PELL. Mr. President, I would like to take this occasion to pay tribute to a valued committee staff member, Bertie Bowman, who is retiring on August 14 after serving the U.S. Government for 40 years.

Mr. Bowman, known as Bertie by all his friends—which number many—began his tenure on Capitol Hill on June 16, 1950, in the Office of the Architect of the Capitol.

After service in the Armed Forces, he returned to the Senate, and on October 5, 1966, Bertie came to work for the Committee on Foreign Relations and stayed—serving under 6 chairmen—Senators Fulbright, Sparkman, Church, Percy, LUGAR, and myself.

Throughout this time, Bertie has been an example to all staff displaying nonpartisanship, professionalism, and honesty. I am sure I speak for all members and staff of the committee in saying that we will certainly miss him and wish him the best in the years to come.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is now closed.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 2884.

The clerk will report.

The legislative clerk read as follows:

A bill (S. 2884) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

(1) Warner amendment No. 2482, expressing the sense of the Congress regarding greater utilization of the reserve components of the armed forces.

(2) Nunn amendment No. 2483 (to amendment No. 2482), in the nature of a substitute.

The ACTING PRESIDENT pro tempore. The Senator from Illinois.

Mr. DIXON. Mr. President, before we turn to my distinguished friend from Colorado to take up his amendment, as chairman of the Subcommittee on Readiness, Sustainability and Support, I plan to speak today about our subcommittee's portion of this bill.

Mr. President, the Armed Services Committee has completed work on the fiscal year 1991 Defense authorization bill, and the full Senate is now debating on this important legislation. Under the leadership of our able and distinguished chairman, the committee has exhaustively examined the Nation's defense needs in light of the breathtaking changes that have occurred in the national security environment over the past year. The Defense authorization bill represents the outcome of this tremendous effort.

The transformation we are witnessing in the Soviet Union and Eastern Europe provides the United States and its allies an opportunity to achieve real, long-lasting stability in the world. However, the pace and sheer magnitude of these changes also present a special challenge to those of us charged with making U.S. defense policy. On the one hand, we must immediately begin reformulating U.S. defense strategy and the Defense budget to reflect the newly emerging national security situation. If we do not, we risk

wasting the American taxpayers' money.

Yet on the other hand, we must directly link this reformulation to the needs of our national defense—not simply to the demands of the budget process. Moreover, we must proceed in a fashion that allows us to preserve healthy Armed Forces. Otherwise, we risk jeopardizing the peace and stability that we have worked so long and hard to achieve.

I believe that the Defense authorization bill strikes a reasonable balance between these two objectives. The measure authorizes $289 billion in budget authority for fiscal year 1991—which is an $18 billion cut from the President's original request in January. It is also possible that the austere funding environment imposed by the huge budget deficit may force larger reductions in defense spending than are called for by this bill. The bipartisan budget summit now in progress between Congress and the administration will largely determine whether bigger defense cuts are required. Should deeper reduction be necessary, it is imperative that we demonstrate how the cuts can be made sensibly and coherently. Again, a proper balance will be the key.

Mr. President, I believe that we can and must take more decisive action than is now planned on reducing U.S. troops stationed abroad. Overseas troop cuts would not necessarily save substantial funds in the fiscal year 1991 budget, but moving in this direction now would pay significant dividends in the future. Already, during the recent markup, the Armed Services Committee passed an amendment—sponsored by myself and Senator LEVIN—which requires the removal of 50,000 United States troops from Europe by the end of fiscal year 1991. This measure also suggests that the United States should begin planning for a lower level of troops in Europe than the 225,000 called for in the Conventional Forces in Europe [CFE] talks. Our amendment in no way seeks to supplant these important negotiations, but rather is designed "to put the United States on an orderly course toward" the deep troop reductions that will ultimately result from the CFE talks and likely subsequent actions.

I intend to offer a simlar amendment on the floor that will reduce United States troops in Korea by approximately 10,000 over the next fiscal year. I believe that this reduction is warranted by the obvious capability of South Korea to take care of far more of its own defense, as well as by the overall climate of diminishing East-West tension.

I also have brought to the floor an amendment that will prohibit the expenditure of any United States funds for the planned construction of the Crotone Airbase in Italy. This will save at least $320 million in total. Frankly, Mr. President, I think it is ridiculous to even think about spending money on a brand new military base in Europe given the sea changes we have seen in that region, and the cuts we are already planning in the Defense budget. I will have more to say about both of these amendments at the appropriate time.

I would also like to highlight a few aspects of the authorization bill that I have been particularly interested in throughout this year's Defense budget debate. In a floor speech back in March, I argued that—in order to respond to the changes that have been occurring—the United States should take actions such as the following: We should begin cutting strategic nuclear modernization programs; we should place more reliance on the Reserves and National Guard; we should proceed cautiously on committing to costly next generation weapons programs—especially if we can improve and continue to use systems that we already have.

The legislation that the Senate is now considering reflects all three of these priorities. First, the bill eliminates all procurement and military construction funds for the rail garrison MX missile—which is 1 of 2 programs intended to modernize the land-based leg of the U.S. nuclear triad. Cutting the MX produces approximately a $1.6 billion savings in fiscal year 1991. Second, the bill contains a major Guard and Reserve initiative that calls for preserving current Reserve strength, increasing and modernizing Reserve equipment, and transferring selected missions from the Active Forces to Reserve components. This approach will allow the United States to preserve strength in a time of diminishing threat and a declining Defense budget. Third, the bill puts the brakes on some enormously expensive next generation systems such as the Army's proposed $42 billion light helicopter program.

Finally, Mr. President, as chairman of the Armed Services Readiness, Sustainability and Support Subcommittee, I would like to focus on this area of the bill for a moment. In total, approximately 35 percent of the administration's Defense budget request for fiscal year 1991—or $107 billion—falls under the jurisdiction of this subcommittee. In order to reflect the changed threat and the constrained Defense budget, the bill incorporates the concept of flexibilie readiness. Essentially, we insure that high priority forces—the ones that we are most likely to use first—are maintained at appropriate readiness levels. I am confident that careful implementation of this type of approach will insure that we do not return to the days of hollow military forces that we experienced in the 1970's. Another major thrust of the bill in this area is to make massive reductions in U.S. spending on military construction overseas. I believe that these provisions and others will allow the United States to maintain strong, healthy defenses while adapting to a changing world.

Specifically, readiness, sustainability and support covers the operation and maintenance accounts, spare parts and ammunition procurement, the Defense stock funds, and military construction and family housing. Examples of the authorization bill's provisions in these areas include several elements. In the operation and maintenance area, we have made a number of adjustments to the administration's request that are based on the changes in the threat, the overall international situation, and the reduction in the size of our military forces.

There is a $392 million reduction in operating tempo and a corresponding $158 million reduction in depot maintenance. I think this reduction is justified both on the grounds that the overall force will be smaller, and therefore less costly to operate, as well as the fact that the reduced threat allows us to reduce the overall readiness level of some lower priority forces.

Training and education programs and recruiting and advertising were two areas of the budget where the military services inexplicably requested increases this year, despite the reduction in the size of the force. The bill includes reductions in both areas.

Real property maintenance, Defense agencies workload, and base operations support are other areas of the O&M budget that are sensitive to the size of the force and the level of operating activity. These areas have also been reduced.

There is a large reduction—$962.5 million—for the effect of the current hiring freeze on civilian personnel in the Defense Department. Putting in place a hiring freeze this year will mean considerable savings next year.

The bill also includes a 10-percent reduction, or $139 million, in the level of foreign national civilian employees in the Department of Defense. I think this reduction is particularly appropriate in light of the upcoming reduction in U.S. forces stationed overseas.

I want to mention the bill's provisions in the area of inventory management. We have spent a great deal of time on this subject this year. The bill includes a three-part initiative to deal with the problems of excessive inventory buying and retention of outdated material and equipment. Overall, this initiative reduces the fiscal year 1991 budget request by $1.2 billion.

First, this initiative eliminates all funding—$565 million—requested in fiscal year 1991 to increase war reserve

inventories of secondary items in the Defense Department stock funds. This reduction on the supply side of the inventory process is fully justified by the inventory management problems of the past, as well as the military services' reduced force structure in the future.

Second, on the demand side, this initiative reduces the funds in each active and reserve component for units to buy secondary items from the stock funds by 5 percent, or a total of $380 million. This is an attempt to reduce excessive ordering and stocking of secondary items at the unit level that may not be used, either because of reduced force levels or reduced operating tempo.

Third, this initiative attempts to increase disposal of unneeded items in the DOD supply system by giving inventory managers an incentive to dispose of unneeded inventory. In the future, receipts from the sale of unneeded items will be returned to the stock fund cash balances, rather than going into the general fund of the Treasury. This change in policy is accompanied by a reduction of $250 million in anticipation of greater disposal activity next year.

The bill also includes an amendment by Senator LEVIN in this area requiring the Secretary of Defense to establish uniform inventory guidelines and to improve the personnel evaluation process for people in the inventory management area.

These recommendations result in a total reduction of $3.7 billion below the fiscal year 1991 budget request for the operation and maintenance accounts.

In the area of revolving funds, the bill includes a reduction of $644 million. The largest part of this reduction—$564.7 million—is the 1-year moratorium on funding to increase war reserve stocks in the DOD stock funds which I mentioned earlier.

The request for U.S. military construction projects overseas is reduced by approximately three-quarters in light of uncertainties over future overseas deployments of U.S. Forces. The budget request for NATO infrastructure funding has been cut in half for the same reason.

The bill includes legislative provisions in the military construction area—most of which are noncontroversial. The bill approves the administration's request to transfer control of the Pentagon Reservation from the GSA to the DOD. It also includes several provisions which will permit DOD to capture and retain the proceeds from leases and the disposal of excess property. Currently, these funds go to the U.S. Treasury. These provisions improve upon proposals in the defense management review legislative package. The most significant among these provisions is a proposal to ensure the highest possible return to the Defense Department for vacating our bases overseas.

The provisions authorizing DOD to retain the proceeds of property sales and leases, coupled with provisions encouraging multiple use of DOD facilities for civil aviation, drug treatment and prisons, and broadening the scope of economic adjustment assistance, are all designed to ease the transition for DOD and communities to a smaller defense installation infrastructure.

Mr. President, given the many tough challenges we faced this year in producing a sensible Defense authorization bill, I would like to thank Dave Lyles, Bob Bayer, John Hamre, and Mary Kampo of the majority staff for all of their hard work. Moreover, as this bill represents a bipartisan effort, I would like to also thank Ron Kelly and Ken Johnson of the minority staff. A special thanks to Jim Seavers, a congressional fellow in my office, for his outstanding work this year.

In closing, Mr. President, I would like to thank my good friend and colleague, Senator GORTON—the ranking member on the Readiness, Sustainability, and Support Subcommittee—for his cooperation and assistance. It has been a pleasure working with him and our colleagues this year on the subcommittee.

The ACTING PRESIDENT pro tempore. Under the previous order the Senator from Colorado [Mr. WIRTH] is recognized to offer an amendment. There will be 90 minutes of debate.

The Senator from Colorado.

AMENDMENT NO. 2514

(Purpose: To amend title 10, United States Code, regarding the entitlement of members of the Armed Forces and their dependents to receive reproductive health services in uniformed services medical facilities outside the United States)

Mr. WIRTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from Colorado [Mr. WIRTH], for himself, Mr. GLENN, Mr. ADAMS, Mr. AKAKA, Mr. BRADLEY, Mr. CRANSTON, Mr. METZENBAUM, Mr. PACKWOOD, Mr. SIMON, and Mr. DODD, proposes an amendment numbered 2514.

Mr. WIRTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 91, between lines 5 and 6, insert the following:

SEC. 705. REPRODUCTIVE HEALTH SERVICES IN UNIFORMED SERVICES MEDICAL FACILITIES.

(a) MEMBERS OF THE UNIFORMED SERVICES.—Section 1074 of title 10, United States Code, is amended by adding at the end of the following new subsection:

"(d)(1) A member of the uniformed services stationed outside the United States is entitled to the provision of any reproductive health service in a facility of the uniformed services outside the United States in the same manner as any other type of medical care if the provision of such service is not prohibited under United States law.

"(2)(A) The administering Secretaries shall require a member of the uniformed services referred to in paragraph (1) to pay the cost, including all indirect costs, for any reproductive health service provided to such member in a facility referred to in such paragraph if payment for such service out of appropriated funds is not permitted. Appropriated funds shall be deemed not to have been used for providing a reproductive health service if such service is paid for pursuant to the requirement imposed under this paragraph.

"(B) Amounts paid under this paragraph for provision of a reproductive health service to a member of the uniformed services in a facility of the uniformed services shall be credited to the appropriation account for the provision of care under this chapter by facilities of the uniformed services, shall be merged with funds in such account, and shall be available for the purpose for which funds in such account are available but may be obligated and expended only by or for the facility in which the service was provided.".

(b) DEPENDENTS OF MEMBERS OF THE UNIFORMED SERVICES.—Section 1077 of title 10, United States Code, is amended by adding at the end of the following new subsection:

"(d)(1) A dependent of a member of the uniformed services stationed outside the United States, if such dependent is accompanying such member outside the United States, is entitled to the provision of any reproductive health service in a facility of the uniformed services outside the United States in the same manner as any other type of medical care if the provision of such service is not prohibited under United States law.

"(2)(A) The administering Secretaries shall require a member of the uniformed services referred to in paragraph (1) to pay the cost, including all indirect costs, for any reproductive health service provided to a dependent of such member in a medical facility referred to in such paragraph if payment for such service out of appropriated funds is not permitted. Appropriated funds shall be deemed not to have been used for providing a reproductive health service if such service is paid for pursuant to the requirement imposed under this paragraph.

"(B) Amounts paid under this paragraph for provision of a reproductive health service to a dependent of member of the uniformed services in a facility of the uniformed services shall be credited to the appropriation account for the provision of care under this chapter by facilities of the uniformed services, shall be merged with funds in such account, and shall be available for the purposes for which funds in such account are available but may be obligated and expended only by or for the facility in which the service was provided.".

The ACTING PRESIDENT pro tempore. The Chair will note the time under this amendment is equally divided and controlled by the Senator from Colorado [Mr. WIRTH] and the Senator from New Hampshire [Mr. HUMPHREY].

Mr. WIRTH. Mr. President, the amendment we will be considering for the next 1½ hours and upon which we will then have a cloture vote allows members of our armed services and their dependents stationed overseas the same access to the full range of quality health care as those stationed in the United States, and as that which is available to all citizens of the United States.

This amendment is cosponsored by Senators GLENN, ADAMS, AKAKA, BRADLEY, CRANSTON, METZENBAUM, PACKWOOD, SIMON, and DODD and is supported by the National Abortion Rights Action League, Planned Parenthood, Zero Population Growth, Alan Guttmacher Institute, the League of Women Voters, Americans for Democratic Action, the Religious Coalition for Abortion Rights (34 religious organizations), the National Organization of Women, the American Civil Liberties Union, the National Women's Political Caucus, the American Association of University Women, the Women's Legal Defense Fund, the National Women's Law Center, the American Jewish Congress, and the American Jewish Committee, the National Council of Jewish Women—a broad tent of support, Mr. President.

This is a simple amendment about assuring that members of the armed services can exercise their own constitutional freedoms and be confident about the quality of medical care that they receive while serving in the military overseas. In short, the amendment will allow those stationed overseas to be able to use military medical facilities for the full range of reproductive health services permitted under U.S. law—permitted under U.S. law. Any service that cannot be funded by appropriated funds is paid for by the individual.

Under the laws of the United States, Mr. President, women may enter a hospital or a clinic to receive an abortion. Public funds are not to be used to pay for the service. This is the law of the land. Abortion is available if you pay for it.

Some may disagree with this law. They may want to restrict abortions in particular ways, or to fund them in particular ways, and we have had debates about these issues—whether to restrict abortions to rape or incest, whether to punish doctors who perform abortions, or whether to outlaw abortions altogether. Those debates we have been through quite endlessly.

We have also had debates about liberalizing abortions, Mr. President, to make them available to everybody in our society, regardless of their income.

While these debates have gone on, Mr. President, the law has remained the same: Abortions are legal if you pay for them. If that is the law, I assumed that it applied to everyone. The 14th amendment is in the Constitution to provide equal protection of the laws to all citizens. So I assumed that all Americans would have equal protection under the abortion laws.

But I was wrong. The United States Government currently has a policy that creates two classes of citizens: those in the military, and everyone else. The average citizen has one kind of treatment available, but if you are in the military or a dependent of somebody in the military, you have another kind of treatment. You are treated as a second-class citizen.

This amendment is about restoring equal access and equal rights to military people and their dependents. We should not have second-class citizens. We should treat people in the military as we treat everybody else in our society.

How did this come about, Mr. President?

On October 1, 1988, the Reagan administration issued a directive. The directive said:

* * * the performance of pre-paid abortions in military treatment facilities is not authorized.

I ask unanimous consent, Mr. President, to have that full directive printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
Washington, DC, June 31, 1988.

MEMORANDUM FOR SECRETARIES OF THE MILITARY DEPARTMENTS

Subject: DOD Policy Regarding Providing Non-Funded Abortions in Outside the Continental United States Military Medical Treatment Facilities.

Until this time, there has been no formal Department of Defense policy on the issue of performing abortions, not funded by the government, in military medical treatment facilities in certain countries in which quality medical care may not be locally available. In a very small number of cases, military medical facilities in several locations around the world have performed abortions when paid for, not by appropriated funds, but by the patient.

Under the law, funds available to the Department of Defense may not be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term. The informal practice of performing so called "pre-paid" abortions in very limited circumstances outside the United States does not violate the legal prohibition. However, it might suggest insensitivity to the spirit of the Congressionally-enacted policy of withholding government involvement in the provision of abortions.

It therefore appears appropriate to establish formally a uniform Department of Defense policy in this regard. The policy is that the performance of pre-paid abortions in military treatment facilities is not authorized. To permit time for necessary instructions to be issued to facilities, this policy becomes effective October 1, 1988.

WILLIAM MAYER, M.D.

Mr. WIRTH. This was a change in longstanding policy. That longstanding had been, Mr. President, that a member of the military or a dependent could use a military facility for an abortion if that individual paid for it. That was changed on October 1, 1988. An individual in the military can no longer go into a military medical facility and, paying for it, have an abortion.

Why is this important? Let us look at the situation. Our service members are frequently serving our country in locations where safe health care is not available at local facilities. This is precisely why the United States has established medical facilities at bases around the world: To meet the needs of DOD personnel and dependents in these locations outside the United States. That is why we do not depend on local hospitals in the Philippines or in Panama or Korea or wherever it may be.

In many countries where U.S. military personnel are stationed, abortion is illegal or access to abortion is severely restricted. For example, in the Philippines where nearly 34,000 members of the U.S. military and their dependents are stationed, and in Panama where about 25,000 are stationed, abortions are simply illegal—except to protect the health of the mother. This is also the only situation in which abortions may be performed on base.

So a member of the U.S. military or a dependent would have to leave the country to have a legal abortion or else pursue illegal options. That is the other choice. Illegal options are increasingly dangerous and understood to be so, Mr. President.

In Latin America complications of illegal abortions are thought to be the main cause of death in women between the ages of 15 and 39. A small 16 percent of the illegal abortions performed in the Philippines are done by physicians; 84 percent are done by nonphysicians.

The alternatives that we have left to U.S. service people and their dependents is the option of seeking unsafe, illegal abortions in the country where they are stationed at risk to the woman's life or forcing her at enormous expense to travel to another country.

Why should this be important to us? Because we are unnecessarily endangering the lives of our service people and their dependents who chose to terminate a pregnancy. Unless the woman's life is in danger by carrying the fetus to term, we turn around and force her to pursue unsafe medical practices that put her life in danger.

Even in countries where abortion services are legal, many subject American women to substandard health care. In many countries when a woman cannot use an overseas U.S. military facility, she has to go out into the local medical community. There she may face the very real problem of a countrys' unanimity to test its blood

supply for the HIV virus. We may be exposing U.S. military people unnecessarily to the HIV virus.

In many of those countries as well, Mr. President, we know that they reuse disposable needles which are not intended for reutilization and which cannot be sterilized. Is this a price that we are asking those who are serving the Nation to pay simply because they are stationed overseas? That is fundamentally wrong, Mr. President.

Many U.S. military personnel and their dependents stationed overseas do not not have full command of the language of their host country. As with any medical procedure, the abortion decision requires a woman to communicate fully with her physician. But we send these women off base to discuss this medical decision in a different language than her own. That is wrong, Mr. President.

Is this an abstract or hypothetical issue? Not at all. This came to my attention, Mr. President, in a letter that I received from Charles Zwierzynski, a second-class petty officer in the United States Navy stationed in Japan. Let me share with my colleagues some of the comments that Petty Officer Zwierzynski wrote to me:

Recently, my 28-year-old Japanese wife, Kaoru, and I went through a very trying time when she was pregnant with our first child. * * *

At Kaoru's 18th week of pregnancy, an ultrasound at our local naval hospital was performed and found the baby may have a very serious amount of multiple birth defects. Initially, the naval officer who was our doctor felt the entire stomach, liver, and intestine areas were growing on the outside of the baby's body (the heart had then moved to where the stomach should be) along with a possibility of a spine defect due to the position of the neck and head. To be sure, the navy paid for a visit to a local Japanese doctor who is an expert in pre- and postnatal care to do another ultrasound. His opinion was the same (Kaoru was in the 19th week at this time). Both doctors recommended termination of the pregnancy—

The Navy doctor recommended termination of the pregnancy, Mr. President, and the local doctor recommended termination of the pregnancy—

as they both felt there was absolutely nothing they could do for the baby and that if it did survive the birth there would be no guarantees as to its continued survival or quality of life.

After considerable frustration and discussion and with no one who wanted to plant false hopes in our minds, we felt the best thing to do was terminate the pregnancy especially since time was very short as Kaoru was now between her 20th and 21st weeks. We felt we just didn't have enough time or information to make any other decision, but we also felt we did not want this baby to suffer.

In the military we have excellent health benefits and doctors. However, in making a decision like this, and once you make this decision, you are on your own. Military hospitals are not authorized to perform abortions or terminations of pregnancy unless the mother's health is in danger. Military insurance will not pay for it and the local Navy Relief Society will not provide a no-interest loan to be deducted from your paycheck due to their regulations in such cases. There is no support group and no program set-up to send you to an advanced birth defect facility such as at Yale or UCLA to see if any fetal operation can be done. Thus, since the cost of performing the termination was prohibitive by going to a stateside hospital, it was performed by the local Japanese doctor who my wife was comfortable with anyway. Her stay was four days, she went through a 10-hour induced labor, two Japanese women had babies born while she was in the four-table operating room, and the baby died during the 7th hour of the labor. I saw the baby and was saddened by the condition it was in (as the doctors said) but felt we did the best we could for what information we had. Since the military insurance did not cover the procedure and Navy Relief would not provide a loan we paid for the entire $2,400 bill ourselves. Luckily, we had the money—our entire savings account.

Since we had the money the military considers everything taken care of. But our questions are: what if we did not have the money? What if we were a younger military couple, both American, who just would not know what to do while serving overseas? Would the military be willing to pay the thousands and thousands of dollars just to keep this baby alive and then have it finally die after much suffering? If we did have the baby and I was separated from the service, the military would no longer pay for the baby's care and no insurance company would touch us, true?

I ask unanimous consent, Mr. President, that the full text of the Chief Petty Officer Zwierzynski's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FPO SEATTLE, WA, *November 7, 1989.*
National Abortion Rights Action League,
Washington, DC.

Attn: Kate Michelman, Executive Director

MS. MICHELMAN: I am a 31-year-old Second Class Petty Officer in the United States Navy stationed in Yokosuka, Japan on a three-year tour. Recently, my 28-year-old Japanese wife, Kaoru, and I went through a very trying time when she was pregnant with our first child. And because of this we wanted to write your organization and ask that you continue your work/lobbying for a "pro-choice" decision on abortion as we would like the situation that happened to us to never happen again to another service member and his wife serving overseas.

To understand our strong feeling towards "pro-choice" (our situation and that of rape and incest), here's the story of what happened to my wife just over two months ago: At Kaoru's 18th week of pregnancy, an ultrasound at our local naval hospital was performed and found the baby may have a very serious amount of multiple birth defects. Initially, the naval officer who was our doctor felt the entire stomach, liver, and intestine areas were growing on the outside of the baby's body (the heart had then moved to where the stomach should be) along with a possibility of a spine defect due to the position of the neck and head. To be sure, the Navy paid for a visit to a local Japanese doctor who is an expert in pre- and postnatal care to do another ultrasound. His opinion was the same (Kaoru was in the 19th week at this time). Both doctors recommended termination of the pregnancy as they both felt there was absolutely nothing they could do for the baby and that if it did survive the birth there would be no guarantees as to its continued survival or quality of life.

After considerable frustration and discussion and with no one who wanted to plant false hopes in our minds, we felt the best thing to do was terminate the pregnancy especially since time was very short as Kaoru was now between her 20th and 21st weeks. We felt we just didn't have enough time or information to make any other decision, but we also felt we did not want this baby to suffer.

In the military we have excellent health benefits and doctors. However, in making a decision like this, and once you make this decision, you are on your own. Military hospitals are not authorized to perform abortions or terminations of pregnancy unless the mother's health is in danger. Military insurance will not pay for it and the local Navy Relief Society will not provide a no-interest loan to be deducted from your paycheck due to their regulations in such cases. There is no support group and no program set-up to send you to an advanced birth defect facility such as at Yale or UCLA to see if any fetal operation can be done. Thus, since the cost of performing the termination was prohibitive by going to a stateside hospital, it was performed by the local Japanese doctor who my wife was comfortable with anyway. Her stay was four days, she went through a 10-hour induced labor, two Japanese women had babies born while she was in the four-table operating room, and the baby died during the 7th hour of the labor. I saw the baby and was saddened by the condition it was in (as the doctors said) but felt we did the best we could for what information we had. Since the military insurance did not cover the procedure and Navy Relief would not provide a loan we paid for the entire $2,400 bill ourselves. Luckily, we had the money—our entire savings account.

Since we had the money the military considers everything taken care of. But our questions are: what if we did not have the money? What if we were a younger military couple, both American, who just would not know what to do while serving overseas? Would the military be willing to pay the thousands and thousands of dollars just to keep this baby alive and then have it finally die after much suffering? If we did have the baby and I was separated from the service, the military would no longer pay for the baby's care and no insurance company would touch us, true? Why does Navy Relief provide a $1,500 loan to a young sailor off a ship to replace an engine in his Lincoln Continental (this actually happened over here just recently) but not our type of situation? And why not provide fetal operation assistance?

What my wife and I would like to do now is make sure no other military couple has to go through financially, emotionally, and uninformed as we were again. We are currently starting a support and volunteer group here for sailors' wives who are pregnant and to assist an over-burdened OB/GYN department that is experiencing financial cuts like anything else in the military. We felt there is a need for more informed decision and also a free choice.

My command here in Yokosuka, Japan has done everything possible to help us through this experience and my command-

ing officer even went so far as to try and get us some financial assistance. But, of course, he was stone-walled by regulations at every turn. Here was a group of sailors trying to help one of their shipmates and there was nothing they could do. We ask that your organization continue your work for prochoice and to please feel free to use our situation as an example. We would also appreciate it if your organization knows of any lobbyists or other individuals who can take a look at this type of situation happening to a service member and help us in our attempt to get this hard-line policy changed to at least a study of a case-by-case basis. It's not fair for this to happen to anyone.

Thank you for your time in reading this letter. Any questions, opinions, or ideas you may have would be greatly appreciated. We hope to hear from you soon.

Sincerely,

CHARLES ZWIERZYNSKI.

Mr. WIRTH. Mr. President, this is not a complex issue. It does not get into public financing for abortions, nor does it remotely address whether a woman should have a choice to have an abortion or not. Rather, this amendment simply allows our 1 million active duty personnel and dependents overseas to be privy to the same rights as those stationed in the United States and to be sure, while serving our Nation, they are able to obtain the level of medical care that they deserve and which is available to all other Americans.

I hope that my colleagues will vote with me for this amendment.

Mr. President, I yield the floor.

Mr. HUMPHREY addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I yield 10 minutes to my colleague from Indiana.

Mr. COATS. Mr. President, I thank the Senator for yielding.

The ACTING PRESIDENT pro tempore. The Senator from Indiana is recognized for 10 minutes.

Mr. COATS. Mr. President, it is surprisingly odd that in the middle of the debate on our defense priorities, we should be forced to take up the issue of abortion. But the Senator from Colorado has made that decision for us and, as a member of the Armed Services Committee, I believe that since this issue has been raised, it requires a response. I am disappointed that we have to deal with this issue on this bill, but, nevertheless, the issue is raised and we, therefore, must respond.

It is my conviction that this amendment is unnecessary and extreme. It violates the spirit of current law, it misdirects an important national security debate, and it hides unprecedented Federal actions behind a screen of misleading language.

First, as I indicated, this amendment is simply unnecessary. One would assume with a measure so controversial and far-reaching that some urgent needs had been established, that some great harms had been done, that a large number of serious wrongs had been committed. One would guess that a cry had been raised from within the military demanding action. But if one assumed or guessed any of these things, he or she would be wrong.

Since 1979, the Department of Defense has complied with Hyde-type restrictions on the use of public funds for abortion. In 1984, Senator Jepsen codified that prohibition into permanent law. Some prepaid abortions were allowed, but only if local facilities did not meet health standards. In 1985, just 19 prepaid abortions were performed overseas.

Finally, in 1988, in a measure urged by the Senator from New Hampshire [Mr. HUMPHREY] the current policy was put in place prohibiting prepaid abortions on military bases but continuing to perform abortions to save the life of the mother.

According to the Defense Department, there have been no problems whatever in implementing this current policy. To the best of their knowledge, no one has been denied access to any medical procedure or abortion. If safe available medical facilities for elective abortions are not available to military women, then these women are permitted to use military airlifts to places where these facilities are available.

Mr. President, I would like to read and submit for the RECORD a response that I have received from the Department of Defense relative to some questions I asked them about the nature of this problem. My letter states that, as I had discussed earlier with them, I would greatly appreciate their response to some questions which pertain to the Wirth amendment. I described the Wirth amendment to them, and these were their responses.

Question No. 1. Has the Department of Defense had any difficulty in implementing this policy? The answer is "no."

Question No. 2. Have any formal complaints, any formal complaints, been filed concerning this policy, to the best of your knowledge and information? The answer is a categorical "no."

Question No. 3. Have any legal challenges been instituted concerning this policy, to the best of your knowledge and information? The answer, a categorical "no."

Question No. 4. Have any members or their dependents been denied access to an abortion as a result of this policy? The answer again was "no."

Question No. 5. Have any members or their dependents been denied leave for the purpose of procuring an abortion off base? The answer, a categorical "no."

Question No. 6. Have any members or their dependents been denied access to military transport for the purpose of procuring an abortion? Again a categorical "no."

The Senator from Colorado argues that women in the military have been stripped of their rights, that they are second-class citizens, but not one voice has been raised from one woman in the military that her rights have been denied, not a single case has been filed in the courts challenging this policy as a violation of constitutional protections.

These procedures, as I have said, according to the Department of Defense, have caused no conflict or resentment. The bottom line is that the need for the legislation has not been proven.

The Senator from Colorado states that we have created two classes of citizens: Those not in the military have access to an abortion; those in the military have no access to abortion. This is simply wrong and untrue. Those in the military have the same access to abortion that those not in the military have. It is just that those abortions cannot be performed in military facilities.

If those people find themselves in situation as the Senator from Colorado described, they have access to safe and legal abortions as provided at the nearest nonmilitary facility that they might choose. If they are not happy with the procedures or the laws of the country in which they are stationed, the U.S. military will airlift them, give them leave to go wherever they want.

So if they are dependent whose residence is California or Colorado or Indiana, or any other State, the military will airlift them to whatever point they need to go to receive the abortion, if that is their choice.

Mr. President, the vague discontent on the part of legislators is a fragile foundation for a measure as controversial as this. We should not allow this defense bill to be used as a vehicle for making social policy, committing this Congress to radical, unrestricted abortion on demand. We cannot allow the careful deliberation of our defense priorities to be held hostage to endless and unrelated conflicts over the issue of abortion on demand in military hospitals.

Let me make a second point. This amendment uses taxpayers' funds to help provide abortion services, in spite of what has been said. According to this measure, people will pay for their own abortions, including indirect costs.

But to maintain that fiction is simply to misunderstand the nature of military medicine. Unlike other medical facilities, medical clinics and hospitals receive 100 percent of their funds from Federal taxpayers. Physicians in the military are Government employees, paid entirely by tax revenues. All of the operational and administrative expenses of military medicine are paid

by the taxpayers. All of the equipment used to perform abortions is purchased at taxpayer expense.

It is impossible to imagine that taxpayers' money can be preserved from entanglement with abortion in military medicine. The Department has told me personally that any attempt would be an accounting nightmare. In direct response, again, to my question to them as to whether they believe they could separate the cost and make sure that no Federal taxpayer funds were used in performing abortions, their answer is that given our current cost-accounting capabilities, this would be an extraordinarily difficult task.

We here in Congress have already accepted a strict wall of separation between public funds and abortion. The only way to protect the integrity of taxpayer funds, consistent with current law, is to keep the military out of the abortion business. We must not take money from citizens and then use it to vandalize their moral values. I think Congress has spoken very clearly on this point.

Third, this amendment, even in the mainstream of those who support abortion, is as radical an abortion measure as can be written or imagined. Under the Wirth amendment, abortions could be performed at any time, for any reason. They could be performed in the ninth month of pregnancy. Abortion could be performed to select the sex of a child. It could be performed to eliminate the handicapped. Abortions could be performed without parental consent, without spousal notification.

In the language of this measure, an unrestricted absolute right to abortion on demand is established. Even the most minimal, reasonable restrictions, even the most limited concern for the unborn child, is rejected out of hand. The assertion that we are simply putting people on an equal footing denies the numerous laws that exist in numerous States relative to the restriction of abortion, in a number of cases.

This amendment would allow unrestricted abortion at a military facility for whatever reason the mother chose. That does not create equality. That creates an inequality that does not now exist under current law.

The PRESIDING OFFICER (Mr. KERREY). The Senator's time has expired.

Mr. COATS. Mr. President, I ask the Senator from New Hampshire for 2 more minutes.

Mr. HUMPHREY. I yield 2 minutes further to the Senator.

Mr. COATS. I thank the Senator.

Fourth, this amendment does not contain a definition of "reproductive health services." And that poses a problem. Currently, certain health services, such as sex change operations, are not allowed in military facilities. This amendment appears to establish a military right to those operations, surely a milestone in the long history of military medicine. And without a better definition in this amendment of what "reproductive health services" does and does not include, it opens up a number of problems which I do not believe this body wants to address.

When all of these objections are totaled and considered, when each extreme provision is examined, it is clear the amendment is unneeded. It amounts to an unrestricted entitlement to abortion on demand for over 1 million military personnel and their dependents stationed overseas. Through arbitrary power, it forces on many taxpayers a violation of their deepest convictions. It departs from every precedent and places this Congress firmly on the radical fringe of a bitter, controversial debate.

We cannot allow this vital discussion on American security to be turned into a contest of ideology. We cannot create issues where needs do not exist.

I strongly urge my colleagues to oppose this unnecessary and very extreme amendment, and to vote no on cloture, which will be forthcoming.

Mr. President, I thank the Senator from New Hampshire for yielding the time, and I yield back whatever remaining time I have.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, will the Senator from Colorado yield 5 minutes to me?

Mr. WIRTH. Yes. I am pleased to yield to the Senator from Oregon.

Mr. PACKWOOD. Mr. President, I thank the Chair. I thank my colleague, the Senator from Colorado.

Our good friend from Indiana made reference to this radical change. Let us put things in perspective. In 1988 military hospitals did perform abortions and then, by an administrative policy change, not congressional change, it was changed. The radical change was done in 1988 when the policy that had been followed for years and years in the hospitals was suddenly turned upside down.

All we are trying to do is go back to what the policy was 2 years ago. It is hardly a radical change.

Second, our distinguished colleague from Indiana said you can be airlifted to wherever you want to go. If you are stationed in Japan, in Iceland, you can be airlifted to wherever you want to go if you cannot adequately get an abortion where you are. That is easier said than done. That is on a space-available basis. All are aware of the military overseas and their dependents. There are more people who would like to fly on the space-available basis than there is space available. We do not have military transport planes going back and forth for the sole purpose of ferrying people on a space-available basis back and forth.

Last, it does not include your spouse. Now, there is a humane policy on a decision that a woman has to make, probably the most important decision in her life, as to whether or not to terminate a pregnancy. She cannot get it done at the military hospital because they will not do it at all even though you are willing to pay for it. You mistrust the local medical system or perhaps the laws are such you cannot get an abortion locally.

But in the spirit of humaneness, our military will fly you; that is, the woman, on a space-available basis to some place that will do it, and you are going without your spouse. You are going to be alone without your spouse when this abortion is done, when it could be done in the military hospital when you are willing to pay for it. What kind of sense does that make?

As to this argument that the military hospitals are 100 percent paid for by the Federal Government and therefore the Federal Government is paying for the abortion, let us be serious. You have the hospital, you have the doctors, the nurses, and not another doctor is hired because you want to have an abortion, not another nurse is hired, not another bed is added to the hospital. If the argument is going to be made that because some minuscule amount of Federal money might be used because the pencil you use to make out the form is paid for by the Government and therefore that is the Government paying for abortions, then we have reached a folly. No wonder we do not understand our budget system, if that is the idea of Government paying for abortion.

Mr. President, this is simply a request for the Government to allow equal access for military personnel overseas that they would have in this country without difficulty. Why place an unfair burden on a small, but very important, part of our military personnel that does not need to be placed in that position?

As to whether this is an appropriate or inappropriate bill on which to discuss this topic, Mr. President, I have been here 22 years, and in past Department of Defense authorization debates we have talked about military housing, we have talked about military medical services, we have had amendments on these bills passed and been accepted by conference unrelated to the military. This is military. This is military medicine. This is what our military hospital is going to be used for. We have discussed those topics all the time in the past on this bill.

So I hope even Senators who do not want to fund abortions could see their way clear to say this is not funding in any normal sense of the word. This is not an issue as if we were voting in the

Senate on a constitutional amendment to overturn Roe versus Wade or one of those court stripping statutes that says the Supreme Court may not consider abortion cases. This is not that.

This is simple justice, decency, equality, an humaneness, so a woman in the military, if she chooses, can get an abortion, with her spouse with her, instead of hoping she can hop on some bucket seat transport plane leaving from Reykjavik flying to Newfoundland, finally getting to the United States, landing close to where she can have an abortion in a State perhaps she is not from with people she does not know.

All this is humaneness and equality in this amendment, and I very much hope that the Senate, regardless of their views on the subject of abortion, will support the amendment of the Senator from Colorado.

I thank the Chair.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I yield myself such time as I may need.

First, I want to thank the Senator from Indiana for his important contribution to the debate. I think his citing of the letter from the Department of Defense was particularly elucidating in making apparent the lack of the case on the part of the proponents of this amendment.

Mr. President, what we are debating here once again is the Hyde amendment. That is the fundamental matter that is at issue here. The Senator from Colorado is seeking to unsettle long settled policy with respect to Government involvement, Government facilitation of abortions. That is the key issue—Government involvement in abortions. It has been settled for a long time. The Senator from Colorado seeks now to unsettle it.

Since 1988, DOD hospitals have performed abortions only where necessary to save the life of the mother. The Wirth amendment would reverse that policy. Under the Wirth amendment abortions could be performed in DOD hospitals abroad for any reason, not just the life of the mother, but for any reason during all 9 months of pregnancy. What the Senator from Colorado is calling for is abortion on demand in DOD hospitals abroad during any time during the 9 months of pregnancy as long as DOD is reimbursed for the costs.

In seeking adoption of his amendment, the Senator from Colorado, it seems to me, asks Senators to accept three premises, each of which is false. The first premise is that members of the Armed Forces posted overseas and likewise dependents accompanying members posted overseas have no suitable recourse when DOD hospitals refuse to provide abortion.

This is simply not so. In many places, not all, where U.S. Forces are posted, medical facilities that are up to Western standards are nearby. What about those places where such facilities are not available? Mr. President, I point out that members of the Armed Forces have generous leave benefits. Every member is entitled to 30 days leave per year. A member of the Armed Forces intent upon securing an abortion in a place some distance removed from where the member is posted is perfectly free to take that leave and to travel to that place whether near or far.

Indeed, Defense Department policy encourages members to take leave for reasons of health and morale. For example, Air Force regulation 35-9, section A, paragraph 1(3)(c) makes it clear that leave is to be granted under a variety of circumstances, including, to quote from the regulation, "* * * where there is evidence of possible adverse impact on the member's health or morale."

What if a member's hospital leave has been used up? Again, Defense Department leave policy is very liberal. For example, Air Force regulation 35-9 again says the following: "Members with no accrued leave or limited accrued leave may be granted advanced leave to resolve extremely urgent personal or emergency situations." That is precisely what we are talking about here.

Clearly, members of the Armed Forces posted abroad are perfectly free to take leave to journey to any place near or far to secure whatever medical care they deem appropriate. And, thus, the premise that members of the armed services overseas have no suitable recourse when DOD hospitals refuse to perform abortion on demand is simply false.

The second premise is that the Government has an obligation to make abortion conveniently available. Some would observe correctly that taking leave and traveling is inconvenient. But there is no obligation on the part of the Government to make abortion convenient to those who desire it any more than there is an obligation on the part of the Government to pay for the abortions of those who desire it.

That is why I say we are talking here essentially about the Hyde amendment, which has long since been settled and which the Senator now seeks to unsettle.

Likewise dependents are free to travel and seek appropriate medical care. And members of the Armed Forces who might wish to accompany dependents are free to take leave for that purpose. That issue was raised a moment ago.

Again, that is inconvenient, but the premise that the Government has an obligation to make abortion convenient, the performance of abortion, is false.

The third premise is that providing abortions, as long as the cost is reimbursed, is somehow consistent with the longstanding refusal of Congress to use Federal funds to pay for abortion. That premise is false, too. Why has Congress consistently refused to provide Federal funds for abortion? Is it because we deem the dollar impact, the fiscal impact, too great?

Of course not. That is not the point at all. It is not the dollar cost that resolves the Congress not to pay. It is the involvement of Government in abortion, the involvement of Government in a matter over which society is very deeply divided, that moves Congress to adopt the Hyde language. It is not a matter of dollars; it is a matter of the Federal Government facilitating a procedure that many Americans find repugnant. That is why Congress—not because of fiscal impact—refuses to fund abortions.

The key word is "involvement." If Senators are opposed to Federal involvement in providing abortions, Senators should preserve existing DOD policy of providing abortion only where the life of a mother is in danger. If Senators are opposed to the Federal Government facilitating abortion, they should preserve DOD policy, where abortion is provided only where the mother's life is endangered. It is not the dollars; it is the involvement.

The reimbursement feature of this amendment negates the dollar cost to the Government, but it ignores the basic fundamental reason that Congress refuses to fund abortion in the first place: The importance of avoiding Government involvement in the provision of abortion. Cost is not the issue. Involvement is the issue.

The Wirth amendment would involve the Government in the provision of abortion on demand for any reason, any time during the 9 months of pregnancy.

I think Senators can see the distinction, and it is an important distinction. So the third premise that reimbursement of the Government makes the performing of abortion value neutral is patently and obviously false.

I point out, Mr. President, that the memorandum which outlined current DOD policy, dated June 21, 1988, and signed by the Assistant Secretary of Defense for Health makes precisely this point. Referring to the earlier practice of providing prepaid abortion on demand, the memorandum states that such a practice:

> * * * might suggest insensitivity to the spirit of the congressionally-enacted policy of withholding Government involvement in the provision of abortions.

There is that key word, Mr. President, "involvement." It is wrong for

the Government to fund abortion; it is wrong for the Government to provide abortion; it is wrong for the Government to facilitate abortion, because it is wrong for the Government to be involved, as the Congress has repeatedly found, in a matter that deeply divides the country.

We have repeatedly attached Hyde amendment language to legislation over the last 15 years. Since 1979, the law with respect to the Department of Defense has been clear: "Funds available to the Department of Defense may not be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term." That is the law and has been so since 1979.

The spirit of that law was violated up through 1988, until the regulations were changed to conform with the spirit of the law. We should leave it just that way. The policy is now settled. It is wise policy, and we should not unsettle it.

Where did this proposal come from? Did it come from the Secretary of Defense? No. Did it come from the Assistant Secretary of Defense for Health? No. Did it come from the White House? No. Indeed, in my talks with high level officials at the Department of Defense over the last week or 10 days, everyone is opposed to changing this policy. Not only they did not ask for a change, but opposed a change in policy. You would think there was a significant problem and, of course, the Senator cited a hard case—and we all know the maxim about setting policy on the basis of a few hard cases—but if there were a significant number of such cases, are we to believe the Secretary of Defense and the Assistant Secretary of Defense for Health would be so callous as to ignore the problem? Of course not. They have not asked for a change. Indeed, they oppose such a change.

The Wirth amendment proposes to turn back the clock, Mr. President, and this is a very, very, very, very serious matter; it is serious because Americans are firmly convinced—many of them, including this one—as a matter of self-evident biology that the offspring of human beings are human beings, and therefore every abortion kills a human being.

It is serious because many Americans, including this one, as a matter of science—not religion—science, recognize that if you were conceived of human parents, you are a human being and that, therefore, every abortion kills a human being.

That is why there is such great moral revulsion against abortion. In recognizing this division in our society and these strongly held views on both sides, Congress has wisely refused to involve—there is the word, not "pay," it is not fiscal cost; it is "involvement"—the Government in abortion.

The Wirth amendment proposes once again to involve the Government. This is a very serious matter, so serious, as the Republican leader will attest, when he arrives momentarily, that the White House is indicating that this entire bill will be vetoed, if the Wirth amendment is adopted.

Adoption, may I point out also, is likely to provoke a series of additional amendments. Adoption of the Wirth amendment is likely to provoke a series of additional amendments, some of them dealing with abortion. So if the Senate is in a mood to deal with an abortion amendment this morning, no doubt the Senate will welcome further abortion amendments as the day goes on. I can think of several we ought to offer in connection with the Wirth amendment, if adopted.

Maybe we ought to qualify the policy the Senator from Colorado seeks to enact.

Should sex-selection abortions be performed in DOD hospitals? That is one we ought to clarify.

Should abortions after viability be adopted? There is another good amendment. Should abortions be performed after viability? There is another good amendment that demands to be offered, if we adopt the Wirth amendment.

We will need amendments to clarify the Wirth amendment, if it is adopted. Those amendments will be controversial and could be debated at considerable length on both sides of the question, may I say, by those possessed of both points of view.

Evidently, may I observe that, according to the language of the Wirth amendment, the Senator from Colorado wants to involve DOD hospitals abroad in the performance of abortion for any reason during all 9 months of pregnancy. That is the U.S. law under Rowe versus Wade.

Is that what we want DOD hospitals involved in, abortion because the mother is unwed, abortion because the timing of the pregnancy is inconvenient? Do we want DOD physicians counseling patients on whether to have an abortion in the case of a fetus that is to some degree less than perfect?

Then there are the logistics, training doctors and nurses in order to provide for the vastly increased numbers of abortions that would be demanded and what to do about fetuses that survive abortions in DOD hospitals. The complications that flow from the Wirth amendment are staggering.

The Senate should reject this amendment. It should reject this amendment by refusing to invoke cloture, because under the unanimous-consent agreement that obtains here if cloture fails the Senator from Colorado will withdraw his amendment and, therefore Senators, who oppose WIRTH, Senators who support the existing Hyde amendment law and its spirit should vote against cloture.

The Senate should reject the Wirth amendment because its premises are false; the premises are false.

The first premise that members of the armed services posted abroad and desiring abortion have no recourse when DOD hospitals refuse to perform them is false. Local care is often up to medical standards and where it is not members have liberal leave policies which they may use to travel for any purpose including to seek an abortion.

The second premise is that the Government has an obligation to make the procurement of abortion convenient. This has no more validity than the charge that the Government has an obligation to pay for the abortions.

The third premise is that the mechanism of prepayment or reimbursement somehow renders the involvement of DOD hospitals in abortion value-neutral. It is not, as I pointed out, the fiscal cost of abortions that Congress is concerned with when we annually attach Hyde language to the various bills. Rather it is the involvement of the Government in providing abortion, in facilitating abortion, that we wisely seek to avoid. The Wirth amendment promises to involve DOD hospitals during abortion on demand for any reason during all 9 months of pregnancy.

Mr. President, we should strive to avoid involving the Government in the provision of abortions. We should do so on this bill by voting against cloture, at which point the amendment will be withdrawn. DOD provides abortion when the life of the mother is in danger. That is sound policy; it is consistent with Hyde language that the Congress has embraced over the years. That policy ought not to be changed. The Wirth amendment ought to be rejected and Senators desiring to do so should vote against cloture.

Mr. President, I believe my colleague from Colorado desires the floor. I am happy to yield.

Mr. ARMSTRONG. I do think others are seeking recognition. I am happy to wait.

Mr. WIRTH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WIRTH. Could you explain to the Senate the procedures and the agreement as to a vote on the cloture vote?

The PRESIDING OFFICER. When time has expired on the amendment, we will proceed to a cloture vote. There are 41 minutes and 45 seconds remaining.

Mr. WIRTH. To make sure all Senators understand, the Senator from New Hampshire referred to a cloture vote. We agreed to an hour and a half

debate; at the end of an hour and a half debate there would be a vote on cloture, and that is under the previous agreement, and that will occur at 10:30.

The PRESIDING OFFICER. The Senator is correct.

Mr. WIRTH. Those voting for cloture are voting to stop the potential filibuster against the bill, voting for cloture will be voting for the Wirth-Glenn-Packwood amendment. Those voting against cloture are voting to continue effectively to continue the filibuster and voting against the Wirth-Glenn-Packwood amendment.

Mr. President, I yield to the Senator from Ohio, the distinguished chairman of the subcommittee on the Armed Services Committee, the cosponsor of this amendment, Senator GLENN, such time as he may consume.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I thank the distinguished Senator from Colorado. Before he leaves the floor, I want to particularly thank him for bringing this amendment up. It takes a lot of guts to raise this issue.

These are not easy matters to discuss. They inflame passions, people get revved-up, as is evident on the floor here this morning.

Some of us on the Armed Services Committee, including the Senator from Colorado and I feel we are in many respects the ombudsmen for our military people, all over the world. They are not all serving in this country. Personnel stationed in the U.S. can go out off the base and they can obtain reproductive health services, and that is all legal.

But what if you are stationed overseas and you are often not in an area where that kind of facility is available.

We do not want to make this into a debate over the statement made a moment ago that every abortion kills a human being. That is the heart of the argument, is when the fetus becomes a viable human being.

Now we have two camps on this argument. One is prochoice where the woman should decide; and the other is the pro no-choice people, who impose their minority opinion on all the rest.

I know how heartfelt these feelings are. I know that people believe in their opinions to the very core of their being. What they say, they say from the heart.

But are we dealing fairly with our people in the military that we put out in foreign lands where they do not have the facilities available to do what they would be able to do lawfully, legally, and of their own free choice in the United States of America? We are the ones who send them out there. And they go and they serve and they serve willingly. It is a volunteer force, and they are out there sometimes under arduous conditions.

I just feel I have an ombudsman obligation to ensure that each individual in the military who serves our country overseas has access to the same family health care that could be received here in the United States. To deny any service members and their families this protection seems to me truly discriminatory and unfair.

I know those on the other side would ban abortions in any case, and that is their right to advocate that view. But the current laws of the United States permit a different situation. Yet we put military people out there and then at the same time say that the only way they can take advantage of what they can do in the States would be to go into places where it might be unsanitary, where there are better chances of needles being reused, and AIDS, and a whole host of things.

I have been stationed abroad. My wife was not with me during most of the tours. Marines did not have many accompanied tours then, not in those places. I remember some of the places my wife would have had to have been dependent on going if it were her decision to terminate a pregnancy, whatever she decided to do. I emphasize to everyone that this amendment grants access only. It does not dictate in any way how any individual may in her own conscience decide to act.

The Assistant Secretary of Defense for Health Affairs put out his letter in June of 1988 prohibiting U.S. military health care facilities overseas from providing the full range of reproductive health services after September 30, 1988, a situation that had prevailed since 1982, legally. The Secretary decided to reverse that decision in 1988. He was not reacting to any statutory direction. There was not any new law passed. There was not anything that said he had to do it or not do it. Rather he was reflecting a judgment of the administration at that time that to allow military members and their families overseas to continue to receive prepaid, reproductive health services in U.S. facilities, and I quote here "might suggest insensitivity to the spirit of the congressionally enacted policy of withholding Government involvement in the provision of abortions."

He suggested it was insensitivity. Well, you know, I am concerned about the insensitivity about how our people feel when they are overseas and cannot get the same adequate health facilities that they can in this country off-base. You do not have that option out there.

It is insensitivity, I think gross insensitivity, to not be able to use a local service in a U.S. military facility and reimburse the Government for that. So I suggest that, far from curing a problem, the Secretary in that letter did exactly the opposite by demonstrating gross insensitivity when it comes to the needs of our military personnel and their families.

Senator Wirth eloquently expressed the fact that many of our military personnel overseas are indeed stationed in areas where safe health care is not available in local facilities, or if it is available, it may be extremely expensive compared to services that were provided in U.S. military facilities on a prepaid basis prior to October 1988.

All this amendment does is restore that right of access to these services on a prepaid basis.

It corrects the second-class citizenship status of our people serving in these countries overseas.

Mr. President, I have here a list of different countries around the world, as to the differences in what they permit in those countries. Some countries are very tight in their restrictions; some countries are very loose. In some, it can only be for rape and incest; some can be of the women's choice; some can be if there are genetic deficiencies. There are a whole host of things that are quite different from anything we have in this country.

All we are saying is that if Americans are over there, that base there does, in fact, become a little bit of America for them and that those people should be able to have access to the same kind of medical facilities they have in this country.

Now it has been mentioned they can always take leave; and they can. They can apply for emergency and morale leave, EML, as it is called. They can go space available. But they may or may not get on the airplane. So how about those people that cannot get on space available in the time required or when they have appointments set up at the other end of the line?

So I just do not see that this treats our people fairly at all. It is not an argument to be pro abortion. It is an effort to make certain that our people overseas are treated fairly. I think that that is all this amendment tries to do.

Is there a huge number of people involved with this? No, there is not. And that statement made a few moments ago here is absolutely correct.

In one report I read this morning, I think the service averaged about 50 a year, between 1982 and 1988, who paid for their abortions at military hospitals overseas. I also understand that the last year it was available in 1988 it was only 15. So it is not a huge number of people we are talking about. But we do want to see that every single person in the military is treated fairly. And that is what this amendment by the distinguished Senator from Colorado does.

So I urge support for this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. HUMPHREY. I yield 5 minutes to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I am grateful to my friend from New Hampshire for yielding me a few minutes to speak on this matter. I am especially grateful to him for his leadership on this issue. Over and over in this Chamber, the senior Senator from New Hampshire has demonstrated his concern for the cause of those who are unable to speak for themselves, who are helpless, who are dependent, who are the innocent victims of abortions which have occurred in scores of millions of cases in this country in recent years, and I thank him for it.

Mr. President, the amendment presented by my colleague from Colorado, Mr. WIRTH, brings into focus not only some very deeply held differences of opinion about medical science and politics and freedom of choice and a lot of other things. It seems to me, it brings into perspective the very essence of why governments are instituted among men. Very, very close to the heart of the reason why governments are instituted is the protection of those who are defenseless, the helpless, the weak of our society.

It was not very long ago that we passed a bill in this Chamber for protecting those who had disabilities and yet this morning we have heard a presentation on behalf of the right to abortion because a child who might otherwise be born would be disabled. I hope my colleagues and friends will reflect upon the logic of that.

By an overwhelming margin, and properly so, we are on record as favoring protections for those who are disabled. And yet today we are considering whether or not to deny the most basic of rights, the right to life, to those who might be disabled.

I believe those are the facts that were outlined by my colleague, Mr. WIRTH. I regret I was not on the floor to listen to his presentation. But as it was presented to me, the specific case which suggested to him the need for this amendment was in fact a case involving a child whom the doctors predicted would be born with a disability.

Mr. President, I think a lot of Senators dread any debate on abortion. For years, whenever the subject of abortion came up, I cringed. Whenever somebody suggested, let us have a discussion on abortion, I thought, no, let us not have a discussion on it.

But I have changed my mind, Mr. President, I reached a point where I am glad to discuss this matter on any occasion, in any setting, in any forum. The more often we discuss it, the better I like it. Personally, I would be pleased if the Senate would discuss the matter every morning, 5 days a week, say, at noon or 1 o'clock, from now until this issue is finally settled, and I will tell you why.

Because there remains in this country a huge number of people, I judge maybe 80, perhaps 90 percent of the people in this country, whose opinion remains yet unformed. There is a very small group that is adamantly opposed to abortion under almost any circumstances for reasons which are well-known, and I happen to be one of that group. There is another group which is in favor of abortion under practically any circumstances and almost without exception.

But in the middle, there are a lot of people who do not know much about abortion, who have never sought to become knowledgeable about it, who in fact have an instinctive aversion to the idea of abortion and yet also have a very natural aversion to the government interfering in any so private a matter.

Well, then why do I think it is important that we discuss this early and often and repeatedly? Why do I welcome it? I can tell you very simply. It is because I have never, in my own personal experience, encountered anyone who became more permissive about abortion as they learned more about what abortion is and its moral consequences.

Now there is one caveat to what I have just said. I do know a handful of political people, people in public office or candidates for public office, who have become more pro choice or, more accurately I think, pro abortion. With the exception of a handful of political people, I have never met, never encountered even one individual who has studied the matter, studied the science of it, that thought it through, talked to people who had abortions or performed abortions, who looked at the kind of photographs which are contained in the Life magazine issue which I have caused to be distributed and placed on every Senator's desk, that became more permissive. The facts are so strong about the humanity of the unborn child, that what we are talking about is in fact an innocent life, that as people know more about it they become less and less willing to countenance the idea of abortion.

Mr. President, on previous occasions, I have shared with my colleagues a fairly extensive body of scientific information, including particularly the writings of Dr. Koop, the former Surgeon General.

The PRESIDING OFFICER. The time allocated to the Senator from Colorado has expired.

Mr. ARMSTRONG. Mr. President, I note that my time has expired. I wonder if my colleague will yield me 1 more minute.

Mr. HUMPHREY. I would be glad to do so.

First, I ask how much time remains?

The PRESIDING OFFICER. The Senator has 10 minutes 44 seconds.

Mr. HUMPHREY. I yield a minute to my colleague.

Mr. ARMSTRONG. I thank my friend from New Hampshire.

Today, because the scheduled time for this debate is so short, it is not my intention to rehash those arguments, although on another occasion I shall welcome the opportunity to do so. The science is very, very strong in support of the reality that what we are talking about are human lives.

But since that is not possible this morning, I do invite my colleagues to take a look at this Life magazine article and the pictures of how life begins and the progressive growth of the unborn child. In fact, in the middle of the magazine is a picture of a child just about the age of that which first came to the attention of the Senate this morning as the excuse for an abortion, as an excuse for this amendment.

Mr. President, I earnestly hope this amendment will be defeated, that cloture will not be granted. If it is not, obviously then we shall need to ask the Senate to consider other related issues—when such an abortion is appropriate, is it appropriate before and after viability or only before, and all of these other related issues. I do not think this is perhaps the best moment for us to do so, but for my part, I shall not be unwilling to continue debate if cloture is not granted.

Mr. WIRTH. Mr. President, I yield 5 minutes to the distinguished Senator from Washington.

The PRESIDING OFFICER (Mr. LIEBERMAN). The Senator from Washington [Mr. ADAMS] is recognized.

Mr. ADAMS. Mr. President I rise in support of the amendment before us offered by Senator WIRTH. We are not, let me repeat—not—talking about the use of Federal funds for abortions. What we are talking about is quality health care for our military personnel.

Current DOD policy needlessly and unjustly sacrifices the health care of our military personnel. The Wirth amendment would correct this injustice. Under the Wirth amendment, U.S. military personnel stationed overseas may use U.S. military medical facilities for the full range of reproductive health services. Yes, included in these services is the service of abortion. But, no Federal money would be used for these abortions and the service would only be provided on a prepaid basis.

Our overseas military personnel make many sacrifices. Serving overseas means that these individuals are separated from family and friends and have given up a home and a community where they are established. When entering the military, one expects these types of sacrifices. Substandard health care, however, is not part of the bargain and our overseas military

personnel should not be forced, as they are now, to accept this as part of the deal.

Let's consider the situation facing women in the military should they choose to have an abortion. In countries where abortion is legal, health care services are often grossly substandard. Many countries, for example, cannot afford to test their blood supply for the HIV virus. Many countries are also known to reuse disposable needles which are not intended for reutilization and which cannot be sterilized.

The reality gets worse for women in the military who are stationed in countries where abortion is illegal. According to the World Health Organization, 200,000 women's lives are lost annually to illegal abortions, with more than half of them occurring in Southeast Asia, sub-Saharan Africa, Latin America, and the Caribbean. The United States has over 225,000 military personnel stationed in these areas. Current DOD policy is promoting the very real possibility that these people may become part of these statistics.

I implore my colleagues to support the Wirth amendment. Our U.S. military personnel deserve to be assured that quality health will be available to them under all circumstances regardless of where they are stationed, regardless of what their duties may be.

Mr. President, with the changes occurring in the world, more and more of our personnel will be subjected to these dangers. So I hope the Wirth amendment is adopted. I fully support it and I hope the Senate will go on record overwhelmingly, agreeing to it today.

I yield any remaining time back to the manager of the bill.

Mr. HUMPHREY. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator has 10 minutes and 10 seconds.

Mr. HUMPHREY. And the other side?

The PRESIDING OFFICER. Ten minutes, 1 second.

Mr. HUMPHREY. Mr. President, how much time does the Senator from Indiana wish? I yield the Senator 2 minutes.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. COATS. Mr. President, I would like to make two points. The question has come up relative to the availability of military transport if a woman determines that a safe abortion cannot be obtained in the place of station somewhere in the world.

Obviously, we have concerns about our military personnel being stationed in places where medical care is not adequate for their purposes. I want to repeat that in response to my direct question yesterday, the Department of Defense has replied categorically that no woman, no dependent stationed anywhere in the world, has ever been denied leave for the purpose of obtaining an abortion, or space on a military airlift to a place of her choosing for an abortion. So that argument simply should not be used as a basis for Senators deciding to support the amendment that is before us.

Second, those of us who support the pro life position do understand and have compassion for those cases which place mothers in a very difficult situation. That is a difficult question that, as the Senator from Colorado said, has to be debated and argued; it should be debated at length on this floor.

But let us understand the Wirth amendment also presents some difficult situations in cases on the other side of the coin. By allowing unrestricted abortion at any time in the pregnancy, it raises some very extreme questions. It raises the issue whether or not this body wants to establish a policy that would allow a military dependent to use taxpayer-financed facilities to perform abortions beyond the age of viability; to perform abortions in the ninth month; to perform abortions for sexual choice, because the mother does not like the sex of the child; for any reason whatsoever. I suggest that is an extreme response to a problem that is basically not properly before us this morning.

The PRESIDING OFFICER. Who yields time? The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I yield myself such time as I require.

I thank the Senator from Indiana for pointing out once again that no member of the armed services and no dependent of a member of the armed services seeking leave in order to secure an abortion has ever been denied such leave, and that no member of the Armed Forces or dependent of a member of the Armed Forces seeking to travel aboard military aircraft for the purpose of securing an abortion elsewhere has ever been denied.

It is important to say that. Because no case has been made here today by the proponents of this amendment for a change in policy.

It is true, of course, the Senator from Colorado [Mr. WIRTH] cited one hard case. But, Mr. President, we cannot make policy, as every Senator appreciates, on the basis of a few hard cases. No case has been made.

The Department of Defense does not want to change policy; opposes the Wirth amendment. The Secretary opposes it, the Assistant Secretary for Health, who is charged above all others with the health and well-being of the members of our Armed Forces and their dependents, does not want a change in policy. Why? Is it because they are by nature intransigent, or is it because they see no need, they see no cause? Well, obviously it is the latter, because no case has been made on this floor.

I thank my colleague the Republican Senator from Colorado for his contribution to the debate; wise, as always, temperate and insightful. I likewise thank him for his willingness to offer with me further amendments to clarify the intent of this body should the Wirth amendment be adopted.

Mr. President, I will reserve the remainder of my time. I know the Republican leader wants to speak on this matter briefly. I will reserve some time.

The PRESIDING OFFICER. Who yields time? The Senator from Colorado [Mr. WIRTH].

Mr. WIRTH. Mr. President, I yield myself such time as I many consume.

Mr. President, the arguments from those who oppose the amendment have some interesting inconsistencies. The argument has been made that somehow the military—although they did it for 9 years prior to 1988—cannot account for how much an abortion costs.

I would be embarrassed if I were the Secretary of Defense to know his Department is making that argument. No wonder they have accounting problems and procurement scandals, if they cannot add up simple costs.

The argument is made that somehow we allow people to be transported on military planes to go someplace else to have an abortion. Yet they say we cannot have any public financing for abortion.

Mr. President, what is transporting somebody to have an abortion? Is that transport not occurring on military aircraft paid for by the taxpayers? Of course it is, Mr. President.

The inconsistencies continue. The argument is made that nobody has ever been denied leave to go have an abortion. I never argued that anybody had been denied leave to have an abortion. The argument is made that there have been no complaints on this issue. Well, I read a very eloquent and very moving letter. To suggest that there are no complaints is absolutely untrue. The record is replete. I have made that case over and over again.

The argument is made that there have been no legal challenges. Why in the world should there have to be legal challenges from people whose career is in the military or whose dependents are worried about endangering the career of their spouse who is in the military? It does not make any sense whatsoever.

On the issue of airlift and airlift availability, the Senator from Oregon was absolutely eloquent. At a time of crisis in an individual's life, she is put in a bucket seat from Reykjavik to

Newfoundland, and maybe she ends up in the United States someplace where she can have an abortion, but probably an unfamiliar place, indeed.

On vandalizing their moral values: My values are vandalized at the idea that somehow the people in the military are treated as second-class citizens. These are people who make a major commitment to our country, their career, and their lives. My values are vandalized at the idea that they are treated as second-class citizens.

The argument is made that somehow this is out of the mainstream of American institutions. I read a long and very distinguished list of individuals and organizations supporting this amendment. I would hardly suggest that the American Association of University Women or the League of Women Voters are out of the mainstream of American values.

The argument is made that sex-change operations might be allowed, an argument that not only confuses the issue but I think now trivializes the issue. Mr. President, this suggestion is an insult to women who must make one of the most intense, difficult decisions of their lives.

My distinguished colleague from the State of Colorado has given us all a copy of Life magazine, and he says we ought to understand and think about the matter of when life begins. This amendment does not have anything to do with when life begins. It does not have anything to do with that whatsoever. It is simply a matter of access—access to quality medical care for people in the military and their dependents. This is not a matter of permissiveness or nonpermissiveness. It is simple a matter of access to quality care for people in the military.

I would hope, as we look at publications, that my colleagues might have a chance to look at the July 1990 World Watch paper, "The Global Politics of Abortion." It is an absolutely wonderful piece on what is going on around the world—the increasing concern about women's rights, the increasing empowerment of women, the increasing understanding of the brutality of governments create in making the kinds of decisions that are being made, and where they are.

Finally, the distinguished Senator from Colorado argues that somehow this is an issue of pro or con disability and disabled individuals. Let me again read the exact text of the letter we received.

This is what Chief Petty Officer Zwierzynski, said:

* * * the naval officer who was our doctor felt the entire stomach, liver, and intestine areas were growing on the outside of the baby's body (the heart had then moved to where the stomach should be) along with a possibility of a spine defect due to the position of the neck and head. * * *

The opinion of another physician was the same. "Both doctors recommended termination of the pregnancy," as they both felt there was absolutely nothing they could do for the baby.

That is not an issue of being pro or con disability. That is an issue of having respect for the man's wife and an individual's right to determine what is going to happen to her body, particularly in the situation where obviously both doctors are saying there is nothing they could do for that child.

Finally, the Senator from New Hampshire bases his argument on the Hyde amendment, that somehow this is a revisitation or a violation of the Hyde amendment.

Let me remind my colleagues that the prohibition for using DOD funds to pay for abortions was passed in 1979 with language similar to the Hyde amendment. If this were a Hyde amendment issue, the Department of Defense would have issued the regulation to end prepaid abortions in 1977, but it did not. If this were a Hyde amendment issue, this regulation would have been issued when the law was passed. It was not issued then. Nor was it issued, Mr. President, when similar Hyde language was attached to the DOD authorization in 1985.

If this had been, as has been argued, a Hyde amendment issue, then presumably the Hyde amendment would have applied at the time of its passage on the DOD appropriations bills, or at the time it was tied to the DOD authorization bill. This was not done until the Reagan administration in 1988. The simple matter of its timing belies this as a Hyde amendment issue; it is not that.

Finally, I was astonished this morning to hear the distinguished Senator from New Hampshire say that the White House had said that this entire bill will be vetoed if this amendment is agreed to. The entire bill will be vetoed if this amendment is agreed to. Is the position of the White House that this White House is going to provide such distinctive, different treatment for people in the armed services? Is the White House honestly saying that they are going to veto this bill if we in the U.S. Congress decide that we are going to treat people in the military with the same rights and the same access to quality medical care that the rest of the citizens in the United States are entitled to? They are going to veto this bill because of that? Astonishing.

And the White House is going to veto this bill when the President of the United States has said over and over again: "The Republican Party has a big tent; there is room for many, many views." Is this a big tent' I think this is a narrow pup-tent view of the rights of women, of the rights of individuals in the military.

I do not believe that the White House would say such a thing, Mr. President. I cannot believe that.

In any case, the issue before us is not complex. This is not an issue about public funding of abortions. If it had been, this regulation would have been issued a long time earlier. This is not an issue of when life begins or does not begin. This is not an issue of permissiveness or nonpermissiveness. This is very simply an issue of access to quality medical care for people in the military.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from New Hampshire has 4 minutes 44 seconds. The Senator from Colorado has 1 minute 5 seconds.

Mr. HUMPHREY. Mr. President, the Senator from Colorado wishes to impose a policy of abortion on demand with respect to DOD hospitals abroad. And yet there is no case for it. He has failed to establish a case. The one statistic he can cite, and to be sure, it is a compelling statistic with which we must be sympathetic, is one hard case. One.

Mr. President, we cannot make important and controversial public policy based on a handful of hard cases. We all know that, and we always try to avoid that. No case has been made for the amendment. The Department of Defense does not want the change; the White House does not want the change. No case has been made for a change in policy from abortions performed only to save the life of a mother to abortion on demand for any reason during pregnancy, during all 9 months. No case has been made.

Therefore, let us leave this settled matter settled. It is fundamentally an issue we have gone over and decided in dealing with the Hyde amendment language time and time again.

Again, I make the point it is not the dollar cost. It is simply reimbursing the Government. It does not remove the central difficulty; namely, that the Senator from Colorado wants to involve the Government in facilitating abortion. That is the problem. That is what we have always sought to avoid, and that is what we should seek to avoid.

Mr. DOLE. Will the Senator from New Hampshire yield?

Mr. HUMPHREY. I will be happy to yield to the Republican leader.

Mr. DOLE. In response to the Senator's statement, I am in a position to say that if this amendment should be adopted, this bill will be vetoed.

The PRESIDING OFFICER. Who yields time?

Mr. HUMPHREY. Mr. President, I am prepared to yield back whatever time remains if the other side is likewise prepared.

Mr. WIRTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. WIRTH. As a closing issue, we have heard, Mr. President, a great deal about the fact that we are in a kinder and gentler time. We have heard a great deal about the fact that we have a rapidly changing world and a rapidly changing defense force, and that one of our greatest assets is the people in the military. This is true. We have never had such quality individuals in the military, but we have never had a time when there was also more turbulence going on in the military. This is clearly a time in which we have to say loudly and clearly to those in the military and their dependents that we respect them; we want them to be treated as other individuals are treated.

The issue before us is one simply of assuring that individuals who are members of the military and their dependents have access to rights under the law and the quality medical care just like everybody else in our society.

This is not about public funding for abortion. This is not about when life begins. It simply allows our nearly 1 million active duty personnel and dependents to have access to quality medical care. I urge my colleagues to vote with me and Senator GLENN and Senator PACKWOOD on this amendment.

The PRESIDING OFFICER. Who yields time? The Senator from New Hampshire has 2 minutes 45 seconds remaining.

Mr. HUMPHREY. Mr. President, I listened very carefully to the argument just raised by the Senator from Colorado. It is the same argument we hear whenever the Hyde amendment language is before the Senate. We hear on one side that the Government should not provide Federal funds for abortion because the Government should not be involved in facilitating abortion.

From the other side, on which the Senator from Colorado stands, we hear that is discriminatory against those who cannot afford to pay for abortions, or cannot easily afford to pay for abortions. It is the same argument we hear now. The Senator from Colorado bases his final plea on the premise that we have an obligation to make abortion conveniently available to those who desire it. But we do not have that obligation any more than we have an obligation to pay for abortions. The Supreme Court has upheld that view a number of times, that you do not have to subsidize the exercise of a right.

So no case whatever has been built for the Wirth amendment, it seems to me. I am sure the Senator from Colorado feels otherwise. One case he cited is troubling, but we cannot build policy on a controversial area based on even a few hard cases. No case has been built for abortion on demand in DOD hospitals abroad.

I hope Senators will leave this matter, which is essentially a Hyde amendment matter, settled and not unsettle it today because, if we do, then those of us on this side, who feel as strongly as the Senator feels on his side, have no recourse but to seek to clarify this matter further, with further amendments on abortion.

Mr. President, if I have any time remaining, I yield it back.

VOTE

The PRESIDING OFFICER. All time having been yielded back or expired, under the previous order the live quorum under rule XXII has been waived.

The question before the Senate is, Is it the sense of the Senate that further debate on the Wirth amendment (No. 2514) should be brought to a close? The yeas and nays are required. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The yeas and nays resulted—yeas 58, nays 41, as follows:

[Rollcall Vote No. 212 Leg.]

YEAS—58

Adams	Gore	Moynihan
Akaka	Gorton	Nunn
Baucus	Graham	Packwood
Bentsen	Harkin	Pell
Biden	Heinz	Pryor
Bond	Hollings	Riegle
Bradley	Inouye	Robb
Bryan	Jeffords	Rockefeller
Bumpers	Kassebaum	Rudman
Burdick	Kennedy	Sanford
Byrd	Kerrey	Sarbanes
Chafee	Kerry	Sasser
Cohen	Kohl	Shelby
Cranston	Lautenberg	Simon
Daschle	Leahy	Specter
DeConcini	Levin	Stevens
Dixon	Lieberman	Wilson
Dodd	Metzenbaum	Wirth
Fowler	Mikulski	
Glenn	Mitchell	

NAYS—41

Armstrong	Ford	McCain
Boren	Garn	McClure
Boschwitz	Gramm	McConnell
Breaux	Grassley	Murkowski
Burns	Hatch	Nickles
Coats	Hatfield	Pressler
Cochran	Heflin	Reid
Conrad	Helms	Roth
D'Amato	Humphrey	Simpson
Danforth	Johnston	Symms
Dole	Kasten	Thurmond
Domenici	Lott	Wallop
Durenberger	Lugar	Warner
Exon	Mack	

NOT VOTING—1

Bingaman

The PRESIDING OFFICER. On this vote the yeas are 58, nays are 41. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

Mr. HELMS. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, cloture not having been invoked, the Wirth amendment, No. 2514, is withdrawn.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I hope the Senate will come to order, because I think Senators might be interested in a little status report here.

The PRESIDING OFFICER. The Senate will come to order. The Senators will clear the aisle. The Senator from Georgia [Mr. NUNN] has the floor.

Mr. NUNN. Mr. President, if the Senators will give me their attention for a moment, let me say where we are at this time.

We have handled 25 amendments now, and we have had 11 hours of debate. We are working on lining up 10 amendments on which we know there will have to be rollcall votes because there is strong opposition to the amendments.

We have a Conrad amendment on European troop cuts, which we hope will come up next. Then we have a Kerry amendment on Asat, which we hope will come up sometime this morning. We have a Bumpers amendment on base closure; a Cohen amendment on drug technology; a Dixon amendment on Federal Prison industries; a Dixon amendment on Korean fighters; a Bumpers amendment on battleships; a Glenn amendment on pay raise; a Reid amendment on atomic veterans.

On most of these, we think we can get very short time agreements. I hope Senators will begin to take 30 minutes equally divided. We have Senators now asking for an hour, some for an hour and a half. I hope we can get it down to 30, 40 minutes equally divided on most of these. We still have to get an agreement on SDI. That is one big hurdle we have not crossed. I think if Senators have amendments——

Mr. President, can I get the attention of the Senate?

The PRESIDING OFFICER. The Senators will please clear the aisle, and staff will return to their chairs so the Senator from Georgia can proceed to describe the status of this very important bill.

Mr. NUNN. Mr. President, we are also asking for a list of all amendments Senators would like to have on this bill. We have a long list now, and we believe a number of them can be worked out. I urge all Senators who have amendments that they believe may be acceptable to please get us the amendments. Even regarding those that may not be acceptable, the sooner we have the amendments, the sooner we can begin to find out where the opposition is and what the time agreements can be.

So we are making progress now. I think we can come very close to finishing all these amendments this evening, with the exception of SDI; we do not know about that one. But it is my view now that we can finish that one and conclude it sometime tomorrow afternoon. If we work hard today and get time agreements, I think we can be well along to finishing this bill by 11 or 12 o'clock tonight.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I wish to add to the Senator's remarks that on this side we have some 70 amendments, at the moment. A number of Senators have indicated to the Republican leader, to myself, and others, that perhaps they need not go forward with those amendments. Now is the time—and we ask the cooperation of all Senators on this side of the aisle—to reconfirm their intention to press forward on their amendment or to drop it. We are anxious to take our list of over 70 and reduce it by two-thirds, hopefully, within the next hour or two.

Mr. STEVENS. Mr. President, will the floor manager yield?

The PRESIDING OFFICER. The Chair counts nine individual conversations taking place on the floor, and we will not proceed until all the conversations have ceased and the Senate is silent.

The PRESIDING OFFICER (Mr. ROCKEFELLER). The Senator from Georgia.

Mr. NUNN. Mr. President, I believe the Senator from Alaska wanted to pose a question. I am glad to yield to him.

Mr. STEVENS. Mr. President, I want to ask the Senator from Georgia. Last evening, I listed 10 amendments. We reviewed those, and eight of them are matters that will be in conference. They are not in the House bill. So I will not offer those. I did have two, one of which is controversial, the National Guard amendment. I hope the Senator from Georgia will put that down, and we will get to that.

Mr. NUNN. I am glad to.

Mr. STEVENS. There are at least eight cosponsors on that. I do not know how much time the cosponsors will want. I am willing to negotiate on the time limit for those who desire to speak. I want to bring it up as soon as possible. I am at your call anytime you want to bring it up.

Mr. NUNN. I understand the Senator from Alaska. It is an important amendment. I am glad to discuss it with him. I say we put together the most favorable package for the Guard and Reserve of any bill in the last 25 years since I have been here, a lot of it premised on the provision that the Senator from Alaska wants to delete.

If that provision is deleted, then we are going to have to revisit a number of other provisions in the package because we are shifting major missions, new missions to the Guard and Reserve, like airlift and others.

So I hope the people proposing that amendment—I talked to the Senator from Missouri yesterday—will take a good look at the overall package in there because I say we have to revisit a number of other issues, including some major missions that have been shifted. I am not willing to shift major missions to the Guard and Reserve if we are not going to have increase in active Guard mix in training. That is a matter of debate.

I would say that will not be a simple amendment. I will take some time and I will have at least three or four other amendments if that one is adopted, including proposing to shift back missions that we have in this bill going to the Guard from the active.

I would have to know if the amendment of the Senator from Alaska is agreed to, we will have to shift those back. Maybe I will lose. But I will say that amendment will, if adopted, need at least three or four other amendments.

Mr. STEVENS. Mr. President, just a slight response if the Senator will yield again: I hope the Senator will examine the amendment before he reaches that conclusion. Senator Stennis and I spent at least 8 years building up this Guard and Reserve and that was the basis of the battle between the Appropriations Committee and the Armed Services Committee for those 8 years because we did exceed the authorized levels of appropriations for the Guard and Reserve.

Now the Armed Services Committee is going to phase out 30 percent of the buildup in reserve, that 30 percent for those who are on active duty. I have no problem with reserving spaces for the active duty, but there ought to be increases to the Guard and Reserve. It should not mean that the 200 to 300 families in my State that are part of that 10 percent reduction each year must leave the State.

I think this is going to be a long debate and I will say to the Senator if that is the case and he has three or four other amendments, then I reserve my right to put back in the other eight that I have which also deal with the same concepts that are in this bill about trying to destroy the citizen soldier, the mechanism of the Guard and Reserve, in order to preserve spaces for those who might be back from Europe and overseas.

This is a significant policy decision, and after hearing the Senator from Georgia, Mr. President, I will not seek a time agreement on my amendment. We will have a nice, long debate on this and it will go on. There are several other sections of this bill that I decided not to attack because they are in conference. I am depending upon my good friend from Mississippi, Congressman MONTGOMERY, to feel the same way I do about the Guard and Reserve.

If we are going to face this Guard and Reserve problem at length on this issue and not be willing to increase the Guard and Reserve to the extent that you want to move people from the regular Army and regular Air Force into the National Guard, and instead fire the people who are there now in order to reserve spaces for future people who might want to come into the Guard—not into the Guard. By the way, the bill, Mr. President, does not put these people in the Guard. It merely detaches them from the Air Force and the Army and assigned people to fill slots in the Guard. This is not just a simple dispute, then; it is a philosophical dispute. I will not seek a time agreement on the amendment. It will be a long debate.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I hear what the Senator from Alaska is saying. I am perfectly willing to be here all next week. I planned my schedule accordingly, that is, the schedule that the majority leader announced earlier that we would probably be in next week. That is fine with the Senator from Georgia. I am delighted to have all the amendments on that subject the Senator from Alaska wants to debate. We will have a good debate on it, and I look forward to doing it this week or next week.

Mr. STEVENS. I am delighted to hear that. My reservation to leave here is on August 9.

Mr. NUNN. We will have a good debate.

Would the Senator from North Dakota be willing to enter into a time agreement on his amendment?

Mr. CONRAD. I am glad to enter into a time agreement.

Mr. NUNN. Mr. President, I will propose a time agreement and ask unanimous consent that there be 40 minutes equally divided on the Conrad amendment; there be no amendment to the amendment and there be a vote on or in relation to the amendment at the conclusion of the time which will be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order the Senator from North Dakota [Mr. CONRAD] is recognized.

AMENDMENT NO. 2515

(Purpose: To further reduce the end strength for military personnel assigned to duty in Europe)

Mr. CONRAD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Dakota [Mr. CONRAD], for himself, Mr. DASCHLE, and Mr. METZENBAUM, proposes an amendment numbered 2515.

Mr. CONRAD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 181, line 18, strike out "261,855" and insert in lieu thereof "231,855".

On page 182, between lines 9 and 10, insert the following:

(c) RELATIONSHIP TO AUTHORIZED END STRENGTHS FOR THE ARMED FORCES.—(1) The total number of the authorized end strengths provided in subsection (a) of section 401 and the total number of the authorized end strengths provided in subsection (b) of such section are each reduced by 30,000. The Secretary of Defense shall allocate the total reduction to the authorized end strengths provided in each such subsection as the Secretary considers appropriate.

(2) In the event of a waiver pursuant to subsection (b), the number specified in the first sentence of paragraph (1) shall be reduced by the number, if any, by which the total number of members of the Armed Force of the United States assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization (NATO) on September 30, 1991, exceeds the number provided in section 1002(c)(1) of the Department of Defense Authorization Act, 1985 (22 U.S.C. 1928 note), as amended pursuant to subsection (a).

The PRESIDING OFFICER. The Senator from North Dakota may proceed.

Mr. CONRAD. Mr. President, my amendment would do three things:

First, it would reduce our troops in Europe by 30,000, over and above the 50,000 reduction in troop levels contained in the committee bill. That would bring the total ceiling in troop strength in Europe to 231,000. I note that that would be above the conventional forces in the Europe talks level of 225,000.

Second, my amendment would require the demobilization of those troops, reducing our total in strength from 1,976,000 to 1,946,000.

Third, my amendment would authorize the President to waive the ceiling requirement if national security interests dictate.

Mr. President, last week, I noted that West Germany announced it will be paying the Soviet Union to keep its troops in East Germany. At the very same time the West Germans will be paying to keep Soviet troops in East Germany, we are paying to keep troops in West Germany to protect against those Soviet forces.

Mr. President, let me just repeat that. The West Germans are paying to keep the Soviet troops in East Germany at the very time we are paying to keep our troops in West Germany to protect against the Soviet troops in East Germany. This makes no sense and Mr. President, maybe it is time to move further than the committee has suggested.

I would note that President Eisenhower 30 years ago upon leaving office said this, and I quote:

For 8 years in the White House I believe that a reduction of American strength in Europe should be initiated as soon as European economies were restored. I believe that time has now come for withdrawing some of those troops.

That was Dwight David Eisenhower, 30 years ago.

Mr. President, the Europeans themselves acknowledge that it is time to review the relationship. The respected publication, the Economist, noted 2 years ago:

Two hundred forty-one million Americans with an income a bit over $4 trillion do not see why 374 million Europeans with nearly $3½ trillion should need 300,000 American servicemen and about $100 billion a year of the American defense budget to guard them.

Mr. President, I want to stress that point. At a time when we are faced with massive budget deficits, we are spending, according to the Europeans themselves, over $100 billion a year to pay for their defense. At the very time they are reducing their defenses and, in fact, we now know, paying the Soviets to keep their troops in East Germany, we continue to spend tremendous sums of money on their defense.

I quote another European source, the Secretary of the French Parliament's National Defense Committee, who said 2 years ago:

Do you think 320 million Europeans can continue forever to ask 240 million Americans to defend us against 280 million Soviets?

I think that pretty well sums up the argument: "Do you think 320 million Europeans can continue forever to ask 240 million Americans to defend us against 280 million Soviets?"

Since those statements by Europeans, we have witnessed dramatic changes, changes that have swept Europe. We all know what has happened. The Warsaw Pact has disintegrated. Warning time in Europe, which was once calculated to be 2 weeks, we are now told by our military planners has been stretched to 12 to 18 months.

Gorbachev announced in December 1988 that the Soviets would unilaterally cut their armed forces by 500,000 men, 250,000 of those out of Europe.

In January, the CIA Director, William Webster, confirmed that significant cuts are being made by the Soviets. Large numbers of Soviet troops are being removed from Warsaw Pact countries; 75,000 from Czechoslovakia by July of next year, 65,000 from Hungary by June of next year. In fact one-half of those troops from Hungary have already been removed. We have seen Germany move to reunify. And, even more remarkable, the Soviets removed any objection to the Germans staying in NATO.

The British have announced that they are withdrawing one-half of their troops from West Germany. Belgium has announced they are withdrawing their 25,000 troops. Italy and Greece have announced dramatically reduced conscription in their countries. Those reductions in forces are justified not only by the reduced threat in Europe, but by our own budget imperatives.

Mr. President, there is not a Member of this body that does not know what has happened to the fiscal condition of this country. In just 8 years, we have tripled the national debt. We have gone from being the largest creditor nation in the world to the largest debtor nation. We still face massive budget deficits, $231 billion next year. And that is counting the Social Security surplus. That rises to $300 billion next year if we exclude the Social Security surplus from the calculation, as many of us advocate.

This year, we face a sequester of some $100 billion; $100 billion cut out if we do not face up to the problem ourselves.

Mr. President, what can be more clear than that we are undermining the strength of America? Many of us believe that the greatest threat to our national security is our economic vulnerability.

The amendment that I have sent to the desk today is a modest step: 30,000 additional troops removed from Europe in addition to the 50,000 proposed by the committee. That is approximately one-quarter of our troop strength in Europe. We will still have 231,000 troops remaining in Europe and we will still have a final troop strength, end strength, of 1,946,000.

Mr. President, the committee has indicated, that if conditions continue to improve in Europe, troop levels should be reduced to no more than 75,000 to 100,000 by 1995. I applaud this proposal as well. But, Mr. President, I contend that we do not need to wait until later to reduce our troops in Europe. In fact, I contend that we cannot afford to wait until later to reduce our troops. With our budget deficit of over $230 billion next year, I contend that we must look for additional savings

anywhere we can responsibly find them.

According to a CBO estimate, my amendment will save us approximately $380 million in fiscal year 1991 from reduction in personnel alone. Add to that CBO's estimated savings in operating and maintenance cost and this amendment will save approximately three-quarters of a billion dollars each year.

I am not proposing to turn these dedicated and loyal troops out of the service without adequate separation pay and training and relocation assistance to allow them to make the transition from the military to civilian jobs. The $400 million savings in personnel costs have already been reduced to account for separation costs and benefits at the levels proposed elsewhere in the bill.

It is time for a proposal like mine to pass. It is 45 years after the last great war in Europe. Dramatic events in Europe have changed the threat there. Our own economic condition requires substantial savings. This is one place to start.

Let me just close by quoting our former Defense Secretary, Mr. Schlesinger, who said earlier this year:

> We should plan now radically to scale back our forces in Europe. Implementation may extend over months or years, but the reduction should not be precluded by the ongoing negotiations in Vienna. The time has come for Europe to move towards the condition stated by former Chancellor Helmut Schmidt. Europe should be defended primarily by French and German forces.

Mr. President, I submit that if we are to get America back on track to start rebuilding its lost economic strength then we have to get our fiscal house in order. That requires spending cuts across the broad range of Federal spending. One place that we must look is to the military. And when we look to the military, we ought to first look to what we are spending in Europe—over $100 billion a year. And we have to borrow the money from them to do it.

We have nearly 500,000 people on our payroll in Europe. That is the greatest economic development scheme in the world today. I submit to my colleagues we simply can no longer afford that. To reduce our forces in Europe by one-quarter, after everything that has happened in the last 12 months, is not imprudent or unwise. In fact, it is dictated by economic circumstances here at home.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Chair makes it clear at this point that the time in opposition to the amendment is controlled by Senator NUNN. The Senator from Arizona is recognized.

Mr. NUNN. I yield such time as the Senator may desire.

Mr. McCAIN. Mr. President, I will not take too much time here. I certainly know my friend from North Dakota reflects the aspirations and hopes of the American people, who have grown weary of these 45 years of bearing the burden of the defense of freedom of Europe and throughout the world. He makes a very logical argument that the time has arrived.

But I would counsel to my friend from North Dakota that patience might be appropriate on this particular issue. I think caution might be appropriate, particularly on a day like today and yesterday, where no credible expert in this country or around the world believed that Kuwait would be the subject of an invasion. No credible expert today or yesterday believed that Saudi Arabia would be the subject of an invasion. Yet, I note with some interest, the latest news reports indicate that Iraqi forces are now amassed on the Saudi border.

Peace is at hand, Mr. President. But too rapid deescalation and dismantling of those very factors which were the basic pillars of the recipe for success is, frankly, unwise at this time.

Let me remind my friend from North Dakota, and again I appreciate his sincerity and his commitment on this issue, let me remind him the committee has already taken action to reduce the number of U.S. military personnel stationed in Europe.

The Dixon amendment already called for a reduction of 50,000. We do have some very serious and important conventional force reduction talks ongoing as we speak. There are expert opinions which conclude that we can reach a successful conclusion of those talks, at least in intermediate bilateral reduction of forces, within the next few months.

I would like to also point out a couple of the realities. Despite the dramatic changes that have taken place in Europe, let us not forget that the Soviet Union still maintains a formidable military establishment in Europe. There are still approximately 500,000 Soviet soldiers in Europe. Are they leaving? Yes. Are they leaving immediately? Not that I know of. And the best way for them to leave as rapidly as possible is through the successful conclusion of an agreement between our two nations.

I might point out again that these 500,000 Soviet troops who are stationed in Eastern Europe are roughly double the 231,000 that my friend from North Dakota referred to.

Let me also remind him, as he well knows, the total Soviet military force consists of 4.5 million persons. Much of it is stationed just east of the Urals.

Does that mean, Mr. President, we are on the verge of war; the cold war still goes on; et cetera? No. I do not make that case. It would be ludicrous to do so.

I do submit that a measured reduction of our forces, consonant with a reduction of Soviet forces, is probably in the best interests of stability and the security of Western Europe, as well as the world.

Mr. President, I also want to point out one additional factor. If this amendment were enacted, the additional end-strength reduction would probably trigger the involuntary separation-transfer benefits provision which we have put into this legislation, which is very generous. This will add approximately $315 million to the bill, which is calculated on the basis of about $105 million per 10,000 involuntary separations.

So we will be adding to the deficit in the short-term, Mr. President, rather than alleviating it. If these troops are brought back and not demobilized, then of course we know the expenses go up, because none of the expenses are shared by our European allies when we leave Western Europe.

I suggest, Mr. President, a year of patience may save a century of crisis. I do not believe it is appropriate, particularly on this date, for the U.S. Congress to be imposing, unilaterally and without the assent and agreement of the executive branch, further reductions in troops until we can achieve a conventional force reduction agreement.

If at this time next year we have not made significant and substantial agreements between ourselves and the Soviet Union to orchestrate the kinds of reductions he is recommending here and even more, I will be one who will be willing to support him, because I agree with his precept; I agree with his principle. I just oppose his methodology.

Mr. President, I yield the floor.

Mr. NUNN. Mr. President, I yield 5 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, we are embarked on a reduction in the military end strengths of the total number of people in the services. The bill authorizes military end strengths totaling 1,976,400 for fiscal year 1991; that is a 100,000 reduction in the current level.

Mr. President, that figure was not just chosen off the tops of our collective heads in the committee.

The Secretary of Defense has set as an objection, which has been confirmed by the President in his speech of yesterday, I believe, that the reduction of about 20 percent over a 5-year period is what we are aiming for.

That seemed to us to set us on a very prudent glide slope that reduces, over a 5-year period, 20 to 25 percent in end strength, and does it on a steady basis. They can reduce 100,000 by cutting back on accessions, on new recruits, and retiring those who are already eligible for retirement between the 20- and 30-year points, and by having a

package of benefits for those who might be forced to involuntarily retire.

In other words, we now are operating with an All-Volunteer Force. We got those people in. They are on contract. They are not planning to serve for a year or 2 and go home; they are planning to make a career out of this. Now we are saying because of a changed world situation, we are going to have to cut back. So we set this orderly progression, and that 100,000 number was set as the figure which the Pentagon agrees they can do just by cutting accessions and retirements, out of the force now, without having to go to involuntary separations.

If we go to involuntary separations above that 100,000, then it becomes more expensive per man that you let out. You save less, in other words, because we have to get into this package of involuntary separation benefits, that means we have to go way up, then, in the number of people we get out.

As I understand it, my distinguished colleague's proposal would mean that 30,000 people coming back would be out of the service. They would not just be relocated to the United States. That was my understanding of it. This would mean we do get into these force-outs, that we cannot take over the 100,000 level without activating the involuntary separation benefit package.

The bill proposes to gradually reduce military personnel strength over the next 5 years. By 1995, it comes down to an end strength of 1.6 million, a reduction of 475,000 from the current level.

There is one other factor here, too. I do not want to overly complicate this debate, but I think it is a factor.

We still have a commitment to NATO. That obligation has not been negated. It even gets beyond just our commitment to NATO.

As long as we have a commitment that is on a very steady, gradual basis and not subject to just a current amendment that says, well, we will whack another 30,000 out of that—that makes the NATO people nervous because they do not know what to plan for. Their forces are coming down. Our forces are coming down; 100,000 is about the level we think we should be coming down to along with them in order to keep NATO, both as a military and as a political organization.

Some people look at NATO as being passé now. I certainly do not, because if we look at what confidence the Soviets were able to have over the reunification of Germany—part of it at least came because our commitment in NATO was still there—the Russians feel we will still be a good influence. That, from their standpoint, we would prevent the Germans from ever again doing what they have already done twice in this century.

We do not like to talk about that because that ruffles some feathers, but those are the facts of life. Every time you go to the Soviet Union, if you make a stop through Leningrad, you lay the wreath at the memorial to the 20 million Soviets who died in World War II.

The PRESIDING OFFICER. The Senator has used his 5 minutes.

Mr. NUNN. I yield the Senator 2 more minutes.

Mr. GLENN. They lost 20 million people in World War II. So they are concerned about seeing stability in Europe that can do them that kind of harm. Our commitment to NATO is part of the reassurance that it cannot happen again.

I am not trying to lay all the world's woes at the feet of my distinguished colleague, but that is something that we really do have to think of if we go beyond this steady reduction that we have discussed with them. And their forces are coming down, too. We are not taking U.S. forces out of NATO willy-nilly after we have worked out this specific plan.

Mr. President, for all those reasons, I, regretfully, must oppose this amendment, and urge my colleagues to vote against it.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Will the distinguished Senator yield 3 minutes to me?

Mr. NUNN. I yield 3 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, this amendment is to reduce, by an additional 30,000, the ceiling on the number of U.S. military personnel authorized to be permanently stationed in Europe and to reduce the overall military end strength by an additional 30,000.

I just want to call the attention of the Senate to the fact that we have already agreed, by a vote of 15 to 5, to lower the statutory ceiling on United States troops in Europe from 311,855 to 261,855, a reduction of 50,000, effective September 30, 1991. The committee also reduced the overall military end strength by 100,000.

The House has taken the same action that we have taken in the committee. The House has agreed to reduce to the same ceiling, 261,855.

Mr. President, further unilateral cuts at this time would, I think, undercut the U.S. negotiating position in the CFE talks. In other words, what incentive will the Soviets have to reach an agreement if their objectives can be achieved in the United States Congress?

The Soviet Union continues to maintain a formidable military presence in Europe. The total Soviet military force consists approximately of 4.5 million military personnel. It seems to me that we should not reduce the United States military capabilities in Europe on the basis of statements of intent by the Soviets. Reductions, I think, should be made in accordance with the arms control agreements, which would require corresponding cuts in Soviet military power. If we take actions here unilaterally, what incentive do the Soviets have to negotiate in these arms agreements? I think it would be a mistake to make further cuts, and I hope the Senate will stand by the action of the committee.

Mr. NUNN. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator has 5½ minutes.

Mr. NUNN. Mr. President, let me take a couple of minutes for remarks. I agree with the Senator from North Dakota that we are going to need to reduce our forces in Europe. When I made my presentations to the Senate in April of this year, laying out what I thought were the implications of the tremendous change in threat in Central Europe, particularly the increase in warning time, I said then that I felt American troop levels ought to be reduced down year by year to about 75,000 troops in Europe, 50,000 to 75,000 by the end of 5 years. I still believe that. We have now moved from 2 weeks' warning time to probably closer to 2 years' warning time; no one knows precisely, perhaps a year, perhaps 18 months. It makes an enormous amount of difference in the threat.

But we still have a NATO alliance. It is still important that we keep that alliance together in a cohesive way. There remain all sorts of instabilities in that part of the world. It is going to be important that we have a chance to let arms control work. Some people would say, why have arms control with the Soviets moving forces out anyway?

There are a couple of important reasons for that. One is verification, setting up a regime of verification in arms control that allow us not only to get forces out, but to make sure that we understand when they are coming back and that the whole world will understand that there has been a serious breach in an agreement if they do come back in. So verification is important, and that is one of the reasons we need to take enough time to get the arms control agreements right.

There is an even more significant reason for letting this take its course in a logical, normal, steady way. The other reason is if both sides, NATO and Warsaw Pact, particularly the Soviets and United States, move our forces out with no agreements whatsoever, if everybody does it on their own, move our equipment out, so forth, there is going to be no destruction of equipment. We are not going to see tanks destroyed, we are not going to see artillery tubes destroyed. What we

are going to see is a proliferation of those sold around the world on a fire sale basis. The arms control regime doing this in a logical, normal, steady fashion gives us an opportunity to require both sides to destroy a great deal of military equipment.

The Conrad amendment has two problems. One is it goes, in my opinion, a little too far in terms of taking forces out this year. The allies and the United States have not gotten together. We have in this bill a reduction of about 50,000; no one knows the precise number.

But my larger objection to the Conrad amendment is that it requires us to go over the 100,000 mark in reducing force structure the first year. If we go beyond 100,000 troops coming out of the force structure, and that is what our bill has, 100,000, then we know after going through this for months and months that we are going to have to send out pink slips; that is, we are going to have to involuntarily separate at least 30,000, if the Conrad amendment is agreed to. That means the men and women in the military who are terminated, who have gone in on a volunteer base, those terminated, involuntarily separated, will have to, of course, leave the service, and that is an important consideration. But even more important is the morale of those who are left, because they are going to believe they are next. We have to have a military force with high morale, particularly as we draw down.

So, Mr. President, I respect the Senator from North Dakota and what he is trying to do. I can assure him that 3 years from now he will see that this is being done, and perhaps even the amount he is talking about will come out of Europe in the first year. We do not know when that is going to happen. But I do believe it is better to do it along the line of what the committee has done. I think it is very important we not go beyond the 100,000 reduction in force structure the first year. I urge this amendment be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. CONRAD. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 7 minutes.

Mr. CONRAD. How much time remains on the other side?

The PRESIDING OFFICER. One and one-half minutes.

Mr. CONRAD. Mr. President, I yield 5 minutes to myself.

The PRESIDING OFFICER. The Senator may proceed.

Mr. CONRAD. Mr. President, I have enormous respect for the chairman of the authorization committee on the Senate side, Senator NUNN, and I have great respect for the Senator from Arizona [Mr. MCCAIN] as well as the Senator from Ohio [Mr. GLENN]. I not only have respect for the three of them, I have affection for them.

But on this question, I also profoundly disagree on the timing of reducing troop levels. I offered this same amendment a year ago, before all of the dramatic events in Europe, because I did not believe we could justify the kind of expenditures we were making in Europe then, and I think it is more clear we cannot continue to pay everyone else's bills when we cannot pay our own. When do we stop?

Mr. President, we have heard the argument that the problem in Iraq should keep us from making additional troop reductions in Europe. I point out these troops are in Europe to meet a Soviet threat. The Warsaw Pact has disintegrated. Warning time has gone from 2 weeks to 12 to 18 months, according to our military leaders. Most of all, the West Germans have sent a signal. My God, they said last week, they are paying to keep the Soviet troops in East Germany.

Mr. President, we have heard talk of force levels. The House had exactly the same information before them as the Senate committee, and the House decided to reduce force levels 130,000; the Senate committee 100,000. With my amendment, another 30,000, we will equal what they did on the House side.

Third, we heard claims that this will actually increase the budget deficit. Not according to the Congressional Budget Office. They said my amendment will reduce the deficit $380 million on personnel and another $30 million on operations and maintenance; a total reduction of over three quarters of a billion dollars.

Finally, Mr. President, we heard the statement that the Europeans are nervous. This will make the Europeans nervous. I think the only thing the Europeans are nervous about is that maybe Uncle Sam is going to wake up and decide to quit paying their bills. Our taxpayers have been spending 6 percent of GNP on defense. They have been spending 3 percent of GNP on defense.

What is their response to developments in Europe? The British have decided to take out half of their troops. The Belgians have decided to take out all of their troops. And West Germany has decided to pay to have the Soviet troops stay in Eastern Germany.

My God, Mr. President, what does it take before the United States decides we are going to withdraw some additional troops—only one quarter of all of our troops in Europe. How gradual do we have to be? Forty-five years after the last war and we still want to keep paying Europe's bills.

I submit to my colleagues we are going to find out about tough economic competition. It is coming in 1992. Some have said the cold war is over and Japan and Germany have won. Mr. President, I do not want to see the United States decline another inch. We have seen the United States fall back, fall back, fall back while we spend ourselves poor.

I submit to my colleagues it is time to make a total force reduction along the lines of what the House has decided to do. It is time to send our friends in Europe a message. They need to start paying their own defense bills and stop counting on the United States to pay them.

Mr. President, I will yield the floor and retain the remainder of my time.

Mr. NUNN. Mr. President, the managers are prepared to yield back all time and go to a vote, if the Senator is prepared to do that. We will do that or let him complete his time and when we will yield back and go to a vote.

Mr. CONRAD. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator from North Dakota has 2 minutes remaining.

Mr. CONRAD. Mr. President, let me sum up.

Again, I want to indicate my respect for the Senator from Georgia and the Senator from Arizona. There really are not two Senators in this Chamber for whom I have any greater respect, but I really do have a difference of opinion on what is important for America.

I believe the greatest threat to our national security is our economic vulnerability. We are faced next year with a $230 billion deficit, and that is counting the Social Security surplus. If we exclude that, we are faced with a $300 billion deficit next year.

Everything has to be on the table. Everything has to be addressed. One element is our military spending, and the place to start is in Europe. What could be more clear? The Soviets are pulling out. The Warsaw Pact has disintegrated. The Western Europeans themselves have sent a very clear signal. They do not believe the threat is there. Why in God's name are we continuing to spend our money, which we have to borrow from them, to protect them against a threat they do not see.

Mr. President, I retain the remainer of my time.

The PRESIDING OFFICER. Those in opposition indicate their willingness to yield back time. The Senator from North Dakota has 20 seconds remaining. Does he wish to yield it back?

Mr. CONRAD. I am willing to yield back the time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. MCCAIN. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. The motion to table has been made. Is there a sufficient second?

Mr. NUNN. I yield back whatever time I have.

Mr. CONRAD. Mr. President, has there been a request for the yeas and nays?

The PRESIDING OFFICER. There has been a request for the yeas and nays. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from North Dakota. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 59, nays 40, as follows:

[Rollcall Vote No. 213 Leg.]

YEAS—59

Akaka	Glenn	Mack
Armstrong	Gore	McCain
Bentsen	Gorton	McClure
Bond	Graham	McConnell
Boschwitz	Gramm	Murkowski
Breaux	Grassley	Nunn
Bumpers	Hatch	Packwood
Burns	Heflin	Robb
Byrd	Heinz	Roth
Chafee	Hollings	Rudman
Coats	Humphrey	Shelby
Cochran	Inouye	Simpson
Cohen	Jeffords	Specter
D'Amato	Johnston	Stevens
Danforth	Kassebaum	Symms
Dole	Kerrey	Thurmond
Domenici	Leahy	Wallop
Durenberger	Lieberman	Warner
Ford	Lott	Wilson
Garn	Lugar	

NAYS—40

Adams	Fowler	Nickles
Baucus	Harkin	Pell
Biden	Hatfield	Pressler
Boren	Helms	Pryor
Bradley	Kasten	Reid
Bryan	Kennedy	Riegle
Burdick	Kerry	Rockefeller
Conrad	Kohl	Sanford
Cranston	Lautenberg	Sarbanes
Daschle	Levin	Sasser
DeConcini	Metzenbaum	Simon
Dixon	Mikulski	Wirth
Dodd	Mitchell	
Exon	Moynihan	

NOT VOTING—1

Bingaman

So the motion to table the amendment (No. 2515) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Georgia is recognized.

Mr. NUNN. For the benefit of Senators, we have a Murkowski amendment that will be proposed, that will take a very short time. Then we have a Glenn amendment on the military pay, on which we hope to get a 40-minute time agreement equally divided, which means that, it is my best guess, we will have an additional rollcall vote in about 45 minutes.

Mr. DOLE. Mr. President, I want to underscore what the managers have done. We have a list of 70-plus amendments on this side. I urge my colleagues on this side, as well as the other side—they have 60 some—to go over that list. We are in the process of doing that now through staff. Unless you feel totally compelled to offer the amendment, maybe you can resist the temptation and give the information to our staff. If you are going to offer it, I hope you will accept a short time agreement. That is key to getting this matter finished today or even next week.

It is my hope, if we are not going to finish today, that we go out and come back on Monday and get rested up over the weekend.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Chair advises that the pending amendments by Senators NUNN and WARNER must be temporarily laid aside before proceeding to an amendment by the Senator from Alaska.

Mr. MURKOWSKI. The Senator from Alaska so asks unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2516

(Purpose: To establish an emergency national energy security plan designed to reduce U.S. dependence on foreign oil supplies to a level which does not pose an unacceptable threat to the national security)

Mr. MURKOWSKI. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI], for himself, Mr. MCCLURE, and Mr. BURNS, proposes an amendment numbered 2516.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

DIVISION D—NATIONAL ENERGY SECURITY

TITLE XLI—NATIONAL ENERGY SECURITY

SEC. 4101. SHORT TITLE.

This title may be cited as the "National Energy Security Act of 1990".

SEC. 4102. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(a) the United States is the leader of the free world and has world wide responsibilities to promote economic and political security;

(2) the exercise of traditional responsibilities here and abroad in foreign policy requires that the United States be free of the risk of energy blackmail in times of shortages;

(3) the level of the United States oil security is directly related to the level of domestic production of oil, natural gas liquids, and natural gas;

(4) the ability of the United States to exercise its free will and to carry out its responsibilities as leader of the free world could be jeopardized by an excessive dependence on foreign oil imports;

(5) increasing dependence on foreign oil imports has and continues to impose severe risks to the lives of United States service men and women and unacceptable costs to the national defense; and

(6) an emergency national energy security plan should be developed and implemented to ensure that adequate supplies of energy shall be available at all times free of the threat of embargo or other foreign hostile acts.

(b) PURPOSE.—The purpose of this title is to establish an emergency national energy security plan designed to reduce United States dependence on foreign oil supplies to a level which does not pose an unacceptable threat to the national security.

SEC. 4103. DUTIES OF THE PRESIDENT.

(a) ESTABLISHMENT OF CEILING.—There is established a national oil import ceiling (referred to in this title as the "ceiling level") of foreign crude and oil product imports at 50 percent of United States consumption.

(b) REPORT.—(1) The President shall prepare and submit an annual report to Congress containing a national oil security projection which shall contain a forecast of domestic oil and natural gas liquid demand and production, and imports of crude and oil product for the subsequent year. The report shall indicate the likelihood of foreign crude and oil product imports exceeding the ceiling level during the next year and the actions which the President will take to maintain crude and oil product imports below the ceiling level.

(2) At the time of the budget transmitted under Section 1105(a) of title 31, United States Code, by the President to the Congress, the projection prepared pursuant to paragraph (1) shall be presented to Congress with a description of the actions which the President would take under Section 4104.

SEC. 4104. NATIONAL ENERGY PRODUCTION AND SECURITY ACTION PLAN.

(a) ESTABLISHMENT OF ACTION PLAN.—The President shall at all times monitor the level of foreign crude and oil product imports as a share of United States oil consumption. Upon a finding that the ceiling level has been exceeded for any six months within any continuous twelve month period, the President shall within 30 days submit an Energy Production and Security Action Plan (referred to in this title as the "Action Plan") to the Speaker of the House of Representatives and the President of the Senate. The Action Plan shall indicate specific actions to be taken to reduce crude and product imports below the ceiling level. Notwithstanding any other provision of law, the Action Plan shall be immediately implemented by the President upon enactment of a joint resolution by the Congress approving the Action Plan.

(b) ACTION PLAN.—The Energy Production and Security Action Plan shall include but not be limited to—

(1) a certification by the President that the ceiling level has been exceeded;

(2) a list of Federal land tracts, offshore and onshore, in order of their potential for oil and gas discovery, including any Federal land outside units of the National Park System, currently off-limits to oil and gas leasing;

(3) a schedule for leasing the tracts identified in subparagraph (B) in order of their potential for oil and gas discovery, including number of tracts to be leased and the timing for individual lease sales;

(4) energy conservation actions including improved fuel efficiency for automobiles and the development and utilization of alternative transportation fuels; and

(5) production incentives for domestic oil and gas including recommendations on the imposition of oil import fees, royalty reductions, tax and other incentives for stripper well production and the production of offshore, frontier, and other oil produced with tertiary recovery techniques.

Mr. MURKOWSKI. Mr. President, the amendment I offer is cosponsored by Senator MCCLURE and Senator BURNS.

The amendment would specifically establish a national energy security plan designed to reduce U.S. dependence on foreign oil, and it has been discussed at length with the minority and the majority floor managers.

Mr. President, the amendment of the Senator from Alaska would specifically establish a national oil import ceiling for crude oil and other oil products of 50 percent of U.S. consumption.

The matter has been cleared on both sides. I defer to the floor manager at this time.

Mr. NUNN. Mr. President, I do not know much about this subject. I hope everyone understands that is because this subject would normally come up on an energy bill.

We have had the Senator from Alaska get in touch with the Senator from Louisiana, Senator JOHNSTON, and I understand Senator MCCLURE, the ranking Republican member, is a cosponsor of this amendment. Senator JOHNSTON has authorized me to say after examining the amendment he has no objection. From that point of view, speaking on behalf of Senator JOHNSTON, we would not object to it being put on this bill.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, in like fashion, on this side of the aisle, we have deferred to the distinguished Senator from Idaho, the ranking member of the Energy Committee, Mr. MCCLURE. He advises me that we should interpose no objection; as a matter of fact, go ahead and urge the adoption of this amendment such that the Senator from Georgia [Mr. NUNN] and I would view it as not the jurisdiction of this committee. Nevertheless, it could be considered germane in some respect to the bill.

On behalf of the chairman and ranking member of the Energy Committee, we interpose no objection.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, I unfortunately have just gotten word that there is objection to this amendment on this side. I just found this out. So I will have to interpose an objection at this point.

I am now getting a contrary message. If I could get the message straight, I would inform the Chair and the Senator from Alaska.

Mr. President, could the Senator from Alaska temporarily withhold his amendment and temporarily set it aside and come hopefully right back to it? I do not believe there is opposition, but we do not have clear word.

Mr. MURKOWSKI. Might I have the assurance, since I have the floor at this time, and we attempted to bring this up last night as well as this morning.

Mr. NUNN. I ask unanimous consent that the amendment of the Senator from Alaska be temporarily set aside and he be recognized on the disposition of the amendment of the Senator from Ohio on military pay.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2517

(Purpose: To increase the amount of the pay raise for members of the uniformed services to 4.1 percent)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN], on behalf of himself, Mr. MCCAIN, Mr. KENNEDY, and Mr. BRADLEY, proposes an amendment numbered 2517.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 52, line 13, strike out "3.5 percent" and insert in lieu thereof "4.1 percent".

On page 39, line 12, strike out "$77,553,700,000" and insert in lieu thereof "$77,853,700,000".

Mr. NUNN. Mr. President, I ask unanimous consent that on the Glenn amendment on pay that there be a 40-minute time limit with the time equally divided between the Senator from Ohio and the managers of the bill, and there be no amendment to the amendment, and that a motion on or in relation to the amendment occur at the conclusion of the time set forth.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, we will have to ask that be withheld for the moment. We hope to achieve that objective. So the Senator can withhold his request for a time agreement. We are optimistic we can get it.

Mr. NUNN. I withhold the request and I hope we get started with the debate. I inform the Senator we will be keeping time with the hope we make it retroactive.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I will not extend my remarks due to lack of a time agreement, I assure the manager.

Mr. President, this is not a pay increase. It is pay equity. It is just keeping even. Those who would call it a big pay increase are wrong. You sometimes hear, as I said earlier, that those of us on the committee feel we are almost in an ombudsman position for our military personnel—trying to make sure they are dealt with fairly. This is a proposal for fairness and for equity.

This proposal would increase military pay recommended in this bill from 3.5 to 4.1 percent just to keep abreast of inflation.

I would draw the attention of my colleagues—and those who are watching in the office of TV—to this chart. I hope they can focus on this disparity. Here is what happened to the military pay versus cost-of-living index, CPI and ECI, going back to about 1983, compared to the civilian counterparts of the military where you can make a comparison. There was a smaller pay difference back in 1983. But year by year, it eroded. Now if we stick with this 3.5-percent raise, we would be 12.6 percent behind in 1991. That means our people in the military will have absorbed a 12.6-percent decrease in pay by 1991.

I know there are those who say that since we are cutting down anyway, why do we pay more when cutting out numbers of people? It does not make sense. But we want to keep good people. We want to keep the people who really do it right. We want the best. We are not going to do that if we let this pay inequity slide further on down.

Mr. NUNN. Mr. President, will the Senator yield one moment for a unanimous-consent request?

Mr. GLENN. Certainly.

Mr. NUNN. Mr. President, I ask unanimous consent there be a period of 40 minutes equally divided on the Glenn amendment, with no amendment thereto, and at the conclusion of the debate on the amendment, the time on the amendment, there be a motion on or pertaining to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I also ask the time so far expired on the Senator from Ohio count against his time.

The PRESIDING OFFICER. The Senator from Ohio has consumed 2½ minutes.

Mr. MURKOWSKI. I ask the floor manager, under the circumstances, my pending amendment be temporarily set aside.

Mr. NUNN. I hope that the unanimous consent did not disrupt the previous unanimous consent which has the amendment of the Senator from Alaska recurring at the end of the Glenn amendment.

The PRESIDING OFFICER. The Chair advises this did not disrupt the previous unanimous-consent request.

The Senator from Ohio.

Mr. GLENN. Mr. President, to draw attention to these figures once again, we are now adding to the slide of the military pay that has occurred since 1983. The bill as it stands will mean the military will be 12.6 behind in pay. That is not fair. All we do by moving this up 3.5 to 4.1 percent in 1991 is keep abreast of inflation, so this line here will remain even, so we do not add a bigger erosion to the military pay erosion than has already occurred.

Mr. President, the administration requested a 3.5-percent military pay increase effective January 1, 1991, in the fiscal year 1991 defense authorization request. That 3.5-percent pay increase recommended by the administration is just not adequate. The 3.5-percent military pay raise falls well short of the 4.8-percent wage growth projected in the private sector for 1991. In other words, the private sector is going up by 4.8 and the administration is not even trying to keep even with inflation, which is less than that.

The projected growth of inflation in 1991 is 4.1 percent as measured by the CPI, Consumer Price Index. So that is all we are trying to do with this, keep even with inflation. It just makes sure there is no further erosion of military pay.

Mr. President, since the last catch-up pay raise for military personnel, which was back in 1981, the administration proposed, and Congress approved, annual pay increases for military personnel that have fallen short of private sector wage increases, as I pointed out on the chart back here. Military pay increases now lag private sector wage increases by 11.2 percent and the gap will grow to 12.6 percent if a 3.5 percent pay raise is all our men and women in uniform receive in fiscal year 1991.

Mr. President, I would like to call the attention of my colleagues to this chart which I also attached to my "Dear Colleague" letter on this amendment. The chart, which I wish to include in the record at this point, graphically depicts this slide in military pay comparability with the private sector. The chart also shows that military pay raises since 1987 have failed to keep pace with inflation as measured by the CPI.

I would like to see us go beyond 4.1 percent, something like 4.8, so we could catch up with something like what the private sector is doing. But we are not even trying to do that because we know the tight budget restrictions we are operating under. That is the reason I offer my amendment—to restrain the erosion of the value of pay to our men and women in uniform by increasing the military pay raise in fiscal year 1991 to match projected inflation.

Mr. President, I wish we could do more than this and close the pay comparability gap. Unfortunately, we are laboring under very difficult fiscal constraints so I think matching inflation is about all we can do this year. However, I want to serve notice to the Department of Defense that I will be pressing very hard in the coming year for a plan to restore military pay to comparability with pay in the private sector.

In this regard, I find it hard to believe that given its own description of the gap between military pay and private sector pay, and the loss in purchasing power of military pay since 1987, that the Department of Defense would characterize its recommended 3.5-percent pay raise for military personnel in fiscal year 1991 in its annual report on the adequacy of pay and allowances for military personnel as "adequate at this time to support our force objectives going into the early 1990's."

In other words, Mr. President, the Pentagon accepts the fact that the pay erosion the military has experienced is something they are happy to live with, and even ready to see it get worse. To me that does not make much sense. We have seen some examples of that attitude by DOD already this year when the Pentagon talked about our most valuable resource being not our hardware, not battleships, not planes, but our people in uniform, the good people we have got in the all volunteer force. And yet this year the Pentagon did not ask for a Presidential exemption on reprogramming that could have exempted the manpower accounts from the Gramm-Rudman-Hollings cuts. DOD says that it gives manpower top priority. But they are not even putting in pay raises high enough to just keep up with inflation.

Another one is CHAMPUS. The administration did not budget enough and had to come back once again with another reprogramming, this time for $750 million. Congress is looking out for the people in the services perhaps more than the Pentagon on many of these issues that deal directly with our people. I plan to look into the underlying basis of this assessment when the Subcommittee on Manpower and Personnel of the Committee on Armed Services, which I chair, considers the pay adequacy report and the associated military pay raise request for fiscal year 1992.

Mr. President, our men and women in uniform will be going through some very uncertain times over the next few years. The bill provides for a regulated strength reduction process to protect the most vulnerable of them as our military forces draw down. The bill also provides a safety net of benefits for those who may be required to be involuntarily separated from the service because of the force draw down. I think the bill should also provide fairly for those who will continue to serve.

Mr. President, as our forces build down over the next few years, I believe it will be even more critical that we keep our Armed Forces combat ready with highly motivated, skilled men and women. It is a matter of equity. In this regard, the $300 milion cost of increasing the military pay raise in fiscal year 1991, to match projected inflation, is a smart investment and a signal to our men and women in uniform and their families that we care about treating them fairly.

I know that under the budget resolution under which we are operating, we have to have an offset. It establishes a funding ceiling if necessary. It is not required that I identify an offset to the cost of the equity pay increase. However, I believe in operating within the funding guidelines of the bill as reported, so I have identified a potential offset.

I understand the distinguished Senator from Arkansas [Mr. BUMPERS] will offer an amendment that I will support that cuts back on SDI. That money could be used to cover this pay equity investment.

Mr. NUNN. Mr. President, would the Senator allow for a brief yielding on my time to the Senator from Alaska who has been patiently waiting? He has now cleared his amendment and we would like to wrap that up.

Mr. GLENN. I would be happy to.

AMENDMENT NO. 2516

Mr. MURKOWSKI. It is my understanding that my amendment is before the body.

The PRESIDING OFFICER. The Chair will advise the Senator that that would require another unanimous consent.

Mr. MURKOWSKI. I ask unanimous consent that my amendment which was pending previously and the amendment pending by the Senator from Ohio be very, very temporarily set-aside.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Ohio will be temporarily

set-aside. The pending business will be the amendment previously offered by Senator from Alaska.

Without objection, the Senator from Alaska is recognized.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent to add the cosponsorship of Senator BENTSEN, Senator MCCLURE, and Senator NICKLES to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I rise in support of the amendment by the Senator from Alaska. It is modeled on legislation that I first proposed in 1987. It was necessary then—and it is even more necessary now.

Mr. President, the events of the last 48 hours have underscored what I have been saying for years: The United States is slipping inexorably into excessive dependence on foreign oil The news of the last few days makes our vulnerability more evident and our response more urgent.

Three years ago, I introduced the Energy Security Act, which would have required the President—in advance of crossing a 50-percent import penetration level—to submit to Congress a plan to prevent imports from reaching that level. I introduced that legislation because—even at that time—it was clear to me that we were reaching a dangerous dependence on foreign oil, and we needed to plan for the future.

I brought that legislation to this floor and 41 of us supported taking that strong action. Well, now we have reached a crisis in the Middle East and we still do not have a plan. I wish we had acted before, but I support the amendment by the Senator from Alaska, which would at least help give us a plan to reduce our vulnerability to foreign oil.

The Senator's amendment is very much like the legislation 41 of us supported 3 years ago. Under the amendment, if U.S. dependence on foreign oil exceeds 50 percent for any 6 months within a continuous 12-month period, the President would be required to submit an action plan to Congress designed to reduce oil imports below the 50-percent danger level. The action plan would then be submitted to Congress for its consideration.

The action plan may include various measures, including energy conservation measures, production incentives for domestic oil, royalty reductions, a schedule for leasing Federal land tracts for oil and gas discovery, and other measures. The amendment does not require these actions. It does not restrict the President to these actions. But it does require that he recommend clear action to reduce our dependence on foreign oil below the danger level.

Mr. President, we simply must learn the lessons of history. During the 1973 oil embargo we learned the painful lesson of what happens when America is too dependent on foreign oil. We all remember the long lines at the gas pumps and skyrocketing fuel prices. We all learned how it threatens our national security.

But we seem to have forgotten the experience of the 1970's and we have allowed ourselves to drift back into a position of vulnerability like the one we faced at that time.

The events in Kuwait pointedly remind us of our vulnerability. But, in fact, that vulnerability has been growing in a dangerous fashion for some time.

U.S. dependence on foreign oil has risen dramatically in the past 5 years. In 1985, approximately one-quarter of our oil was imported. Today we are importing one-half of our oil. Even during the height of the Arab oil embargo in 1979, imports were only 43 percent. That was considered a crisis. But today we are already past that crisis—and the new crisis in Kuwait is just beginning.

Meanwhile, oil production here at home has plunged to the lowest level since 1962. The fall has been particularly dramatic in recent years. Since 1986, domestic exploratory drilling has plunged by three-quarters and domestic production has fallen 15 percent. Alaskan production—which previously had offset the declines in the other 48 States—peaked in 1988 and began declining last year for the first time, leading to a 6-percent drop in domestic production.

Most experts now predict that we will annually and regularly import more than one-half of our oil. The events in the Persian Gulf today underscore the dangers of becoming that dependent on foreign oil.

Mr. President, there are many reasons to prevent excessive dependence on foreign oil. But none is more important than the need to ensure our national security.

My concern for this Nation's energy security is shared in many quarters. The Department of Energy concluded emphatically 2 years ago that there existed a very real threat to the security of the United States from overdependence on imported oil—and, since then, the situation has just gotten worse.

What particularly concerns me is that we are letting our national energy security depend on a man like Saddam Hussein, a dictator, a man with a record of brutality and a complete disregard for the rules of civilized nations. Can we risk trusting our national energy security to man like that? We would never do that intentionally. But we are doing so implicitly by permitting ourselves to become so dependent on Middle East oil.

Mr. President, I am also concerned about the effect of increasing energy dependence our our competitiveness as a nation. Last year, energy imports totaled $43 on a net basis—fully 40 percent of our $108 billion merchandise trade deficit. Net energy imports in 1989 were up 30 percent over 1988, and they are running 21 percent higher this year.

At that pace, net U.S. oil imports will total $50 billion this year, accounting for about one-half of the trade deficit. If this trend continues, the Nation's deficit in imported oil in 1990 will exceed our trade deficit with Japan.

Mr. President, last night many Senators came to the floor to deplore the invasion of Kuwait. They recognized that it raised the specter of global energy instability. I agree.

But the point was made that talk is cheap—and I agree with that too. You cannot have it both ways. You cannot decry actions like those in Kuwait, but do nothing to protect us against excessive dependence on foreign oil.

Mr. President, we simply must stop this downward spiral into the abyss of energy dependence. Three years ago, we should have required the President to present an energy action plan when our dependence on foreign oil reached the 50-percent danger level. We certainly should do so today.

I urge my colleagues to support the amendment.

Mr. McCLURE. Mr. President, I rise in support of the amendment offered by the Senator from Alaska [Mr. MURKOWSKI] which would require the President to establish a national energy security plan to reduce our dependence on foreign oil supplies to a level which does not pose an unacceptable threat to our national security.

Upon a finding that our imports of crude oil and petroleum products exceed 50 percent of U.S. consumption over a 6-month period, the amendment would require the President to submit an energy production and security action plan to the Congress which identifies the specific actions to be taken to reduce our import dependence below the trigger level.

Mr. President, it is clear that we must take this action to help protect our energy and economic security. Since 1973, total U.S. oil production has declined by 20 percent, and lower 48 oil production has fallen by an astounding 38 percent.

It is clear from our growing dependence on foreign oil that our economy and national security is increasingly at risk. In 1973, the year of the Arab oil embargo, the United States was 36 percent dependent on imported oil; in 1979, the year of the Iraq-Iran war-induced oil shortage, we were 46 percent foreign dependent; and this year; we are now slightly more than 50 percent dependent. And the predictions are that in just a few years, we will likely

be two-thirds foreign dependent, that is unless we begin now to take action.

Mr. President, no commodity is more essential to a modern society than energy, yet it is largely taken for granted, until we are told we will have to do with less or have to pay sharply higher prices.

Like in 1973 and in 1979, we are today facing the prospects of another significant oil price disruption and price run up. As we all know from news reports, once again the Persian Gulf is in the middle of a crisis which threatens world oil supplies. Saddam Hussein has sent part of his million-man army into Kuwait to take over that oil-rich, but militarily weak country. Kuwait is but a few hundred miles from the oil fields of Saudi Arabia, Qatar, the United Arab Emirates, and the other oil-producing gulf countries.

In this context, it is important to note that what is motivating Iraq is not a political dispute with Kuwait, but instead is largely a desire for higher oil prices driven by a need for revenues. And if their incursion into Kuwait does not succeed, who knows who next Iraq will threaten or where next they will invade.

Iraq and Kuwait together account for 10 percent of the free world's oil supplies. Altogether, the oil-producing countries of the Middle East account for nearly 40 percent of the free world's oil supplies.

The 1973 Arab oil embargo reduced world oil supplies by 1.6 million barrels per day and quadrupled oil prices; the 1979 supply disruption cost the world 3.7 million barrels per day of supply, and tripled the price of oil. Iraq and Kuwait together produce 5.2 million barrels per day of oil, and who knows what impact the shut off of that oil would have on prices, to say nothing if the entire Persian Gulf supply is disrupted.

As a result of our concerns about the situation there, and the potential impact on international oil supplies, the United States now has increased from six to eight U.S. Navy warships in the Persian Gulf, and has ordered the attack aircraft carrier battle group led by the U.S.S. *Independence* to proceed to the mouth of the gulf.

For a number of years now I have been saying that we need to develop and implement a national energy strategy which promotes the production of all forms of energy: oil, natural gas, hydropower, nuclear power, and so forth. I think that it is fair to say that my concerns about our short- and long-term energy needs have been pooh-poohed by many as being excessive. Some States believe that it is all right to shut down operable nuclear powerplants; others believe that it is OK to impose offshore leasing moratoria; and on a national level, still others are comfortable imposing new clean air requirements which not only constrain future energy development, but also may well result in the closure of existing facilities, refineries in particular. But the events of the last few days clearly demonstrate otherwise.

Mr. President, it is clear that this Nation and the other nations of the industrialized world are threatened by developments in the Persian Gulf. These events underscore once again the fragility of the economies of the Western World and the marginal supply of energy that fuels it. It is clear that we must begin to take action to stabilize, and begin to reduce, our foreign oil dependence and vulnerability. It is likewise important that we preserve the strategic petroleum reserve for the purposes for which it was originally intended, that of responding to international disruptions of oil supplies.

It is for these reasons that I strongly support the amendment of the Senator from Alaska and urge my colleagues to vote for it.

Mr. DOMENICI. Mr. President, I am pleased to cosponsor the amendment offered by Senator MURKOWSKI and MCCLURE. This amendment would finally put into place an Energy Secuirty Policy. It establishes a 50 percent percent peril point or import ceiling. It creates a mechanism for putting into place specific actions to reduce our dependence on foreign oil to a level below that peril point.

Each year when the President transmits his budget to the Congress, he would be required under this amendment to include a forecast of domestic oil and gas production, and the level of imports for the subsequent year. The report would include the likelihood of imports exceeding the peril point during the next year and the actions which the President would take to maintain crude and oil product imports below the peril point.

Congress would be required to vote on the plan.

This amendment draws a line in the sand. It says to the world that a level of energy dependence greater than fifty percent presents a danger to America's national security and requires an effective, certain policy response.

Specifically, the President could submit a plan with recommendations for an oil import fee or tax incentives for exploration and development, for maintaining the stripper production and for enhancing production through enhanced oil recovery techniques.

This legislation is long overdue. We tried to enact it in 1987.

Mr. President, I want to read a statement I made on the Senate floor on June 2, 1987, when the Senate was considering some very similar provisions. At that time the Senate was debating the trade bill and Senator BENTSEN and I were defending the Energy Security Act of 1987—provisions very similar to the amendment that I am cosponsoring today.

At that time I said:

> Our current energy policies do not protect our economic and national secuirty. We are losing our domestic industry at the hands of the OPEC cartel, our oil imports are soaring, and recent events in the Persian Gulf show the fragility of that region to disruptions in world oil supplies.

At that time we were spending $40 billion a year to keep the shipping lanes of the Persian Gulf open. We were about to provide American flags for Kuwaiti tankers traveling through a free-fire zone. We were mourning the tragic death of 37 Americans who lost their lives in an unprovoked attack in the Gulf.

This week Saddam Hussein invaded Kuwait. The situation is uncertain at best. In response to the hostilities in the region the United States has increased our naval presence in the Pesian Gulf—once again. We have added two more U.S. Navy warships and ordered the aircraft carrier *Independence* to proceed to the area.

As Yogi Berra was fond of saying, "I feel like deja vu all over again."

As in 1973 and 1979, in 19909 we are once again facing the prospects of another oil price disruption. In the past few days, gasoline at the wholesale level is up 11 cents a gallon because Saddam Hussein has sent his army into Kuwait to take over that oil rich country. Kuwait is a few hundred miles from the oil fields of significant oil producing Gulf countries.

While there is no imemdiate threat to the supply of petroleum for American consumes, we are vulnerable because of our heavy reliance on imported oil.

CRS in 1987 estimated that a 1973-style embargo would cost the United States $700 billion in lost GNP, 2 million jobs, and a doubled rate of inflation.

While history has given us a few economically devastating lessons in the form of the 1973 and 1979 embargoes, we have not learned much.

We have allowed our domestic industry to deteriorate. Since 1973, total U.S. oil production has declined by 20 percent. Rig counts are at the lowest level in 50 years. Imports accounted for 42 percent of U.S. oil consumption in 1989 and are projected to increase to 54 to 67 percent by 2010 according to the Department of Energy.

Mr. President, I am very pleased that the Senate has included this amendment to the Defense bill. I am hopeful that when the budget summit resumes its negotiations the topic of implementing specific oil and gas incentives will be considered.

Thank you, Mr. President.

Mr. MURKOWSKI. I also ask unanimous consent that Senator GRAMM and Senator BURNS be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (2516) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. MURKOWSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2517

The PRESIDING OFFICER. Pending is the amendment of the Senator from Ohio [Mr. GLENN]. Senator GLENN is recognized.

Mr. GLENN. Mr. President, to wrap this up, I mentioned that an offset is possible from the SDI reduction that will be proposed by Senator BUMPERS. I would propose using that money to cover the cost of my amendment. I hope the SDI amendment passes, but even if it does not, there will be other amendments that will free up funds that could be applied to the cost of paying for the military pay raise. Therefore, I urge my colleagues to join me in supporting fair compensation to our men and women in uniform by voting for this amendment.

Mr. President, Senator MCCAIN wanted a few minutes. I think Senator KENNEDY can finish his statement in a couple of minutes.

Mr. WARNER. Mr. President, if we might just follow the current situation of going back and forth, I will yield to Senator KENNEDY and I would like to follow the Senator from Massachusetts, if it is agreeable, then the Senator from Arizona.

Mr. GLENN. I yield 3 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I thank the Senator from Ohio.

I commend the Senator from Ohio and urge our colleagues to support this measure. As we are going to be restructuring the military forces of our country to meet the current challenges which we are facing today that are considerably different from what we were facing some years ago, it is imperative, I believe, that we do not lose the competence and the determination and the skill of the members of the military forces.

It ought to be very, very clear to them, on measures of financial security and support for the wide range of different family issues, that we here in the Senate and in Congress are going to indicate our strong support. Quite clearly, the issue of compensation, of just keeping level, is one of the most basic and fundamental of those questions.

I think the amendment is correct on the basis of equity in demonstrating our concern to them that they not be placed at a further disadvantage because of increases in inflation. We are going to be facing these kinds of issues all along the way as we restructure our forces.

I commend the Senator from Ohio for recognizing this. Whether it has been this issue, the child care program, or the educational benefit program, the Senator from Ohio has been there on these issues.

I think it is important that the Senate speak very clearly in support of this measure because of the message that it sends not only to the pockets and pocketbooks of the members of the Armed Forces but it is a strong and important message that we intend to stand by them. They are, after all, the backbone of the security of our Nation.

So I thank the Senator from Ohio. I urge my colleagues to support the amendment.

Mr. GLENN. I thank the distinguished Senator from Massachusetts for his comments and his work on our subcommittee along this same line.

Mr. WARNER. Mr. President, if I might have a word or two?

Mr. GLENN. Mr. President, who yields time on this?

The PRESIDING OFFICER. The managers of the bill have 17 minutes remaining. The Senator from Ohio has 7½ minutes remaining.

Mr. WARNER. Mr. President, I yield myself such time as I may require.

Mr. NUNN. Mr. President, I ask the Chair to notify the managers when we are down to 5 minutes remaining.

Mr. WARNER. Mr. President, the distinguished Senator from Georgia [Mr. NUNN] and I have to oppose this amendment. We do so because the Secretary of Defense has made it unequivocally clear, by letter to the Senate, of his objections. I would like to read the letter, dated August 2.

DEAR MR. CHAIRMAN: The President's FY91 budget request included a 3.5 percent military pay raise which supports the Department's long term objective to keep military pay and allowances comparable to private sector compensation. We believe 3.5 percent is the appropriate increase for FY91.

The House Armed Services Committee included a 4.1 percent military pay increase in the FY91 Defense Authorization bill recently reported out of committee. The additional cost in 1991, for active duty members alone, would be $314 million. The total budgetary impact of the increase is not restricted to basic military compensation. It also drives increases in the retired pay accrual fund, reserve pay, and certain special pays, and will create significant increased costs in the future.

My goal is to reduce the size of the force to meet changing requirements, but to do so in a deliberate manner, without causing an unncessary increase in involuntary separations. Unfortunately, when operating under current fiscal constraints, an increase in the proposed FY91 pay raise to 4.1 percent would require additional offsets in end strength.

Therefore, Mr. President, I ask the Senate consider this will not become a conferenceable item, if the Senate were to adopt this amendment. The Senate conferees' hands would be tied. It would become law, and they would then be compelled to go further into the end strength reduction. For those reasons we have to oppose it.

The PRESIDING OFFICER. The Chair will advise that the Senator from Georgia has 14½ minutes remaining, the Senator from Ohio has 7½ minutes remaining.

Mr. GLENN. I yield such time as he may require to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. MCCAIN. Mr. President, I am pleased to cosponsor this amendment along with the distinguished chairman of the Manpower Subcommittee of the Armed Services Committee. Senator GLENN has displayed his leadership on this, and many other issues, in this very difficult time of transition.

Mr. President, we are undergoing a period of unprecedented transition in the history of the men and women of the armed services. We are, for the first time telling men and women who have decided to make the military a career, and who are all volunteers, that their services will no longer be needed. Some 100,000 to 150,000 men and women will be separated from the service during the next year, many of them in an involuntary fashion.

Mr. President, if we go to the military bases, the ships, and the other establishments that compose our defense establishment, we find this turbulence in our manpower policy causes enormous uncertainty, tremendous concern, and all of which is understandable. These men and women no longer can predict their futures and we have added insult to injury by failing to give them a pay raise which is sufficient to keep up with inflation.

This failure is part of a 7-year record of letting pay fall behind inflation. It is a failure which has resulted, as Senator GLENN stated, in an 11.2-percent real decrease in military incomes during that period.

Mr. President, I do not intend to describe the demographics of our military establishment in detail. Let me point out, however, that most of our military are not colonels or generals, but young men and women. Many have families. Many are single parents. Most have great difficulty in surviving in today's economy, having experienced a real decrease in their incomes over the past few years.

I might add that most of our men and women believed, when they volunteered for the military, that their pay

scale would keep up with inflation. This, as Senator GLENN has so graphically demonstrated, has not been the case.

Mr. President, I am not in the business of pointing out detailed places where money can be saved. But, let me give some examples. Take the $200 million we are authorizing for the strategic environmental research program. This program may be a worthy cause but it is scarcely the mission of the Department of Defense. Take the add-ons to our milcon projects which include a long series of $5, $10, and $50 million projects. After all, what we are taking about in terms of total cost is $300 million of additional cost during the next year, $300 million out of a total budget of over $280 billion.

Mr. President, I think we can afford $300 million for the men and women in the military today; $300 million addition out of more than $280 billion budget. I think we owe it to them. I think it is fair.

If there is ever a time, Mr. President, when we need to send a signal to the men and women of the military that we cherish and value their service to our Nation, it is now. I think that would be a critical and valuable message to send to our military at this particular time in history.

I might also add that many of them are looking at the news at this minute and are wondering today whether they will again be called upon to risk their lives in combat in the defense of someone else's freedom. They will continue to harm their lives long after this crisis is over. Their risks are not vanishing with the cold war.

Mr. President, let us give them this annual pay raise, if only to keep up with 1 year of inflation, which it barely will. Let us send the kind of signal to the men and women in the military that they are, indeed, our most important resource. Let us be fair. We are dealing with people, not paying for equipment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio has 5 minutes remaining.

Mr. GLENN. Mr. President, I yield myself 2 minutes.

I want to respond to the remarks of the distinguished Senator from Virginia, talking about the letter yesterday from the Secretary of Defense. The Secretary of Defense, with all due respect, is just flat wrong in his statement, what he says in the first paragraph. He says they "included a 3.5-percent military pay raise which supports the Department's long-term objective"—listen to this—"to keep military pay and allowances comparable to private sector compensation." He says, "3.5 percent is the appropriate increase for fiscal year 1991."

Mr. President, that is just flat wrong. I use the Defense Department's own figures right here to show how wrong they are and what has happened since 1983, the steady downhill slide for the men and women of the services as far as what their pay is. If we go with Secretary Cheney's recommendation of 3.5 percent when we go from this line here down to this line here, we increase that erosion of pay even further.

So the Secretary of Defense is just not correct. I do not know who wrote this letter for him, or if he wrote it himself, but that is just not a statement of fact.

I said before, it is a matter of equity, a matter of fairness. We are not trying to recover all that has been done in the past in this one year when we have all these budget constraints, but now at least let us not let it get worse.

I identified a source on this. We will be having shortly a vote on SDI. We will be coming up with several other things we are voting on here, but I think SDI will be a likely candidate for how to pay for the pay raise because the funds reduced will come out just about even.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Ohio has 1½ minutes remaining; the Senator from Georgia has 14 minutes remaining.

Mr. NUNN. I thank the Chair. Senator WARNER has already read from the letter of Secretary Cheney, but I want to emphasize the particular part of the letter from Secretary Cheney that I think is decisive, in my mind, in trying to decide how to vote on this amendment.

Secretary Cheney says, "3.5 percent is the appropriate increase for fiscal year 1991." He goes on to say:

> My goal is to reduce the size of the force to meet changing requirements, but to do so in a deliberate manner, without causing unnecessary increase in involuntary separations. Unfortunately, when operating under current fiscal constraints, an increase in the proposed fiscal year 1991 pay raise to 4.1 percent would require additional offsets in end strength.

That means, in effect, we tell the men and women of the military, with this vote if we agree to it, the good news is we are going to go from 3.5 percent to 4.1 percent in your pay. The bad news is an awful lot of you are going to be involuntarily retired and will never get it.

We already are taking 100,000 people out of the force structure. According to the information I have received from the Department of Defense, if we have to pay for this increase from the manpower account, and when you look at both bills and you look at the chemistry between the House and Senate and look at the conference, it is my opinion—no one can prove it—it is my opinion, in the final analysis, we will have to pay for this pay increase out of the manpower accounts. When you do that, that means that 30,000 people are going to get pink slips and not be able to remain in the military because we have raised it from 3.5 to 4.1 percent.

Perhaps there will be a quarrel on this. That is my opinion about how it will all shake down in the final analysis.

Mr. President, I understand Secretary Cheney's position. The cost of the 3.5-percent military pay raise in the budget for fiscal year 1991 and what we have in our bill now is $1.8 billion. The cumulative cost of this raise over 5 years, and that is what we have in the bill at the moment before this amendment, is $11 billion. Both of these figures take into account the strength reductions recommended by the committee. That means that we have anticipated cuts in order to figure how much this is going to cost to give these raises that are already in the bill.

Increasing the military pay raise to 4.1 percent in fiscal year 1991 would add $300 million to manpower costs in fiscal year 1991. That is not the big problem, though. I think it could be accommodated for 1 year. The problem is it is $2 billion to the cumulative cost of manpower over the next 5 years; $2 billion.

This budget squeeze is going to get worse. In theory, the Senator from Ohio is absolutely correct. He is right. We ought to be raising the military to 4.1. They deserve it. The men and women in the military deserve it.

I have joined with Senator WARNER, Senator MCCAIN, Senator GLENN and others in promoting the whole theory of pay equity. Senator WARNER and I started back in 1979 working on a whole package of pay incentives, including the variable housing allowance which became law and helped turn around the severe morale and quality problem we were developing in the military.

I cannot in good conscience support this amendment under the fiscal squeeze we are in now because if we do, we are really kidding people. We are saying we can afford to pay you 4.1 percent, but we are not telling them directly this is going to mean an awful lot more if you are going to be laid off and involuntarily terminated; 30,000 this year. But by the time we count the $2 billion and we look at the fiscal squeeze we are in and look at the summit conference and what they are doing and the fact we are probably going to have to take more out of defense than we have already taken out of this bill, we are basically talking about increasing the pay to 4.1. And to pay that $2 billion over 5 years, we are talking about laying off an enormous number of military men and women who would otherwise not have to be terminated.

So, Mr. President, I respect what the Senator from Ohio is doing. I know there is a case for what he is doing. I respect his leadership as head of the Manpower Subcommittee. In theory he is absolutely right. In practice, I think this amendment is counterproductive. I believe it is going to be more harmful to the men and women of the military than helpful.

I believe that when you see a large number of people get involuntary separations, the small amount of money that people are going to get in raising from 3.5 percent, which is in the bill, to 4.1, is not going to compensate for the feeling that the military men and women will have who remain, who are not involuntarily separated but they are going to think we are next. They are going to think we have no job stability. They are going to think my buddies are all being drummed out of the military; they did not think they were going to be terminated, can I afford to stay?

So I think this amendment, as well-intentioned as it is, and as correct in theory as it is, and as much as the men and women in our military uniform deserve it, I do not believe we are doing them any service by agreeing to it, and I urge its defeat.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. If I might yield to myself such time as is required.

The PRESIDING OFFICER. The Senator from Georgia has 8 minutes 45 seconds remaining.

Mr. WARNER. Mr. President, I think any time we address an issue of this importance, we should also know the facts as they relate to the civilians who work in the U.S. military and, therefore, I ask the distinguished chairman to respond on his time, what is the intention of the various committees of the Congress, particularly the Senate, with respect to the civilians?

My understanding is the Senate Appropriations Committee is going to adhere to the President's request of 3.5 and, therefore, were this amendment to carry, it would be in sharp contrast to what is being done to the civilians.

Mr. GLENN. Will the Senator yield?

Mr. WARNER. Yes.

Mr. GLENN. I only say this vote might be a guide for them to help make up their minds.

Mr. WARNER. It may be a guide but, on the other hand, we build an inequity in the two structures in the Department of Defense which causes frictions and problems. Recognizing the fiscal restraints across the board, that is further reason to continue to adhere to the parallelism between the two categories of personnel.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. I yield myself such time as I have remaining.

Let me respond to Mr. Cheney's letter. He says it will require offsets in end strength. I do not accept that at all because that is not the case. It is not going to cause involuntary separations.

I already identified one other area in the budget where I think we can get the money from, and I am sure there are others we can tap if this amendment is agreed to. Raising the specter for our people out there in the services that they have to choose between seeing a lot of people involuntarily separated or not getting their pay raise, that just is not the choice that I see. I want to see this come out of other functions. I would rather see it out of SDI. I think we have to keep faith with our people there.

I refer once again to the chart back here. Here is what happens if we do not do this. It means the pay erodes even further for our military, as it has over the past 8 years. Here we are still going down hill, and still saying how fairly we want to treat our people in the military, which we are just flat not doing.

So, Mr. President, I do not think there is any need to prolong the debate. If the floor managers are prepared, I am prepared to yield back whatever time I have, if any. I am probably over my time now.

The PRESIDING OFFICER. The Senator from Ohio has 2 seconds remaining.

Mr. GLENN. I yield back.

Mr. NUNN. Why does the Senator not go ahead and use all his time?

The PRESIDING OFFICER. The Senator from Georgia has 7½ minutes.

Mr. NUNN. I assure the Senator from Ohio I will yield as much additional time as he needs out of my time. I will yield him 5 minutes.

Mr. GLENN. We are prepared to yield back. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, how much time do I have remaining.

The PRESIDING OFFICER. The Senator from Georgia has 6½ minutes remaining.

Mr. NUNN. Mr. President, I yield back the remainder of my time, and I move to table the amendment on behalf of Senator WARNER and myself. I ask for the yeas and nays on the tabling motion.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in his family.

The PRESIDING OFFICER (Mr. ROBB). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 67, nays 32, as follows:

[Rollcall Vote No. 214 Leg.]

YEAS—67

Akaka	Durenberger	McClure
Armstrong	Exon	Mikulski
Baucus	Fowler	Mitchell
Bentsen	Garn	Murkowski
Bond	Gore	Nickles
Boren	Gorton	Nunn
Boschwitz	Graham	Packwood
Bryan	Gramm	Reid
Burdick	Grassley	Robb
Burns	Hatch	Rockefeller
Byrd	Heinz	Roth
Chafee	Helms	Rudman
Coats	Humphrey	Shelby
Cochran	Inouye	Simpson
Cohen	Kassebaum	Specter
Conrad	Kasten	Stevens
D'Amato	Kerrey	Symms
Danforth	Kohl	Thurmond
DeConcini	Levin	Wallop
Dixon	Lieberman	Warner
Dodd	Lott	Wirth
Dole	Lugar	
Domenici	Mack	

NAYS—32

Adams	Heflin	Moynihan
Biden	Hollings	Pell
Bradley	Jeffords	Pressler
Breaux	Johnston	Pryor
Bumpers	Kennedy	Riegle
Cranston	Kerry	Sanford
Daschle	Lautenberg	Sarbanes
Ford	Leahy	Sasser
Glenn	McCain	Simon
Harkin	McConnell	Wilson
Hatfield	Metzenbaum	

NOT VOTING—1

Bingaman

So the motion to lay on the table amendment No. 2517 was agreed to.

Mr. NUNN. I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2518

(Purpose: To grant a Federal charter to the 82d Airborne Division Association, Incorporated)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes amendment numbered 2518.

Mr. THURMOND. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, add the following:

CHARTER

SECTION 1. The 82nd Airborne Division Association, Incorporated, a nonprofit corporation organized under the laws of the State of Illinois, is recognized as such and is granted a Federal charter.

POWERS

SEC. 2. The 82nd Airborne Division Association, Incorporated (hereinafter in this Act referred to as the "corporation"), shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall include—

(1) perpetuating the memory of members of the 82nd Airborne Division who fought and died for our Nation,

(2) furthering the common bond between retired and active members of the 82nd Airborne Division,

(3) providing educational assistance in the form of college scholarships and grants to the qualified children of current and former members,

(4) promoting civic and patriotic activities, and

(5) promoting the indispensable role of airborne defense in our national security.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the State or States in which it is incorporated and the State or States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. (a) Subject to subsection (b), eligibility for membership in the corporation and the rights and privileges of members of the corporation shall be as provided in the consitution and bylaws of the corporation.

(b) Terms of membership and requirements for holding office within the corporation shall not discriminate on the basis of race, color, national origin, sex, religion, or handicapped status.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The composition of the board of directors of the corporation and the responsibilities of such board shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The positions of officers of the corporation and the election of members to such positions shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation may inure to the benefit of any member, officer, or director of the corporation or be distributed to any such individual during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual and necessary expenses in amounts approved by the board of directors.

(b) The corporation may not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents whenever such officers and agents have acted within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep, at its principal office, a record of the names and addresses of all members having the right to vote in any proceeding of the corporation. All books and records of such corporation may be inspected by any member having the right to vote in any corporation proceeding, or by any agent or attorney of such member, for any proper purpose at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(74) 82nd Airborne Division Association, Incorporated.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as the report of the audit of the corporation required by section 2 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101). The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND, ALTER, OR REPEAL CHARTER

SEC. 13. The right to amend, alter, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF STATE

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1986.

TERMINATION

SEC. 16. If the corporation fails to comply with any of the restrictions or provisions of this Act, the charter granted by this Act shall expire.

Mr. THURMOND. Mr. President, I am pleased to offer as an amendment to the Department of Defense authorization bill, legislation which would grant a Federal charter to the 82d Airborne Division Association. I introduced identical language as a bill (S. 82) on January 25, 1989. On October 5, 1989, S. 82 passed the Senate as an amendment to S. 1711, a bill to implement the President's 1989 national drug control strategy. S. 82 also passed the Senate as a free-standing bill on November 3, 1989 with the bipartisan support of 52 cosponsors and is currently pending in the House Judiciary Committee.

The 82d Airborne Division was activated initially as an infantry division which participated in three of the major campaigns of World War I: Lorraine, St. Michiel, Meuse-Argonne. On May 27, 1919, the 82d Airborne was inactivated. The division was reactivated on March 25, 1942, under the command of Maj. Gen. Omar Bradley and became the Army's first airborne division under the command of Maj. Gen. Matthew B. Ridgway. Deployed to North Africa in 1943, the 82d made parachute and glider assaults on Sicily and Salerno. In a 2-year period during World War II, the regiments of the 82d saw action in Italy at Anzio, in France at Normandy, where I landed with them, and at the Battle of the Bulge.

Following the end of the war, the sky soldiers of the 82d were ordered to Berlin to serve as "America's Guard of Honor" for 5 months of 1945. Due to logistical problems associated with the servicing of an airborne division overseas, the division returned to the United States where it was greeted with a New York City tickertape reception as it marched triumphantly on Fifth Avenue, on January 12, 1946.

The division was assigned to Fort Bragg, NC, to become a leading element of the Nation's military reaction force as well as to participate in a number of peacekeeping missions. Elements of the division have valiantly served in Korea, the Dominican Republic, Vietnam, and Grenada. Peacekeeping units have served in Sinai.

Designed to move quickly to any part of the world and to be prepared to fight immediately upon arrival, the members of the 82d Airborne have served with distinction for over 45 years. They have demonstrated a tireless commitment to our Nation's de-

fense and ideals. Therefore, I can think of no other military association more deserving of the recognition given by Congress in the granting of a Federal charter. I urge my colleagues to join me in supporting the passage of this amendment to grant such a charter to the 82d Airborne Division Association.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I think this is an excellent amendment. I urge its support.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment (No. 2518) was agreed to.

Mr. THURMOND. I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, in a moment I will propound a unanimous-consent agreement. I believe the Senator from Arkansas and I have an understanding on this. It would be my intent to, in a moment, propound an agreement that would have 40 minutes on this amendment with the time equally divided, with a reservation for a second-degree amendment by Senator WARNER, which would be germane to the amendment.

Mr. BUMPERS. With no tabling motion in order.

Mr. NUNN. We have not been doing that, but do I not mind an up-or-down vote on this amendment.

Mr. BUMPERS. What is the nature of the second-degree amendment?

Mr. WARNER. The nature of the second-degree amendment is, recognizing the uncertainties in fiscal year 1992, that we constrain the goals of the Senator from Arkansas to a single fiscal year; namely, the Senator from Virginia would propose that we take out but one battleship at this time and retain flexibility in the hands of the President and Secretary of Defense to make such decision, as they feel prudent, for the second fiscal year.

Mr. BUMPERS. Is the Senator talking about the first or second one?

Mr. WARNER. Leaving the second one and taking the first. The amendment of the Senator from Virginia would provide for elimination of one battleship in fiscal year 1991.

Mr. BUMPERS. Then leaving discretion with the Secretary in 1992 on the other one?

Mr. WARNER. By virtue of leaving nothing in there, the discretion is reposed in the Commander in Chief.

Mr. NUNN addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia has the floor.

MEMORANDUM OF AGREEMENT BETWEEN THE NAVY AND SAN DIEGO CHILDREN'S HOSPITAL

Mr. WILSON. Mr. President, I would like to engage the distinguished ranking member of the Armed Services Committee in a colloquy concerning the provision of medical services for the families of our military personnel, namely pediatric trauma and specialty acute care for dependents of Navy personnel in the San Diego area.

Mr. WARNER. Mr. President, I would be happy to engage in a colloquy with my good friend, the Senator from California, on this very important subject.

Mr. WILSON. Mr. President, with pressing budget constraints and with the cost of providing health care rising, the Navy faces increasing challenges in its efforts to provide specialty services such as pediatric acute care. Yet, a top priority for Navy personnel is assuring the availability of quality health care for their spouses and children. I know that the Senator from Virginia shares my concern that members of the military and their families should have access to the best possible medical care.

A unique situation exists in our States in this regard. Both San Diego and Norfolk have a large Navy presence. In both communities, the military looks to the private sector health care community for specialized pediatric services. Although the Navy hospital is able to provide most of the necessary pediatric care, it faces a shortfall in supplying specialized and acute care medical services. Members of the House Armed Services Committee have expressed their concern in this matter and encouraged the Navy to enter into a memorandum of understanding for the provision of such services. Also, the Navy was directed last year by Congress to conduct a study to determine if existing facilities and equipment are sufficient for the provision of specialized pediatric care. I have reviewed this report recently and am concerned with its conclusion that the Navy hospital can offer only between 85 to 90 percent of these specialized services.

Mr. WARNER. Mr. President, I understand and appreciate the situation which the Senator from California describes. The main consideration is that the families of military personnel should have access to the highest quality medical care, including trauma care and other specialized treatment. At the same time, this medical care should be provided as cost-effectively as possible.

Mr. WILSON. Mr. President, an available solution for this problem is the initiation of public-private partnerships geared toward insuring that trauma and acute care services remain available. In this partnership, financial resources from both public and private entities are combined to ensure that the supply and availability of medical care, such as specialized pediatric services continue. The Congress has recognized the benefits of public-private partnerships and has passed legislation in 1985 authorizing them in instances where medical services can be provided more efficiently and at lower cost. In San Diego, this arrangement would be cost-effective for the Federal Government because hospitals presently exist that specialize in this type of care. Consequently, the naval hospital would be freed from committing extensive resources for purchasing duplicate equipment and contracting out to provide these specialty services in house.

Mr. WARNER. I agree with the Senator from California.

Mr. WILSON. Providers of acute care services in San Diego are overwhelmed with demand for services, and need to expand in order to continue to admit and treat children. The alternative to meeting this pressing demand is that children will have to go outside the San Diego area to receive acute care, which adversely affects the morale of Navy personnel. My concern is that health care should be readily available for the children of the area, including both civilian and military, and the public-private partnership seems a sensible and cost-effective method with which to address the present shortfall of trauma and acute care services and guarantee the continued access to medical care for children that need it.

Mr. WARNER. Mr. President, I appreciate the comments of the Senator and his suggestion of an innovative solution for this problem. I look forward to working with the Senator from California on this matter and to ensuring that our military families receive the specialized health care they need.

Mr. WILSON. Mr. President, I thank the Senator for his attention to this matter and I also look forward to working with him.

SANTA BARBARA NAVAL RESERVE CENTER

Mr. WILSON. Mr. President, I rise to engage the distinguished ranking member of the Armed Services Committee in a colloquy concerning the status of the Santa Barbara, CA, Naval Reserve Center.

Mr. WARNER. I am pleased to respond to the Senator from California on this matter.

Mr. WILSON. The Naval Reserve still owns a large building dominating the Santa Barbara waterfront which the city deeded to the Navy for the war effort in 1942. The Navy refuses to cede the building's ownership back to the city even though it has returned all the other local public facilities that municipal officials made available during the war. Today, the city wishes to reclaim ownership of the Reserve Center because it stands

directly in the path of a major waterfront redevelopment project. Alternative compromises exist to accommodate the needs of both the city and the Navy, but the latter is a reluctant party to negotiations which Representative ROBERT LAGOMARSINO and I have tried to foster to solve the problem.

Mr. WARNER. I understand the Senator's concern and join him in urging the Navy to negotiate in good faith with the city of Santa Barbara to achieve a settlement without any further delay. Either the Navy Reserve can find space at other military locations in the area or it could make an arrangement with the city whereby its operations at the building would continue after the retransfer of the property. I am sure that Secretary Garrett and his staff have every interest in bringing this issue to a mutually satisfactory conclusion.

Mr. WILSON. I thank the distinguished ranking member of the committee for his guidance and support.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I understand there is a McConnell amendment that has been agreed to on both sides. Perhaps the Senator from Virginia would like to present that at this time, while we have a brief interlude.

Mr. BUMPERS. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. NUNN. I yield.

PRIVILEGE OF THE FLOOR

Mr. BUMPERS. Mr. President, I ask unanimous consent that Bruce MacDonald of my staff be permitted privileges of the floor during debate and proceedings on the DOD bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair recognizes the Senator from Virginia.

AMENDMENT NO. 2519

(Purpose: To provide surplus military equipment to State and local drug enforcement authorities)

Mr. WARNER. Mr. President, I send to the desk an amendment on behalf of the Senator from Kentucky [Mr. MCCONNELL].

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for Senator MCCONNELL, proposes an amendment numbered 2519.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend title XI, by adding new section 1103 as follows:

SEC. 1103. TRANSFER OF EXCESS DEFENSE ARTICLES

Pursuant to Public Law 100-456, section 1208 and section 372 of title 10, United States Code, the Secretary of Defense shall review the availability of equipment resulting from the withdrawal of United States Forces from Europe and Asia for the purpose of identifying excess equipment that may be suitable for drug enforcement activities for transfer to appropriate state or local civilian law enforcement authorities.

Mr. MCCONNELL. Mr. President, this week the Senate Judiciary Committee issued a grim forecast: the Nation's murder toll is heading to a record level with the tragic increase due largely to drug-related violence. The committee estimated more than 23,000 people will be murdered in 1990, the third year in a row of increasing murders.

Statistics have a way of making a problem impersonal and distant. But, the victims have a way of focusing our attention and, Mr. President they get younger every day. The dramatic scope of the problem compels us to support dedicating every available resource and agency to the drug war. For this reason, I voted in 1986 along with 13 other Senators to commit the Defense Department to the drug war. Eventually, a majority of the Senate came to share this view and the Department has launched plans to work with Federal agencies to support drug enforcement efforts.

Now, there is a new and important role the Defense Department can and should play in the drug war at the scene of most crimes, at the local level. Although the Congress has authorized the Defense Department to coordinate and cooperate with State and local authorities in drug enforcement activities, there has been little effort to date to meet this objective. There seems to be a real gap between what DOD can do and make available in training and resources and what local authorities are taking advantage of.

As a first step in upgrading this effort, I have introduced an amendment which will assure the Secretary of Defense provides on a priority basis to local law enforcement agencies any equipment resulting from the withdrawal of United States forces from Europe and Asia. Although some people have suggested we use this surplus materiel to compensate countries where we have bases or to fulfill security assistance obligations, I think American needs must come first. For example, if there is secure communications equipment which might assure the success of a local sheriff's drug enforcement operation, DOD should accommodate the American community's needs before shipping the equipment overseas.

Once, in 1987, DOD is said to have published in national law enforcement journal a list of surplus military goods which could be provided to State and local authorities. I think we should encourage DOD to strengthen this very limited effort. When they bring back equipment from Europe, as they will over the next few years, it should end up being put to the best possible use in our war on drugs in our communities.

Mr. WARNER. Mr. President, I ask that the amendment be considered.

The PRESIDING OFFICER. Is there further debate? The question is on agreeing to the amendment.

The amendment (No. 2519) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote, and move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Does any Senator seek recognition?

Mr. WARNER. Mr. President, momentarily we will be considering an amendment by the Senator from Arkansas [Mr. BUMPERS], to which I will attach an amendment in the second degree.

The Senator from Arkansas is addressing the issue of the force structure of naval forces as it relates to the battleships. It is a subject in which I have been involved for many years.

I also observe on the floor the distinguished Senator from Rhode Island, the former Secretary of the Navy, under whom I served as his deputy for many years and then had the privilege to succeed him. The Senator from Rhode Island and I have had some differences on this issue during the years.

But at this time, I think the best solution and the one that will save time is if the amendment in the second degree, which is being drawn in the nature of a substitute amendment, would be the one that will be accepted by the managers. I do this primarily to resolve a problem at this time because I still firmly believe that the battleship plays a vital role in today's naval force structure, particularly as the changing threat places greater emphasis in requirements on the Armed Forces of the United States to meet the contingencies in Third World areas, and also terrorist activities. I think the battleship will play a very useful role in those contingency operations.

Perhaps at this time the Senator from Arkansas might like to say a word, or perhaps the Senator from Rhode Island, who also is anxious to address this issue.

Mr. CHAFEE. Mr. President, first of all I want to thank my distinguished

colleague and friend from Virginia for the action he has taken on this. I think there is no point in belaboring this subject. This is a matter that we have debated.

I have reviewed the RECORD, and we first debated this in 1980; at which time the *New Jersey* was taken out of mothballs. Then there were subsequently debates in connection with the *Missouri* and the *Iowa* and the other battleships. I think we had votes on three of them.

When we got to the fourth, I think the distinguished Senator from Arkansas and myself—and the Senator from Nebraska has been active in this—I think we ran out of gas when we got to the fourth one, since we never got more than about 36 votes in our favor.

We had the distinguished chairman of the committee with us on a couple of those votes, but those are the days when there was great enthusiasm for these vessels. Since then——

Mr. WARNER. Mr. President, that enthusiasm, I am proud to say, was led by the former deputy to Senator CHAFEE, the Senator from Virginia; am I not correct on that?

Mr. CHAFEE. That is right. I believe to err is human and to forgive devine. So since then, two have been taken out, and now we are discussing the third one. I do not want to belabor the subject.

I think my distinguished colleague from Arkansas is here, who worked so hard on this over many years.

Mr. BUMPERS. I thank the Senator from Rhode Island very much for his comments.

The PRESIDING OFFICER. The Chair recognizes the Senator from Arkansas [Mr. BUMPERS].

AMENDMENT NO. 2520

(Purpose: To retire the remaining battleships)

Mr. BUMPERS. Mr. President, I send an amendment to the desk on behalf of myself, Senator CHAFEE, and Senator EXON, and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment will be laid aside.

The clerk will report the amendment.

The Senator from Arkansas [Mr. BUMPERS], for himself, Mr. CHAFEE, and Mr. EXON, proposes an amendment numbered 2520.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following: "Notwithstanding any other provision of law, no funds may be obligated or expended to maintain in active service more than one Iowa-class battleship after 30 September 1991; and no funds may be obligated or expended to maintain in active service any Iowa-class battleship after 30 September 1992.

Mr. BUMPERS. Mr. President, I think the distinguished ranking member of the Armed Services Committee has a second-degree amendment that he wants to offer to this.

Does the Senator have a second-degree amendment prepared?

AMENDMENT NO. 2521 TO AMENDMENT NO. 2520

(Purpose: To amend the Bumpers amendment on battleships)

Mr. WARNER. Mr. President, I send an amendment to the desk, on behalf of myself and Mr. NUNN, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for himself and Mr. NUNN, proposes an amendment numbered 2521 to amendment No. 2520.

Mr. WARNER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out "1991;" and all that follows and insert in lieu thereof the following: "1991."

"Furthermore, the Secretary of Defense shall conduct an analysis of the need for battleships to be used in situations arising in the Third World in which the full capabilities may not be needed or cannot be fully utilized and any other alternative use of the battleships due to the changing nature of the threat facing the United States and its allies.

Mr. WARNER. Mr. President, I have a second-degree amendment that I offer on behalf of myself and the Senator from Georgia [Mr. NUNN].

The essence of this amendment would be to add—I want to emphasize that—to the 1991 budget direction to the Secretary of Defense to retire the third battleship. Two are already scheduled in the 1991 budget for retirement. This occurred at the direction of the President and the Secretary of Defense. The third will be added, assuming the Senate adopts the amendment in the second degree, and the fourth will remain in active service subject to further consideration regarding its future beyond the fiscal year 1991.

The distinguished Senator from Georgia, in joining me on this amendment, desires that language be incorporated which will state that the Secretary of Defense will conduct an analysis of the need for battleships to be used in situations arising in Third World areas in which the full capabilities may not be needed or cannot be fully utilized, and any other alternative use of the battleships.

Again, the thrust of the added language in the second-degree amendment is to point out the changing threat and the belief of the Senator from Virginia, and I assume the Senator from Georgia, that it is very important, in view of the nature of the changing threat, that we reexamine the role of the battleships out of concern that next year Congress might also retire the fourth ship.

Mr. BUMPERS. Mr. President, will both sides agree to the first and second-degree amendment? I am prepared to vote. This has been debated here many, many times. I doubt that further debate will shed a great deal of light on it.

The PRESIDING OFFICER. Is there further debate?

The Chair recognizes the Senator from Arizona [Mr. MCCAIN].

Mr. MCCAIN. Mr. President, in my view, we are about to undertake something very foolish, and that disregards our national security needs. In case my friend from Arkansas has missed the television, radio, newspapers, and other information about the events of the last 48 hours, let me be one of the first to inform him, Iraq has invaded Kuwait and may invade Saudi Arabia.

What is the best response to that? It happens to be naval capabilities, and it happens to be ships with the capability to project long-range power. I wonder if my friend from Arkansas has some other options that he might propose in order for us to counter this threat to the very economic structure of this Nation and the free world. If so, I would like to hear him describe them.

I might like to remind my friend from Arkansas that battleships have 16-inch guns with ranges of many miles; they are equipped with cruise missiles, with ranges of 900 to 1,600 kilometers, which are very accurate in nature, which have highly lethal conventional warheads, and which can inflict damage in a very accurate and persuasive fashion.

To make the case, at this particular moment in history that we should force the President to dismantle a significant naval capability strikes me as nearly incredible. Yes, these ships are old, although they have been rebuilt and modernized. Yes, they are manpower intensive, although not nearly so as they were many years ago. But they are also powerful and effective. To suggest at this moment that we need to dismantle the very equipment which could help us counter the activities of the thug who threatens the very economic structure of the world, is, I say to my colleagues, incredible.

I will not take too much more time on this amendment. I could at least understand this amendment, if it were some days or weeks ago, even though I would have disagreed at the time. Today, history speaks for itself.

I do not have to make the case for the battleship, Mr. President. Saddam Hussein has made the case for the battleship. Saddam Hussein has shown that the cold war with the Soviet bloc may be over, but conflicts by no means are over. In most parts of the world,

the key capability we have to counter thugs of Saddam Hussein's ilk is by deploying significant naval capability and by having the ability to project power, whether it be through aircraft, long-range artillery, or cruise missiles.

Let me remind my friend from Arkansas that when we launch air strikes with manned, piloted aircraft, we run the risk, as we have in the past, of having American citizens being held hostage. We had this happen to a young Navy lieutenant in Lebanon, and we had a devil of a time retrieving him from the tenacles of some people who are scarcely "very nice."

Let me also say a word about guns. They are not obsolete. What do 16-inch guns do? They hurl projectiles the size of Cadillacs about 17 miles, if I remember my previous learning. They are equipped with cruise missiles which go many, many, many miles and strike targets very accurately. There is no possibility of either of those forces being shot down and anyone become captive.

So, Mr. President, let us remember where we are, and when we are. Let us remember what is happening as we speak. We must not dismantle our Nation's abilities to protect our interests and that of the free world.

I yield the floor.

The PRESIDING OFFICER. Is there further debate?

Mr. INOUYE. Mr. President, I will not try to add any more to this debate but just to make an observation. Last evening, after much debate and angry rhetoric, the United States Senate, by a unanimous vote, voted to condemn Iraq. It said:

Whereas Iraq's military power in the Persian Gulf area is virtually unchallenged, and its record of callous brutality, opportunism, and belligerency demonstrates that no policy of appeasement or cooperation will constrain the threat Iraq now poses to the security of nations throughout the entire Persian Gulf region and to the international order; Now, therefore, be it

Resolved:

And we set forth of a whole series of programs anywhere from sanctions to blockade. And then we finally said:

If such measures prove inadequate to secure Iraq's withdrawal from Kuwait, additional multilateral actions * * * involving air, sea, and land forces as may be needed to maintain or restore international peace and security in the region.

On April 5, before my Subcommittee on Defense, Admiral Trost, the former Chief of Naval Operations, testified as follows:

I am opposed to the decommissioning any (Battleships) because * * * they continue to play a very significant role in our efforts to provide that forward-deployed presence that deters terrorist actions or regional instabilities * * * they provide a degree of survivability, of presence that we cannot replace.

And on May 15, just a few months ago, Admiral Nyquist, Assistant Chief of Naval Operations, also testifying before the Defense Appropriations Subcommittee, had this to say:

The battleship * * * has tremendous combat capability. It has tremendous presence. And it is the least vulnerable of all of our ships * * * And it is also an ideal regional conflict, Third World kind of ship.

This is what my friend from Arizona was trying to tell our colleagues.

With that observation, I realize that arrangements have been made. I just hope that when this matter is taken up in conference, it will be given a full airing.

The PRESIDING OFFICER. Is there further debate?

Mr. NUNN. Mr. President, when we started this battleship business several years ago, I was persuaded by the Navy they were going to have new and innovative uses for the battleship. I supported two of them, and then I opposed the next two because, by the time we got to the last two, it was apparent to me there was no real effort by the Navy to look at innovative ways to use the battleship.

The advantage of these battleships is that they are very difficult to sink because they have an awful lot of armor on them so they can be put in harm's way. They are much better, in some cases, than even modern ships. The disadvantage to them is they are manpower intensive because they have not been fully modernized and, of course, we have problems with the big guns.

But the main case for the battleships when they were first sold was not the old guns, with which there have been some troubles, but rather the armor, the heavy armor, plus the fact they would be ideal for carrying large numbers of cruise missiles.

Now we find ourselves with the Navy several years later still not having used the battleships to their potential, in my view. There is every reason to believe that the Navy—I thought they would find ways to use them. For instance, you could take amphibious ships and you could load them up with Harriers and you could combine the amphibious ships with Harriers with the battleships, and then you would have a lot of striking power with the battleships and you would have some air cover with the Harriers.

The problem now is battleships do not have air cover. I think the Navy could use battleships with amphibious ships in much cheaper fashion in Third World countries than employing an entire carrier battle group. Right now the Navy has a dilemma because in the Persian Gulf—and the Senator from Arizona mentioned the Persian Gulf—the problem there is that in the Persian Gulf, the carrier battle group cannot get in there and maneuver. So the Navy has to stand way outside the Persian Gulf and depend on refueling, and, of course, that takes a lot of time and you really do not have much striking power there.

So with the scenario that has been talked about a lot in the last 48 hours, as I said at the very beginning, if you really wanted to use power in that part of the world, you would have to use long-range air power, which means bombers. You are not going to be able to use effectively very many of the Navy assets in that area in terms of air striking offensive power.

Now we are in a dilemma because the Navy has never used innovative ways to handle the battleships, and, of course, they have come under great scrutiny because they are expensive, they are manpower expensive.

I added a provision to the second-degree amendment of the Senator from Virginia because I think it is time to invite the Secretary of Defense, if the Navy will not do it, and apparently they never will, to take a look at how you could use those battleships, not in a Soviet type confrontation, but in Third World countries where you are showing the flag, where you do not have a sophisticated opposition in terms of modern aircraft. I think they would be very useful and much cheaper than sending very large, very expensive carrier task forces with all their ships all over the world. But the Navy has never done that. In this amendment, I am hoping the Secretary of Defense will take a look at that.

In the meantime, it is very hard to defend the battleship. I was opposed to the last two. I felt four of them were entirely too many. I think we have wasted an enormous amount of money by going with four. Now we are left with two and no Navy innovations.

So I am willing to go along, reluctantly, because of the situation we are in, with cutting one battleship, still feeling that if there was any innovative thinking going on and if there was any relationship between the threat in the world, which there is increasingly going to be in Third World areas, and the battleships themselves, they could be utilized properly.

So I think that the best solution at this juncture is to cut the one battleship out that is remaining and then go to conference and see where we are, and perhaps the Navy will come up with something innovative, after all of these years of not doing it, with the battleship.

We had the most discouraging time when we investigated the battleship *Iowa*, when the captain of the battleship was telling us things he thought his ship could do and yet he was not called on to do them and he was not really given a mission, according to his own testimony. Not only did he not have the Navy's support in terms of giving him the kind of personnel he needed, the battleship was relegated by the Navy to the bottom of the pile

after having the Secretary of the Navy come over and make the hardest sell on the battleship in the early 1980's that I had ever seen.

So, it has been a series of mishaps, and I think at this juncture the best solution is to go ahead with the second-degree amendment. I do not think we need a rollcall vote. I hope we would not. Then, take it to conference and see if there is anybody at the Department of Defense who is interested in taking another look at this whole area.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas [Mr. BENTSEN].

Mr. BENTSEN. Mr. President, I do not disagree with some of the criticism just made about the Navy. It should have plans to use battleships in more creative and innovative ways. Those ships are enormously versatile, so their advantages should be exploited. But there is still time to develop such plans, especially if we reject this amendment.

Battleships are potent weapons. They have awesome firepower and amazing survivability. They can show the flag and carry the fight to the enemy.

I have learned a lot more about these mighty ships because the Navy has planned to send the battleship *Wisconsin*, to a new homeport at Ingleside, TX, near Corpus Christi, next spring.

That base is already more than half completed, and funds have been approved for the entire project. What is unusual about this base is that the State and local community voted $50 million of their own funds for the base. Another $100 million in local money has gone for highways and infrastructure.

By contrast, the Federal cost is only $93 million. This is a state-of-the-art facility, built with substantial local funding, ready for that battleship. I would not want the Senate to foreclose the option or derail the plan to base the *Wisconsin* there.

Mr. President, our military capability will be enhanced by having a battleship based in the Gulf of Mexico, not far from potential trouble spots in Central America and the Caribbean. Remember, only a few months ago we sent troops into Panama. Earlier this week, there was a problem in Trinidad which might have endangered Americans.

We never know just where we might need to demonstrate our power and resolve.

Iraq's invasion of Kuwait is only the latest—and far from the last—occasion of conflict and instability in the Third World. Now that we have added to our fleet the enormous capability of our battleships, we should not lock them away. To do so would be wasteful and foolhardy.

Mr. GLENN. Mr. President, I hate to oppose the Senator from Arkansas on this, but back here a few years ago we were debating the battleship. I thought, at first, all we had was a bunch of people in the black-shoe Navy that would not let go. They had to have a battleship out there to ride around on and that was about it, and we had to have 16-inch guns. But that was not the reason at all that we brought the battleship back.

At the time, the fleet had a need to be able to put at sea two of their new weapon systems, the Tomahawk missile and the Harpoon missile. They were trying to find out how they were going to do that and what kind of platforms they would put them on.

If we start designing a ship to carry more Tomahawks and more Harpoon missiles, and we make it a defendable ship and an armored ship and something that is not going to be too vulnerable, it winds up that we had that kind of a hull actually sitting in the yards in the form of the battleships. That is the reason the battleships were brought back. Even if they had not had any 16-inch guns on them, we probably would use those hulls to put those missiles at sea, because we needed that capability for fleet defense and for the attack capability.

About the 16-inch guns? They came along for free because we would not have resurrected the battleships and put them at sea just to get those 16-inch guns out there. I do not believe we would. So the guns came along as sort of an auxiliary weapon system: Yes; we will keep them in ship and if we ever need shore bombardment or have targets that are somewhat close to the beach, why, we can do something about them, we have those 16-inch guns. They are mammoth. But mainly the battleship is an armored platform, a stable platform, from which to launch cruise missiles.

The Tomahawk—the figures are that the battleship carries 32 Tomahawks. Those things will carry a warhead, a nuclear warhead as I understand it, out over 1,300 miles for land attack. Fantastic. And for conventional warhead, which is heavier, it goes out to about 600 miles to hit land targets.

It is good for either ship or land targets, either one.

That is the Tomahawk. That is a tremendous capability.

The Harpoon is basically antiship, that is for fleet defense. Battleships carry 16 Harpoons which have a 60-mile range, with an antiship capability, and radar guidance; very good.

If we knock battleships out, I do not know what happens to fleet defense. Maybe there are other ships carrying these missiles and Harpoons and maybe we have developed new means of delivering that Tomahawk capability that can go out and can strike either land or shore targets.

But the battleship was brought back for that purpose, not basically to get the 16-inch guns that everyone still raises their eyebrows at, but they sure still might be useful once in a while.

Let me give an example. In the Iran-Iraq war, we were concerned about Iran if they prevailed, if they came around the head of the gulf through Kuwait and down Saudi Arabia or Bahrain or whatever, how were we going to oppose that? Could we control that? We were not prepared to go to war with Iran to prevent that in a ground warfare situation.

But in any war, just as we are faced with today with regard to Iraq, you have two things in war you have to control. One is your immediate tactical situation, whatever is opposing you on the ground. We have all sorts of weapons to bring to bear on that.

The other thing you try to do is, you try to cut the economic base of your opponent so he cannot support war.

If we had been required to do that with Iran, we could have done it very easily. If we put a battleship over there. It could have gone up to the head of the Persion Gulf, it is armored, they could not have badly hurt the battleship. It could have sat there and taken out the 14 loading docks at Kharg Island with no problem, and do it with impunity, no problem whatsoever, with 16-inch guns. That mission would not require Tomahawks, not require Harpoons or anything else like that. We would not have to do that.

Mr. WARNER. Mr. President, I cannot stand here and listen to my good friend without challenging him on that.

Correct, that battleship could move in tomorrow and blow the pants off Saddam Hussein. But once it blew his pants off, he has some 500 tactical aircraft that could be targeted against that battleship. We cannot bring a carrier into the gulf safely to protect and give the adequate air cover to the battleship. If you want to start a fight in the gulf——

Mr. GLENN. If my friend would yield, I have not mentioned Iraq except to say it had been brought up this morning. I am referring to a previous situation. Do not get too excited.

Mr. WARNER. There was another Senator here a moment ago and I held to my seat firmly when he was talking about this.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. GLENN. I have the floor. I am not talking about the Iraq war. What I am pointing out is, once in a while we find a use for these 16-inch weapons systems, such as in the Iranian situation which I was speaking of. I was not talking about our ability to hit Iraq at

all. They do not have the same kind of oil there.

Iraq has different places, they send most of their oil out by pipeline—a battleship is not going to run out in the middle of the desert, between there and Turkey where they have their main pipeline where most of their oil goes out. They send very little down the gulf. I am not talking about Iraq.

I am pointing out an example where even the 16-inch guns on the battleship could have been useful in a certain situation; and might again be sometime. I do not know. Obviously, that weapons system cannot be applied as well as the Iraqi situation.

But the point is, and the reason I back the substitute amendment is, that it does give us time to study whether we have other replacements in the fleet, and in fleet defense, for the Tomahawk missiles that are aboard the battleships and the Harpoon missiles that are aboard the battleships. If we in fact are providing other means for that kind of attack capability, or that kind of defense capability, then I would favor taking these battleships out of commission because we do not want to save them just for the 16-inch guns.

But I think this gives the Navy time, then, for that kind of study, and to me it makes a lot more sense than just our deciding here today what fleet defense and fleet attack capabilities should be or should not be, as we vote on the battleship.

I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Nebraska [Mr. EXON].

Mr. EXON. Mr. President, I cannot tell my colleagues how pleased I am that the Senator from Arkansas offered this extremely reasonable amendment. I stood on this floor on many occasions, many times with only one or two supporters, when the battleships 2 years ago were taken out of mothballs and placed on active duty. I pointed out all of the reasons at that time, why the modern-day Navy cannot afford a battleship. There has been no reasonable, affordable, rational need for battleships since World War II.

We can always invent reasons for reinstituting a system.

But that does not change the fact that battleships are a very wonderful part of the history of the Navy. There is no question but what the battleships in their day provided the real thrust and support of the U.S. Navy to project military power around the world.

I will not go through all of those arguments that I used before, except to say that the amendment offered by the Senator from Arkansas, supported by the Senator from Georgia, the chairman of the Armed Services Committee, and also supported by the ranking member of that committee, the distinguished Senator from the State of Virginia, indicates that the total reasonableness of this proposal to eliminate one of the two proposed battleships that even the administration feels that four were unnecessary.

I simply point out, Mr. President, I just hope we are not going to buy this argument that the Harpoon and the Tomahawk missiles just cannot be deployed unless we have those battleships. One of the arguments that I guess was made, when I think back, was that this would be a great platform for Tomahawks and Harpoons. That was, in my opinion, one more of the crazy ideas that was advanced, crazy from the standpoint, not that the battleship would not be a good platform, but crazy from the idea of the cost of that type of a platform.

I also wish to point out, Mr. President, that I think it is rather interesting that in this body, we have two former very distinguished Secretaries of the Navy: The Senator from Virginia, who I just mentioned, and Senator CHAFEE. Both of those individuals are supportive, as I understand it, of the amendment offered by our colleague from Arkansas. So I hope whether we can do it by voice vote, or whether we can and should do it in the form of a rollcall vote, if that is required, I think it is important this be included in our bill.

The only reason that one could reasonably be for the continuation of even two battleships is from the standpoint of nostalgia. Certainly it is an impressive sight.

In fact, during the earlier debate that I led against restructuring those four battleships and the construction of all that home porting, Mr. President, that took place around the United States, it simply did not make any sense then. It makes no sense whatsoever now, except for nostalgia.

As I started to say, during that debate, there was a former Admiral of the Navy who said we should have these battleships, if I can remember what he printed in an article that it is very impressive to draw a battleship up to one of those islands in the South Pacific and raise the American flag, and the natives would come out of the jungle and say we believe, we believe. That is nostalgia. That is a great thing for symbolism. We cannot afford it at this juncture.

If we are going to have a modern Navy that is designed to fight a modern war, then the battleship, in the view of this Senator, has very little, if any, important role to play. Let us put our money in the U.S. Navy that I am very proud of and have been a strong supporter of where it is needed. Look at the programs that are being cut in the U.S. Navy today, important modern programs for future naval warfare. I think it is very wrong that we are keeping up this very expensive system for what I believe to be unsound reasons advanced on the floor of the Senate. I yield the floor.

The PRESIDING OFFICER. Is there further debate? The Senator from Virginia.

Mr. WARNER. Mr. President, I would like to recount for the Senate how we arrived at where we are. The distinguished chairman and I were made aware of an amendment by the Senator from Arkansas to delete two battleships, one in 1991 and one in 1992. It was my judgment that we could not predict with great accuracy how that vote would come to pass. The best chance to have the view prevail that we should keep as many battleships as possible was to settle it in conference.

So, as a tactic, I offered a second-degree amendment to just take the one. That amendment was to be accepted by the Senator from Arkansas, to be voice voted, and then in conference we would have had the benefit of the further studies that the distinguished chairman suggested, and we could then make an informed decision.

It is now apparent that many Senators are very much interested in this issue on both sides. The Senator from Virginia has always been a strong proponent of the battleships. I feel we should keep both battleships. I simple put in the amendment as a holding action to preserve the rights of the conferees after the conferees receive further information from the Department of the Navy.

So at this time, in view of the parliamentary situation and the expression of interest on both sides, Mr. President, since the yeas and nays have not been ordered, the Senator from Virginia asks to withdraw his amendment.

The PRESIDING OFFICER. The Senator has right. The amendment is withdrawn.

The amendment (No. 2521) was withdrawn.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I started off about 50 minutes ago propounding a unanimous-consent request to have 20 minutes equally divided on this amendment. Obviously, we have passed that stage. What I would like to do is go ahead and finish the debate and vote on the amendment of the Senator from Arkansas. We do not necessarily need a time agreement. Do the Senators who are going to speak have any indication about how long they will need?

Mr. GRAMM. Will the distinguished Senator yield?

Mr. NUNN. I will be glad to yield.

Mr. GRAMM. Mr. President, we have a limited number of people who want to speak on this subject. There will be a motion to table the amendment. If that is successful, that will be the end of the debate. I do not want to prejudge where we are at this point, and I reserve my right at that point to see that we have a broader debate. I think we are looking at a fairly short debate and a motion to table that is not debatable, and we will vote on it.

Mr. NUNN. Mr. President, I suggest, instead of tryng to struggle to get a time agreement, let the debate proceed and have whatever motions are going to be made and have a rollcall vote.

What I would like to do is tell the Senators who are following the floor action that we would like to move to the DeConcini amendment next after this one is concluded. That is an amendment, I understand, on transferring Department of Defense money to care for some of the critical problems relating to crack babies. We also have a Kerry amendment on ASAT. I understand both will accept brief time agreements. I would like them to come over after the rollcall vote and see if we can handle those amendments in the near term.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, at such time as we have conclusion of the debate and whenever the vote is to be had, I will move to table because I stand in opposition to the amendment of the Senator from Arkansas.

Several Senators addressed the Chair.

Mr. INOUYE. Will the Senator from Virginia permit me to join him on that motion?

Mr. WARNER. Yes.

The PRESIDING OFFICER. The Senator from Arkansas [Mr. BUMPERS].

AMENDMENT NO. 2520, AS MODIFIED

Mr. BUMPERS. Mr. President, I send a modification of my amendment to the desk.

The PRESIDING OFFICER. The Senator has that right. The amendment is modified.

The amendment, as modified, is as follows:

At the appropriate place in the bill, insert the following:

"Notwithstanding any other provision of law, no funds may be obligated or expended to maintain in active service more than Iowa-class battleship after 30 September 1991;

"Furthermore, the Secretary of Defense shall conduct an analysis of the need for battleships to be used in situations arising in the Third World in which the full capabilities may not be needed or cannot be fully utilized and any other alternative use of the battleships due to the changing nature of the threat facing the United States and its allies.

PRIVILEGE OF THE FLOOR

Mr. FORD. Mr. President, I ask unanimous consent that Jane Matthias of my staff be given privilege of the floor during the debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Arkansas.

Mr. GRAMM. Mr. President, can we hear the modification?

The PRESIDING OFFICER. The clerk will state the modification.

The legislative clerk read as follows:

At the appropriate place in the bill, insert the following:

"Notwithstanding any other provision of law, no funds may be obligated or expended to maintain in active service more than Iowa-class battleship after 30 September 1991;

"Furthermore, the Secretary of Defense shall conduct an analysis of the need for battleships to be used in situations arising in the Third World in which the full capabilities may not be needed or cannot be fully utilized and any other alternative use of the battleships due to the changing nature of the threat facing the United States and its allies.

Mr. BUMPERS. Mr. President, the modification is simply a modification with precisely the wording of the second-degree amendment which has just been withdrawn by the Senator from Virginia.

Now, Mr. President, as I was about to say, I thought there had been an agreement here on some middle ground regarding these battleships, and apparently there are various interests: of course, home porting. I know that the Navy has promised one sometime in the future to Hawaii. It would be difficult to get one into Pearl there because we have so many battleships on the bottom of the ocean. And another port in Galveston, TX.

Now, when you saw the distinguished junior Senator from Texas coming charging through the door of the Senate, you did not have to be a rocket scientist to figure our his interest. I do not mean that in a denigrating way. I would have come charging through the door, too.

Mr. President, we have debated these battleships on the floor of the Senate a number of times, and we now come down to the point where we have this defense bill, roughly a $296 billion authorization. What a lot of people in the Senate are trying to do is to figure out how we can save the taxpayers of this Nation some money, reduce even the amount of spending cuts on other programs and tax increases that we are talking about in the budget summit to try to reduce the Nation's debt. In the process we are trying to find where we can save money that will do the least damage to our military posture, indeed, maybe not affect our capabilities at all.

Somebody mentioned a moment ago that Iraq had invaded Kuwait. I do not think that has escaped anybody's attention. But let me ask you, where are the four battleships we have? Are they steaming for the Persian Gulf? The mention has been made that we need these battleships in the Third World.

I resisted taking battleships out of mothballs in 1981, because they had been obsolete since World War I. We are the only Navy in the world that has such a behemoth as this.

Let me ask you one other thing. If they were all four in the Persian Gulf, do my colleagues realize that the Navy will not let them even fire the 16-inch guns because they are afraid they will blow up? You want Tomahawks and Harpoons. The best, most invulnerable platform for cruise missiles is the submarine. We have cruise missiles on our improved *Los Angeles 688* class submarines. We have Tomahawks on 15 of our *Aegis* cruisers. We have Tomahawks on 10 *Spruance* class destroyers.

You want cruise missiles in the Persian Gulf? We have scads of them. And you want Harpoons? They are on everything. We hardly have anything that does not carry Harpoons.

Now, President, why do you think the Defense Department on its own initiative with no prodding from Congress decided on its own to mothball two of the four battleships next year? They did it for a lot of reasons. The rationale that was used here time and time again for bringing those old World War II vintage battleships out of mothballs was that those 16-inch guns could fire a shell the size of a Toyota.

Today, the Senator from Arizona has upscaled it to a Cadillac. Tomorrow, it will be an M-1 tank. And when we shelled, with the battleship *New Jersey*, the Shouf Mountains in Lebanon to punish them for destroying our barracks, our Marine barracks, in which we lost 240 fine young Marines, what happened? Those magnificent 16-inch guns, which are now obsolete because the powder explodes—and we have already lost 47 sailors on the battleship *Iowa*—when they steamed along the shores of Lebanon to punish the people that they said were terrorists up in the Shouf Mountains, what happened? They did not come within a half mile of the target and slaughtered a lot of innocent women and children.

You go to Lebanon today, to that vicinity, and the first thing they will talk to you about was what they considered a barbaric shelling. It was not intended to be barbaric. It just happened that way because those guns were so inaccurate, and they were using powder left over from World War II.

The Armed Services Committee must not be all that red hot about

keeping these other two battleships. As I told you, the Defense Department has agreed to take out two battleships. They cannot be very red hot to keep the other two because the Defense Department asked for $30 million for new powder to fire the 16-inch guns, and the Armed Services Committee zapped it. It did not give them a penny.

Mr. President, surely, there is some sanity left in this country. Surely, Saddam Hussein, the admitted madman of the Middle East, is not going to cause everybody to just take leave of their senses. If you want to steam into the Persian Gulf, for God sakes, do it with something that works. Do not go there to show your strength when there is no strength.

The worst thing the United States or any nation could do is to bluff. Why would you steam in there with those big 16-inch guns aimed at the shore when even Hussein knows you cannot fire them. But there is more to it than that.

I am not offering this amendment because I hate battleships. I am offering this amendment because we have a solemn duty to the American people in the interest of our national security to spend their money not based on who is going to get the home port of the battleship but based on what is the most effective platform and weapons system we can have for the Third World, for strategic forces, for everything. It is a tragedy of monumental proportions that you cannot debate a sensible defense policy without somehow or other the argument being turned on patriotism or who wants a stronger defense.

I tell you that in the past 8 to 9 years as we have spent over $2 trillion on our defense posture, a lot of it has been squandered. I think probably the worst example of that is the battleship. Back in those days in 1981-82, President Reagan said "You can have it all. Tell us what you want. You can have it."

Some smart lobbyist representing some shipbuilding outfit said why do not we bring those old rust buckets out of mothballs; they will scare the Third World to death. So they brought one out. They said we are going to bring out the battleship *New Jersey.* That was the first one. The first thing you know somebody says that is such a dynamite idea, let us do the *Iowa.* And the same old story. The first thing you know we have four of them.

Now we have four, and the rationale for bringing them out was because those big 16-inch guns can fire a Toyota for 23 miles, and now they cannot shoot a popcorn seed any distance because there is a moratorium on firing those big 16-inch guns because they are too dangerous.

Do you know what the cost of operating these ships is? It is staggering. To his eternal credit, the reason Secretary Cheney has chosen to take two battleships out of commission and put them into mothballs next year is because he is under budget constraints, and he did exactly what he should have done. He looked over all the Navy systems, said where can I save money without losing any of our firepower. You do not have to be a rocket scientist to know why he homed in on the battleships immediately.

Mr. President, we have cruisers. The reason I know about it is because the U.S.S. *Arkansas* is one, the good ship U.S.S. *Arkansas,* CG44. Betty busted the bottle of champagne over the bow of it. It is a magnificent ship, unbelievable firepower, unbelievable sophistication; every kind of a missile you can think of. At the time it cost $400 million. Today they cost $1 billion. But they can defend themselves. What is more important, they have all that firepower for 500 men. You want to do something in the Persian gulf? Send those Virginia class cruisers.

You know something else? That ship—at a cost today of $1 billion, we do not make them anymore—had a 35- to 40-year life expectancy, and only 500 men to man it. So what do we do? We go out and we planned—we did not do it—but we planned through phase I and phase 2 to spend $1 billion on retrofitting battleships that require 1,550 men to man.

So Dick Cheney said that is too much manpower. The cost is staggering.

Mr. President, this amendment was crafted to try to make our military posture and particularly our Navy more streamlined.

When I think of the money that we spend on these battleships, not just retrofitting them, but keeping them afloat, that could be used to a better purpose; if you took one battleship out next year and the other out in 1992, if you discharged those men, you save $700 million between now and 1995. Even if you do not discharge those men on the ships, you are going to save $234 million. In an almost $300 billion budget, I guess that is not much money. But down in Arkansas $234 million "ain't beanbag."

When you start talking about raising people's taxes, or cutting their Social Security cost of living or eliminating a couple of battleships that should never have been placed in the fleet in the first place, I know what they would take.

You know, I can tell you what this body will take, too. A lot of people will vote against this amendment in saying we just cannot do that. We cannot afford to save that money. They will vote against everything else when it comes to cutting entitlements, whether it is Medicare, Social Security, drug enforcement, FBI; they will vote against cutting those, too. We have some painful choices coming.

I think what former Secretary of the Navy Lehman did to co-opt Congress and to say we will put one of these battleships in your State, you compete—there will not be a single vote cast on this from any State that has a chance of home porting one. I am not squawking about that. If I were a Senator from that State, I would not, either. But that is not the way you build a defense.

Mr. President, I want to thank my distinguished colleague from Rhode Island, Senator CHAFEE, who is a former Secretary of the Navy. He knows a little bit about the Navy. He was head of the Navy Department for years. He feels the same way about it.

Another former Secretary of the Navy, now Senator JOHN WARNER, thought it was a good amendment, and originally was willing to accept it.

The distinguished chairman of the Armed Services Committee supports this amendment for a lot of reasons, not the least of which he wants to save the money, but the other is he wants the Navy to give him some justification for a battleship. He voted with me when we were trying to keep the last two from being taken out of mothballs.

Mr. President, I know other Senators wish to speak on this both for and against. So I yield the floor.

The PRESIDING OFFICER. Who seeks recognization?

Mr. CHAFEE. Mr. President, I want to commend the Senator from Arkansas for both the amendment that he presented and also for the consistent stand he takes. As he mentioned, the debate on this subject goes back to 1980 when both he and I and others opposed the reactivation of the battleships. As he mentioned, it started off with the *New Jersey.* Then I believe the next one was the *Iowa,* then the *Missouri,* and then there was the *Wisconsin.* There seemed to be no end to it.

Mr. President, I would like to make a point that deals with why these vessels were brought out of mothballs in the beginning. I do not think it reflects great credit upon the U.S. Navy because of the system which the Navy used at that time.

First, the argument they brought out was that you get a very durable platform for a relatively modest amount of money, the argument being that you could reactivate each battleship for something less than $500 million apiece. That was the first argument.

The second argument was that when we bring these battleships out of mothballs we will situate them judiciously around the Nation, thus garner greater support for the U.S. Navy in the Congress, both in the House and

the Senate of the United States. That, to me, was the most blatant waste of the taxpayers' money I believe I have seen since I have been here.

So those ports were selected judiciously: New York, Texas, State of Washington. Finally, apparently when we were doing the debate, it was not clear that Hawaii was being selected which apparently it was.

Mr. President, we had a chance to use those battleships. It came in Lebanon in a situation that is not totally unlike the situation in the Persian Gulf.

As the Senator from Arkansas has pointed out, the use of the *New Jersey* in Lebanon was a total disaster.

It turned out that it could not hit what it was trying to hit. Instead, it destroyed the villages and incurred the wrath of those who, at the time, were favorable toward the United States. I think people will recall that the United States came into Lebanon and appeared to be somewhat of a peacekeeper, whose presence was respected, and indeed desired, by many in Lebanon at the time.

But the faulty performance of the *New Jersey* in Lebanon led to a reversal of the situation, to the United States incurring the wrath of those that previously had been on our side.

Now there will be those who say we just did not have enough experience with the *New Jersey*, or if we kept that moving along, we would have perfected our system.

Since then, Mr. President, other things have occurred that have demonstrated that these battle ships are not safe as far as the 16-inch guns go. We have had reference to the tragedy that occurred on the *Iowa* when 47 sailors were lost. Since then, we have not been using them, and the Navy has refused to permit the 16-inch guns to be fired.

The argument comes, we will not use the 16-inch guns. We have these Tomahawk missiles. There is a marvelous platform for that, because of its durability, principally. Let us review a little bit of the durability of battleships.

First, we had the situation that arose December 7, 1941, when four battleships were sunk by airplanes. Subsequently, the *Prince of Wales*, a great British battleship, was lost off Singapore in the early days of the war. I think that was probably about as depressing an incident as occurred in the early days of the war, when the Japanese torpedo planes ganged up on the *Prince of Wales* and sank it.

About the success of the others: the *Bismarck*, or the largest battleship ever built; the *Amato*, a Japanese battleship sunk by our planes as it came down in Japan, in Okinawa, in the closing days of the war. To suggest that these battleships are invulnerable is not remembering history.

We have other platforms—as has been pointed by the distinguished Senator from Arkansas, of the launching of the Tomahawk missile—if we choose to proceed in the Persian Gulf and partake in deterring the crazy Iraqis from what they are doing in Kuwait.

So, Mr. President, it is not that we lack platforms. Indeed, we still have one; which one they will choose to keep, I do not know, but there will be a battleship. As I understand it, the *Iowa* and the *New Jersey* are being taken out. That leaves the *Wisconsin* and/or the *Missouri*. This will take one out.

To my knowledge, we have not read of the battleships steaming toward the Persian Gulf, and indeed the distinguished Secretary of Defense has not backed off from his request that two go out. So, obviously, they are in a quandry about what to do with these vessels.

So, Mr. President, at a time when we are short of money—and just as important, Mr. President, we are going to be short of manpower—these arguments were being made 8 years ago and 5 years ago.

Like every Senator, I have said things on the floor of this Senate that I wish I could retract. I have had a chance to eat my words many a time, as I suppose most of us have. What we said 8 years ago and 5 years ago when we debated this issue has not proven far off the mark. The large number of personnel required in these vessels saps up people we could use elsewhere more effectively in the U.S. Navy, for other platforms that can proceed into the Persian Gulf.

I support the amendment of the Senator from Arkansas, and I hope it will be adopted.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER (Mr. BRYAN). Senator Cohen is recognized.

Mr. COHEN. Mr. President, I want to respond to a couple of comments made by my friend from Rhode Island.

First of all, the initial decision to reactivate battleships was to reactivate four, provided the Secretary performs on his original pledge to reactivate that first ship; I believe "under $348 million" was the figure originally cited. He made good on that pledge. Then it was decided to bring the other three back.

Second, it had nothing to do with the homeporting. The decision to reactivate the battleships had nothing whatsoever to do with the homeporting issue. That decision was made independent of the homeport issue.

The third point: On the one hand, the Senator from Arkansas praises Secretary Cheney for agreeing to retire two, and then condemns him for not retiring all four. It seems to me that the Secretary of Defense is put under severe budgetary restrictions, and he responded responsibly; that is, "I will do the best I can with the amount of money I am likely to get, and therefore, I will retire these two ships and keep the other two."

So now we say, "You did not go far enough. We want to take the other two out." Frankly, I think this amendment ought to be defeated. If you are going to leave one, take them all out. Do not hold one ship there. It is meaningless. If you want to kill the battleships, then take them all out. Do not just leave one in; that is sort of tokenism. Take them both out. This would only take the one. I suggest going back to the original amendment and taking the two out.

The fourth point is this: Do not cite the failure of the *New Jersey* in Lebanon as a reason why this ship ought to be retired, or all the ships retired. If it had been a cruiser and missed, would we retire cruisers?

By the way, the most sophisticated system we have is the Aegis air defense system. What happened in the Persian Gulf? We shot down an Iranian airbus. Does that mean we cancel the cruisers and destroyers? A mistake was made, a malfunction—human or mechanical. "Bring them all home." Do we do that?

We have weapon systems on the battleships which are less than flawed. We have an enormous military capability that still remains on the ships. Forget about the 16-inch guns. Saw them off. Take them off. You still have a very capable, durable ship.

Is it unsinkable? No. The Senator from Rhode Island is correct. No ship in existence is unsinkable. It is hard to sink, but not unsinkable. We are dealing with margins of safety here. If there is any question about the vulnerability of battleships to modern warfare, go back to what the Iraqis did to the U.S.S. *Stark*. One missile, and the *Stark* was out. I doubt whether that could happen with any of the battleships.

I rise in opposition to the amendment of the Senator from Arkansas. At the appropriate time, if the Senator from Virginia does not move to table, I intend to do so.

Mr. GRAMM. Mr. President, I think we would do well here to judge people on the content of the debate. I do not think we serve the Senate well by trying to impugn the motives of either the Navy or the people who engage in the debate.

As our distinguished colleague from Maine has pointed out, the decision was made on the battleships before anybody ever contemplated that there would be home ports, much less before any decision was made as to where home ports would be.

I think if our dear colleague from Arkansas will check, he will find that those who are here today arguing for

the preservation of two battleships were for those battleships before any decision was made as to where they would be deployed.

Also, if I might say to our colleague from Rhode Island, during this whole debate over battleships, as a member of the Armed Services Committee, never, ever, did I hear anybody make an argument that stationing battleships was somehow better politics than stationing any other ship. That is an argument that I never heard, an argument that, in my opinion, was never made anywhere.

Mr. President, we have heard a lot of discussion about the fact that battleships were sunk in World War II, and we hear a lot of armchair decisionmaking based on it. The Germans had the greatest submarine fleet in history and lost World War II, but did we conclude that the submarine was obsolete and not useful? No.

After Pearl Harbor, how many American battleships were sunk in World War II, as compared to Korea? Has everybody forgotten Lebanon, when an A-6 was shot down and a pilot captured? Did we terminate the carriers; did we ground the A-6?

We hear discussion about the 16-inch guns. We heard the opinion of our two highly esteemed colleagues. Yet, when the U.S. Navy, with the greatest experts in the world, studied this problem, they said it was sabotage.

Of course, we are hearing varying opinions today, and we have to judge the content of those opinions in terms of an active study that is conducted.

The battleships are valuable for several reasons. They are valuable because they have a capacity to support amphibious landings that we do not have with other vessels. They cannot put a shell on a target with the accuracy of a cruise missile. That is right. But they can deliver to the beaches, to the landing areas where marines might be engaged in an amphibious assault, a killing field of fire that no other weapon in the American arsenal can deliver.

The battleship gives us the capacity to put down massive firepower in fighting future conflicts against Third World nations. I do not know anybody on the floor here today that contemplates at the present time, thank God, any other kind of conflict. Quite frankly, I am sorry we have to contemplate this kind of conflict, but I think with what is happening in the world today only a fool would fail to contemplate that such a conflict could occur. The battleship can do that job.

Second, in showing American power and showing the American flag, something that we have done in our Navy from the time of the framing of the Constitution and gaining our independence, no other ship gives the visual presence in delivering the American flag to show our military power than the battleship.

Let me also say, Mr. President, I have great regard for our two colleagues who have spoken here today. I have great regard for their opinion, but if we were debating subjects related to lawmaking, subjects related to appropriations, subjects related to the environment, I might be swayed by their opinion. But we are debating a subject where the Secretary of Defense and the Secretary of the Navy, based on the advice of the greatest living experts in this country, decided that, even with massive defense cuts, they wanted to keep two battleships in the fleet.

Mr. President, that was not a casual decision based on nostalgia. That was not a decision based on politics. That was a cold decision based on the fact that the battleship can do things that other ships cannot do.

So, Mr. President, I do not have any doubt, as we look into the future, as we go on this mad rush to declare a peace dividend before any money is in the bank, as we have a free-fall in defense spending, beating swords into plowshares even on a day when we may need swords, I do not have any doubt that this decision will be revisited by the Pentagon. But let us not engage in micromanagement here where people who were opposed to the battleship in 1980, who were opposed to the battleship every day since the decision was made, now seek an opportunity to attack it. The Secretary of the Navy says, even with the cuts we are talking about, that he wants two. The Secretary of Defense says that he wants two.

Our colleagues from Arkansas asks, where are the four battleships? Two of them are on their way to mothballs. We need these two ships. If the Secretary of the Navy and the Secretary of Defense, after studying the naval requirements of America in projecting power around the world, say we do not need them, then that is another issue. But for us on the floor of the Senate to override the decision of the Armed Services Committee, for us on the floor of the Senate to override the decision of the Secretary of the Navy and the Secretary of Defense, based on opposition that has existed from the very beginning, not based on any revolutionary, new evidence, Mr. President, I think that is a mistake. So I urge my colleagues, when the motion to table is made, to table this amendment. Let us let the decision be made by those who have the capacity to look at the facts and make the decision.

Mr. President, in a budget that cuts defense by $18 billion in spending authority, the Senate Armed Services Committee recommended the keeping of two battleships.

Mr. President, should we, on the basis of opposition to the battleships that has always existed, override the determination of the President, the Secretary of Defense, the Secretary of the Navy, and the Senate Armed Services Committee, and, might I add, the Armed Services Committee in the House?

I say, no, Mr. President; and I urge my colleagues to defeat this amendment.

The PRESIDING OFFICER. The Senator from Hawaii [Mr. INOUYE].

Mr. INOUYE. Mr. President, it is very difficult to add much to the wise words of my friends from Texas and from Maine. But I would just like to make an observation and also a reminder to all of us. I note that history was invoked which suggested the vulnerability of the battleship.

Mr. President, it is true that, on December 7, 1941, five battleships were sunk. Proud ships and thousands of lives were lost. One was in drydock. To suggest that the drydocked battleship was ready for action is stretching it a bit too far. The other four had men lining up for breakfast. It was a sneak attack. No one expected the attack. But after December 7, not a single U.S. battleship was sunk during the Second World War.

I presume that most of us here are not old enough to recall the battles of World War II. But ask those who participated in the landing in Saipan, or Tarawa, or Kwajalein, or Leyte Gulf, or Luzon. They will tell you that without the battleships they would have had a much tougher time. Ask the Marines. I think we should remind ourselves, it is not nostalgia.

Yesterday, all of us with grandiloquence spoke up for the resolution condemning Iraq. I think we should remind ourselves on what we said at that time. Those were eloquent words speaking of the brutality and the unconscionable action taken by Saddam Hussein, and we said: "Appeasement or cooperation will not constrain the threat Iraq now poses to the security of nations throughout the entire Persian Gulf," and we suggested that the President of the United States should take into account all possibilities from sanctions to blockade. But then we ended the whole resolution by saying:

> If such measures prove inadequate to secure Iraq's withdrawal from Kuwait, additional multilateral actions * * * involving air, sea, and land forces as may be needed to maintain or restore international peace and security in the region should be employed.

Then we speak of experts before this crisis occurred. On April 5, Admiral Trost, the former Chief of Naval Operations, strongly supporting these battleships testified before my Subcommittee on Defense, said:

> I am opposed to decommissioning any (battleships) because * * * they continue to play a significant role in our efforts to pro-

vide that forward-deployed presence that deters terrorist actions or regional instabilities * * * they provide a degree of survivability, of presence that we cannot replace.

And the Assistant Chief of Naval Operations, Admiral Nyquist, had this to say, on May 15, of this year:

The battleship * * * has tremendous combat capability. It has tremendous presence. And it is the least vulnerable of all our ships. * * * And it is also an ideal regional conflict, Third World kind of ship.

It was tailored for this coming era. It was tailored to counter men like Hussein. It was tailored for regional conflicts. I would hope that we would not take the precipitous actions this afternoon to do away with what we yesterday voted to support. This is the wherewithal we need. This is the kind of support our men would need if landings were necessary.

I hope that we would ask those men who served in Saipan and Kwajalein, Leyte Gulf, Luzon, and Iwo Jima. I think we owe it to them.

Mr. BUMPERS. Mr. President, I think the distinguished ranking member of the Armed Services Committee will probably move to table this amendment shortly. I do not want to prolong it. We have a long night ahead of us and the majority leader has a terrible task to get this bill through.

First of all, I want to say to the Senator from Hawaii, anything I said about battleships and Pearl Harbor was not meant in any way to denigrate any of the men there at the time, or certainly condone the sneak attack on Pearl Harbor.

The point was very simple. That air power, our air power, is so preferable to a battleship. The Japanese sank our fleet in Pearl Harbor. And the Senator from Hawaii is right, we did not lose a battleship after that. But battleships were sunk all over the world. We sank Japanese battleships. We and the British sank German battleships. Every one of them were sunk by airpower.

The battleships that we have right now, the only air defense system they have is the Phalanx, which is essentially a rapid firing machinegun. It does not have the Sea Sparrow, not even a Sea Sparrow to defend it. And the truth of the matter is they are very vulnerable.

I mentioned the bombardment of the Shouf Mountains in Lebanon and how far off target the battleship *New Jersey* was, a half mile in some instances, and the Senator from Maine said, well, the cruiser that we had in the Persian Gulf made a mistake when they shot down the Iranian aircraft, the air bus. But, you are talking about in one instance a mechanical failure, and in another a human failure. The cruiser that shot down the Iranian air bus went right on target, hit exactly what they were shooting at, very accurate. The problem was human error.

And at the Shouf Mountains, those magnificent 16-inch guns missed their target by a half mile. And now those 16-inch guns have been silenced. We lost 47 fine young men on the battleship *Iowa*. And so tragic was that, that the Navy said, do not shoot those 16-inch guns anymore. It would be foolish in the extreme to send battleships into the Persian Gulf with those great big 16-inch guns, full or sawed off, where they could not even fire for fear of the damage it would do to our own men.

Dick Cheney will tell you, we have nothing in the Navy, nothing to sail that costs anything like what those battleships cost for what good you get out of it. The cost in manpower is staggering. And their life expectancy is short.

The Senator from Maine has said it would just leave us with one battleship. I confess, I wanted to take it out too, but the Senator from Georgia [Mr. NUNN] had said he would support the amendment if we would leave it in and instruct the Navy to give us some kind of study on what role this battleship is supposed to play, particularly in the Third World.

And somebody said, "You just want to save one little, lone battleship?" Do you know what we did in Vietnam? I believe it was in 1968 or 1969, we rushed to take the battleship *Missouri* out of mothballs. We said we are going to use this battleship to teach those Vietnamese a lesson. We are going to cruise along the shore and we are going to bombard Vietnam with this battleship.

Within 6 months that had been such a dismal, dismal failure, they took it back and put it back in mothballs.

Generals always want to fight the war the way they fought the last one. Do you remember the Poles at the beginning of World War II had a big cavalry. They went out to meet Hitler's mechanized division with cavalry. That is all they knew from the last war.

It is my firm opinion that the battleship has technically been obsolete since World War I. And to have brought those things out at a staggering cost and the continuing cost—we have to cut some money somewhere. If you want to cut money where you lose the least capability—talk about the Persian Gulf, you have cruisers, you have everything in the world with more effective firepower than a battleship has. I hope you will support this amendment.

Mr. McCAIN addressed the Chair.

Mr. WARNER. Mr. President, the Senator from Virginia is about to move to table, but I defer it to the Senator from Arizona.

Mr. McCAIN. I will make my remarks brief Mr. President. An interesting view of history has been displayed here from time to time during this debate. The allegation has been made that although no U.S. battleship was sunk after Pearl Harbor—and no proponent of battleships or any other ship has ever claimed that they are invulnerable to a surprise attack while tied up at the dock on Sunday morning—many other battleships were sunk by airpower. Well battleships were sunk on both sides of World War II by both aircraft and guns—and sometimes the guns of other battleships. So, I might remind my friend from Arkansas that our enemies had very, very few ships remaining by the time the United States had finished with them, thank God, at the end of World War II. I also might remind him that there are still many marines who are alive today because of the guns of our battleships, and the firepower they provided in World War II.

The inference has been made that the battleship somehow sits out at sea; all by itself, with only the Phalanx to defend it. I would remind my friends that the battleship travels in good company. It has Aegis cruisers, destroyers, and other equipment which are highly capable to defend it.

I particularly was intrigued by the depiction of the battleship being a failure—I believe the word was dismal failure—during the Vietnam war. I happen to have a friend who is a Marine colonel. I know him very well. He happened to be in command of a unit during the Vietnam war. They were on the verge of being totally overrun by, and attacked by, the North Vietnamese. With the help of an air spotter, a barrage of 16-inch guns was fired and destroyed that attack. We have seen this happen time and again when close air support directs naval gunfire. It does so in most accurate fashion.

I think the Senator from Arkansas knows that the arrival of the *Wisconsin* off Vietnam coincided with the end of the Tet offensive, a scaling down of United States involvement, a cessation of United States bombing, which prevented the *Wisconsin* from being sent north to attack the very targets that would have had a significant impact on the war if struck. And I am specifically speaking of the Port of Haiphong.

To allege that somehow—because of the political reasons which are the real cause the *Wisconsin* stayed for only 6 months—that the battleship lacked value or capability—differs rather significantly from my knowledge of history.

The amendment asks us to study whether we should keep one battleship. Frankly, if we are going to keep only one, I must agree with my friend from Maine, we should get rid of both of them. The idea that we should again study the role of the battleship is absurd. I have heard of wastes of money in my time, and I have heard of

some ludicrous studies. If we do not know what a battleship can be used for at this point, I can absolutely assure my colleague from Arkansas, we never are going to find out from another study.

I suggest if this motion to table fails, we should propose another amendment very shortly, and get rid of the other battleship, as the Senator from Arkansas had originally proposed. We need military capability, not expensive exercises in symbolism.

In closing I would like to take a moment to thank our friend from Hawaii for his very eloquent statement. His presence, I think, is eloquent testimony to sacrifice and experience in war. I think his comments have been very important to this debate.

I yield the floor.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, is it possible to come to conclusion on this debate?

Mr. WARNER. Mr. President, I think this debate is completed. The Senator from Virginia is ready.

The PRESIDING OFFICER. The Senator from Arkansas [Mr. BUMPERS] is recognized.

Mr. LEVIN. Mr. President, I believe that the Bumpers amendment to eliminate battleships from the Navy's inventory has considerable merit, but unfortunate timing.

The Department of Defense has already offered to mothball two of the four battleships in order to be able to live within their shrinking budget. The Bumpers amendment would have the Navy cut one more battleship and study the need for the last remaining ship.

Given the events in the Middle East within the last 2 days, I believe that we should send a signal to the Iraqi Government that we have significant sea power at our disposal and we are willing to project our power into the Persian Gulf in order to protect our interests there. To put the Senate on record in support of mothballing one of the most survivable ships in our inventory at this point would send the wrong signal in this time of crisis.

I believe that at some near point in the future we may need to retire the two additional battleships, but at this point in time I believe that it is more prudent to keep this capability at hand.

Mr. BUMPERS. Mr. President, I said the battleship brought out of mothballs for Vietnam duty was the *Missouri.* The Senator from Arizona said it was the *Wisconsin.* We are both wrong, it was the *New Jersey.* I thought we ought to clarify the record.

For those who might be interested, it cost $100 million to take the *New Jersey* out of mothballs back in the late 1960's. They kept it out 6 months and then put it back in mothballs.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Senator WARNER is recognized.

Mr. WARNER. On behalf of the distinguished Senator from Hawaii [Mr. INOUYE] and myself, I move to table. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the motion to lay on the table the amendment of the Senator from Arkansas. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

The PRESIDING OFFICER (Mr. GLENN). Are there any other Senators in the Chamber who desire to vote?

The result was announced, yeas 55, nays 44, as follows:

[Rollcall Vote No. 215 Leg.]

YEAS—55

Adams	Garn	Mack
Akaka	Glenn	McCain
Armstrong	Gorton	McClure
Bentsen	Gramm	McConnell
Bond	Hatch	Murkowski
Boren	Heflin	Nickles
Boschwitz	Heinz	Packwood
Burns	Helms	Rudman
Byrd	Hollings	Shelby
Coats	Humphrey	Simpson
Cochran	Inouye	Specter
Cohen	Jeffords	Stevens
D'Amato	Johnston	Symms
Danforth	Kassebaum	Thurmond
DeConcini	Kasten	Wallop
Dodd	Levin	Warner
Dole	Lieberman	Wilson
Domenici	Lott	
Durenberger	Lugar	

NAYS—44

Baucus	Gore	Nunn
Biden	Graham	Pell
Bradley	Grassley	Pressler
Breaux	Harkin	Pryor
Bryan	Hatfield	Reid
Bumpers	Kennedy	Riegle
Burdick	Kerrey	Robb
Chafee	Kerry	Rockefeller
Conrad	Kohl	Roth
Cranston	Lautenberg	Sanford
Daschle	Leahy	Sarbanes
Dixon	Metzenbaum	Sasser
Exon	Mikulski	Simon
Ford	Mitchell	Wirth
Fowler	Moynihan	

NOT VOTING—1

Bingaman

So the motion to lay on the table the amendment (No. 2520), as modified, was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DIXON. Mr. President, I will advise my colleagues that in the next couple of hours we will have an amendment by the Senator from Arizona, 40 minutes evenly divided between the two sides, an amendment on crack babies, I believe.

We will have about eight agreed amendments that will be taken in that period of time. At approximately the hour of 5 o'clock we will go to an amendment by the Senator from Massachusetts, Senator JOHN KERRY, on a reduction in Asat.

I think we are going to be fairly busy until the hour of about 5 o'clock. But I urge Senators to come in here because we are very anxious to move along expeditiously. I think it is the feeling of the majority and minority leader and the distinguished manager of the committee we could dispose of this matter tonight if we will cooperate.

We are ready to yield now to the Senator from Arizona for 40 minutes.

The PRESIDING OFFICER. The minority leader.

Mr. DOLE. The last amendment took 2 hours. If we are going to have much more of this, we are not going to finish this bill this week or next week. It seems to me we should not consider any amendment on which there is not a time agreement unless it is going to be accepted.

The last one got out of hand and took 2 hours. Who knows what may happen next. We are trying very hard on this side to shrink the number of amendments, and we are going to continue to do that, but I hope the managers would help us by not bringing up any amendment unless they will agree to a 40-minute time agreement. Those who want longer can stay here next week. The rest of us will go home.

Mr. NUNN. Will the Senator from Kansas yield for a brief observation? I agree with the minority leader on this description. I think we should not take up amendments without time agreements. The problem on the last one was that we thought we had a time agreement. There was objection. We also thought we had worked it out and there was objection.

Mr. DOLE. I do not fault the managers.

Mr. NUNN. The best laid plans went astray.

AMENDMENT NO. 2522

(Purpose: To establish a demonstration program to allow drug-addicted mothers to reside in drug abuse treatment facilities with their children, and to offer such mothers new behavior and education skills which can help prevent substance abuse in subsequent generations)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI], for himself and Mr. BRADLEY, proposes an amendment numbered 2522.

Mr. DECONCINI. Mr. President, I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 212, between lines 20 and 21, insert the following new section:

SEC. 1103. MODEL RESIDENTIAL PROJECTS FOR ALCOHOL AND DRUG ABUSING WOMEN AND THEIR CHILDREN.

(a) FINDINGS.—Congress finds that—

(1) research studies strongly suggest that the incidence of drug abuse among women in general and women of childbearing age in the United States is increasing;

(2) drug-abusing women who have children traditionally experience significant barriers to drug abuse treatment because most residential drug abuse treatment programs do not accommodate the children of such women;

(3) many women with children are either reluctant to seek the drug abuse treatment they need or are forced to put their children in State foster homes at a time when there is a severe shortage of people willing and able to provide foster care in the United States;

(4) for the first time since the turn of the twentieth century, orphanages are filling up primarily because of the growing drug problem; and

(5) there is mounting evidence that women whose children reside with them during treatment for drug abuse consistently stay in treatment longer than women separated from their children, thereby increasing the chances of recovery for women whose children reside with them during drug abuse treatment.

(b) PURPOSE.—It is the purpose of this section to attempt to rebuild economically disadvantaged drug-affected families by—

(1) reducing the barriers to successful drug abuse treatment for economically disadvantaged high-risk mothers by permitting such mothers to bring their children into residential drug abuse treatment programs with them, and

(2) teaching such mothers new behavior and employment skills which can help to break the cycle of drug addiction in the next generation.

(c) ESTABLISHMENT OF PROJECT.—Part A of the title V of the Public Health Service Act is amended by inserting at the end thereof the following new section:

"SEC. 509H. MODEL RESIDENTIAL PROJECTS FOR ALCOHOL AND DRUG ABUSING WOMEN AND THEIR CHILDREN.

"(a) PROJECT AUTHORIZED.—

"(1) IN GENERAL.—The Secretary, acting through the Director of the Office, shall make grants to establish not less than 5 projects in which addicted mothers in residential drug abuse treatment facilities are permitted to have their children reside with them during the course of such treatment. Such residential drug abuse treatment and prevention projects shall target economically disadvantaged addicted women and their children (age 10 years and younger) and shall offer child care, parenting and jobs skills, nutrition, and other health, social, education, and employment services as necessary.

"(2) PERIOD OF OPERATION.—The Secretary, acting through the Director of the Office, shall only award grants under this section for projects which will be operated for a period of at least 3 years.

"(b) APPLICATION.—Each entity desiring a grant under this section shall submit an application to the Director of the Office at such time, in such manner and accompanied by such information as the Director of the Office may reasonably require. Each such application shall include assurances that the mothers selected for participation in such project have been evaluated to ensure that such mothers are committed to remaining in drug abuse treatment and prevention projects assisted under this section.

"(c) EVALUATION.—The Director of the Office shall conduct evaluations to determine the effectiveness of the projects assisted under this section.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $50,000,000 for fiscal year 1991, and such sums as may be necessary for each fiscal year thereafter to carry out the provisions of this of section.".

(d) TRANSFER OF CERTAIN FUNDS.—Of funds appropriated to or for the Department of Defense for fiscal year 1990 and which remain unobligated on September 30, 1990, $100,000,000 shall be transferred to the Department of Health and Human Services and shall remain available until September 30, 1991. Of such amount—

(1) $50,000,000 shall be available for the program established under section 509F of the Public Health Service Act; and

(2) $50,000,000 shall be available for the program established under section 509H of the Public Health Service Act (as added by the amendment made by subsection (c)).

Mr. NUNN. Mr. President, I ask unanimous consent on the DeConcini amendment there be a time of 40 minutes equally divided and that there be——

Mr. DECONCINI. No intervening amendments.

Mr. NUNN. No second-degree amendments.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. That at the end of the time a motion on the amendment, or pertaining to the amendment, be in order.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DECONCINI. Mr. President, this amendment address an explosive problem in our country, a problem that may prove to be the biggest challenge to our economy in this decade and the next decade. I am talking about the devastating effect of drugs on American families.

On Wednesday, the distinguished Senator from California spoke movingly of the tragedy of drug babies in America and the urgent need for the Congress to help addicted pregnant women find the treatment they require. Senator WILSON'S amendment to the Campaign Finance Reform Act in support of necessary funds for the Office of Substance Abuse Preventions program for pregnant women and their infants was successfully adopted by this body. I commend the Senator from California.

I admire his tireless work in this area. He has been moving in this area for a long time, as I have. I do not question for one moment the need for the distinguished colleague's amendment.

However, whether the Campaign Finance Reform Act will pass both Houses of Congress and become law is in doubt. But there is no doubt that we are going to pass a Department of Defense authorization bill.

Therefore, I am offering an amendment today that would authorize the transfer of $100 million from the unobligated balance of funds available within the Department of Defense budget at the end of fiscal year 1990 to the Department of Health and Human Services to fund prevention and treatment programs for addicted mothers with infants and other young children.

Such a transfer has precedent on the Senate floor. It is the same mechanism used last year by the distinguished chairman of the Armed Services Committee during debate of the fiscal year 1990 Defense Department authorization bill.

The amendment of the Senator from Georgia authorized the transfer of $1.7 billion from the total unobligated balances from discretionary funds available to each agency on September 30, 1989, to fund the Anti-Drug Abuse Act of 1988. I complimented the Senator from Georgia then for his leadership and for working a way for this body to find the money to fund that very important bill.

Specifically, my amendment would authorize $50 million for the Pregnant Mothers Program administered by the Office of Substance Abuse Prevention and $50 million to establish a new demonstration program to allow drug-addicted mothers to reside in substance-abuse treatment centers with their children.

This new program would address one of the major barriers to drug treatment for low-income addicted mothers, particularly single mothers. Currently, most residential treatment programs do not allow clients to bring their children into treatment with them. As a consequence, a woman who needs help is often forced to choose between drug treatment and her children. All too often mothers are reluctant to seek the treatment, or they are forced to put their children into State foster homes. It is a no-win choice, with the cards stacked against families.

The demonstration treatment projects authorized by this amendment would target economically disadvantaged addicted women and their children and would offer child care, parenting, and jobs skills, nutrition, and other health and education services, as deemed necessary. The idea is to maximize successful treatment,

keep families together, and prevent substance abuse in the second and third generations.

Mr. President, I do not want to revisit the ground already covered by the distinguished Senator from California. Let me just say that I recently visited an intensive care nursery in Phoenix, AZ. I saw babies hooked up to tubes who weighed less than 1 pound. That room of struggling babies is only a small fraction of the tidal wave of drug babies being born every year.

I want to refer to chart No. 1, Mr. President. This is a chart by the U.S. Department of Health and Human Services which projects the number of crack babies by the year 2000 according to low, moderate, and high estimates. What this chart tells me is that we really do not know for sure the number of drug babies born every year. Is it 100,000? Is it 375,000?

In one hospital in this country, almost half its babies born last year—42 percent—were babies born exposed to drugs. Hopefully, this is not the norm, but I have a feeling deep inside me that we are just looking at the tip of the iceberg.

Let us not fool ourselves. The problem is worse in the inner cities. But it also cuts across lines of race and class. It infects not just our cities, but our suburbs and rural towns. It is a national tragedy that threatens to overwhelm our health-care system our overburdened foster care system, our system of education, and our families.

The problem is explosive, and it is getting bigger because we simply do not have enough treatment programs for women. Women and children are on the bottom of our totem pole in the treatment services that are delivered.

A recent General Accounting Office report tells us that 280,000 pregnant women in this country need treatment. One out of 10 get it. We must increase the treatment opportunities for women, and we should try, where it is practical, to rebuild families affected by these drugs.

I will admit that the uncertainty of successfully treating drug-addicted parents has made reuniting some families very difficult, even impossible. But hope exists. I want to maximize that hope.

This hope is reinforced by hard data from the handful of facilities that do allow mothers to have their children with them in treatment: Odyssey House in New York; Pomperoy House in San Francisco; Amity, in my hometown of Tucson, are just a few examples of successful programs.

Their data show that these women are consistently staying in treatment longer than women separated from their children. Expert testimony indicates that the longer a person stays in treatment, the better the chance is for recovery.

I want to close with this chart. Chart No. 2 speaks to the heart and the crux of that old saying, "penny-wise and pound foolish." These are conservative figures, and the figures speak for themselves.

The cost of providing foster care in drug-exposed babies is almost $500 million a year. Hospital care is $1.8 billion. Preschool costs for these babies who require special care is another $2.5 billion. This does not even touch the amount we will spend to get the most severely impaired through high school. Just over $100 million—less than 1 percent of the Federal budget for the drug war is spent today—is what we spend on treatment for women. Less than 1 percent.

During the debate on the Wilson amendment, the distinguished chairman of the Appropriations Committee, Senator BYRD, talked about this, stating that his committee intends to appropriate more than the $100 million for crack babies called for in the Senator from California's amendment, the 302(b) allocation is not further reduced by virtue of a sequestration or the summit agreement.

However, it is my understanding that the appropriation to which the distinguished chairman of the Appropriations Committee, the Senator from West Virginia, was referring includes more than $20 million for NIDA research, and another $20 million for the newly created Office of Treatment Improvement for programs just now getting underway.

Currently, the operating, ongoing Pregnant Women's Program, under the offices of OSAP—the specific program to which the amendment of the Senator from California referred—is funded at $33 million. President Bush recommended only $4 million in new money for fiscal year 1991. I understand that from previous reviews, OSAP has approved 58 applications—good applications—that go unfunded because there is no money. The new money the administration has requested will all go—every single penny of it—to help those programs already approved. So we are looking at a year in which no new applications for the addicted pregnant women program can be considered—no matter how worthy.

Mr. President, I think this chart speaks for itself. This is what we are spending in the area of drug-exposed babies, research, everything. The amendment before us today will increase that and put it into two programs, programs that I think are most worthy.

The PRESIDING OFFICER. Who seeks recognition? Who yields time?

Mr. DIXON. Mr. President, it is the plan of the managers to make very brief remarks and move to table when my colleague and friend from Arizona has concluded.

I yield whatever time to my colleague.

Mr. WALLOP. Mr. President, I ask that I be yielded 3 minutes.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. Mr. President, this is one of the most dreadful amendments. It causes people who oppose the amendment to appear as if they oppose drug treatment for crack babies and for social ills in America. But I rise in protest and opposition to the amendment for one very simple reason. That is, the DOD authorization is becoming a cash cow to be milked for every social ill in the country.

I suggest to my good friend from Arizona that in his State, mine, and most others, unemployment in the defense industry is going to be a social ill. I suggest that base closings are going to seem, in the areas where they close, very serious social ills.

I will suggest that the inability of the U.S. military to provide for the comfort and security of the families of our soldiers is going to be viewed by them as a social ill.

I suggest that our inability to respond in the ways in which we might like in Iraq will cause this Nation to feel much the same way. This "cow" is not for every soda fountain in America. It is for the defense of our country. We have other obligations and other means to take care of these problems. Nobody is opposed to taking care of the infants of addicted mothers in this country. It is a question of where you search for the source of funds. I suggest that it is not wise for us to so milk this poor cow called the DOD budget. We must be able to protect U.S. power on behalf of U.S. interests as conflicts emerge around the world.

So I rise in opposition to this amendment. I think it is unwise as a source of funds for a perfectly acceptable and perfectly noble requirement of the U.S. Government on behalf of its own people. But the source of funding is my objection to it, and I think that the Senate would be wise to defeat this amendment.

I yield the remainder of my time.

Mr. DIXON. Mr. President, I yield myself 1 minute to say to my colleague from Arizona that we have said about all we will say against his amendment, but to advise him that I will take about 2 more minutes of our time, thus using in total only 5 or 6 minutes, prior to moving to table. I yield to him any additional time he wants to consume, and I will take about 2 more minutes and move to table on behalf of the managers.

Mr. DECONCINI. I thank the Senator. I hoped he would let me have an up-or-down vote on this.

Mr. DIXON. I would be delighted to, but before I make that commitment, I will check with some people. We had planned to move to table.

Mr. DECONCINI. The Senator from Wyoming makes a point that is often made, and a legitimate point, about why are we using a defense bill for doing something in drugs. Well, this body, and the President made that judgment back in 1989 when we authorized and appropriated $300 million from the defense budget for drug purposes.

In 1990 we appropriated and authorized $700 million. And in this particular authorization bill we have $1.2 billion. That is important. That is a commitment. And that is a commitment I think we can be proud of.

I am asking that out of whatever money is unobligated from defense—and we know that in 1989 there was $40 million unobligated, and this year it is estimated that there will be $42 million unobligated—I am suggesting by this amendment that we take $100 million of that which is not going to be spent and use it in two very important programs.

This year, the DOD is having the same kind of problem expending the money that we allocated and set aside for drug programs in the defense bill, a $40 million fund set up particularly to give or grant money to Federal law enforcement agencies involved in drug programs.

As of the first of this month, only $6 million of that fund had been granted. So we can see that the Defense Department is not really pushing these dollars into programs that are needed. We know the problem here with these drug-addicted mothers and their children, and, putting them together, there is no better investment.

Why should the defense budget not participate in a problem that is devastating to this country? We have decided to do that, and for us now to say, well, we ought not to go along with this because we do not want to "milk the cow," misses the mark. Well, you milk the cow when you have a hungry child or a hungry family or a hungry nation.

This cow has milk and, as a matter of fact, we have gone so far as to tell the dairies that we want some of that milk put into the drug war—$1.2 billion. The Senator from Illinois has been one of the leaders in getting that kind of money obligated and authorized for that. Now we are saying, let us use some of this money, some of this milk, for drug-exposed babies and their mothers. We know that with mothers who have their children with them in residential treatment the rate of nonrecidivism and the rate of success are much higher.

So, Mr. President, I really hope that the yeas and nays have not been ordered. I hope that the distinguished chairman of the committee, Senator NUNN—who has been a leader in the effort to allocate up to $1.2 billion last year and who transferred $1.7 billion in funding for the 1988 drug bill—would accept this amendment and take it to conference. I think it makes a lot of sense.

Mr. President, how much time does the Senator from Arizona have remaining?

The PRESIDING OFFICER. Six minutes, twenty-two seconds.

Mr. DECONCINI. I yield to the Senator from Illinois.

Mr. DIXON. Mr. President, I yield myself as much time as may be required. I will be very brief. We are checking a matter right now that might take a couple of minutes.

May I say, Mr. President, that I essentially agree with what my colleague, the manager on the other side, has said. What the Senator from Arizona is attempting to do here has a great deal of appeal to all of us, because we are entirely sympathetic to the plight of crack babies, and I am greatly supportive of the plot behind what the Senator from Arizona would like to do in this case.

But while a demonstration project of this kind, Mr. President, may be highly desirable, it is the opinion of the managers on both sides that it should not be funded from the DOD budget. This, of course, would result in a reduction in the 050 account at a time when that account is being reduced dramatically. We have seen all the evidence of that here on the floor in our discussions about the very substantial reductions that have already been made in this authorization bill this year.

I think it is necessary for me to observe, Mr. President, that notwithstanding the very deep reductions we have made here, the other body has made even deeper reductions, and everyone here is perfectly aware of the fact that when this bill is conferenced, we will be subject to some kind of an accommodation to reach a lower figure than the Senate figure, and then, in line with that, we also have the problem of what might be the result of the ultimate summit conference that may impact on what we do as well.

I observe that just because the Department of Defense has an unobligated balance, does not mean that those funds are not needed for multiyear programs. The Appropriations Committee, Mr. President, has traditionally opposed this type of an amendment on the basis that, while an authorization bill can authorize the transfer of funds, it cannot actually transfer funds as is done here.

So while I have the greatest appreciation for the cause articulated by my distinguished friend, the senior Senator from Arizona, I must suggest to my colleagues that there is a very strong feeling on the part of both managers that we should not support the request of the Senator from Arizona.

Mr. President, how much time does this point of view that I represent still have?

The PRESIDING OFFICER (Mr. BRADLEY). The Senator has 13 minutes and 26 seconds.

Mr. DIXON. Mr. President, in about 1 minute or so I will make a motion or otherwise suggest what the managers would like to do, but I now suggest the absence of a quorum and ask that the time be charged to our side.

Mr. DECONCINI. Mr. President, will the Senator withhold?

Mr. DIXON. Yes; I withhold.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DIXON. I yield the floor then.

Mr. DECONCINI. How much time do I have?

The PRESIDING OFFICER. Six minutes and 17 seconds.

Mr. DECONCINI. Mr. President, as my good friend and distinguished colleague from Illinois points out, this is an exceptional process we are going through here. Indeed it is. We did it last year. We did it last year on this bill. We made a determination—and I know the Chair is interested in this—that it could be done and then we passed legislation by transferring $1.7 billion from the total unobligated balances from discretionary funds available to each agency on September 30, 1989, making it available to drug programs across the country.

It is interesting to note that to this day, I cannot find out, and I am not sure the Armed Services Committee knows, where the $700 million is being spent this year, or where it is going to be spent next year.

I have tried a number of times to get a designation from the Defense Department on where they have spent this money. One thing I found out. Out of $40 million that was set aside for direct funding to Federal law enforcement agencies, as I said, as of August 1, only $6 million of that has been spent. We have the money. The question is whether or not we want to tell the Department of Defense that we are going to take some of this money out of its budget and transfer it to treatment programs for drug-exposed babies and addicted mothers. I hope we can do just that.

Mr. President, this is not a matter of any less importance, in my opinion, than the defense of the United States. We are talking about the defense of the United States and we are talking about taking some money and putting it into the best defense that we can possibly do. We are supposed to have our drug funds equally divided, 50–50 on supply and demand, and we know that it has not quite worked out that way.

That upsets me because I happen to believe in that principle. This amendment will help balance the heavy weighted enforcement which I also support and think we have to maintain.

Mr. WALLOP. Mr. President, will my colleague yield for a question?

Mr. DIXON. I yield on the Senator's time.

Mr. WALLOP. On my time.

Mr. DIXON. I yield to my colleague.

Mr. WALLOP. The question is this: Has the Senator inquired of the Department of Health and Human Services what levels of unobligated funds they may have that might be more appropriately subject to this kind of amendment?

Mr. DECONCINI. No; the Senator has not.

Mr. WALLOP. My view and response is that would be a more appropriate place to absorb unobligated funds than would be the Department of Defense budget.

Mr. DECONCINI. I appreciate the opinion of the Senator from Wyoming on that. But the fact is the discretionary funding in Labor, HHS as a percentage of the budget has declined in relation to discretionary spending in DOD.

The PRESIDING OFFICER. Who yields the floor?

Mr. DIXON. Mr. President, I yield myself as much additional time as may be necessary, assuring the Chair and my colleagues it will only be a matter of moments until we reconcile what we intend to do with reference to this amendment offered by my distinguished friend and colleague from Arizona.

I simply make this observation to my colleagues, that while this amendment has a great deal of appeal, I am sure it would be an amendment that would set a significant precedent late in the proceedings when we are trying to dispose of this legislation.

If we are going to begin to make transfers to funds from the Department of Defense for other social purposes, no matter how important, I suggest that we are going to have a great deal of difficulty about this.

Again, I stress to my colleagues that the Appropriations Committee has traditionally opposed this type of amendment on the basis of, while an authorization bill can authorize a transfer of funds, it cannot actually transfer funds as is done here.

For this reason, Mr. President, I think that it would be a very serious mistake for us to support what the Senator from Arizona is suggesting.

I regret very much, may I say to my friend from Arizona, the necessity of moving to table here, but it is the substantial opinion of all those managing, that that is the way to go.

Mr. WILSON. Will my friend from Illinois yield?

Mr. DECONCINI. I yield 2 minutes to the distinguished Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. WILSON. I thank my friend, the Senator from Illinois. I understand he has a motion to table and I understand why. Before he does so I would like to use some of the time remaining to the Senator from Arizona, who is opposing the amendment.

Mr. President, this is not an easy question for a number of Members on this floor. People who are members of the Armed Services Committee, like myself, devote a great deal of time and effort to the defense budget.

I have to agree with the Senator from Arizona that in terms of the urgency of the threat we are facing I described that the other day as an epidemic. I do not think that is in any way an exaggeration. The unobligated funds in this fund to which he refers are not truly unobligated. There are more claims on them than we would like. We are engaged in an effort here on this floor to try to reduce, in order, those competing claims. I would have to say, though, that in terms of the immediacy, in terms of the urgency, I agree, and not only agree, I have been emphatic in urging that this is the most urgent of unmet needs, the most deserving.

It may be that in accordance with the question asked by my friend from Wyoming, there will be unobligated funds within the Department of Health and Human Services. I would agree it would be more appropriate that they be expended. I am going to vote, though, for the amendment being offered by my friend from Arizona, because if, in fact, it turns out that other funds are available from other sources, that is all to the good. But if not, if the question becomes very narrowly focused upon whether or not, with no other funds available, we are going to add to the amount that we are expending now to combat the addiction of innocent newborns by trying to do something to arrest drug abuse among pregnant women, then I would spend money from even the funds that we allocate to those very hard-pressed competing priorities claiming our national security funds.

I do not like to do that, but, frankly, we are talking about priorities and what he is proposing here is the beginning of what we are going to actually have to expend.

So, reluctantly, with some not misgiving, actually, but with some understanding of the difficulty that the good men, the Democrats and the Republicans on this committee feel in opposing this and offering a motion to table, I cannot support them in this instance.

I will support the Senator from Arizona because I think that whether it is this bill or some other bill, we are going to have to come to grips with this problem. We are going to have to provide funds in a magnitude that begins to be realistic about dealing with it. Otherwise, we cannot realistically or honestly state that we are making the effort required to contain and reverse what is, in fact, an epidemic.

I simply remind my colleague that what we are not spending on this is a disgrace. What we will be compelled to spend on it if we do not contain and reverse the epidemic, will make even this expenditure literally the tip of the financial iceberg.

Mr. President, I relinquish the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Mr. President, I thank the Senator from California for his remarks on this. Since he serves on the Armed Services Committee, I understand the importance of supporting the bill which came out of the Armed Services Committee. I appreciate his perspective on this approach. This is important enough to make some difference and some changes. That is exactly what we have the opportunity to do.

I thank the Senator from Illinois and the Senator from Wyoming.

Mr. DIXON. Mr. President, on behalf of the managers, Senators NUNN and WALLOP, I move to table.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Does the Senator from Arizona yield back all of his time?

Mr. DECONCINI. Yes; I yield back my time.

Mr. DIXON. We yield back our time as well.

The PRESIDING OFFICER. All time has been yielded back.

Mr. DIXON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Illinois [Mr. DIXON], to table the amendment of the Senator from Arizona [Mr. DECONCINI]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN], is absent because of illness in the family.

The result was announced—yeas 51, nays 48, as follows:

[Rollcall Vote No. 216 Leg.]

YEAS—51

Armstrong	Breaux	Chafee
Bentsen	Bryan	Coats
Bond	Burns	Cochran
Boschwitz	Byrd	Danforth

Dixon	Heflin	Murkowski
Dole	Heinz	Nickles
Domenici	Hollings	Nunn
Durenberger	Humphrey	Roth
Exon	Jeffords	Rudman
Ford	Johnston	Sanford
Garn	Kassebaum	Shelby
Glenn	Kasten	Simpson
Gore	Kerrey	Stevens
Gorton	Lott	Symms
Graham	Lugar	Thurmond
Gramm	Mack	Wallop
Hatch	McClure	Warner

NAYS—48

Adams	Grassley	Mitchell
Akaka	Harkin	Moynihan
Baucus	Hatfield	Packwood
Biden	Helms	Pell
Boren	Inouye	Pressler
Bradley	Kennedy	Pryor
Bumpers	Kerry	Reid
Burdick	Kohl	Riegle
Cohen	Lautenberg	Robb
Conrad	Leahy	Rockefeller
Cranston	Levin	Sarbanes
D'Amato	Lieberman	Sasser
Daschle	McCain	Simon
DeConcini	McConnell	Specter
Dodd	Metzenbaum	Wilson
Fowler	Mikulski	Wirth

NOT VOTING—1

Bingaman

So the motion to lay on the table the amendment (No. 2522) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DECONCINI. Will the distinguished manager yield?

Mr. NUNN. I will be glad to.

Mr. DECONCINI. I want to thank Senators for voting for this amendment and I also want to indicate we will be visiting this subject matter again. I want to thank Lynn Kimmerly of my staff, the chairman, and the ranking member.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. KOHL). There will be order in the Chamber.

The Senator from Georgia.

Mr. NUNN. Mr. President, we have three Roth amendments, and he is willing to enter into a time agreement on each one of them. I ask the Senator, the first amendment is called a base conversion amendment; is that the way he describes it?

Mr. ROTH. That was not the amendment I had planned to bring up.

Mr. NUNN. We do not care in which order they are brought up.

Mr. ROTH. The first amendment I propose to bring up is a prohibition of a transfer of land to the Department of Defense of lands under the jurisdiction of any other department or agency in the Federal Government for 1 year.

Mr. NUNN. Mr. President, I ask unanimous consent that on the first amendment as described by the Senator from Delaware, there be a time limitation of 20 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I also add to that unanimous-consent request that any second-degree amendment be relevant or germane, with the same time agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Will the Senator be willing to stack his votes?

Mr. ROTH. I will be happy to stack the votes.

Mr. NUNN. If he could describe the other two amendments, and then we will seek unanimous consent on each one of those.

Mr. ROTH. The second amendment involves a number of people that can be withdrawn off a base without referring it to the Congress. It is currently 300, and we would raise that to 1,000.

Mr. NUNN. Will the Senator agree to 20 minutes?

Mr. ROTH. I will happy to agree to 20 minutes.

Mr. NUNN. I ask unanimous consent that there be a time agreement of 20 minutes on this amendment, with second-degree amendments being relevant and germane.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Under the same time.

Mr. ROTH. My third amendment involves base conversion, a proposal to turn over bases that will be closed to the local communities if they so choose and enable them to develop a plan to make it a community development.

Mr. NUNN. Forty minutes on that one?

Mr. ROTH. I would be happy to limit that to 40 minutes.

Mr. NUNN. Will the Senator be willing to do less than that? Could he do 30?

Mr. ROTH. Yes; we will be happy to do 30.

Mr. NUNN. How about 20?

Mr. ROTH. No. No.

Mr. NUNN. Mr. President, I ask unanimous consent there be a 30-minute time agreement on the third Roth amendment as described, with any amendments thereto being relevant and germane under the same time agreement.

Mr. KENNEDY. Reserving the right to object, and I do not intend to object, I had talked to the manager of the bill about an amendment that I had.

I will not object to this, but I would like to be able to see if we could follow the Roth amendment. I will be glad to follow whatever procedure the floor managers would like in terms of the amendment, which I believe the managers have had some opportunity to look at.

Mr. NUNN. Will the Senator from Massachusetts be willing to have a time agreement on his amendment? Can he describe the amendment briefly?

Mr. KENNEDY. Yes. Does the Senator want to get his consent on Roth before I do it?

Mr. NUNN. Mr. President, could we get consent on the third Roth amendment?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. NUNN. Mr. President, can the Senator from Massachusetts describe the amendment?

Mr. KENNEDY. Mr. President, the purpose of the amendment is to strengthen the foundation for confident verification of deep reduction in the nuclear arsenal by encouraging analyses of possible monitoring arrangements for controls on the production of nuclear explosive materials and the dismantlement of workloads.

It is basically a report and advisory group to help assist in the areas of verification, looking down the road that if we do get verification, we will have built up some additional information that will be useful to verification.

Mr. NUNN. Mr. President, I thank the Senator from Massachusetts. Will the Senator be willing to enter into, say, a 20-minute time agreement?

Mr. WARNER. Mr. President, we cannot at this time enter into that time agreement. We have had the amendment for a brief period. As soon as we get some responses, we would be happy to accommodate the Senator from Massachusetts.

Mr. NUNN. I will try to accommodate the Senator after the Roth amendment, and perhaps we could be able to work out that amendment.

Mr. KENNEDY. I thank the Senator. I thought the minority had it for a period of time, 2 weeks, but perhaps they did not.

Mr. WARNER. I apologize to the Senator.

Mr. KENNEDY. It is no problem. We will come back and visit it at the conclusion of the Roth amendment and work out something. We welcome that opportunity.

I thank the Senator.

Mr. NUNN Mr. President, perhaps the Senator from Delaware could begin. I am asking if the majority leader would agree, and I ask the Senator from Delaware if he could agree, for the votes to be stacked, with the first vote to be 15 minutes and the subsequent votes to be 10 minutes each. But I need to clear that with the majority leader.

Mr. ROTH. That will be very satisfactory to this Senator.

The PRESIDING OFFICER. Without objection, the pending amendments are laid aside.

The Senator from Delaware is recognized.

AMENDMENT NO. 2523

(Purpose: To prohibit the transfer to the Department of Defense of lands under the jurisdiction of any other department or agency of the Federal Government)

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH], for himself and Mr. BIDEN, proposes an amendment numbered 2523.

Mr. ROTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PROHIBITION ON TRANSFER OF LANDS TO THE DEPARTMENT OF DEFENSE

(a) IN GENERAL.—(1) Notwithstanding any other provision of law and except as provided in subsection (b)—

(A) the Department of Defense may not procure, purchase, or otherwise acquire any lands; and

(B) a department or agency of the Federal Government may not transfer to, or make available for use by, the Department of Defense any lands under the jurisdiction of that department or agency.

(2) Funds made available to or for the use of the Army National Guard of the United States, the Air National Guard of the United States, or the Reserve components of the Armed Forces may not be used for the procurement, purchase, acquisition, or transfer of any lands.

(b) EXCEPTIONS.—The prohibition in subsection (a) shall not apply—

(1) to the acquisition or transfer of any parcel of land involving 25 acres or less; or

(2) to lands that have been made available on a regular basis to the Department of Defense by a department or agency in any area before the date of the enactment of this section so long as (A) such lands are made available for the same purpose and for the same period of time as in previous years, and (B) the total acreage of the lands made available to the Department of Defense in that area after the date of the enactment of this section does not exceed the annual average number of acres made available to the Department of Defense by that department or agency in that area in the five years preceding the year in which this section is enacted.

(c) EXPIRATION OF PROHIBITIONS.—The prohibitions in subsection (a) shall expire on September 30, 1991.

Mr. ROTH. I propose this amendment on behalf of myself and the junior Senator from Delaware.

Mr. President, the Department of Defense now has 25 million acres in land holdings, and it is seeking this year to increase its holding by some 20 percent, or 4.5 million acres, an amount that is 3.5 times the size of my State of Delaware. The targeted lands include New England hardwood forests, Southern pine forests, Northern prairie, and Western rangeland.

While most of the acreage desired by the Pentagon is owned by the Department of Interior's Bureau of Land Management and the Department of Agriculture Forest Service, large tracts of private lands will be condemned and then purchased.

Additionally, the Pentagon is offering to trade to other Federal agencies 16,000 acres of Army-owned land in Colorado worth $2.2 million or 32,000 acres of forest land in Mississippi worth $46.6 million.

According to DOD, the capability of our airplanes to fly faster and lower, of our units to travel quicker and farther, and advances in weapons and technology, requires this land so that training can keep pace.

Let me draw a salient point to your attention, Mr. President. DOD put its plan together at least 2 years ago, and these land acquisitions, which may well have been reasonable at the time they were formulated, are no longer reasonable.

Times have changed. The Warsaw Pact threat to NATO is greatly diminished. The changes that flow from this changed threat have not yet been determined. Almost everyone agrees that these changed circumstances will result in a smaller U.S. Military Establishment. Presumably, a smaller establishment will not require so much property.

This analysis may be incorrect, but we at least owe it to the taxpayer to stop and evaluate the impact of the changed international environment on our land acquisition plans before we proceed. I should point out that the Secretary of Defense has recognized this principle by freezing military construction. If we are to freeze construction, which I agree should be done, should we not also freeze land acquisition, at least until we have had time to reassess the military property requirements in light of a changed military structure?

I also want to point out to all Senators that a total force structure report is due in November. I do not think that any purchase decision should be made until this report is in hand.

Mr. President, we are already wrestling with the problem of disposing of unwanted military property. Let us not exacerbate this problem by rushing ahead to acquire more property. I suggest that we have time to revisit this decision before we commit to a decision to condemn and purchase private land, or to withdraw such a vast amount of land from the public domain for use by the military.

I believe that my proposed amendment is germane. It is reasonable. I think it deserves the support of all Senators.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DIXON. Mr. President, I yield 6 minutes to the manager on the other side, the distinguished Senator from Mississippi.

Mr. LOTT. Mr. President, I thank the Senator from Illinois.

I rise in opposition to this amendment. I understand this amendment would prohibit the Department of Defense from acquiring or receiving by way of transfer or interchange with other Federal agencies any parcels of lands in excess of 25 acres.

First, I would like to point out that in many instances, these transfers, or interchanges in particular, are actively sought by not only the Department of Defense but by other agencies or departments of the Government, whether it is the Forest Service or BLM. Quite often, it is to the benefit of all concerned.

Perhaps you have some military training exercise in an area that is causing some problems that could be moved to another area that would be much more acceptable environmentally, or from a conservation standpoint. These interchanges quite often are initiated by the other department or agency. It is not even necessarily just the Department of Defense.

Now, a statutory prohibition of these interchanges, transfers or interchanges, certainly is unnecessary micromanagement of the Department of Defense. Each proposed land acquisition receives careful scrutiny from the Armed Services Committee and from the Committee on Energy and Natural Resources.

In fact, in the fiscal year 1991 budget, there were, I believe, five significant land acquisition proposals but only one was approved. The rest were deferred because of questions about their underlying requirements, not because of a bias against land acquisition.

The Armed Services Committee gives very close scrutiny to these issues, and I thnk they will continue to do so. Also, you have very imortant environmental impact statements. You have cooperation and communication between the departments that might be involved. And many times IIS would say, "Well, this is really not justified. We should not do it. Therefore, it will not be done."

In this particular case, this amendment would effectively block expenditure of the bill's authorization of $10 million for an option for the purchase of some 55,000 acres of a critical safety zone underlying the Vandenberg Air Force Base, California, missile launch corridor.

So you not only have environmental considerations that would mitigate for and urge that these transfers, or interchanges take place for conservation

factors as well as safety. Without timely acquisition of this option, land development might make it impossible, therefore, substantially or, if not impossible, at least certainly more expensive in its cost to the Government.

The Energy Committee, likewise, exercises very careful scrutiny of these DOD requests. These actions reach the Congress for review only after extensive environmental impact statements and other justifications that are required.

Another example that I am personally familiar with is an example where the National Guard, working with officials at DOD and the Forest Service in my own State of Mississippi, are looking at some land interchange between the Forest Service and DOD for tank training. This land would actually be in a different area, in some instances, from where they presently train, which would be environmentally advantageous. It is something that the National Guard has been very careful about.

They are very good stewards, by the way, of these areas. They pay attention to endangered species. That is one of the reasons why we are looking at perhaps some different acreage.

This is one other factor that I think we need to consider in this particular area.

Yes, we are going to be bringing troops home from Europe and other places around the world. I voted for the amendment of the distinguished Senator from Illinois in the Armed Services Committee to bring home an additional number of troops from Europe, 50,000. I voted for that in the committee, to some people's surprise, but I think it is time to start bringing them home a little faster perhaps.

But as we bring home troops, as we bring home tanks, they are going to need places to train. Perhaps in the past they have been doing that training in Europe. As we bring more of them home, there must be some arrangement for that, even if we reduce overall numbers of troops, and overall number of tanks. They have to go some place.

So I urge that this not be done. There are certain exchanges now or interchanges that are in process that may be completed soon or final decision could be made.

You might say, well, we are only talking about a 1-year moratorium. Many of these have been under way for months, even years. Many of them make very good sense from every standpoint.

So I think that, while I am sure this is very well-intentioned, when you get into it, look at all the arguments, the fact is it is not necessary. It is micromanagement, it could lead to increased costs, it could lead to safety dangers, and it could lead to environmental conservation problems.

I just do not think it is necessary, and I urge my colleauges to defeat this amendment that would place this moratorium on the interchange and transfer of lands.

I yield the floor.

Mr. DIXON. Mr. President, I yield myself 1 minute simply to say that I concur thoroughly in everything that my colleague from Mississippi has said. In view of his very able articulation of the point of view of the managers opposing this amendment, I see nothing more to add.

I simply want to ask unanimous consent of the Senate that the votes on or in relation to the three Roth amendments be stacked to occur at the conclusion of the debate on all three amendments with the first vote being 15 minutes and the remaining votes being 10 minutes in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. I yield the floor.

Mr. ROTH. How much time do I have remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 6 minutes remaining on the first amendment.

Mr. ROTH. Mr. President, as I have already pointed out, the Department of Defense now has 25 million acres in land holdings and is seeking to increase that holding by some 20 percent, or 4.5 million acres, as I already pointed out, an amount that is 2.5 times the size of my State.

All I am asking is a moratorium for 1 year. The Secretary of Defense has already given a moratorium on construction. What concerns me is that we should not be acquiring additional land that can have a very, very disruptive influence on other citizens.

For example, there was an article recently in the U.S. News that said it is a time of rural despair. Hundreds of farmers, anxious and angry, pack into a local hall to counter a tenuous future, the threat of loss of their farms and homes. The agenda is organize and fight. What they are concerned about is that their land is going to be acquired by the Pentagon, and they will lose their livelihood.

We are not saying that it should not be done under any circumstance. What we are arguing is that with this much land, we should not be acquiring additional land when presumably we are in a period of retrenchment. It may be that some of this land will have to be acquired. Let us take time and do it carefully. Let us not put at risk families, farmers, business people when it is not necessary. This should be a time that we study carefully where we are moving, and do it in a manner that is compassionate, thought out and does not adversely affect other citizens of this great country.

Mr. President, I would be willing to yield the balance of my time.

Mr. DIXON. On behalf of the managers, Mr. President, we yield the remainder of our time on this particular amendment. We can go to the second amendment.

The PRESIDING OFFICER. The Senator from Delaware is recognized on the second amendment.

AMENDMENT NO. 2524

(Purpose: To minimize the adverse effects on local communities caused by the closure of military installations)

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH], for himself and Mr. BIDEN, proposes an amendment numbered 2524.

Mr. ROTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new title:

TITLE —BASE CONVERSION

SEC. . DEFINITIONS

As used in this title:

(1) The term "military installation" means a base, camp, post, station, yard, center, homeport facility for any ship, or other activity under the jurisdiction of the Secretary of a military department.

(2) The term "Administrator" means the Administrator of General Services.

(3) The term "local community" means the incorporated town, village, city, or similar entity of the State in which a military installation is located or, if the military installation is not located in an incorporated entity, the incorporated entity of the State that has authority under State law to annex the property on which the military installation is located.

SEC. . DISPOSITION OF PROPERTY

(a) IN GENERAL.—The real property constituting each military installation identified by the Secretary of Defense on January 29, 1990, as a military installation in the United States proposed to be closed by the Department of Defense shall, if such installation is closed, be disposed of as provided in this title.

(b) TRANSFER OF PROPERTY TO THE ADMINISTRATOR.—Thirty days after the date on which a military installation referred to in subsection (a) is officially closed by the Department of Defense, the Administrator shall have jurisdiction over the real property constituting the military installation.

(c) PRIORITY FOR DISPOSITION.—Within six months after a military installation referred to in subsection (a) has been closed, the Administrator shall offer title to the real property constituting the military installation to the local community concerned. Title to the property shall be offered subject to the conditions prescribed in this title.

(2) If the local community concerned refuses the property, or fails to notify the Administrator of the community's acceptance of the property within six months after the date on which the Administrator notifies the community in writing of the availability

of the property (and the conditions under which the property will be granted to the community), the Administrator shall offer the property to the county in which the military installation is located.

(3) If the county refuses the property, or fails to notify the Administrator of the county's acceptance of the property within three months after the date on which the Administrator notifies the county in writing of the availability of the property (and the conditions under which the property will be granted to the county), the Administrator shall offer the property to the State in which the military installation is located.

(4) If the State refuses the property, or fails to notify the Administrator of the State's acceptance of the property within 60 days after the date on which the Administrator notifies the State in writing of the availability of the property (and the conditions under which the property will be granted to the State), the Administrator shall offer the property to other departments and agencies of the Federal Government.

(5) If no department or agency of the Federal Government requests the property within 30 days after the date on which the notice of the availability of the property is published in the Federal Register, the Administrator shall dispose of the property to the highest responsible bidder.

(d) PROPERTY LOCATED IN MORE THAN ONE LOCAL COMMUNITY.—In any case in which a military installation referred to in subsection (a) is located in more than one local community, the property shall be offered to each of the communities and, if accepted by more than one community, shall be divided among the communities in such manner as may be specified by the laws of the State concerned.

(e) PROPERTY LOCATED IN MORE THAN ONE COUNTY.—In any case in which a military installation referred to in subsection (a) is located in more than one county of a State and the real property constituting the installation is not accepted by the local community concerned, that portion of the installation within each county shall be offered to that county.

SEC. . CONDITIONS

(a) IN GENERAL.—Title to the real property constituting a military installation referred to in section (a) may not be conveyed to a local community, county, or State unless the local community, county, or State, as the case may be, submits to the Administrator, in such manner as the Administrator may prescribe, a plan under which the local community agrees—

(1) to reimburse the United States for the training or retraining of all Federal civilian employees whose employment is terminated as a direct result of the closing of the military installation concerned;

(2) to reimburse the United States for all severance payments made by the United States to employees described in paragraph (1) as a result of the closing of the military installation;

(3) to reimburse the United States for payments made to employees described in paragraph (1), in addition to any other payments to which they may be entitled, an adjustment allowance equal to one week's pay for each year employed, but not more than an amount equal to 10 weeks' pay;

(4) that if the property is sold by the local community, county, or State, as the case may be, within 25 years after the date of the conveyance of the property to the local community, county, or State, to pay to the United States an amount equal to 25 percent of the proceeds from the sale of the property after deducting the costs incurred in carrying out paragraphs (1), (2), and (3) (to the extent the costs have not been deducted from any proceeds referred to in paragraph (5));

(5) to pay to the United States 25 percent of any income realized by the local community, county, or State, as the case may be, from the rental or lease of the property during the first 25 years following the date of the conveyance of the property to the local community, county, or State, after deducting the costs incurred in carrying out paragraphs (1), (2), and (3) (to the extent that the costs have not been deducted from any proceeds referred to in paragraph (4));

(6) to make available to the Comptroller General of the United States such information as may be necessary for the Comptroller General to carry out his duties under section ; and

(7) to such other terms and conditions as the Administrator determines necessary to prevent the local community, county, or State from entering into an arrangement that would postpone payment of part or all of the sale price of the property or postpone payment of part or all of the rental payments so as to avoid any payment to the United States required under paragraph (4) or (5).

(b) REQUIREMENTS REGARDING PLAN.—(1) Property referred to in section (a) may not be conveyed under this title to a local community, county, or State unless the plan submitted by the community, county, or State, as the case may be, is approved by the Administrator, in consultation with the heads of other appropriate departments and agencies.

(2) The Administrator may not approve a plan submitted by a local community, county, or State unless—

(A) the plan describes, in such manner as the Administrator may provide, the manner in which the benefits referred to in subsection (a) will be provided and the manner in which the other conditions prescribed in such subsection will be met by the local community, county, or State; and

(B) the Administrator determines on the basis of the information contained in the plan that there is a reasonable likelihood that the plan will be successful.

(c) APPROVAL OR DISAPPROVAL OF PLAN.—The Administrator shall review each plan submitted pursuant to subsection (b) and shall notify the local community, county, or State concerned of the approval or disapproval of the plan within 30 days after receipt of the plan. If the plan is disapproved, the Administrator shall specify the reasons for the disapproval and the changes necessary to obtain approval of the plan.

SEC. . FAILURE TO COMPLY WITH CONDITIONS.

If a local community, county, or State to which real property is conveyed pursuant to this title fails to comply with any condition provided for in this title, the Administrator, after providing written notice to the community, county, or State, as appropriate, may withhold from any payments otherwise payable to the community, county, or State under any Federal program, such amounts as may be necessary for the United States to meet the expenses of complying with the conditions provided for in section (a). The Administrator may provide any benefit described in section (a) to any employee referred to in paragraph (1) of that section in any case in which a local community, county, or State, as the case may be, fails to provide that benefit.

SEC. . REVIEW BY COMPTROLLER GENERAL.

The Comptroller General of the United States shall conduct such reviews of the transactions carried out pursuant to this title as may be necessary to determine whether the transactions are in compliance with this title.

SEC. . REGULATIONS.

The Administrator shall prescribe such regulations as may be appropriate to carry out this title.

SEC. . AUTHORIZATION OF APPROPRIATONS.

There are authorized to be appropriated such sums as may be necessary to carry out this title.

Mr. ROTH. Mr. President, the purpose of this amendment is to allow us to put the best possible face on the difficult transition of closing unnecessary military bases. I introduced this amendment as a freestanding bill earlier. The bill was cosponsored by Senators HOLLINGS and LUGAR.

My proposed amendment does three things. First, it supersedes existing regulations that deal with disposal of Federal surplus property and permits the transfer of property to local communities to own and develop.

Second, it provides retraining, severance pay, and an adjustment allowance for the workers who are impacted by the closing of the military base.

Third, it provides an opportunity to reduce radically or eliminate base closing costs which would accrue to the Federal Government under existing law.

Mr. President, I would like to say that on the whole we are facing an enviable position in the arena of defense spending. Of course, there are some very serious considerations that must be made, and the task ahead of us is both formidable and serious. But there is reason for good heart. While the answers will be difficult, the questions are widely agreed upon. No longer are we asking should we cut defense spending. Instead we are asking in what manner and by how much.

My amendment is designed to provide for a lowering of the national defense budget and the deficit by ending the operation and maintenance costs of unneeded bases to benefit local communities that are impacted when bases are closed, to provide retraining, adjustment allowances, and severance benefits for civilian Federal employees whose jobs are lost because of bases closed to empower local communities to determine how to use former bases, without outside interference.

Mr. President, where local opposition to base closings exist, congressional opposition is generated, and the Department of Defense has a difficult time in closing that base. Because the base is not closed, the cost of operating it continues. The Federal Government continues to operate a facility which, according to the Secretary of

Defense, it does not need. In such a case, nobody wins, and everybody loses a little each year, so long as that unneeded facility remains open.

There is no way that one can consider an unneeded base an asset. A base becomes an asset only when sold. And we have found it virtually impossible to sell many bases. In reality, unneeded bases are a liability that continue to drain the limited resources of the Department of Defense. According to the Grace Committee, closed, unneeded bases can save several billions of dollars.

This estimate was made before the recent changes in Eastern Europe. As we reduce the size of our Armed Forces, even more bases may need to be closed. The key to breaking the logjam of local resistance, so that bases can be closed and the potential savings can be realized, is to devise a method that turns base closings into an attractive economic opportunity for the impacted community.

A base closure process that is slow, painful, and politically agonizing, benefits no one. It means that the financial savings remain largely theoretical, while the process is dragged out in legal and political arenas.

A system is needed that begins to change base closings into real opportunities which will win the support of local communities. We need to create win-win situations.

I am pleased to report, Mr. President, that the U.S. Conference of Mayors, in its annual meeting in Chicago on June 20, 1990, strongly endorsed my legislation. I believe, and the Nation's mayors agree, that the principle is sound, and that this amendment will provide assistance to those communities where this approach makes good economic sense.

The reason why the mayors agree is that my amendment represents a new, constructive, voluntary arrangement available to communities undergoing the transition brought about by closing a defense facility. It is a proposal true to basic Federalist principles, and it gives the communities impacted by the closure of a Federal facility the opportunity to control the fate of its closed facility.

It is a voluntary program that is triggered when the community decides that the program serves its best interests. The community decides the best use of the property, not the Federal Government. Unlike other Federal programs, no one from Washington will be traveling to the community to tell the community the best use of its property. That is something that the community understands better than anyone here in Washington.

At the same time, it is not a simple giveaway of the property. The community must agree to reimburse the United States from proceeds of the development or for the cost of protecting the impacted Federal civilian workers. It must also share 25 percent of any profits with all of the taxpayers.

In short, my amendment offers economic conversion of unneeded military facilities at no cost to the Federal Government.

Even with these strings attached, the bill provides the incentive for aggressive community leaders to turn what in the past has been viewed as a negative experience into a positive development experience, under the community's control.

This amendment tells the community that Washington is willing to work with them in establishing a program that will benefit both parties, as well as the many civilian employees, and this is what we are here for, after all, not to protect obsolete and useless bases, but to help our States and our communities help themselves.

As I said before, these people, as well as these communities, have every right to be concerned about the loss of jobs and economic activity from the necessary closings. And we have an obligation to assist them by adopting policies that turn base closings into economic opportunities for the individuals, opportunities for the community, and opportunities for the country. Mr. President, I urge the Senate to adopt my proposed amendment.

I yield the floor.

Mr. DIXON. Mr. President, I yield myself as much time as may be required. I will be brief.

With all due respect to my colleague, I think the basic hypothesis he articulates here is flawed. With extremely rare exceptions, communities have almost always gained access to closing bases. Opposition to closure is based upon wanting Federal Government activities to remain—to remain, not to leave. Take the work of this Senator.

In Illinois, we took a tremendous hit on the base closure commission report. Two bases closed: Fort Sheridan near Highland Park in northern Illinois, and Chanute adjacent to Rantoul in central Illinois.

The concern of those communities is more addressed to the Federal and other involvements adjacent to their communities, than to acquisition of the remaining installation by the municipalities. Making communities responsible for funding displaced Government employees, severance pay, training and retraining assistance, and a new category of adjustment allowance, one week's pay for each year's service up to 10 years, removes the military service from its legitimate obligations to its employees.

If communities have to fund these benefits, the Department of Defense will lose its incentive to place these workers in other kinds of Government jobs.

My friend's amendment further establishes a very complex structure of reimbursement to the U.S. Government, a 25 percent fee on rents and revenues from the redeveloped property for 25 years, without giving the Federal Government any kind of voice in the site's management at all.

So under this provision, the property would be encumbered for 25 years, and it would be subject to Federal garnishment of benefits occurring in the community, if all conditions were not met. It would give the General Services Administration administrator approval authority over community re-use plans, imposing Federal micromanagement on all the local issues.

I am afraid my friend's amendment contradicts streamlined closure provisions provided in the bill in section 2805, which delegates disposal authorities from the GSA to the Department of Defense.

Mr. President, the current system protects local redevelopment interests and priorities. Let me give you an example. The Department of Defense has resisted the VA's desires to expand the cemetery at Fort Sheridan in my State, where we are going through this experience right now, because it is incompatible with community redevelopment plans. They have worked with the community, they have worked with this Senator, they worked with JOHN PORTER, a Congressman, of the other political persuasion, but a very fine fellow, who has worked with me, as we have worked together in connection with that community's needs.

It is forcing the Bureau of Prisons to secure community approval before siting new prisons at Fort Meade and at the Brooklyn Naval Station.

So I think that while my friend's intentions are good, his amendment contradicts the longstanding guidelines of the Federal Property Act, which has worked successfully for years, and section 2813 of the committee bill, this committee's bill, which has been carefully studied. May I say, my friend was heard in my subcommittee. We gave him a full hearing, and he presented his case persuasively.

We did not think we should change existing law. The existing law reiterates right now Congress' priority of using closed bases for a variety of reasons, and we think that is the proper approach to the problem.

So, while I consider the intention of my colleague, and my colleague has been a very fine one in his work here, in his demonstrably excellent usual manner of approaching each and every problem, I do not think there is any call for changing existing law. I urge my colleagues not to do so.

At the appropriate time I will make the appropriate motion.

I yield whatever time my colleague, the other manager, has from what I have remaining. How much time do I

have remaining? I yield the remaining time to my colleague.

The PRESIDING OFFICER. Five minutes and 20 seconds.

The Senator from Mississippi.

Mr. LOTT. Mr. President, I will be brief. I say on behalf of the managers on this side we concur in what has been said by the Senator from Illinois.

I might touch on a couple points, though, that I think important. First of all, it is not a remove thing now. It could affect any of our States. We better think about what the priorities are and how it will be handled. I guarantee I have been having that go through my mind.

I think one of the major problems with the problem like the previous one is another case of micromanagement with an extremely complex system of reimbursement regarding cost of rents and leases. I really do not like that.

As a matter of fact, I can envision where if a facility might be closed in my State I really would feel the Federal Government ought to give it to the local community because they certainly would be experiencing a lot of costs. We should not be shackling it with a lot of new rules or costs.

That is one point in particular I want to make. There would be cost, I understand it, to the communities under this arrangement. It establishes a structure of reimbursement to the United States of 25 percent of rents and revenues from the redeveloped property for 25 years, without giving the Federal Government an ongoing voice in the site's management.

I do not think I would like the Federal Government to have that much voice in site management. It is one of the problems involved.

Also the fact that the property would be encumbered for 5 years really bothers me. I think the local community will wind up with this property when they really want it anyway. We have a current system that I think works very smoothly. We have closure provisions that are in the bill, that will help make it clear how this will be done.

I feel while this is certainly well intentioned, I am certainly sympathetic to the community. I have a little feeling this is a way to transfer some responsibility from the Federal Government to the communities and I do not like that.

So I join my colleague from Illinois and urge once again we not start down this road of micromanagement, that we defeat this amendment.

I yield the floor.

Mr. DIXON. Does our colleagues have objection to yielding back time?

Mr. LOTT. Will the Senator yield for one comment?

Mr. DIXON. I yield.

Mr. LOTT. We do understand also the Department of Defense opposes this amendment.

Mr. DIXON. That is correct. I thank the Senator for mentioning that.

We do yield back the remainder time for the managers.

Mr. ROTH. How much time do I have?

The PRESIDING OFFICER. One minute, 46 seconds remaining.

Mr. ROTH. Mr. President, what we are seeking to do here is to provide an opportunity to our local community. Currently base closings are looked upon as a catastrophy both by the local community and State. As a result, we have witnessed very, very few base closings until this last year. There was one reason and one reason for it, because the legislation now in effect does not benefit the community. What I am proposing changes that, converts from what is a loss to an opportunity.

I cannot agree with my distinguished managers of the bill who says that this does not provide an opportunity. If that were the case, if this was not providing an opportunity to the local community, then why would the Conference of Mayors strongly endorse my proposal?

The fact is whether we like it or not we are going to see base closings in the future. This is a changing situation. There is going to be less money available. What we are trying to do is to seize this situation and make it an opportunity rather than a tragedy.

For that reason, I urge my colleagues to support this legislation, and I yield back the remainder of my time.

The PRESIDING OFFICER. All time has expired.

The Chair recognizes the Senator from Delaware for 30 minutes.

AMENDMENT NO. 2525

(Purpose: To amend section 2687 of title 10, United States Code, relating to the closure and realignment of military installations—

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH] proposes an amendment numbered 2525.

Mr. ROTH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . MODIFICATION OF REQUIREMENTS FOR NOTICE AND WAIT.

Section 2687(a) of title 10, United States Code, is amended—

(1) in paragraph (1), by striking out "300" and inserting in lieu thereof "1,000"; and

(2) in paragraph (2), by striking out "1,000" and inserting in lieu thereof "2,500".

Mr. ROTH. Mr. President, the purpose of this amendment is to grant the Secretary of Defense an increased measure of flexibility in closure and realignment of military installations, especially smaller installations. In 1985 the Congress provided the Secretary of Defense with limited authority to close or realign certain installations. Under this authority the Secretary, without notice to the Congress, controlled an installation if it employed fewer than 300 civilians.

Additionally, the Secretary could realign an installation if the realignment involved fewer than 1,000 citizens or less than 50 percent of the number of civilian employees.

If the Secretary proposed to close an installation that employed more than 300 civilian employees or if he proposed a realignment that involved more than 1,000 civilian employees, the Secretary was required to give notice to the Congress and wait 60 days.

I think you will agree, Mr. President, that this authority was reasonable in face of the conditions that existed in 1985.

But the situation that existed in 1985 has changed. Today the Director of Intelligence is forecasting a greatly deceased chance of conflict in central Europe between the Warsaw Pact and NATO. As a result of this change in the threat, the deficit and other related conditions, the Secretary of Defense has proposed another round of base closures and realignment.

Most of us believe that the expected build down in the size of our military establishment will require even more closures and realignment. Now my amendment would provide more flexability to the Secretary of Defense for dealing with smaller installations and permit us to concentrate on the closure and realignment of major installations. It would do so by allowing the Secretary of Defense to close installations that employ fewer than 1,000 Federal workers without notice to the Congress. It would also allow the Secretary to realign installations so long as the realignment involved fewer than 2,500 civilian employees.

The change I propose does not surrender congressional control over base closure and realignment and will primarily affect smaller installations. The Secretary will be able to close them without a notice and wait, period. For example, the 19 realignments and closures listed on the Secretary's February 1990 list could have been closed under this proposal. I believe that this is a step in the right direction.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The chair recognizes the Senator from Illinois.

Mr. DIXON. My distinguished friend from Arkansas is going to speak against this amendment. I wonder how

we can accommodate him? How much time does he need?

Mr. BUMPERS. How about 10 minutes on the Senator's side?

Mr. DIXON. We have a total of 15 minutes.

Mr. BUMPERS. Mr. President, will the Senator yield me, say, 6 minutes?

Mr. DIXON. May I inquire of the Chair? I was told there were 30 minutes equally divided.

The PRESIDING OFFICER. That is correct.

Mr. DIXON. I yield 6 minutes to the Senator from Arkansas.

Mr. ROTH. I do not think that is correct. The base conversion was 30 minutes, 15 minutes on a side. And on this one and the first one were 20 minutes equally divided.

The PRESIDING OFFICER. The Chair's impression is that this amendment has 30 minutes equally divided.

Mr. ROTH. That was not what was stated by the Senator at the time the unanimous consent was agreed to.

Mr. DIXON. Mr. President, perhaps we can accommodate our colleague. I do not think I am going to take any time. My friend from Arkansas wishes to have 6 minutes. If the other manager does not want more than 4, we will take no more than 10.

The PRESIDING OFFICER. Is that satisfactory?

Mr. ROTH. That is satisfactory. We changed the order.

Mr. DIXON. I yield 6 minutes to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, I thank the distinguished floor manager. I want to say, first of all, everybody in this body knows that bases have to be closed. But that is not the debate here. The debate is, No. 1, are those bases going to be closed in accordance with a 5-year projected force structure which the bill now requires? Are they going to be similiarly closed by the Secretary, or what kind of equity and fairness is there going to be?

Mr. President, I have the utmost respect for the Secretary of Defense, but when the Senator from Delaware says that the Secretary of Defense ought to have the right to close bases that will cost 1,000 people their jobs or realign a base that could cost 2,500 people their jobs, that is a lot of power in one man.

You might trust Dick Cheney to do that but you might not trust Caspar Weinberger or vice versa. And everybody in this body knows that when a base closes in his State, as the Senator from Illinois suffered last year, it is a traumatic event. You are dealing with human lives and people's livelihood. I think it is too much power to put in one person.

And if I were the Secretary, I would not want it. I would want the right to submit to Congress some input into it. The Base Closing Commission under Secretary Carlucci did not work to the advantage of the Senator from Illinois but it worked to my advantage because a base in my State that we were worried about was not closed. But I will say this, if Eaker Air Force Base had been on the list, I would have been upset because of the economic and environmental impact of the closing of the base, but at least I could have said, these are honorable men.

My distinguished former colleague, Tom Eagleton, was on that Base Closing Commission, Abe Ribicoff was on it, whose integrity was unimpeachable. I could at least say this is not a political decision. This is not a decision to punish a Member of Congress.

You cannot close a base anywhere at all and keep a Senator or a Congressman whose district or State that base is located in happy. Scoop Jackson used to say to me "I wish I did not have a military base in my State. You get no credit for getting one. You take all the flak if you lose one."

Do you know that the ordinary standard size air base has 300 civilian employees and 3,500 airmen. So you are giving the Secretary carte blanche on a lot of air bases and other bases in this country. I do not want him to have it.

I would ask my distinguished friend from Delaware how he would, if he were me—and I ask this not as a rhetorical question but a question that I would like for the Senator from Delaware to respond to—when I go to Blytheville, AR, I would like to take the Senator from Delaware with me. It is a city of 25,000-30,000 fine citizens, where Eaker Air Force Base is located. Secretary Cheney announced earlier this year he wanted to close it. We have discovered of the 21 bases affecting 44,000 employees that the Secretary sent us earlier this year, 99 percent of the jobs lost are in Democratic districts. I can tell you that mathematically the chances of that happening by coincidence is 244 to 1.

Let me further say to my distinguished friend from Delaware that of the 14 bases that have realignments, all of those jobs, 88 percent of those realignments where they take men and airplanes and equipment from these bases in Democratic congressional districts and move them, 88 percent of them go to Republican districts.

So I ask the Senator from Delaware, how would he answer the folks in Mississippi County about whether there was any politics involved in this base-closing proposal or not? Could the Senator answer that?

(Ms. MIKULSKI assumed the chair.)

Mr. ROTH. Well, of course, I would point out to my distinguished friend, I think we all agree that the closing of bases should not be done on a political basis. But I would have to point out that I suppose in today's world, because there are more Democratic congressional districts than Republicans, it is natural that in a close-down more Democratic districts would be involved.

Mr. BUMPERS. Senator, not 99 to 1.

Mr. ROTH. Well, of course, the other side is that, traditionally, more money went into those districts.

But let me say this to the distinguished Senator. If we find the criteria collected by the Secretary to be reasonable and in the best interest of the Government, we should be willing to accept the fair application of that criteria across the length and breadth of the Department of Defense. If we find the criteria to be lacking, then we should demand that they be reviewed and reconsidered.

Mr. BUMPERS. Let me ask the Senator this question. Secretary Cheney is a Republican; he is a former Republican House Member. That is just hunky-dory with me. He was appointed by the President. I thought he was a very able House Member, and I think he is an able Secretary of Defense. We have our differences, naturally.

But when he came before the Appropriations Subcommittee, I asked him, I said, "Mr. Secretary, let us change positions. Let us put me down there as Secretary of Defense, as a Republican, and you as a Democratic Senator sitting in my position, and I will tell you that I just got through announcing the closing or realignment of 35 bases, 99 percent of the 44,000 jobs lost will be in Republican congressional districts, and 8 percent of the realignments will go to Democratic districts. Would you have any trouble believing that that had been determined by a computer programming system or something?"

He just smiled. He did not answer that. There is not any answer to that. And as I say, I really hate to put this on this basis. But I think the Base Closing Commission, for all of its flaws, at least gave somebody a little cover.

The answer to the question I asked you a moment ago, I say to the Senator, is when you go to Mississippi County and when you tell those people, where not hardly a house has sold since the announcement that base would be closed because their total economy is dependent on that base, the answer is you cannot tell them anything, except, yes, it is blatantly probably political and I am certainly sorry about it, but there is nothing I can do about that. There is not anything I can do. But I can tell you there is something I am going to try to do. I am going to try to get this body to adopt the same amendment that the House has adopted to try to do this in a fair, equitable, military, economic, environmental basis.

I have to resist, strongly resist, the amendment of the Senator from Delaware for whom I have the utmost respect. He is a man of immense integrity. Yet, as they say, figures do not lie but liars can figure. And here we have unassailable statistics on the base-closing proposal that has already been made this year that is absolutely, absolutely unfair and cannot be accepted without a fight. So, I must resist.

I helped the distinguished Senator from Illinois last night on the amendment on Crotone, Italy. Again go to Blytheville, AR, and say we are going to dry this town up. It is already one of the 10 poorest counties in America, but "you ain't seen nothing yet," one of the 10 poorest counties in America and the unemployment rate will go to 30 percent when you close that base.

Yet, you say, we have to have this F-14 base in Crotone, Italy, at a cost of $1 billion.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Delaware controls 6 minutes and 40 seconds.

Who yields time?

Mr. DIXON. I am prepared to yield 4 minutes to the Senator from Mississippi on our time, Madam President. Then we are not going to use the rest of ours because we agreed to yield it back.

The PRESIDING OFFICER. The time of the Senator from Illinois has expired. The Senator from Illinois has no time.

Mr. DIXON. That had to be a miscalculation, I yielded only 6 minutes to the Senator from Arkansas. But, in all due deference, I do not care about the time, if my colleague has no problem.

Mr. ROTH. I will yield 2 minutes to the distinguished Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 2 minutes.

Mr. LOTT. Thank you, Madam President.

I especially thank the Senator for yielding that time since I am going to oppose his amendment. But the Senator from Arkansas was about to talk me out of it.

The Department of Defense supports this amendment. But on behalf of the managers of this side of this bill, we are opposed to this amendment. I am opposed to it personally.

But I have total confidence in the Secretary of Defense, Secretary Cheney. I served in the House with him. I am confident that he is trying to do the best possible job with a very bad situation.

I might point out to the Senator from Arkansas, all these closures are not occurring just in Democratic districts or Democratic States. There are a lot of statistics which show that maybe that occurs because maybe more of them are in urban areas and urban Congressmen or Senators represent those areas. I will bet we could go back and show a set of statistics in the Carter administration or the Nixon administration. But I think if we check around, a lot of the Senators here on this side of the aisle have installations being closed in their State. I am one of them. I do not like it at all. I feel the same way the Senator from Arkansas feels.

I think it is unfair to say this is just being done on a partisan basis. Maybe it has been in the past. Maybe that is a factor. But let us get to this particular amendment.

The Congress has an absolute right—in fact I think a responsibility—to be involved in this decision process. It is a tough process. I do not want the Secretary of Defense or the administration to just be able to make a decision without us being involved. When we raise these numbers up to 1,000 or 2,500 civilian employees, that is a large number of people.

In the next few years, as the numbers are reduced, we are going to have serious problems. There are going to be closures. And Congress should be involved in that process. We should leave these numbers alone, leave them where they are and work with the administration.

I urge Senators to oppose this amendment.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Madam President, on behalf of the managers, I ask unanimous consent that I may be permitted to make a motion to table, at one time, all three of the amendments.

The PRESIDING OFFICER. Is there objection? Without objection, the Senator's request is agreed to.

Mr. DIXON. If I may have unanimous consent to simply remind the Senators now of what is transpiring so they know. I want to remind all my colleagues, if there is no objection to that, that we have three stacked votes here. The first one is an amendment offered by the Senator from Delaware, a prohibition of land transfers to the Department of Defense for 1 year. The managers oppose that and move to table. The second one is an amendment that changes the property disposal process for closing bases. The managers oppose that and move to table. The third changes the civilian personnel thresholds at which congressional review of base closures occurs. This would allow the Defense Department to close additional bases without oversight. We also move to table that.

My recollection is we had agreed to 15 minutes on the first rollcall and 10 on each succeeding rollcall.

The PRESIDING OFFICER. The Senator from Delaware has 4 minutes remaining.

Mr. ROTH. Madam President, I will be very brief. First I want to point out, already the Secretary of Defense has the authority to close down bases where there are 300 or less civilian employees. We have proposed increasing that to 1,000 as a step toward expediting the necessary savings and actions that are going to be taken, or have to be taken, if this country is going to meet the reductions of deficits that both parties want.

I reemphasize what the distinguished Senator from Mississippi said. I have every confidence in the Secretary of Defense. He is a very bright, a very able, and a very fair man. I believe he is seeking to act in that fashion in his actions as Secretary.

Madam President, I urge the Senate adopt my amendment. I yield the remainder of my time.

Mr. DIXON. We yield back any time we have.

VOTE ON MOTION TO TABLE AMENDMENT 2523

The PRESIDING OFFICER. All time has been yielded back. The question is on the motion to table the amendment No. 2523. All in favor, signify by saying "aye."

Mr. DOLE. Madam President, I ask unanimous consent I may ask for the yeas and nays on all three motions with a single show of seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, I ask for the yeas and nays on all three.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the motion of the Senator from Illinois.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 93, nays 6, as follows:

[Rollcall Vote No. 217 Leg.]

YEAS—93

Adams	Cohen	Glenn
Akaka	Conrad	Gore
Armstrong	Cranston	Gorton
Baucus	D'Amato	Graham
Bentsen	Danforth	Gramm
Bond	Daschle	Grassley
Boren	DeConcini	Harkin
Boschwitz	Dixon	Hatch
Bradley	Dodd	Hatfield
Breaux	Dole	Heflin

Kassebaum	McConnell	Rudman
Kasten	Metzenbaum	Sanford
Kennedy	Mikulski	Sarbanes
Kerrey	Mitchell	Sasser
Kerry	Moynihan	Shelby
Kohl	Murkowski	Simon
Lautenberg	Nickles	Simpson
Leahy	Nunn	Specter
Levin	Packwood	Stevens
Lieberman	Pell	Symms
Lott	Pressler	Thurmond
Lugar	Pryor	Wallop
Mack	Riegle	Warner
McCain	Robb	Wilson
McClure	Rockefeller	Wirth

NAYS—6

Biden	Chafee	Reid
Bryan	Humphrey	Roth

NOT VOTING—1

Bingaman

So the motion to lay on the table the amendment (No. 2523) was agreed to.

Mr. DIXON. Madam President, I move to reconsider the vote by which the motion was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON MOTION TO TABLE AMENDMENT NO. 2524

The PRESIDING OFFICER. The question is now on agreeing to the motion to table amendment 2524. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

The result was announced—yeas 81, nays 18, as follows:

[Rollcall Vote No. 218 Leg.]

YEAS—81

Adams	Ford	Metzenbaum
Akaka	Fowler	Mikulski
Baucus	Glenn	Mitchell
Bentsen	Gore	Moynihan
Bond	Gorton	Murkowski
Boren	Graham	Nickles
Boschwitz	Gramm	Nunn
Bradley	Grassley	Packwood
Bryan	Harkin	Pell
Bumpers	Hatfield	Pryor
Burdick	Hollings	Reid
Burns	Humphrey	Riegle
Byrd	Inouye	Robb
Chafee	Jeffords	Rockefeller
Cochran	Johnston	Rudman

DeConcini	Leahy	Stevens
Dixon	Levin	Thurmond
Dodd	Lieberman	Wallop
Domenici	Lott	Warner
Durenberger	Mack	Wilson
Exon	McCain	Wirth

NAYS—18

Armstrong	Hatch	McClure
Biden	Heflin	McConnell
Breaux	Heinz	Pressler
Coats	Helms	Roth
Dole	Kassebaum	Specter
Garn	Lugar	Symms

NOT VOTING—1

Bingaman

So the motion to table the amendment (No. 2524) was agreed to.

Mr. DIXON. I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Madam President, I ask unanimous consent that the yeas and nays be vitiated on the third Roth amendment on which the yeas and nays had been ordered.

The PRESIDING OFFICER. Is there objection? Without objection, the yeas and nays are now vitiated.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

The motion to table the amendment (No. 2525) was agreed to.

Mr. DIXON. I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2526

(Purpose: Relating to the conveyance by the Secretary of the Army of Fort A.P. Hill, VA)

Mr. WARNER. Madam President, I send to the desk a technical amendment to the bill and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Hearing none, the clerk will report.

The legislative clerk read as follows:

The Senator from Virginia [Mr. Warner] proposes an amendment numbered 2526.

Mr. WARNER. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 356, lines 10 and 11, strike out "Northern Virginia Regional Correctional Commission" and insert in lieu thereof "Commonwealth of Virginia".

On page 356, lines 17 through 19 strike out "the Northern Virginia Regional Correctional Commission" and all that follows through "to be completed" and insert in lieu thereof "construction of a regional correctional facility on the land be completed".

On page 356, line 21, strike out "and".

On page 356, lines 22 and 23, strike out "by the Northern Virginia Regional Correctional Commission (or any successor governmental entity)".

On page 356, line 25, strike out the period and insert in lieu thereof "; and".

On page 356, below line 25, insert the following new subparagraph:

"(C) the Commonwealth of Virginia offer to Arlington County, Fairfax County, the City of Alexandria, Loudoun County, Fauquier County, Prince William County, Stafford County and Caroline County, Virginia, and any other Virginia county that the Commonwealth of Virginia may choose, the opportunity to participate in the governmental entity created under the law of the Commonwealth of Virginia to construct and operate the regional correctional facility.".

On page 357, strike out lines 1 through 5, and insert in lieu thereof "If a regional correctional facility is not constructed on the land conveyed pursuant to this section in accordance with paragraph (1)(A), such land is used for any purpose other than the purpose specified in paragraph (1)(B), or the counties referred to in paragraph (1)(C) are not offered the opportunity to participate in the entity referred to in such paragraph".

On page 357, line 18, strike out "public".

On page 357, lines 21 through 23, strike out "The cost of such survey shall be borne by the Northern Virginia Regional Correctional Commission.".

Mr. WARNER. This is a technical amendment which has been cleared on the other side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia.

The amendment (No. 2526) was agreed to.

Mr. WARNER. I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BUMPERS. Madam President, if I can inquire of the distinguished floor manager, I furnished the staff and the distinguished managers a copy of an amendment that I had, which would require the Defense Department to annually brief certain Members of Congress. I was wondering if we could agree to that quickly and perhaps move on to the amendment of the Senator from Massachusetts.

Mr. NUNN. Madam President, is the Senator prepared to present that amendment? Is that the annual briefing?

Mr. BUMPERS. Yes.

Mr. NUNN. I think if the Senator will send it to the desk, we can dispose of it rapidly.

AMENDMENT NO. 2527

Mr. BUMPERS. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment. The pending amendments will be set aside, and the amendment will be reported.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes an amendment numbered 2527.

Mr. BUMPERS. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following:

"It is the sense of the Congress that the President should provide for the Speaker of the House, the President pro tempore of the Senate, the minority leaders of the House and Senate, and the chairmen and ranking minority members of the Armed Services and Appropriations Committees of the House and Senate to be given annually an overview presentation on the United States' top level military strategy and its implemen-

tation by strategic forces, including the impact on targeting requirements, resources, and force structure.".

Mr. BUMPERS. Madam President, this amendment is a simple one. It requires the chairman and ranking members of the Appropriations Committee, and of the Armed Services Committee, and the leaders of both Houses, to be briefed annually on our national military strategy.

Mr. NUNN. Madam President, I have read the amendment and discussed it with the Senator from Arkansas. I recommend its approval.

Mr. WARNER. Madam President, we have no objection on this side.

The PRESIDING OFFICER (Mr. ADAMS). The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment (No. 2527) was agreed to.

AMENDMENT NO. 2528

(Purpose: To urge formation of a United States-Soviet technical working group to examine the technical basis for verification of potential provisions in future arms reduction agreements providing for dismantlement of nuclear weapons and a halt to further production of plutonium and highly enriched uranium for nuclear weapons, and to require a report)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY], for himself, Mr. WIRTH, Mr. HATFIELD, Mr. KERRY, Mr. ADAMS, and Mr. CRANSTON, proposes an amendment numbered 2528.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title XXXI (page 380, after line 12), add the following new part (and conform the table of contents accordingly):

PART D—INTERNATIONAL FISSILE MATERIAL AND WARHEAD CONTROL

SEC. 3135. PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR NUCLEAR WEAPONS AND DISPOSAL OF NUCLEAR STOCKPILES.

(a) PRODUCTION BY THE SOVIET UNION.—Congress urges the President and the Supreme Soviet of the Soviet Union—

(1) to cease production by the Soviet Union of plutonium;

(2) to maintain the cessation in production by the Soviet Union of highly-enriched uranium for weapons that was announced on April 7, 1989.

(b) TECHNICAL ASPECTS OF FISSILE MATERIAL MONITORING AND NUCLEAR WARHEAD DISMANTLEMENT.—Should the President determine that future international agreements should provide for dismantlement of nuclear warheads and a ban on further production of fissile materials for weapons, then the Congress urges the President to seek to establish with the Soviet Union a joint technical working group to examine and demonstrate cooperative technical monitoring and inspection arrangements that could be applied to the design and verification of these potential provisions.

(c) REPORT ON VERIFICATION TECHNIQUES.—(1) The Secretary of Energy, in consultation with the Secretary of Defense and in coordination with the Director of Central Intelligence, shall prepare a comprehensive technical report on the verification matters described in paragraph (2) of this subsection.

(2) The report shall describe the on-site monitoring techniques, inspection arrangements, and national technical means that could be used by the United States to verify the actions of other nations with respect to the following:

(A) dismantlement of nuclear warheads in the event that a future agreement between the United States and the Soviet Union should provide for such dismantlement to be carried out in a mutually verifiable manner.

(B) a mutual U.S.-Soviet ban, leading to a multilateral, global ban on the production of additional quantities of plutonium and highly-enriched uranium for nuclear weapons.

(C) the end use or ultimate disposal of any plutonium and highly enriched uranium recovered from the dismantlement of nuclear warheads.

(3) In order to prepare the report required by paragraph (1) of this subsection, the Secretary of Energy, in coordination with the Director of Central Intelligence, shall establish a Technical Advisory Committee on Verification of Fissile Material and Nuclear Warhead Controls, composed of preeminent government and nongovernment experts in the fields of radiation detection, nondestructive examination, nuclear safeguards, nuclear materials production, and nuclear warhead dismantlement. This committee, which shall be established not later than December 31, 1990, shall advise the Secretaries of Energy and Defense, and the Director of Central Intelligence on the availability, utilization, and further development of techniques which could be applied to the verification of the prospective actions described in paragraph (2) of this subsection.

(4) The report required by paragraph (1) shall be submitted to Congress not later than April 30, 1991. The report shall be submitted in unclassified form, with such classified appendices as may be necessary.

SEC. 3136. DEVELOPMENT AND DEMONSTRATION OF MEANS FOR WARHEAD DISMANTLEMENT VERIFICATION.

The Secretary of Energy may use funds available to the Secretary for national security programs of the Department of Energy for fiscal year 1991 to carry out a program to develop and demonstrate a means for verifiable dismantlement of nuclear warheads.

Mr. KENNEDY. Mr. President, I offer this on behalf of Senators WIRTH, HATFIELD, KERRY, ADAMS, and CRANSTON. I have given this amendment to both managers, and I understand that it will be acceptable.

The purpose of the amendment is to strengthen the foundation for verification of reductions in nuclear arsenals by encouraging both unilateral and joint United States-Soviet analysis of possible monitoring arrangements for dismantling nuclear warheads and controlling further production of nuclear explosive materials.

I believe that the floor managers have had an opportunity to review it. I would be glad to describe it further, if it is desired.

The amendment urges the Government in the Soviet Union to halt the production of the plutonium for weapons and continue its current moratorium on highly enriched uranium weapons. I have had the opportunity to talk with the managers on it. I will put in a statement. They have had a good opportunity to review it. I can take as much or as little time to accommodate the other Members.

Let me briefly summarize the amendment:

It urges the Government of the Soviet Union to halt production of plutonium for weapons, and to continue their current moratorium on the production of highly enriched uranium for weapons.

The amendment urges the formation of a United States-Soviet technical working group to examine the technical basis for verification of agreements that would provide for mutually verifiable nuclear warhead dismantlement, and a ban on the production of additional fissile materials for weapons.

The amendment directs the Secretary of Energy, in coordination with the CIA Director, to establish an expert Technical Advisory Committee on the Verification of Fissile Material and Nuclear Warhead Controls.

The amendment also directs the Secretary of Energy, in coordination with the Director of the CIA, to prepare a comprehensive technical report on the verification issues associated with dismantling nuclear warheads and a ban on fissile material production for weapons.

The amendment authorizes the Secretary of Energy, at his discretion, to use DOE defense program funds for fiscal year 1991 to develop and demonstrate a means for verifiable dismantlement of nuclear warheads.

Mr. President, one of the disputed issues during consideration of the INF Treaty was the lack of a requirement to verifiably dismantle the warheads on delivery systems to be eliminated under the treaty. This issue was raised by a number of Senators from across the political spectrum. It remains to be explored as a potential component of future arms reduction agreements.

Especially as arms control agreements move into the domain of dual-capable weapons—weapons that can be equipped with either nuclear or conventional rounds—it becomes important to gain a measure of direct control over nuclear warhead inventories.

There is another important dimension to verifying future reductions in warhead stockpiles, and that is providing assurance that additional plutonium, or highly enriched uranium, is not being produced to replace the warheads being dismantled.

This would require a capability to monitor a future agreement banning the production of additional fissile material for weapons.

Mr. President, stopping further proliferation of nuclear weapons will require more than simply extending the existing Nonproliferation Treaty when it comes up for renewal in 1995.

Many of the nuclear threshold states with the greatest incentives toward further proliferation are not parties to the NPT. Persuading these nations not to construct nuclear arsenals will require a concerned approach by the United States, the U.S.S.R., and the other declared nuclear weapon states.

What is needed in the nuclear arena is a new set of verifiable international obligations banning the production of nuclear explosive materials for weapons.

These obligations would be equally binding upon all nations, much like the proposed international convention now under negotiation to ban chemical weapons production.

In view of the large nuclear warhead inventories on both sides, and the surplus of fissile materials now available from weapon retirements, as we move toward smaller nuclear arsenals in the post-cold-war era, neither the United States nor the Soviet Union has any need for the production of more fissile materials for weapons.

Both sides have already ceased the production of highly enriched uranium for weapons—the United States over two decades ago, and the U.S.S.R. more recently, in the spring of 1989.

Two years ago the United States halted its production of additional plutonium. Last year, at the urging of Congress, the Department of Energy deferred construction of a special isotope separation plant to produce additional weapons grade plutonium.

While it has apparently shut down 4 out of an estimated 14 reactors originally dedicated to plutonium and tritium production, the Soviet Union has not yet announced the shutdown of its remaining plutonium production reactors.

Nor has the Soviet Union announced, as our Government has, which reactors it intends to maintain in operation for the production of tritium.

The amendment we are offering urges the Government of the Soviet Union to reciprocate the current halt in United States production of fissile materials for weapons.

This action would put an end to what appears to be, at this point, an excessive Soviet accumulation of additional plutonium for weapons.

The official United States reluctance to begin negotiations does not obscure the fact that it is the Soviet Union—not the United States—that is continuing to produce plutonium for weapons. The political burden is clearly on the Soviet Union to end its current production and invite reciprocal inspection visits to each Nation's shutdown facilities.

Finally, Mr. President, there is tremendous underutilized potential in our Department of Energy laboratories to apply the nuclear monitoring technologies developed for the nuclear nonproliferation regime to the technical problems of global nuclear arms reduction.

Our proposed amendment will spur greater Government activity in this area, and speed the development of a wider range of verification options for our treaty negotiators.

I thank those Senators who have joined with me in sponsoring this amendment, and I would urge all my colleagues to support this amendment.

But, effectively, it requires a report and also the establishment of an advisory committee to be able to better determine the verification opportunities, problems in nuclear warhead dismantling and also develop the kinds of verification for the production of plutonium and enriched plutonium.

As I say, I see the manager on his feet at the present time. I am glad to give a further description. I think we have accommodated both the minority and majority leader's concerns in adjusting the amendment, and if it is agreeable, then I would be glad to hear from the manager. Otherwise, I will take a brief time to have a further description.

Mr. NUNN. Mr. President, we have worked with the Senator from Massachusetts on this amendment. The staff worked on it. We have gone over it with him personally. I recommend this amendment be approved.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. Mr. President, the Senator from Massachusetts is quite correct. We have worked on it. The amendment is now acceptable.

I would say that even in its present form, it comes uncomfortably close by arms control by statute rather than negotiation. But with the new language in it, which gives the President some judgment as to whether or not we enter into these negotiations, it is comforting to this Senator, at least.

One of the very few privileges and obligations that the Constitution bestows upon the President of the United States is to choose when to and what to negotiate. I think the Senate and the Congress generally ought to be very careful about jumping in there and directing.

So I thank the Senator from Massachusetts, and I appreciate the work we have had with his staff and with himself, and I say also just because we have a truthful data exchange with the Soviet Government, the President should not feel pressured to appoint an Ambassador to initiate negotiations on plutonium. It is still his judgment what constitutes national security interests.

With that understanding, I say to the Senator from Massachusetts I appreciate his comments.

Mr. KENNEDY. I thank the Senator for his comments.

The Senator stated correctly a number of the items brought up in the INF debate and discussion on verification issues. If there is going to be future agreements which this administration has committed itself to, I believe that trying to develop this kind of information will be valuable both to the President and to the Senate during the time of consideration of the verification.

I heard the comments of the Senator from Wyoming, and we are glad to make those kinds of adjustments to clarify the amendment.

I hope the Senate will accept it.

Mr. WALLOP. Mr. President, I will say the exchange is unfortunate. It is that judgment which the Senator from Massachusetts spoke on the national interest and the circumstances between the countries also has a relevance.

I yield the floor.

Mr. KENNEDY. I add that the amendment urges technical changes and the report and does not urge negotiations.

Mr. WIRTH. Mr. President, this amendment is intended to help us think through a new set of challenges and requirements in nuclear arms control for the 1990's and beyond. As we all know, the world is changing very rapidly. Most of these changes have occurred in the political landscape in East-West relations. Changes in the military relationship are catching up with the political world, but much work remains to be done in thinking through the relationships which will define nuclear arms control in the years ahead.

This amendment would help us better understand the technical aspects of verifiable deep reductions in nuclear weapons and mutual limits on the production of weapons-grade materials for nuclear weapons. Rather than relying on the destruction of delivery vehicles, we may want to pursue verifiable reductions in fissile material—the nuclear material itself. I am aware of the importance of handling nuclear materials resulting from arms reductions through my experience with the Rocky Flats plant in Colorado. A major function at that plant is to dismantle the nuclear warheads.

If we are to seek genuinely deep reductions in the vast nuclear arsenals of the superpowers, we need to have a better understanding of the technical, physical, and economic problems associated with reducing nuclear weapons

materials as well as aircraft, submarines, and missiles.

Given high cost of our nuclear weapons complex, we may have added incentive to pursue deep reductions in nuclear weapons materials and production.

I believe this amendment is a forward-looking and useful contribution to our understanding of the world we will face in the 1990's and I urge my colleagues to support it.

The PRESIDING OFFICER. The Chair will put the question.

The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (No. 2528) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, it is my understanding the Senator from Illinois has two amendments that he is willing to accept 50-minute time agreements on each with the time equally divided.

Could I ask the Senator to give the title of each of the amendments?

Mr. SIMON. One is regarding medical coverage for those who are voluntarily retired from the armed services with a preexisting condition. That is kind of a long title. That is what it is about.

Mr. NUNN. On that amendment the Senator from Maine.

Mr. COHEN. Could I inquire whether or not we have the two amendments back to back?

Mr. NUNN. That is what I am going to propose.

Mr. President, on the first amendment I ask unanimous consent that there be a 20-minute time limit, with the time equally divided between the Senator from Illinois and the managers of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. With no second-degree amendment unless relevant and germane thereto and the vote to occur on the amendment or motion pertaining thereto at the conclusion of the time.

Mr. WARNER. Mr. President, reserving the right to object, I regret I shall object, we have not yet seen the amendment and, therefore, cannot consent to the time agreement.

Mr. SIMON. I asked the page for copies of the amendment. We get them to Senators right away here.

Mr. NUNN. Mr. President, I withdraw my unanimous-consent request. If the Senator could send the amendments down and let them be reviewed, and go ahead and begin the debate, that might be the most expeditious way to proceed.

The PRESIDING OFFICER. The Senator must ask consent to ask the two amendments be set aside that are presently pending.

Mr. SIMON. Mr. President, I ask unanimous consent that the two amendments be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2529

(Purpose: To direct the Secretary of Defense to establish a health insurance program for temporary coverage of members of the Armed Forces voluntarily discharged or released from active duty for health conditions existing before the date of the discharge or release from active duty and for dependents of such members for such preexisting conditions)

Mr. SIMON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. SIMON] proposes an amendment numbered 2529.

Mr. SIMON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 72, line 15, strike out "section:" and insert in lieu thereof "sections:".

On page 74, line 9, strike out the end quotation marks and the period following the end quotation marks.

On page 74, between lines 9 and 10, insert the following:

"§ 1106. Temporary health coverage for persons voluntarily discharged or released from active duty

"(a) IN GENERAL.—The Secretary of Defense shall develop a program for providing health insurance coverage described in subsection (b) for—

"(1) members of the armed forces who are voluntarily discharged or released from active duty after completing two or more years of continuous service and who voluntarily enroll in such program; and

"(2) the dependents of such a member.

"(b) COVERAGE.—The health insurance provided under this section shall cover health conditions existing before the date of the discharge or release, including pregnancy existing before such date, for one year after such date.

"(c) PAYMENT OF PREMIUMS.—A member enrolled in such program shall be responsible for payment of the premiums required for the insurance coverage provided under the program.

"(d) CONTRACT.—The Secretary may enter into a contract with an insurance underwriter to furnish the health insurance under the program.".

On page 74, strike out the matter between lines 12 and 13 and insert in lieu thereof the following:

"1105. Temporary health coverage for persons involuntarily discharged or released from active duty.

"1106. Temporary health coverage for persons voluntarily discharged or released from active duty.".

Mr. SIMON. Mr. President, if I may have the attention of my colleagues from Georgia and Virginia.

Mr. FORD. They are reading the Senator's amendment now.

Mr. SIMON. If I may ask for their attention, there may be a way of solving this without going through the process of a vote on the amendment, if I may have the attention of my colleague from Georgia here, too.

Mr. WARNER. Mr. President, we are now engaged in listening to our colleague.

Mr. SIMON. Here is the situation we face right now. It is an unusual situation that if you are involuntarily discharged from the armed services you can have coverage for preexisting medical conditions. You have to make payments, and I understand it, or contract with Mutual of Omaha. If, however, you are voluntarily discharged and you have a preexisting medical condition, you cannot get that health insurance coverage.

That just does not make sense. We are going to be in a situation where we are going to have more and more people voluntarily discharged from the Armed Forces.

I recognize this is a somewhat technical amendment, and if my colleagues would assure me that the Armed Services Committee is going to take a look at this question, to see what is clearly something that should not exist, that we can rectify this, then I would be willing to withdraw the amendment. But clearly there is a wrong, there is an injustice to people now because if you are voluntarily discharged, if you serve your 4 years or whatever time, you do not get the same benefits as those who are involuntarily discharged.

Mr. NUNN. Mr. President, I say to my friend from Illinois I think he makes a good point. I am not sure of the cost ramifications of this. What I prefer to do if the Senator could give us a little bit of leeway is to take this one to conference in terms of the Senator's advice.

We will work on it in conference. I prefer not to put the amendment in without having a cost analysis of it. But my staff informs me that they believe there is merit to the proposal and we will work it in conference in connection with all of the compensation packages.

Mr. SIMON. If I can have the same assurance from the ranking member.

Mr. WARNER. Mr. President, if I understood the petition of the Senator, it was for Senate Armed Services Committee to look at this in the legislative year as opposed to conference.

Mr. SIMON. Frankly, if we can work it out in conference, that is ideal. If you cannot, I understand.

Mr. WARNER. We have just gotten it. It seems to me the petition by the Senator for us to look at it in the course of the normal legislative year I think is a reasonable one. I think we can give full assurance.

Mr. SIMON. Maybe we can look at it in conference if the Senator can get it worked out. He has an able staff. We are going to have time now over the recess to look at this. If the Senator cannot work it out in conference, I want the assurance he will move on it.

Mr. NUNN. The Senator has the assurance. The reason I mentioned conference that is certainly not a pledge. The Senator knows that I cannot pledge we are going to come out with this in conference.

What I pledge is we will take a look at this in conference in connection with the overall compensation package. The House has passed a very comprehensive package including many items that are related to this health insurance issue. So I think the issue will be left in conference and we will consider this.

Mr. SIMON. With that assurance, Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

The amendment (No. 2529) was withdrawn.

Mr. SIMON. Mr. President, I do not know whether technically we have to read that second amendment or whether it has been read.

The PRESIDING OFFICER. The second amendment has not been read.

AMENDMENT NO. 2530

(Purpose: To establish a Presidential Advisory Committee for Policy Toward Cuba)

Mr. SIMON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Illinois [Mr. SIMON] for himself, Mr. MACK, Mr. GRAHAM, and Mr. DECONCINI, proposes an amendment numbered 2530.

Mr. SIMON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, below line 24, insert the following new section:

SEC. 1216. PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA

(a)(1) PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA.—There is hereby established a presidential advisory committee to be known as the Presidential Advisory Committee for Policy Toward Cuba (hereafter in this section referred to as the "Advisory Committee"). The purpose of the Advisory Committee shall be to provide advice and recommendations relating to all aspects of United States policy toward Cuba.

(2) The Advisory Committee shall consist of seven members each of whom shall be citizens of the United States. The President shall appoint such members of the Advisory Committee not later than 60 days after the date of the enactment of this Act. Not more than four of such members may be from the same political party. Each member of the Advisory Committee shall serve for the life of the Advisory Committee.

(3) The President shall appoint one of the members of the Advisory Committee to serve as Chairman. The Advisory Committee shall meet as may be necessary, at the call of the Chairman, or at the call of two-thirds of the members of the Committee.

(4) The Secretary of State shall make available to the Advisory Committee such staff, information, personnel, and administrative services and assistance as it may reasonably require to carry out its activities.

(b) PURPOSE.—(1) It shall be the purpose of the Advisory Committee to advise and make policy recommendations to the President and the Secretary of State on sound policies toward Cuba.

(2) In carrying out the purposes referred to in paragraph (1), the Advisory Committee shall—

(A) make recommendations relating to policy options to encourage freedom for the people of Cuba;

(B) propose a plan for providing appropriate assistance to the people of Cuba in the event the present government is changed; and

(C) make recommendations on immigration and trade between the United States and Cuba.

(c) REPORTS.—(1) The Advisory Committee shall submit annual reports detailing the advice and recommendations referred to in subsection (b).

(2) The Advisory Committee shall submit a final report detailing such advice and recommendations 30 days before its termination date.

(3) The Advisory Committee shall submit a copy of the report referred to in paragraphs (1) and (2) to the President, the Secretary of State, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives.

(d) APPLICATION OF FEDERAL ADVISORY COMMITTEE ACT.—The provisions of the Federal Advisory Committee Act shall apply to the Advisory Committee, except that—

(1) the meetings of the Advisory Committee shall be exempt from the requirements of subsections (a) and (b) of sections 10 and 11 of the Federal Advisory Committee Act (5 U.S.C. App.) (relating to open meetings, public notice, public participation, and public availability of documents), whenever and to the extent it is determined by the President or his designee that such meetings will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of policy toward Cuba; and

(2) meetings may be called of special task forces or other such groups made up of members of the Advisory Committee.

(e) OTHER ACTIVITIES BY MEMBERS OF ADVISORY COMMITTEE.—Nothing contained in this section may be construed to authorize or require any member of the Advisory Committee or any other individual to participate directly in any other official Government meeting on any matter referred to in subsection (b). To the maximum extent practicable, the members of the Advisory Committee shall be informed and consulted before and during any such meetings. Advisory Committee members may be designated as advisors to a United States delegation to such meeting and may be permitted to participate in other international meetings to the extent the President deems appropriate, except that they may not speak or negotiate for the United States at such meetings.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

(g) TERMINATION.—The Advisory Committee shall terminate 3 years after the date of enactment of this Act.

Mr. SIMON. Mr. President, I do not ordinarily come in the last minute with amendments, and I apologize to my colleagues for not providing this in advance. This is an amendment that is cosponsored by Senator MACK, Senator GRAHAM, and Senator CRANSTON. This would provide an advisory committee to the President, appointed by the President, of seven persons to advise on the situation in Cuba, and what we should do.

We do not want a repetition of what has happened in Eastern and Central Europe where all of a sudden they were free of Communist shackles and we did not know what to do, and we had to scurry around. This is an advisory committee.

My hope is that my colleagues could accept this without a rollcall. It is one that just makes sense. It is backed by the Cuban American community. It is a concern, I think, of anyone who looks at this situation and recognizes that Castro could fall at any point. We ought to be preparing for the day when he does fail.

This simply asks for a committee of seven, seven American citizens appointed by the President, no more than four from any one party. I think this could be accepted. I hope we do not have to go to a rollcall. If we have to, I am willing to. But it seems to me this is something that my colleagues could accept.

Mr. WARNER. Mr. President, having just looked at this for several minutes, I would like to ask a question of my distinguished colleague from Illinois.

I will express my initial concern for several reasons and then I will pose a question.

First, the amendment provides that the President establish a Cuban-American advisory committee for policy toward Cuba, to provide overall policy and recommendations on matters concerning this policy toward Cuba.

Indeed, the situation in Cuba, I am certain, will be impacted by the dramatic advancement of democracy in Eastern Europe and may well be the next nation to fall in line. But I could suggest that the President establish similar commissions for other nations.

To the best knowledge that this Senator has, there is no precedent for this, nor is there any other nation in the world given the recognition that would be sought in here; namely to establish a special committee for them.

Mr. SIMON. Mr. President, in response to my colleague from Virginia, let me say as one who has spent a great deal of time on the Polish situation, I wish we had had this for Poland. There are only two other countries that possibly fall into this category and those are Albania and North Korea. Neither has been anywhere near as involved in our foreign policy as has been Cuba.

We have spent a great deal of time and effort and resources on the Cuban situation. If someone wants to introduce an amendment at another time to have a similar committee for Albania and North Korea, I would be happy to support it. But I do not think real candidly they fall in the same category as Cuba does. I think my colleague from Virginia would agree with that.

Mr. WARNER. Mr. President, I do believe we are departing from precedent. I do not at this time recognize those facts as being present that would justify this exception. Therefore, this side would have to register its opposition to establishing this precedent, I regret to advise the Senator.

It may well be that I would be willing to withhold that until such time as perhaps the chairman and ranking member of the Foreign Relations Committee might wish to take a look at it, and perhaps they could dissuade me from the position I am taking.

Mr. SIMON. If the request of the Senator from Virginia is we set it aside temporarily, I am willing to do that.

Mr. WARNER. That is a parliamentary situation. I would certainly want to permit the chairman of the committee to look at that. At this time, I would not be able to indicate my consent to it, but I would be willing to hear from others.

Mr. SIMON. Let me just add if my colleague from Georgia is more sympathetic, I am willing to go to a voice vote, as long as we have good lungs on this side, Mr. President.

Mr. NUNN. Mr. President, this matter really is more in the nature of a matter before the Foreign Relations Committee. I think we would probably need to notify them.

I have some sympathy for this amendment. I think Cuba is unique. It is right off our shores. We have had very grave difficulties with the governmental leadership there. There have been tremendous abuses of human rights. We have a tremendous and outstanding Cuban-American community in this country. I am sure they are very concerned about this.

It is my opinion that at some point the Soviet Union is going to decide that continuing to prop up Mr. Castro is not in their economic or even their political interest, and I do not think that day is far around the corner, so getting out in front of the problem and beginning to take a closer look at it with all of the other problems in the world, it seems to me this kind of advisory committee would have merit.

But at this stage I know that my colleague and partner from Virginia has a problem with it and so what we really have to do is defer to him as to whether he would like to have a rollcall vote on it.

Mr. President, if the Senator has confidence in a voice vote, then I believe we could have one.

Mr. SIMON. That is satisfactory with me, Mr. President.

The PRESIDING OFFICER. Is there further debate? If not the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 2530) was agreed to.

Mr. SIMON. I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I object.

I say to the Senator, the distinguished chairman of Foreign Relations Committee, if I heard his vote, it was in the negative; am I correct?

Mr. PELL. Yes.

Mr. WARNER. The Senator from Virginia wishes to reflect that his vote and the vote of the chairman of the Foreign Relations Committee were in the negative.

With that, I withdraw my objection and make note of the fact there are less than a half dozen Senators on the floor of the Senate.

The PRESIDING OFFICER. It will be so recorded.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, what is the pending business?

The PRESIDING OFFICER. The motion to reconsider.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I want to say in connection with the previous voice vote, I want to be recorded in the negative.

The PRESIDING OFFICER (Mr. SIMON). Does anyone seek recognition? The Senator from Georgia.

Mr. NUNN. Mr. President, it is my hope we could have the Senator from Massachusetts present his amendment on Asat. I know he is not on the floor at the moment. That would be the next amendment I know we can get a time agreement on.

Mr. President, I see the Senator from Arkansas on the floor. Is he willing to take up his base closure amendment at this time? Or does he have another amendment?

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. I will be ready very shortly with the base closing amendments. But I also have another short amendment here. I was wondering if the managers had a chance to look over it.

What it does, it says simply that defense contractors shall have the right, if they pay for parking for their employees, to also pay their employees the same amount in cash that they pay for parking in order to enable them to take mass transit to and from work. The idea is to take some automobiles off the road.

Mr. NUNN. This is an area that is beyond the jurisdiction of this committee.

Mr. President, I am told this applies only to the Department of Defense, so it would be within the jurisdiction of this committee. We do not have any idea what this amendment would cost. Does the Senator have any cost figures?

Mr. BUMPERS. It should not cost anything. Bear in mind, Senator, this is a cost that is being charged to the Federal Government, to the Defense Department. If they provide free parking for employees who are working on a defense contract, they would have an obligation to provide anybody who wanted an equal amount in fare cards or whatever, so they could take mass transit. They would be entitled to that.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, I will just utilize this time to discuss two amendments which I understand have been cleared on both sides. Certainly on this side.

I shall at this time not send them to the desk, but to create the record, such that at the appropriate time they could be sent to the desk.

Mr. President, I rise to propose an amendment to establish an environmental education program for personnel of the Department of Defense.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

Mr. WARNER. I thank the Chair.

AMENDMENT NO. 2531

(Purpose: To require the Secretary of Defense to establish a program for the purpose of educating Department of Defense personnel in environmental management)

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER] proposes an amendment numbered 2531.

Mr. WARNER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 27, between lines 11 and 12, insert the following:

SEC. 321. ENVIRONMENTAL EDUCATION PROGRAM FOR DEPARTMENT OF DEFENSE PERSONNEL

(a) REQUIREMENT TO ESTABLISH PROGRAM.—The Secretary of Defense shall establish a program for the purpose of educating Department of Defense personnel in environmental management.

(b) PROGRAM REQUIREMENTS.—Under the program, the Secretary shall—

(1) in consultation with environmental education personnel of colleges and universities in the United States that offer undergraduate and graduate level courses in a wide range of environmental disciplines, develop a curriculum of environmental management courses offered by such colleges and universities;

(2) provide opportunities for Department of Defense personnel to attend such courses at such colleges and universities; and

(3) develop the criteria for the selection of Department of Defense personnel to attend such courses.

(c) FISCAL YEAR 1991 FUNDING MATTERS.—Of the funds authorized to be appropriated pursuant to section 301, not more than $100,000 shall be available for the program established pursuant to subsection (a).

(d) RECOMMENDATIONS REGARDING CONTINUATION OF PROGRAM AFTER FISCAL YEAR 1991.—Not later than the date on which the President submits the budget for fiscal year 1992 to Congress pursuant to section 1105(a) of title 31, United States Code, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives in writing his recommendations regarding whether the program established under subsection (a) should be continued after September 30, 1991.

Mr. WARNER. Mr. President, the amendment I have proposed would establish an environmental education program for personnel of the Department of Defense. I am informed that the amendment has been cleared on both sides.

Mr. President, during hearings this year, the members of the Armed Services Committee have heard testimony concerning the large task the Department of Defense has in front of it to clean up environmental pollution at many of its domestic and foreign military bases. In addition, we are all aware of the increasing number of environmental requirements being imposed on all sectors of the economy, including the military. These facts point up the need for more and better education for personnel engaged in environmental control and management.

Mr. President, new developments in natural resource and environmental management are occurring so rapidly that traditional methods of training and education used by DOD are no longer adequate. Expertise in the management of wetlands, shorelines, rivers, lakes, arid lands, and forests is greatly needed. Personnel who are both knowledgeable about the proper handling and disposal of hazardous waste and able to quantify pollution risks are essential. The enlisted and officer corps do not provide sufficient personnel to meet these needs, and adequately prepared civilian environmental scientists are not readily available to many installations and programs.

Mr. President, my amendment is a simple one that is intended to address this problem. It requires the Department of Defense, in consultation with colleges and universities with expertise in environmental education, to develop a curriculum of environmental management courses. In addition, the amendment directs the Department of Defense to develop criteria for the selection of individuals to attend these courses.

Mr. President, this is a modest attempt to address the educational needs in this area. It is my hope that the Department of Defense will find this a useful start in providing badly needed education for its personnel, and in minimizing future environmental problems on military installations. During the fiscal year 1992 budget review process, the Armed Services Committee will review this program to determine whether this program is indeed effective and whether its continuation and expansion would be worthwhile.

The PRESIDING OFFICER. Is there further debate?

Mr. LEVIN. Mr. President, this has been cleared on our side. We think it is a good amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2531) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BUMPERS addressed the Chair.

Mr. WARNER. Mr. President, I believe the Senator from Virginia still has the floor. I will be another 2 minutes.

Mr. LEVIN. If the Senator from Arkansas also will withhold, there are a couple of cleared amendments on our side.

Mr. BUMPERS. I was going to offer an amendment that has just been cleared.

The PRESIDING OFFICER. The Senator from Virginia.

AMENDMENT NO. 2532

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for himself and Mr. GORE, proposes an amendment numbered 2532.

Mr. WARNER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page , line , insert the following new section:

SEC. 3XX. USE OF OZONE DEPLETING SUBSTANCES WITHIN THE DEPARTMENT OF DEFENSE.

(A) DOD REQUIREMENTS FOR OZONE DEPLETING CHEMICALS OTHER THAN CFC'S—

(1) In addition to the functions of the Committee designated by section 356(c) of the National Defense Authorization Act for fiscal year 1990, it shall be the function of the Committee to study (A) the use of methyl chloroform, Hydrochlorofluorocarbons (HCFC's) and carbon tetrachloride by the Department of Defense and by contractors in the performance of contracts for the Department of Defense, and (B) the costs and feasibility of using alternative compounds or technologies for methyl chloroform, HCFC's, and carbon tetrachloride.

(2) Within 120 days after the date of the enactment of this Act, the Secretary shall provide the Committee with a list of all military specifications, standards, and other requirements that specify the use of methyl chloroform, HCFC's or carbon tetrachloride.

(3) Within 150 days after the date of the enactment of this Act, the Secretary shall provide the Committee with a list of all military specifications, standards, and other requirements that do not specify use of methyl chloroform, HCFC's, or carbon tetrachloride.

(b) In preparing reports the Committee shall work closely with the Strategic Environmental Research Program Council, and shall provide to the Strategic Environmental Research Program Council its reports and recommendation with respect to section (a).

(c) EXTENSION OF REPORTING DEADLINE FOR CFC's.—The deadline for submitting a final report to the Congress concerning uses of CFCs, established in section 356(d) of the National Defense Authorization Act for fiscal year 1990, is hereby extended to June 30, 1991.

(d) REPORTING DEADLINE FOR METHYL CHLOROFORM, HCFC'S, AND CARBON TETRACHLORIDE.—Not later than September 30, 1991, the Secretary shall submit to Congress a report containing the results of the study by the Committee authorized under subsection (b)(1) of this section.

Mr. WARNER. Mr. President, I rise to propose an amendment concerning ozone-depleting chemicals in military specifications. I have been informed that the amendment has been cleared on both sides.

Mr. President, last year, I, along with my colleague on the Armed Services Committee, Senator GORE, offered an amendment that established a CFC Advisory Committee to assist the Department of Defense in: First identifying military specifications requiring the use of chlorofluorocarbons [CFC's]; and second, studying the feasibility of changing those specifications to allow for substitutes as expeditiously as possible. That amendment became law as part of the National Defense Authorization Act for fiscal year 1990.

Mr. President, we offered this amendment because the Department of Defense is an important user of CFC's, in items from guided missile systems to airplane parts. In addition, electronics equipment for military communications systems, as well as weapons systems, are manufactured using CFC's for various cleaning and testing processes.

Our amendment of last year recognized that, given our present understanding of the adverse environmental impact CFC's have on the Earth's ozone layer, it was essential that DOD expeditiously reduce its use of CFC's in those areas where safe substitutes have been made available. The CFC Advisory Committee was established to identify all DOD military specifications that directly and indirectly required the use of CFC's and to identify processes and specifications where available CFC alternatives can be substituted safely and expeditiously.

The CFC Advisory Committee has already begun work on this enormous task. Just last week, the committee submitted a report to Congress describing the Department's strategy to reduce and eliminate the use of CFC's.

Mr. President, despite this progress on CFC's, we now need to focus on the phaseout of the Department's use of other ozone depleting chemicals. This focus is consistent with the broadening scope of the phaseout called for just recently in the Montreal protocol, as well as clean air legislation now pending in a House-Senate conference.

Both the Montreal protocol and the House and Senate clean air bills call for the phaseout of the use of carbon tetrachloride, methyl chloroform, and hydrochlorofluorocarbons, HCFC's. In light of these internationally supported changes in policy, the Defense Department needs to follow suit and begin work to eliminate uses of these chemicals wherever possible, and to change military specifications requiring such use.

Mr. President, that is exactly what my amendment would do. It would expand the jurisdiction of the CFC Advisory Committee, established as I indicated in last year's DOD authorization bill, to study the use of methyl chloroform, HCFC's, and carbon tetrachloride by the Department of Defense and by contractors in the performance of contract for the Department of Defense. Based on the results of that study, the committee will work with DOD to identify processes and specifications where available alternatives to those chemicals can be substituted safely and expeditiously.

Mr. President, approval of this amendment represents a major step in eliminating ozone-depleting substances from military uses. I have been informed it is cleared on both sides.

Mr. LEVIN. Mr. President, the amendment has been cleared on this side. We have no objection to it.

The PRESIDING OFFICER. Is there further debate?

Mr. LEVIN. Mr. President, is it correct that Senator GORE is a cosponsor of this amendment?

Mr. WARNER. The Senator from Michigan is correct. I appreciate very much his bringing it to my attention. I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2532) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Mr. President, if the Senator from Arkansas is ready with that modified amendment relative to transportation, I suggest we dispose of it at this time since it was raised.

AMENDMENT NO. 2533

(Purpose: To provide for the payment of certain mass transit costs of employees under contracts with the Federal Government, and for other purposes)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes an amendment numbered 2533.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the reading of amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 181, insert between lines 8 and 9 the following new section:

SEC. 854. PAYMENT OF MASS TRANSIT COSTS OF EMPLOYEES UNDER CERTAIN GOVERNMENT CONTRACTS

(a) IN GENERAL.—No later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall issue a regulation to provide that mass transit costs incurred by contractor employees in commuting to a place of performance of a contract for the Department of Defense may be treated in the same manner as parking costs of contractor employees are treated under such contract, to the extent that the Secretary deems appropriate, and consistent with otherwise applied cost principles.

(b) MASS TRANSIT COSTS.—The mass transit costs referred to under subsection (a) may include the cost of transit tokens, farecards, or other access devices for an employee commuting on mass transit.

(c) LIMITATION.—The mass transit costs payable to or for an employee under any contract described under subsection (a) may not exceed the parking costs which would be payable to or for an employee under such contract.

Mr. BUMPERS. Mr. President, this is an amendment that we have agreed to modify from its original purpose to, No. 1, confine it to the Department of Defense and not the entire Government.

What it does is it says the Secretary of Defense shall have the discretion of permitting a defense contractor who is providing free parking for the employees who are working on a defense contract the discretion to provide, I would say order, if that contractor is billing the U.S. Government for that free parking, as a part of the contract, the Secretary can also provide him the right to provide fare cards, coins, or cash to those employees in order to allow them to take mass transit. There would be no additional cost to the Government because they are being billed for the free parking, and the employer, if the Secretary chose to let him do that, would only pay employees what he is paying for free parking and would allow them to take that cash and take mass transit and take some automobiles off the highway and help clean up the environment.

Mr. LEVIN. Mr. President, first let me thank the Senator from Arkansas for his work on this. It has been modified so that it is now discretionary, to be consistent with existing cost principles. We thank the Senator for the

amendment. We think it is a good amendment. It has been cleared on this aisle.

Mr. GORTON. The amendment has been cleared on this side as well.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2533) was agreed to.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2534

(Purpose: To set aside $5,000,000 for certain registration, monitoring, and notification activities of the States of Washington, Oregon, and Idaho in connection with the releases of radionuclides from the Department of Energy Hanford Nuclear Reservation, Hanford, WA, during the years 1944 through 1972)

Mr. LEVIN. Mr. President, I send an amendment to the desk on behalf of Senator ADAMS and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for Mr. ADAMS (for himself and Mr. HATFIELD), proposes an amendment numbered 2534.

Mr. LEVIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 380, between lines 12 and 13, insert the following:

SEC. 3135. FUNDING FOR REGISTERING, MONITORING, AND NOTIFYING PERSONS EXPOSED TO RADIONUCLIDES RELEASED FROM THE DEPARTMENT OF ENERGY HANFORD NUCLEAR RESERVATION, HANFORD, WASHINGTON

Of the funds authorized to be appropriated to the Department of Energy pursuant to this title, the Secretary of Energy shall make available to the State of Washington $3,000,000, and to the State of Oregon and the State of Idaho $1,000,000 each for the following purposes:

(1) To implement one or more programs to register and monitor those persons who may have been exposed to radionuclides released from the Department of Energy Hanford Nuclear Reservation, Hanford, Washington, between the years of 1944 and 1972.

(2) To develop procedures for notifying each such person of the potential adverse health effects of such exposure and of any recommended course of medical action regarding such adverse health effects.

Mr. LEVIN. Mr. President, this amendment would set up a registry of exposed persons so that, through the States, the Federal Government may begin to dispense health advice and information to any citizens who are concerned about being exposed to radiation from DOE operations at the Hanford, WA, site.

Mr. ADAMS. Mr. President, today I have proposed to the Department of Defense authorization bill an amendment that will start to address the concerns of U.S. citizens who were exposed to high levels of the radiation from the operations of the Hanford facility in Washington State.

My amendment will set up a registry of exposed persons so that, through the States, the Federal Government may begin to dispense health advice and information to any citizens who are concerned about being exposed to radiation from DOE operations at the Hanford site.

This registry is a modest first step in addressing people's concerns about radiation exposure in the Northwest. Ultimately, some form of compensation legislation will probably be enacted to redress any harm suffered as a result of DOE operations at Hanford. Yet, such compensation legislation should only be enacted after health studies have been completed, and these studies are several years away from completion. In the meantime, people who live or lived in the area downwind of Hanford will continue to see preliminary health and exposure reports published, and they will understandably be alarmed. It is expected that the registry and information dissemination system proposed by this legislation could settle unwarranted fears and provide sound medical advice where warranted.

The registry would also be a means by which the U.S. Government could find and track citizens who were exposed to high levels of radiation during Hanford's early operations. This could substantially facilitate the completion of present and future health studies of downwinders and would make it much simpler to provide compensation to those folks when and if it is needed.

I am pleased to have offered this amendment with Senator HATFIELD today. I expect that it will serve Hanford downwinders well. This is an important first step toward addressing the concerns of folks who were essentially guinea pigs of the U.S. Government in the early days of our atomic weapons production.

Mr. LEVIN. I understand it has been cleared.

Mr. GORTON. Mr. President, the amendment indeed has been cleared. It is a very good and a very important one. We recommend its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2534) was agreed to.

Mr. LEVIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2535

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON] for Mr. DOLE, proposes an amendment numbered 2535.

Mr. GORTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SENSE OF THE SENATE RELATING TO THE DEVELOPMENT AND PRODUCTION OF WEAPONS AND WEAPON SYSTEMS HAVING STANDOFF ATTACK CAPABILITIES AND EMPLOYING SENSOR-FUSED DEVICES

Findings:

(1) The worldwide proliferation of sophisticated and highly lethal, advanced technology weapons systems continues at rapid pace; and

(2) These increasingly lethal weapons place United States and Allied forces at greater risk; and

(3) The development of standoff weapons to attack highly defended targets while minimizing risk to United States Forces is a high priority; and

(4) The results of research and testing conducted by or for the Department of Defense on weapons and weapon systems having standoff capabilities and employing sensor-fused devices demonstrates that such weapons satisfy such needs; now

The Air Force should complete development of weapons and weapon systems having standoff attack capabilities and employing sensor-fused devices and, upon completion of such development, should proceed with the production of such weapons and weapon systems, and that such production should take place at facilities so selected during the development phase of these weapons.

Mr. GORTON. Mr. President, this is a sense-of-the-Senate amendment to reinforce the need to continue development of weapons systems having stand-off attack capabilities and employing sensor-fused devices. It has been cleared on both sides for adoption.

Mr. LEVIN. The amendment has, indeed, been cleared. We have no objection to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2535) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2536

(Purpose: To broaden the scope of certain acquisition workforce enhancements)

Mr. LEVIN. Mr. President, I send an amendment to the desk on behalf of myself and Senator BINGAMAN and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for himself and Mr. BINGAMAN, proposes an amendment numbered 2536.

Mr. LEVIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 153, line 23, strike out "(1) Chapter 81 of title 10" and insert in lieu thereof "Section 5532 of title 5".

On page 153, line 24, strike out "inserting before section 1583 the following new section:" and insert in lieu thereof "adding at the end thereof the following new subsection:".

On page 154, strike out line 1 and all that follows through page 155, the matter between lines 7 and 8, and insert in lieu thereof the following:

"(g)(1) Upon a finding by the head of an Executive agency that it is difficult to recruit qualified persons for appointment to a particular scientific, engineering, professional, or managerial position in such Executive agency, the head of such Executive agency may request, and the Director of the Office of Personnel Management may grant, a waiver of the applicability of the other provisions of this section and sections 8344 and 8468 of this title (relating to annuities and pay on reemployment) to any person appointed to such position. There may not be in effect at any time waivers under this paragraph for more than 1,500 employees of the Executive Branch.

On page 155, line 20, strike out "373 of title 10," and insert in lieu thereof "41 of title 5,".

On page 155, line 21, strike out "inserting" and all that follows through line 23 and insert in lieu thereof the following: "adding at the end thereof the following new section:

" '4119. Degree training".

On page 155, line 25, strike out "Department of Defense" and insert in lieu thereof "Executive branch".

On page 156, line 2, strike out "Secretary" and all that follows through line 4, and insert in lieu thereof "Director of the Office of Personnel Management may establish a program for the heads of Executive agencies to furnish financial assistance for an agency".

On page 156, strike out line 9, and insert in lieu thereof the following:

"(2) an academic degree which would enhance the employee's ability to serve the federal goverment.

On page 156, line 24, strike out "the Secretary of Defense with the concurrence of".

On page 157, line 1, strike out "Secretary of Defense, in coordination with the".

On page 157, line 5, strike out "title 5" and insert in lieu thereof "this title".

On page 157, line 8, strike out "373" and insert in lieu thereof "41".

On page 157, line 9, strike out "inserting" and all that follows through "4021" on line 10 and insert in lieu thereof "adding at the end thereof".

On page 157, in the matter between lines 10 and 11, strike out "4022." and insert in lieu thereof "4119.".

On page 158, line 16, strike out "373" and insert in lieu thereof "41".

On page 158, line 17, strike out "10" and insert in lieu thereof "5".

On page 158, line 18, strike out "inserting" and all that follows through line 20 and insert in lieu thereof the following: "adding at the end thereof the following new section:

" '4120. Student loan repayments".

On page 158, line 23, strike out "Department of Defense, the Secretary of Defense" and insert in lieu thereof "Executive branch, the Director of the Office of Personnel Management".

On page 158, line 24, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 159, line 1, strike out "the department" and insert in lieu thereof "that executive agency".

On page 159, line 7, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 159, strike out lines 11 through 22.

On page 159, line 23, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 160, line 1, strike out "Secretary" and insert in lieu thereof "head of the executive agency".

On page 160, line 3, strike out "by" and all that follows through "Defense" on line 4, and insert in lieu thereof "in the Executive branch".

On page 160, line 14, strike out "Secretary" and insert in lieu thereof "head of the executive agency".

On page 160, strike out lines 15 through 22.

On page 161, line 11, strike out "Secretary" and insert in lieu thereof "head of an executive agency that entered into an agreement with an employee under subsection (a)".

On page 161, line 12, insert "in connection with such agreement" after "this subsection".

On page 161, line 12, strike out "Department of Defense" and insert in lieu thereof "Executive branch".

On page 162, line 1, strike out "by" and all that follows through line 2, and insert in lieu thereof "in the Executive branch; or".

On page 162, line 5, strike out "Secretary of Defense" and insert in lieu thereof "Director of the Office of Personnel Management".

On page 162, line 7, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 162, line 9, strike out "title 5" and insert in lieu thereof "this title".

On page 162, line 19, strike out "Secretary of Defense" and insert in lieu thereof "Director of the Office of Personnel Management".

On page 162, strike out line 21 and all that follows through line 10 on page 163 and insert in lieu thereof the following:

"(j) In this section, the term 'student loan' means—

"(1) a loan made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 (20 U.S.C. 1071 et seq.);

"(2) a loan made under part E of such title (20 U.S.C. 1087aa et seq.); and

"(3) a health education assistance loan made or insured under part C of title VII of the Public Health Service Act (42 U.S.C. 294 et seq.) or under part B of title VIII of such Act (42 U.S.C. 297 et seq.).

On page 163, line 13, strike out "373" and insert in lieu thereof "41".

On page 163, line 15, strike out "inserting" and all that follows through the end of that line and insert in lieu thereof "adding at the end thereof".

On page 163, in the matter between lines 16 and 17, strike out "4023." and insert in lieu thereof "4120.".

On page 164, line 2, strike out "4022 and 4023 of title 10" and insert in lieu thereof "4119 and 4120 of the title 5".

On page 164, line 6, strike out "Department" and all that follows through line 8, and insert in lieu thereof "civilian workforce in the Executive branch.".

Mr. LEVIN. Mr. President, the amendment I am offering, and which the managers of this bill have agreed to accept, would give certain provisions of this bill relating to DOD personnel Governmentwide effect.

The Armed Services Committee, in an effort to enhance the DOD work force, has included certain incentives to both incoming and current DOD personnel. These incentives are similar to those included in recent recommendations made for the entire Federal work force by experts who have reviewed the compensation and benefits package of Federal employees.

One provision, section 4022 of the bill, would permit the Secretary of Defense to pay for academic degrees for employees in positions requiring critical skills. Section 4023 of the bill would permit the Secretary of Defense to pay for the outstanding student loans of up to 500 incoming employees in order to attract top candidates for important positions. Section 1581 of the bill would allow the Secretary of Defense—for up to 1,000 DOD employees—and the Secretary of Energy—for up to 250 energy employees—to waive the provisions prohibiting dual compensation for Federal retirees.

My amendment would expand these provisions to make them available for all executive branch agencies.

Mr. President, these provisions are designed to enhance the quality and caliber of the Federal work force. To apply these provisions only to the Department of Defense would suggest that Congress views that Department as the most important agency for attracting and retaining talented Federal employees. I do not think any of us, here, agree with that proposition. We need top talent in all of our Federal agencies—at the Environmental Protection Agency, at NASA, at the National Institutes of Health, at the Fish and Wild Life Service, at NOAA, at the Food and Drug Administration—to

name a few. That is why my amendment would make these opportunities available to employees of any Federal agency.

My amendment also establishes tighter standards for two of these provisions. For the provision on academic degrees, my amendment would permit payment for such a degree only where the academic degree would enhance the employee's ability to serve the Federal Government. I want to make clear that we will not pay for an academic degree for a Federal employee that serves only personal advancement and is not related to the employee's ability to perform his or her job in the Government. It is expected that agency heads will require strict adherence to this principle in order to make sure that this money is wisely spent for the benefit of the Federal Government as well as the Federal employee.

For the provision waiving dual compensation, my amendment would require the agency head to make a finding that the position to be filled by a retiree is otherwise difficult to fill. This waiver, in other words, is not to be granted automatically, but only where it is necessary to hire a retiree in order to adequately fill a Government position.

Finally, Mr. President, I should point out that the amendment would maintain limits on the number of employees who could avail themselves of these provisions. The amendment, like the bill, limits the number of persons for whom student loan debt could be waived to 500 persons Government-wide. It limits the waiver authority for dual compensation to 1,500 employees in the executive branch.

Mr. GORTON. Mr. President, this is a good amendment. We agree it should be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2536) was agreed to.

Mr. LEVIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Mr. President, if my friend will yield for a minute, I ask unanimous consent that Senator WALLOP be added as a cosponsor on the work force amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2537

(Purpose: Sense of the Congress regarding the effective utilization of counternarcotics funds and report requirement)

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of Senator D'AMATO and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for Mr. D'AMATO, proposes an amendment numbered 2537.

Mr. GORTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 212, between lines 20 and 21, insert the following section:

SEC. . SENSE OF THE CONGRESS REGARDING THE EFFECTIVE UTILIZATION OF COUNTERNARCOTICS FUNDS AND REPORT REQUIREMENT.

(a) FINDINGS.—The Congress finds that—

(1) Secretary Cheney has declared that combatting illegal drugs is a high priority national security mission for the Department of Defense;

(2) All funds authorized and appropriated for Operations and Maintenance and Military Personnel in the Department of Defense's counternarcotics budget for Fiscal Year 1990 have not been obligated;

(3) If such funds are not obligated during Fiscal Year 1990 such funds will no longer be available for counternarcotics efforts; and

(4) Such funds should not be allowed to lapse.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that the Secretary of Defense and the Chairman of the Joint Chiefs of Staff must continue to emphasize the Department of Defense's commitment to this extremely important mission so that the entire chain of command ensures that funds are fully and effectively utilized so as to maximize the military's contribution to the national counterdrug efforts.

(c) REPORT.—Not later than January 15, 1991, the General Accounting Office shall report to the Armed Services Committees of the Senate and the House of Representatives, the Senate Appropriations Subcommittee on Defense, the House Appropriations Subcommittee on Defense, and the Senate Caucus on International Narcotics Control on the Department of Defense's counternarcotics budget, providing the following—

(1) An analysis of the funds authorized and appropriated in Fiscal Year 1989; how these funds were obligated and expended, including a month by month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year;

(2) An analysis of the funds authorized and appropriated in fiscal year 1990; how these funds were obligated and expended, including a month by month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year;

(3) An analysis of whether there is any information available with respect to the obligations and expenditures from the fiscal year 1989 and fiscal year 1990 counternarcotics budget that suggest a systemic problem in reference to the timely obligation and expenditure of counternarcotics funds;

(4) An analysis of the effectiveness of the role of the Department of Defense Coordinator for Drug Enforcement Policy and Support; whether his dual responsibility as Assistant Secretary of Defense for Reserve Affairs and as Drug Coordinator complicates his ability to coordinate all entities within the Department of Defense in the counternarcotics mission; and the adequacy of personnel levels in his Office to meet his responsibility for coordinating these funds and ensuring that the funds are obligated and expended in a timely manner; and

(5) Recommendations for correcting any problems found in the course of this review.

Mr. GORTON. Mr. President, this amendment is a sense-of-the-Congress resolution designed to address the issue of lapsing fiscal year 1990 counternarcotics funds.

Mr. D'AMATO. Mr. President, my amendment is a sense of the Congress designed to address the issue of lapsing fiscal year 1990 counternarcotics funds. It also requires the General Accounting Office to report to Congress by January 15, 1991, on the problems associated with the fiscal year 1989 and fiscal year 1990 Department of Defense counternarcotics budget.

On July 31, 1990, I learned the status of the Department of Defense fiscal year 1990 counternarcotics account as of May 31, 1990—the most recent numbers available. I was shocked to learn that of $645,192,000 available, $466,370,000—73 percent—remained unobligated.

Last year, we went through a similar exercise. The issue then was fiscal year 1989 counternarcotics obligations and expenditures.

On May 17, 1989, only $200,000 of the $300,000,000 available had been expended. Senator DECONCINI and I attempted to transfer these funds to other drug-fighting agencies who needed, and who would use, the money.

One year later, we are facing a similar problem.

The funds contained in the operations and maintenance and military personnel accounts of the Defense counternarcotics budget are in danger of lapsing if they are not obligated by September 30.

On August 1, I wrote to Secretary Cheney and called his attention to the following facts:

Of the $645,192,000 available in the counternarcotics account, only $178,822,000—27 percent—has been obligated.

With two-thirds of the fiscal year completed, only $51,169,000 of the $181,400,000—28 percent—available for operations and maintenance accounts has been obligated for the armed services to increase their operational tempo for, among other things, increased steaming days for ships and flying hours for surveillance aircraft.

With only one-third of the fiscal year remaining, $130,231,000 of the operations and maintenance accounts for

operational tempo—72 percent—will have to be obligated or these funds will lapse.

As of May 31, $27,363,000 of the $56,369,000—48 percent—available for the National Guard military personnel account had been obligated.

I have asked Secretary Cheney to provide me with updated information that reflects obligations and expenditures as of July 31 and I have asked the Secretary for his assurance that none of the funds would lapse and that all funds in these accounts would be obligated by the end of the fiscal year.

On April 24, 1990, the Senate Appropriations Subcommittee on Defense held a hearing on the topic of our military's counternarcotics efforts.

At that hearing, I expressed, along with Senator STEVENS, to the Defense Department drug coordinator, Assistant Secretary Stephen Duncan, that I had hoped that the slowness in getting the money out last year would not occur again this year.

Secretary Duncan, in response to an inquiry from Senator STEVENS, replied:

We are putting renewed emphasis on making sure this money gets released. In recent days and weeks, there have been several additional moneys released, and I am satisfied that everybody has the word * * * we will continue to make it a high priority to make that money get out.

The figures speak for themselves.

We cannot tolerate a chronic delay in obligating funds.

We cannot allow these moneys to lapse.

To do so would betray the trust of the American people.

Mr. President, I ask unanimous consent that the text of my amendment, a copy of the material on the counternarcotics obligations status for fiscal year 1990 funds, provided by the Department of Defense, a copy of a letter dated October 18, 1989, from the Office of Management and Budget, and a copy of my remarks on August 4, 1989, and November 21, 1989, in the CONGRESSIONAL RECORD be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COUNTERNARCOTICS OBLIGATION STATUS AS OF MAY 31, 1990

[In millions of dollars]

Department/agency	Available	Obligated
a. PRIOR YEAR FUNDS

[From the CONGRESSIONAL RECORD, Aug. 4, 1989]

DEPARTMENT OF DEFENSE COUNTERNARCOTICS EFFORTS

Mr. D'AMATO. Mr. President, I rise today to call the attention of my colleagues to the abysmal performance—and nonperformance—of the Defense Department in spending the $300 million we provided to fund their part in the war on drugs.

Last year, we authorized and appropriated $300 million for DOD to take charge of detection and monitoring of air- and sea-borne smugglers. We put them in charge of integrating the counternarcotics communication system.

Mr. President, I have two questions: Where is the money? and, Who is in charge?

On May 17, I received a letter from Mr. L. Paul Dube "accounting" for the $360 million. According to that letter, $30.2 million had been made available to the services for the National Guard program on April 19, and a total of $200,000 had actually been expended.

That's right, only $200,000 of the $300 million had been spent by May 17, 7½ months into fiscal year 1990.

During the markup of the dire emergency supplemental, I, along with the distinguished senior Senator from Arizona, Senator DECONCINI, offered an amendment to take $227.8 million of the $300 million away from DOD and give it to other agencies that are actually fighting the war on drugs.

That amendment lost, because OMB argued that it violated the budget summit agreement. As part of the debate on that amendment, DOD promised to spend the money we had provided.

On July 7, the Department spent over two reprogramming requests to move approximately $193 million from the "Drug Interdiction, Defense, 1989" account into a variety of procurement and research and development accounts. I cannot be more specific because the actual requests are classified.

I wrote to the distinguished chairman and the distinguished ranking member of the Defense Appropriations Subcommittee, requesting an immediate hearing on these reprogramming requests. Because time was so short, my request could not be accommodated. However, the chairman responded that there would be a special hearing on DOD counternarcotics efforts after we return from the August recess.

Mr. President, we need to know what is going on with DOD's drug war effort. I understand that there is at least one classified section of the national drug strategy due to be issued on September 5 that will discuss the military's role in the drug war. We need to know more.

We need a plan—not just any plan, but one that meets Defense Department planning, programming, and budget standards for tackling the drug war. We do not have such a plan.

We need to have someone in charge over there. We do not have anyone in charge now. What we have is a recipe for disaster.

We have the Assistant Secretary of Defense for Reserve Affairs, Mr. Stephen Duncan, serving as the Secretary's principal adviser on narcotics matters. We are told that the Office of the Deputy Assistant Secretary of Defense for Drug Policy and Enforcement, is being moved into Mr. Duncan's organization.

But most of the budget authority will continue to rest in agencies and offices under the supervision of the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence.

The Pacific Command, Atlantic Command, Southern Command, and the North American Air Defense Command are the operating agencies in the war on drugs, but DOD-level supervision of their drug war budget activities will be split, as will counternarcotics policy development and planning.

I repeat—Who is in charge here? The answer cannot be Dick Cheney, because, like President Bush, he has a few other high priority items competing for his time and attention.

DOD needs a single manager for the war on drugs, in whom policy, planning, programming, and budgeting functions are focused. Right now, we cannot hold any one person accountable if the Department's efforts are disorganized and late. A basic principle is that when many people are responsible, no one is responsible.

Last night, we authorized another $450 million for DOD's role in the war on drugs. Will it again take them most of fiscal year 1990 to make the money available? Will part of it expire at the end of the year because they have not used it?

This is a scandal and an outrage. At a time when we say we are nationalizing and mobilizing our efforts on the war on drugs, to have almost all of the $300 million unspent, poorly allocated, with a rush to beat the spending deadline.

The time has come for the Defense Department to put its first team to work on this problem, to sort out the organizational lines of authority, to make budget and policy decisionmaking functional and effective, and to actually start fighting the war on drugs.

They have sat on their hands long enough. I plan to ask them very tough questions at the forthcoming hearing. I am giving them fair notice, so that they will have time to develop good answers.

Alone among Federal agencies, DOD has the resources, the experience, and the ability to make a serious dent in drug smuggling and to discourage other aspects of the international drug trade.

Mr. President, I serve public notice that it is time for DOD to join the team. If they do not, they will bear the blame for it, and will lose the resources we have authorized. I am dead serious about this and I hope they receive this message loud and clear.

Mr. President, to date their handling of these resources, these precious resources, is nothing short of shocking and scandalous. We must do better, otherwise we make a sham of the so-called war on drugs.

I thank the Chair and I yield the floor.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 18, 1989.

Hon. ALFONSE M. D'AMATO,
U.S. Senate, Washington, DC.

DEAR SENATOR D'AMATO: Thank you for your letter of September 5, 1989 concerning the Department of Defense's anti-narcotics efforts.

As you know, the President shares your concern about the narcotics threat to the United States. He unveiled a comprehensive National Drug Control Strategy for dealing with that threat on September 5, 1989. His strategy calls for a substantial DOD role in the anti-narcotics effort and increases Defense anti-narcotics funding to $450 million.

Secretary Cheney announced his program to implement the National Drug Control Strategy on September 18. He is insuring that DOD anti-narcotics efforts fully support the President's strategy and are accomplished in a prudent and timely manner.

The Department of Defense will be responding to you on each of your questions about the DOD anti-narcotics program.

Sincerely,

THOMAS A. SCULLY,
Associate Director for Legislative Affairs.

DEPARTMENT OF DEFENSE ANTINARCOTICS EFFORTS

Mr. D'AMATO. Mr. President, on August 4, 1989, I spoke on the floor to call attention to the poor performance of the Defense Department in spending the $300 million we appropriated to fund the Department's role in the war on drugs. On that day, I stated, "I have two questions: Where is the money? and, Who is in charge?"

On September 5, 1989, I wrote to the Secretary of Defense, Dick Cheney, in reference to my concerns about the Defense Department's counternarcotics efforts, particularly about how the Department was allocating fiscal year 1989 and fiscal year 1990 funds appropriated and the organization of the Defense Department's efforts.

On November 13, 1989, I received Secretary Cheney's response to my letter. I know that many of my colleagues have also had questions on this issue and I believe that they would find the Secretary's answers enlightening.

I commend Secretary Cheney for beginning to turn around the old attitude in the Defense Department, which was not fully supportive of fighting the drug war. In his letter, the Secretary stated, "The detection and countering of the production and trafficking of illegal drugs is a high priority national security mission of the Department of Defense. Pursuant to my direction, the commanders-in-chief of the key unified and specified commands have now submitted their plans for carrying out this mission in their respective areas of responsibility. I am currently reviewing those plans."

He further stated, "I am confident now that we have the management and organizational structure that will maximize our contribution to the administration's goal of a drug-free America."

A few of the major areas of progress Secretary Cheney mentions in his letter are:

First, the Chairman of the Joint Chiefs of Staff now has, within his staff, a Counternarcotics Division which coordinates operational issues with the unified and specified commands.

Second, the full defense planning process for fiscal years 1992 through 1997 is now underway, and it will give special attention to narcotics production and trafficking in Latin America.

Third, a Defense Planning Resource Board has been established to review and provide recommendations on all defense and counternarcotics issues.

Fourth, two joint task forces, JTF-4 in Florida and JTF-5 in California, are now operational 24 hours a day, 7 days a week. A new joint task force, JTF-6, has been established along the southwest border to coordinate DOD support to Drug Law Enforcement Agency operations.

Fifth, a unique circuit of the Defense Data Net, "NARC Net," is expanding.

Sixth, specific Defense Department goals for fiscal year 1990 are as follows: First, support the President's national drug strategy; second, develop an effective counternarcotics surveillance capability along the southern border; third, enhance intelligence systems to provide timely, relevant intelligence support to the operating forces and law enforcement agencies; fourth, develop an effective integrated communications network to support drug interdiction command, control, communications, and intelligence capabilities; and fifth, support energetic National Guard counternarcotics operations under the command of the State Governors.

I look forward to working with Secretary Cheney to help him meet all of these goals. I ask that my letter of September 5, 1989, and the Secretary's response of November 13, 1989, be printed in their entirety at the conclusion of my remarks.

U.S. SENATE,
Washington, DC, September 5, 1989.

Hon. RICHARD CHENEY,
The Secretary of Defense,
The Pentagon, Washington, DC.

DEAR MR. SECRETARY: I am writing to express my concern about a number of unresolved issues regarding the role of the Department of Defense in combatting the narcotics threat. I spoke on this matter on the floor of the U.S. Senate on August 4, 1989. I have enclosed a copy of my remarks for your information.

My August 4 remarks show a high level of exasperation with the Department's progress. The basis for my exasperation is the slowness and obvious reluctance the Department has shown in the past in becoming engaged in this great national struggle against drugs. As one of those responsible for the authorization and appropriation of $300 million in FY89 for the Department's counternarcotics efforts, I was sharply disappointed by the way these funds were utilized and, in fact, attempted to transfer the unused balance to agencies that could and would use them effectively.

I note that since that effort the Department has moved out quickly to use those funds. I look forward to receiving the answers to the specific questions I ask below, in the hope that these funds are being obligated according to a well thought-through plan.

In contrast with the Department's past record, I want to commend you for the efforts you have made and are continuing to make in support of our national counternarcotics efforts. As the May 1989 Report to Congress entitled, "Integration of Command Control, Communications and Technical Intelligence into an Effective Communications Network for Drug Interdiction" makes clear, much good work is being done. However, a number of key questions remain. As recent events in Colombia demonstrate, it is time they were answered.

The Chairman of the Senate Defense Appropriations Subcommittee, in response to my request, promised a special hearing after the August recess on the Department's counternarcotics efforts. To help me prepare for this hearing, I would very much appreciate a description of how the Defense Department plans to manage its role in the war on drugs.

This description should explain how the Department's counternarcotics policy, planning, programming, and budgeting functions and responsibilities will be coordinated and exercised, with particular attention to the following points:

—The key organizational lines of authority (in particular, both operational command and control and policy, administrative and budget supervisory responsibilities) for each of the offices and agencies invovled in your counternarcotics efforts;

—Identify with specificity which office below the Secretary's level has executive authority over budget and policy decisions for each of the Department's drug war roles;

—What kind and level of decisions are made by the ASD(RA), ASD(C3I), Defense Communications Agency, and operating agencies such as SOUTHCOM, CINCPAC, NORAD, CINCLANT, and the Joint Chiefs of Staff;

—Please explain the Department's relationship with Ambassador David Miller's office on the NSC staff, the Communications Interoperability Working Group (CIWG), and the Director of National Drug Control Policy.

In addition, I would appreciate responses to the following questions (the responses may be in both classified and unclassified versions, as necessary):

1. Is there a clear statement of the goals the Department seeks to accomplish with the FY 1989 appropriation of $300 million for DOD's counternarcotics efforts and a plan for achieving its objectives? Is there a clear statement of the goals the Department seeks to accomplish with the $450 million authorized for counternarcotics efforts in the FY 1990 Senate Defense Authorization Bill and a plan for achieving those objectives?

2. How much of the $300 million appropriated in FY 1989 will be carried over to FY 1990 and what are current plans for those funds?

3. Will all remaining funds that have not been reprogrammed as of September 1 be obligated within FY 1989? Will any part of the $300 million appropriated in FY 1989 lapse?

4. Will any procurement actions be completed (in the sense that equipment or materials are actually delivered to a procuring authority) using reprogrammed FY 1989 funds before the end of FY 1989?

5. Why did the FY 1989 reprogramming request come to Congress without full programmatic documentation to support the request, including a plan explaining what the Defense Department expects these expenditures to accomplish and how programmatic documentation and budget justification documents are now available to support the Department's reprogramming request?

6. Has a Concept of Operation been completed for each Joint Task Force (JTF) site?

7. Have all intelligence and radar assets been identified and designated for communications integration into the JTF's?

8. Is the Department developing a plan to phase out use of operational military sensor platforms in favor of dedicated drug enforcement sensor platforms, e.g. Aerostats, off shore oil rigs, etc.?

9. Have communications plans been established between JTF-4 and JTF-5, Customs C3I and other federal, state and local drug interdiction agencies? Please also explain the organizational lines of authority between the JTF's and higher DOD authorities, from both policy and budget perspectives.

10. What are your plans to ensure the integrity and protection of classified information within and between facilities?

11. What is the planned Defense Department interface with the Customs C3I Centers with respect to type and quality of interdiction data provided?

12. Has the Defense Department requested and received industry support to validate operational concepts and system availability?

13. What is the status of the JTF-4 and JTF-5 facilities regarding construction, operating equipments, staffing, etc.?

14. Will the JTF sites be used for functions other than drug interdiction?

15. Will Southern Command move from Panama City? If so, has a location for its new headquarters been selected? Will the new location incorporate communication coordination for the Defense Department's drug interdiction activities?

16. On July 19, you sent a memorandum to your subordinates on the subject of the Defense Planning Guidance for FY 1992-1997. In that memorandum, you indicate that you have asked the Under Secretary of Defense for Policy to prepare Proposed Defense Planning Guidance for FY 1992-1997 program and budget planning on the issue of: U.S. interests in Latin America of countering the production and trafficking of illegal drugs and of assisting countries in providing for their own security.

(A) Are there any plans for similar direction regarding development of Defense Planning Guidance for the FY 1992-1997 program for accomplishing the Department's counternarcotics detection and monitoring mission, and for support for drug enforcement generally, as provided for in 10 U.S.C. 371, et seq.?

(B) For which part of the counternarcotics expenditures presented for the Senate Appropriations Committee's approval has five year planning, programming, and budget documentation been prepared?

17. When did the Department send Congress the May 1989 Report on the "Integration of Command, Control, Communications and Technical Intelligence into an Effective Communications Network for Drug Interdiction"? When will Congress receive the June 1989 Implementation Plan described on page 20 of the May 1989 Report? Does the June 1989 report exist?

18. Please explain how the Department's plans for its internal organization fulfill its responsibilities under the President's and the Director of National Drug Control Policy's National Drug Strategy?

19. How will the officer in charge of the counternarcotics element in the Office of the Joint Chiefs of Staff (J-3) coordinate with and exercise staff supervision over other offices and agencies?

20. How will the Military Departments (as distinguished from the unified and specified commands) participate in your counternarcotics strategy and activities, and who will be in charge of the effort in each Department?

I look forward to working with you to ensure that your nation's counternarcotics efforts are as sound and effective as possible. Thank you for your prompt attention to my request.

Sincerely,

ALFONSE M. D'AMATO,
U.S. Senator.

[From the CONGRESSIONAL RECORD, Aug. 4, 1989]

DEPARTMENT OF DEFENSE COUNTERNARCOTICS EFFORTS

Mr. D'AMATO. Mr. President, I rise today to call the attention of my colleagues to the abysmal performance—and nonperformance—of the Defense Department in spending the $300 million we provided to fund their part in the war on drugs.

Last year, we authorized and appropriated $300 million for DOD to take charge of detection and monitoring of air- and sea-borne smugglers. We put them in charge of integrating the counternarcotics communication system.

Mr. President, I have two questions: Where is the money? and, Who is in charge?

On May 17, I received a letter from Mr. L. Paul Dube "accounting" for the $300 million. According to that letter, $30.2 million had been made available to the services for the National Guard program on April 19, and a total of $200,000 had actually been expended.

That's right, only $200,000 of the $300,000 million had been spent by May 17, 7½ months into fiscal year 1989!

During the markup of the dire emergency supplemental, I, along with the distinguished senior Senator from Arizonz, Senator DECONCINI, offered an amendment to take $227.8 million of the $300 million away from DOD and give it to other agencies that are actually fighting the war on drugs.

That amendment lost, because OMB argued that it violated the budget summit agreement. As part of the debate on that amendment, DOD promised to spend the money we had provided.

On July 7, the Department sent over two reprogramming requests to move approximately $193 million from the "Drug Interdiction, Defense, 1989" account into a variety of procurement and research and development accounts. I cannot be more specific because the actual requests are classified.

I wrote to the distinguished chairman and the distinguished ranking member of the Defense Appropriations Subcommittee, requesting an immediate hearing on these reprogramming requests. Because time was so short my request could not be accommodated. However, the chairman responded that there would be a special hearing on DOD counternarcotics efforts after we return from the August recess.

Mr. President, we need to know what is going on with DOD's drug war effort. I understand that there is at least one classified section of the national drug strategy due to be issued on September 5 that will discuss the military's role in the drug war. We need to know more.

We need a plan—not just any plan, but one that meets Defense Department planning, programming, and budget standards for tackling the drug war. We do not have such a plan.

We need to have someone in charge over there. We do not have anyone in charge now. What we have is a recipe for disaster.

We have the Assistant Secretary of Defense for Reserve Affairs, Mr. Stephen Duncan, serving as the Secretary's principal adviser on narcotics matters. We are told that the Office of the Deputy Assistant Secretary of Defense for Drug Policy and Enforcement, is being moved into Mr. Duncan's organization.

But most of the budget authority will continue to rest in agencies and offices under the supervision of the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence.

The Pacific Command, Atlantic Command, Southern Command, and the North American Air Defense Command are the operating agencies in the war on drugs, but DOD-level supervision of their drug war budget activities will be split, as will counternarcotics policy development and planning.

I repeat—Who is in charge here? The answer cannot be Dick Cheney, because, like President Bush, he has a few other high priority items competing for his time and attention.

DOD needs a single manager for the war on drugs, in whom policy, planning, programming, and budgeting functions are focused. Right now, we cannot hold any one person accountable if the Department's efforts are disorganized and late. A basic principle is that when many people are responsible, no one is responsible.

Last night, we authorized another $450 million for DOD's role in the war on drugs. Will it again take them most of fiscal year 1990 to make the money available? Will part of it expire at the end of the year because they have not used it?

This is a scandal and an outrage. At a time when we say we are nationalizing and mobilizing our efforts on the war on drugs, to

have almost all of the $300 million unspent, poorly allocated, with a rush to beat the spending deadline.

The time has come for the Defense Department to put its first team to work on this problem, to sort out the organizational lines of authority, to make budget and policy decisionmaking functional and effective, and to actually start fighting the war on drugs!

They have sat on their hands long enough. I plan to ask them very tough questions at the forthcoming hearing. I am giving them fair notice, so that they will have time to develop good answers.

Alone among Federal agencies, DOD has the resources, the experience, and the ability to make a serious dent in drug smuggling and to discourage other aspects of the international drug trade.

Mr. President, I serve public notice that it is time for DOD to join the team. If they do not, they will bear the blame for it, and will lose the resources we have authorized. I am dead serious about this and I hope they receive this message loud and clear.

Mr. President, to date their handling of these resources, these precious resources, is nothing short of shocking and scandalous. We must do better, otherwise we make a sham of the so-called war on drugs.

THE SECRETARY OF DEFENSE,
Washington, DC, November 13, 1989.

Hon. ALFONSE M. D'AMATO,
U.S. Senate,
Washington, DC.

DEAR AL: Thank you for your letter of September 5 concerning the Department of Defense role in combatting the threat to our society of illegal narcotics. Answers to the questions you posed in your letter are enclosed.

In April, I asked Steve Duncan, the Assistant Secretary of Defense for Reserve Affairs, to assume a new responsibility as the DOD Coordinator for Drug Enforcement Policy and Support. On September 18, I issued guidance, a copy of which is attached, designed to assist in the swift and effective implementation of the President's National Drug Control Strategy within the Department. In that guidance, I made clear that the detection and countering of the production and trafficking of illegal drugs is a high priority national security mission of the Department of Defense. Pursuant to my direction, the Commanders-in-Chief of the key Unified and Specified Commands have now submitted their plans for carrying out this mission in their respective areas of responsibility. I am currently reviewing those plans.

I am confident now that we have the management and organizational structure that will maximize our contribution to the Administration's goal of a drug-free America. Your continuing commitment to the fight against illegal drugs is appreciated.

Sincerely,

DICK CHENEY.

ANSWER TO SENATOR D'AMATO'S QUESTIONS

The following answers respond to the four unnumbered questions on page two of Senator D'Amato's September 5, 1989, letter, as well as Questions 18 and 20.

Answer: Anti-drug missions have a high priority within the Department of Defense. Executive decision making authority for issues concerning the Department's anti-drug activities is exercised by myself or, in my absence, by the Deputy Secretary. I have designated Mr. Stephen Duncan, the Assistant Secretary for Reserve Affairs, as the DOD Coordinator for Drug Enforcement Policy and Support. As such, he is responsible for the coordination and staffing of all drug policy issues relevant to the Department. I have assigned the responsibility to conduct operations to detect and monitor aircraft and maritime vessels suspected of smuggling drugs into the United States to the Combatant Commands through the Chairman, JCS. The Chairman also has the responsibility for overseeing the activities of the Combatant Commands in the performance of this mission as well as their other missions. He has, within his staff, a counternarcotics division which coordinates operational issues with the Unified and Specified Commanders. All policy and operational issues are fully staffed and recommendations are provided by the appropriate DOD agencies, the Joint Staff and my own staff. Decision making authority for these important issues has not been delegated. In addition to staffing within the Department of Defense, I participate in NSC deliberations and decisions which affect the Department's counternarcotics work. Our relationship with the Director, Office of National Drug Control Policy (ONDCP), has been, and continues to be, one of mutual respect, cooperation, and close coordination. we provide personnel and logistical support to ONDCP as well as staff input and suggestions as requested.

The defense planning process for FY 1992 through 1997 is underway. As you correctly noted, I have directed that special attention be given to U.S. interests in Latin American concerning illegal drug production and trafficking. Since detection and monitoring is a formal mission of the Department, the issues are automatically included in our planning process. In order to prepare the Defense Planning Guidance, I have established the Defense Planning Resources Board (DPRB) to review and provide recommendations on all issues. The Secretaries of the Military Departments sit on the DPRB and, for selected issues, the Chiefs of the Military Services also participate in Board deliberations. I expect that, when completed, the Defense Planning Guidance will fully address DOD anti-drug issues.

We look forward to continued cooperation with the Director, ONDCP in combatting our Nation's drug problem. The Department of Defense is enthusiastically participating in the fight against the epidemic of illegal drugs while maintaining our defense readiness posture. My DOD Coordinator for Drug Enforcement Policy and Support has an excellent relationship with the Secretaries of the Military Departments and the senior leadership of the Defense Agencies who have the appropriate personnel within their staffs to coordinate their activities in support of the DOD's role in the National Drug Strategy.

The following are responses to your numbered questions:

1. Is there a clear statement of the goals the Department seeks to accomplish with the FY 89 appropriation of $300 million for DOD's counternarcotics efforts and a plan for achieving its objective? Is there a clear statement of the goals the Department seeks to accomplish with the $450 million authorized for counternarcotics efforts in the FY 1990 Senate Defense Authorization Bill and a plan for achieving those objectives?

Answer: The following goals of the FY 1989 program are carried forward for the FY 1990 program: (1) Support the President's National Drug Strategy; (2) Develop an effective counternarcotics surveillance capability along the southern border; (3) Enhance intelligence systems to provide timely, relevant intelligence support to the operating forces and law enforcement agencies; (4) Develop an effective integrated communications network to support drug interdiction command, control, communications, and intelligence capabilities; and (5) Support energetic National Guard counternarcotics operations under command of the State Governors. In addition, the FY 1990 program has the additional goals set forth in the Secretary's September 18th DOD Counternarcotics Guidance.

2. How much of the $300 million appropriated in FY 1989 will be carried over to FY 1990 and what are current plans for those funds?

Answer: The FY 1989 National Defense Appropriations Act appropriated $300 million to DOD for counternarcotics. Initially, the funding was appropriated for operations and maintenance (O&M), and military personnel. DOD submitted for congressional approval requests to reprogram the $300 million appropriation as follows:

Procurement (3 year funds), $192.077 million.

RDT&E (2 years funds), $1.5 million.

The remaining balance of $106.423 O&M was internally reprogrammed to the appropriate Services and Defense Agencies. Approval from the final congressional committee for the procurement reprogramming was signed on August 8, 1989. The $1.5 million RDT&E reprogramming request was not approved by the requisite Congressional committees.

Procurement funds were needed to acquire land and sea-based aerostats, communications equipment and other necessary items. Upon receipt of Congressional approval, the procurement reprogramming funds were released to the Services and Defense Agencies for obligation to the various projects which were approved as part of the FY 1989 DOD Counterdrug Program. The funds will carry forward into FY 1990 for execution.

All of the $300 million was identified to fund specific programs and projects that were contained in the approved FY 1989 DOD Counterdrug Program.

3. Will all remaining funds that have not been reprogrammed as of September 1 be obligated within FY 1989? Will any part of the $300 million appropriated in FY 1989 lapse?

Answer: It appears that some of the funds provided for O&M and MILPERS in support of the National Guard were not obligated. With heavy seasonally driven program execution now taking place and the normal lag in receiving accounting data, we do not yet know the amount of funds that have lapsed.

4. Will any procurement actions be completed (in the sense that equipment or materials are actually delivered to a procuring authority) using reprogrammed FY 1989 funds before the end of FY 1989?

Answer: Yes. Subsequent to receipt of congressional procurement reprogramming approval and release of funds to the respective Services and Defense Agencies, procurement actions have proceeded rapidly towards fruition. The contracting and delivery process will be completed as rapidly as possible. However, in view of the relatively compressed time frame between reprogramming approval and the end of FY 1989, most deliveries will occur in FY 1990.

5. Why did the FY 1989 reprogramming request come to Congress without full programmatic documentation to support the request, including a plan explaining what the Defense Department expects these expenditures to accomplish and how the Department intends to manage these programs? What programmatic documentation and budget justification documents are now available to support the Department's reprogramming request?

Answer: The February 1989 DOD Report to Congress outlined DOD's intentions and plans for execution of the $300 million appropriation, and provided much of the underpinning for the development of the FY 1989 Counterdrug Program which was approved on May 23, 1989. Both formed the basis for justification of the reprogramming requests. Although the actual transmittal on which the reprogramming requests are conveyed to Congress (Department of Defense Form 1415) does not normally include substantial programmatic documentation, DOD staff members have responded to requests for elaboration and clarification and will continue to do so.

6. Has a Concept of Operation been completed for each Joint Task Force (JTF) site?

Answer: Yes. Two Joint Task Forces, JTF-4 in Key West, Florida, reporting to Commander-in-Chief Atlantic and JTF-5 in Alameda, California, reporting to Commander-in-Chief Pacific were created to conduct surveillance missions, fuse technical intelligence, and coordinate detection and monitoring missions with law enforcement agencies. JTF-4 has been operational 24-hours a day, 7 days a week since April 1989. JTF-5 became operational 24-hours a day, 7 days a week in October 1989. They are currently conducting operations against both airborne and seagoing targets employing a variety of DoD assets. The JTF commanders hold quarterly planning conferences with the law enforcement agencies to schedule joint counterdrug surveillance and interdiction missions. These conferences reduce duplication of effort and ensure detection and interdiction assets are available to respond to emergent intelligence. The JTFs have been successful in joint "hand off" operations, and have provided valuable fused intelligence to the law enforcement agencies. The Secretary of Defense has approved in principle a Commander, U.S. Forces Command recommendation that a new JTF-6 be established to coordinate DoD support to drug law enforcement agency operations along the southwest border. Detailed planning and interagency coordination have been initiated.

7. Have all intelligence and radar assets been identified and designated for communications integration into the JTF's?

Answer: Yes. In early FY 1990 both JTFs 4 and 5 will have complete intelligence centers capable of fully fusing intelligence products from all DoD sources. The JTFs will have access to the target data from all operational land-based and sea-based aerostats, deployed mobile radars and the radars in the Caribbean Basin Radar Network.

8. Is the Department developing a plan to phase out use of operational military sensor platforms in favor of dedicated drug enforcement sensor platforms, e.g. aerostats, off shore oil rigs, etc?

Answer: No. The drug smugglers mainly use altered civilian aircraft and boats to transport drugs. Radar detection capabilities vary by platform, and small targets often fall below detection parameters. A short warning time, the potential of "low flyers," and exceptionally small, surface targets dictate continued support and employment of operational military sensors. DoD has selected a mix of land and sea-based aerostats to provide the needed continous coverage along the approaches to our borders. The JTFs will use military aircraft, ships, and mobile radars to fill in the gaps in land and sea-based aerostat coverage. In addition, a number of military platforms will be on standby to respond to intelligence cueing. Together, the dedicated sensor platforms and military platforms will provide a cost-effective and flexible radar barrier.

9. Have communications plans been established between JTF-4 and JTF-5, Customs C3I and other Federal, state and local drug interdiction agencies? Please also explain the organizational lines of authority between the JTFs and higher DoD authorities, from both policy and budget perspectives.

Answer: DoD and Law Enforcement Agency communications plans were reviewed in the DoD's January and May 1989 reports to Congress. Additionally, the National Telecommunications Master Plan for Drug Enforcement provides the required guidance, recommendations, standards, and strategy for effecting a secure and interoperable communications capability. The Drug Enforcement Telecommunications Implementation Plan (DETIP), developed to implement the Master Plan, is now prepared for intra-agency coordination and will provide DoD with a detailed plan for fielding the required communications equipment and security plans. All communication plans will be updated as the strategy and participants evolve.

Regarding the organizational lines of authority, the JTFs respond directly to the respective CINC tasking and the CINCs receive their policy guidance from the Secretary of Defense. The JTFs receive their budget authority through the same budgetary channels as their respective CINCs.

10. What are your plans to ensure the integrity and protection of classified information within and between facilities?

Answer: The integrity and protection of classified information is the responsibility of every agency. A communications infrastructure, when fully implemented (as described in the Master and Implementation Plans), will provide the required protection and security to pass sensitive intelligence relating to narcotics activities. Information referred to a DoD agency by a law enforcement agency (LEA) will maintain the classification applied to it by the LEA. The current and planned mode of transmission of classified information to the various facilities is through the rapidly expanding "NARC NET" which is a unique circuit of the Defense Data Net. Information transmitted is encrypted and may be classified up to Top Secret. Additionally, STU III telephones are employed for the rapid transmission of classified information, with units available at all sites.

11. What is the planned Defense Department interface with the Customs C3I Centers with respect to type and quality of interdiction data provided?

Answer: By capitalizing on various sophisticated technologies currently available, DOD will provide fused intelligence to the C3I centers utilizing JTF-4 and JTF-5 as the conduits for the flow of that information. The types of intelligence passed will be both tactical and strategic in nature, derived from human and electronic detection resources. The information will be evaluated for effectiveness and serviceability and immediately relayed to the civilian law enforcement agencies.

12. Has the Defense Department requested and received industry support to validate operational concepts and system availability?

Answer: DOD's interface with representatives of industry is extensive and continuing. Active solicitation for presentations on technology which may be applied to the counterdrug effort have been forwarded to all major corporations, and a number of innovative concepts have been added to procurement plans. Additionally, consulting firms with longstanding DOD contracts have been asked to review several issues related to communications connectivity and tactics development.

13. What is the status of the JTF-4 and JTF-5 facilities regarding construction, operating equipment, staffing, etc?

Answer: JTF-4 is an operational Headquarters. Facility enhancement and equipment integration is nearly 80 percent complete; funding has been provided to permit the achievment of full capability by summer 1990. Manning has been provided by TDY up until August 1989; however, PCS personnel replacements are arriving at this time. Full permanent manning will occur by January 1990.

JTF-5 is currently operating at approximately 75 percent of planned capacity. Full manning will occur in the spring of 1990 and all construction will be complete in FY 1991. JTF-4 was given priority in funding and personnel because threats in that region are higher at the present time.

14. Will the JTF sites be used for functions other than drug interdiction?

Answer: No. Both JTFs are conducting counternarcotic operations only.

15. Will Southern Command move from Panama City? If so, has a location for its new headquarters been selected? Will the new location incorporate communication coordination for the Defense Department's drug interdiction activities?

Answer: Southern Command must move no later than December 31, 1999 in accordance with the Panama Canal Treaty. The decision on its new headquarters location has not been made. The new location will be tied into the Defense Data Network and fully linked into counternarcotic operations.

16. On July 19, you sent a memorandum to your subordinates on the subject of the Defense Planning Guidance for FY 1992-1997. In that memorandum, you indicate that you have asked the Under Secretary of Defense for Policy to prepare Proposed Defense Planning Guidance for FY 1992-1997 program and budget planning on the issue of: U.S. interests in Latin America of countering the production and trafficking of illegal drugs and of assisting countries in providing for their own security.

a. Are there any plans for similar direction regarding development of Defense Planning Guidance for the FY 1992-1997 program for accomplishing the Department's counternarcotics detection and monitoring mission, and for support for drug enforcement generally, as provided for in 10 U.S.C. 371, et seq.?

Answer: The Secretary's Counternarcotics Guidance of September 18, 1989 provides the basis guidance for the DOD counternarcotics program, covering all facets of the program. Further internal planning guidance in the form of the Defense Planning Guidance is in process.

b. For which part of the counternarcotics expenditures presented for the Senate Appropriations Committee's approval has five year planning, programming, and budget documentation been prepared?

Answer: DOD is finalizing the program and budget to support the three mission areas outlined in the FY 1989 Defense Authorization Act (National Guard, C3I, Detection and Monitoring). The process to determine the employment of funds earmarked for support of the international initiative has been initiated.

17. When did the Department send Congress the May 1989 Report on the "Integration of Command, Control, Communications and Technical Intelligence into an Effective Communications Network for Drug Interdiction?" When will Congress receive the June 1989 Implementation Plan described on page 20 of the May 1989 Report? Does the June 1989 report exist?

Answer: The May 1989 Report on the "Integration of Command, Control, Communications and Technical Intelligence into an Effective Communications Network for Drug Interdiction" was forwarded by the President to the HAC, SAC, HASC, and SASC on July 20, 1989. The Drug Enforcement Telecommunications Implementation Plan (DETIP), described on page 20 of the May 1989 report, does exist and is currently undergoing agency review. The DETIP was developed by the Interagency Communications Interoperability Working Group, under the auspices of the Science and Technology Committee, with DoD as the major contributor. The DETIP will be forwarded to the Director, ONDCP for approval upon completion of interagency review.

18. Please explain how the Department's plans for its internal organization fulfill its responsibilities under the President's and the Director of National Drug Control Policy's National Drug Strategy?

Answer. See page one.

19. How will the officer in charge of the counternarcotics element in the Office of the Joint Chiefs of Staff (J-3) coordinate with, and exercise staff supervision over other offices and agencies?

Answer. The officer in charge of counternarcotics operations on the Joint Staff coordinates operations between all law enforcement agencies and the DoD. Members of the Joint Staff attend all interagency meetings to ensure connectivity between all agencies involved. Additionally there are U.S. Customs and U.S. Coast Guard representatives on the Joint Staff attached to the counternarcotics branch. These representatives ensure the smooth flow of information between the DoD and law enforcement agencies.

20. How will the Military Departments (as distinguished from the unified and specified commands) participate in your counternarcotics strategy and activities, and who will be in charge of the effort in each Department?

Answer. See page one.

THE SECRETARY OF DEFENSE,
Washington, DC, September 18, 1989.

DEPARTMENT OF DEFENSE GUIDANCE FOR IMPLEMENTATION OF THE PRESIDENT'S NATIONAL DRUG CONTROL STRATEGY

On September 5, 1989, the President issued the National Drug Control Strategy pursuant to the Anti-Drug Abuse Act of 1988. The President's strategy provides for an integrated program of counternarcotics actions designed to move the country substantially closer to the goal of a drug-free America. This guidance is designed to assist in the swift and effective implementation of the President's strategy within the Department of Defense.

The supply of illict drugs to the United States from abroad, the associated violence and international instability, and the use of illegal drugs within the country pose a direct threat to the sovereignty and security of the country. The threat of illicit drugs strikes at the heart of the Nation's values. It inflicts increased crime and violence on our society and attacks the well-being and productivity of our citizenry. One of the principal foreign policy objectives of this Administration is to reduce, and if possible to eliminate, the flow of illegal narcotic substances to the United States. Also, the Congress has by statute assigned to the Department the duty to serve as the single lead agency of the Federal Government for the detection and monitoring of aerial and maritime transit of illegal drugs to the United States. For these reasons, the detection and countering of the production, trafficking and use of illegal drugs is a high priority national security mission of the Department of Defense.

The Nation ultimately will be rid of the scourge of illegal drugs only through the sustained application of the energy, courage and determination of the American people. As the President's strategy reflects, the Nation must seek to eliminate both the demand and the supply for illegal drugs, for the Nation will conquer neither if the other is left unchecked.

The Department of Defense, with the Department of State and U.S. law enforcement agencies, will help lead the attack on the supply of illegal drugs from abroad under the President's strategy. The efforts of the Department of Defense will complement those of other U.S. agencies and cooperating foreign countries. The Department of Defense will work to advance substantially the national objective of reducing the flow of illegal drugs into the United States through the effective application of available resources consistent with our national values and legal framework.

An effective attack on the flow of illegal drugs depends upon action at every phase of the flow: (1) in the countries that are the sources of the drugs, (2) in transit from the source countries to the United States, and (3) in distribution in the United States. The United States Armed Forces can assist in the attack on the supply of drugs in each of these phases.

I. THE ATTACK ON DRUGS AT THE SOURCE

The Department of Defense will assist in the attack on production of illegal drugs at the source. The production of illegal drugs is a complex criminal enterprise. The criminal enterprise requires illicit labor, capital, entrepreneurship and a substantial infrastructure to grow the plants that are the raw materials for illegal drugs and to refine and manufacture the illegal drugs. Reducing the availability of these elements of illegal drug production in the countries from which illegal drugs originate would reduce the flow of illegal drugs to the United States.

The Department of Defense can assist in the three elements of an effective attack on the supply of drugs in source countries: (1) assistance for nation-building, (2) operational support to host-country forces, and (3) cooperation with host-country forces to prevent drug exports. Pursuant to the National Drug Control Strategy near-term efforts will focus on the Andean nations from which most cocaine entering the United States originates. A key requirement for the success of U.S. efforts directed at the supply of illegal drugs, and in particular U.S. counternarcotics operations, will be the cooperation of the foreign countries involved.

As the National Drug Control Strategy indicates with respect to the Andean countries, a sustained, multi-year effort to provide economic, security, and law enforcement assistance is an essential element for a successful fight against illegal drugs abroad. Drug-producing criminal organizations control what amounts to private armies that challenge the law enforcement and military forces of their countries. Often such organizations are intertwined with insurgent forces that challenge directly the governments of their countries. The National Drug Control Strategy calls for the United States to reinforce the abilities of the governments of the countries cooperating in the fight against illegal drugs to combat drug-producing organizations. Security assistance will help enable such a government to protect itself from criminal drug enterprises and drug-related insurgencies, and to enforce its laws against drug producers and traffickers. Future economic assistance will help to strengthen the national economy and keep the labor, capital and entrepreneurship available in the country channeled toward useful production and away from drug production. Success in other efforts to attack the supply of illegal drugs depends in the long-run upon the establishment of healthy economies in drug-producing countries and the restoration of government authority in those countries. To assist in the implementation of this element of the National Drug Control Strategy, the Department of Defense will execute security assistance programs in accordance with Presidential instructions and applicable law, and in coordination with the Department of State.

Effective implementation of the National Drug Control Strategy requires that the Department of Defense be prepared to provide counternarcotics operational support to the forces of cooperating countries. The U.S. Armed Forces can provide foreign forces substantial assistance in training, reconnaissance, command and control, planning, logistics, medical support and civic action in connection with foreign forces' operations against the infrastructure of drug-producing criminal enterprises. Such U.S. military support would be designed to increase the effectiveness of foreign forces' efforts to destroy drug processing laboratories, disrupt drug-producing enterprises, and control the land, river and air routes by which the enterprises exfiltrate illegal drugs from the country.

In addition to assistance for nation-building and support for foreign forces' strikes on drug-producing enterprises, the U.S. can assist law enforcement agencies of cooperating foreign countries in combatting the export of drugs from those countries. The Department of Defense can assist with an improved intelligence collection effort, which will be essential not only to assist the governments of the source countries, but also for U.S. actions in the second line of defense—the attack on drugs in transit to the United States.

II. THE ATTACK ON DRUGS IN TRANSIT

The substantially increased effort to attack drugs at their source in the drug-producing countries as a first line of defense should help reduce over time the export of illegal drugs to the U.S. Nevertheless, drug-

producing criminal enterprises in those countries currently are so vast in scope that, even if U.S. efforts to attack drugs at the source are highly successful, the flow of drugs by sea, air, and land will continue. As the second line of defense against the flow of illegal drugs, the U.S. armed forces will implement the National Drug Control Strategy through substantial efforts to counter the flow of illegal drugs in transit to the United States, both outside the United States and at the Nation's borders and ports of entry. The Department's service pursuant to statutory direction as the single lead agency of the Federal Government for the detection and monitoring of aerial and maritime transit of illegal drugs to the United States will prove particularly important to the success of this effort.

Deployment of appropriate elements of the U.S. armed forces with the primary mission to interdict and deter the flow of drugs should over time help reduce the flow of illegal drugs into the U.S. At a minimum, deploying the armed forces with this mission should have the immediate effect of substantially complicating the logistical difficulties of criminal drug traffickers and increasing the costs and risks of their drug smuggling activities.

As a high priority, United States military counternarcotics deployments will emphasize combatting the flow of drugs across the Caribbean Sea and across the southern border of the United States. The Department of Defense will proceed with planning to deploy a substantial Caribbean Counternarcotics Task Force, with appropriate air and maritime drug interdiction assets and aerial and maritime detection and monitoring assets, to combat the flow of illegal drugs from Latin America through the Caribbean Sea. The Department also will proceed with planning for other deployments of U.S. forces to complement the counternarcotics actions of U.S. law enforcement agencies and cooperating foreign governments.

Success of the attack on drugs in transit will require sustained deployment of appropriately trained and equipped members of the U.S. armed forces and substantially improved cooperation between the armed forces and U.S. law enforcement agencies. The substantial increase in military participation in the attack on drugs in transit is intended to be in addition to, rather than in place of, Federal law enforcement agencies' efforts.

The success of interdiction and deterrence efforts will depend greatly upon the ability of the Department of Defense and law enforcement agencies to marshal effectively the myriad command, control, communications and intelligence resources they possess into an integrated counternarcotics network. The Department of Defense will serve as the single lead Federal agency for the detection and monitoring of aerial and maritime transit of illegal drugs and will be prepared, with the cooperation of U.S. enforcement agencies, to integrate expeditiously into an effective network the Federal command, control, communications, and technical intelligence assets that are dedicated to the mission of interdicting illegal drugs from abroad. The Department of Defense will seek to develop and employ when appropriate the capability to exercise tactical control of Federal detection and monitoring assets actively dedicated to counternarcotics operations outside the United States and in border areas.

To ensure that action to implement the President's National Drug Control Strategy begins immediately, the Commanders-in-Chief of all unified and specified combatant commands will be directed to elevate substantially the mission priority within their commands of actions to fight illegal drugs.

III. THE ATTACK ON DRUGS IN THE UNITED STATES

After the first and second lines of defense—actions directed at illegal drugs in source countries and in transit—the third line of defense against drugs will be in the United States itself. The role of the armed forces in the third line of defense includes both actions to reduce the supply of illegal drugs and actions to reduce the demand for those drugs.

Within the United States, to assist in reducing the supply of illegal drugs, the counternarcotics actions of the Department of Defense will emphasize support to Federal, State and local law enforcement agencies, and the National Guard in State status. The Department of Defense will assist requesting law enforcement agencies and the National Guard with training, reconnaissance, command and control planning, and logistics for counternarcotics operations. In appropriate cases, armed forces personnel and equipment will be detailed directly to law enforcement agencies to assist in the fight. The Department of Defense will ensure that its administrative and command structures permit rapid and effective response to appropriate requests for counternarcotics assistance from law enforcement agencies and the National Guard. The Department will continue to assist the Governors of the several States in employing the National Guard in the fight against illegal drugs.

With respect to reduction of demand for drugs within the United States, the Department of Defense bears an important responsibility to reduce the use of illegal drugs within the armed forces and among its civilian personnel. The Department of Defense has met with substantial success in its demand reduction efforts with armed forces personnel through aggressive drug abuse education and drug-testing programs—an 82% reduction in drug abuse since 1980. The Department will step up its efforts to combat illegal drug use by departmental personnel and will make available to other large organizations its experience in reducing the demand for illegal drugs. The Department also will emphasize drug abuse awareness and prevention programs in the Department's school system, which educates over 190,000 of America's children.

The Department of Defense will be prepared to assist the Department of Justice with its responsibilities for incarceration and rehabilitation of drug criminals, through means such as training Federal, State and local personnel in the conduct of rehabilitation-oriented training camps for first-offense drug abusers and providing overflow facilities for incarceration of those convicted of drug crimes.

The President's National Drug Control Strategy emphasizes a multi-national and multi-agency approach to reduction of the drug supply. The Department of Defense has a crucial role in defending the United States from the scourge of illegal drugs. The Department will employ the resources at its command to accomplish that mission effectively. Should it prove necessary in implementing the President's strategy effectively, any needed additional statutory authority will be sought. The men and women of America's armed forces will fight the production, trafficking and use of illegal drugs, as an important part of the national effort to secure for all Americans a drug-free America.

RICHARD B. CHENEY,
Secretary of Defense.

Mr. GORTON. Mr. President, I believe it has been cleared on both sides.

Mr. LEVIN. Mr. President, this amendment of Senator D'AMATO has indeed been cleared on this side. We have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2537) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2538

(Purpose: To enhance participation of historically black colleges and universities and minority institutions in defense research)

Mr. LEVIN. Mr. President, on behalf of Senators NUNN, BINGAMAN, THURMOND, WARNER, MCCAIN, and myself, I send an amendment to the desk.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for Mr. NUNN (for himself, Mr. BINGAMAN, Mr. THURMOND, Mr. WARNER, Mr. MCCAIN, and Mr. LEVIN) proposes an amendment numbered 2538:

At the end of title XII insert the following new section:

SEC. 1216. ENHANCING PARTICIPATION OF HISTORICALLY BLACK COLLEGES AND UNIVERSITIES AND MINORITY INSTITUTIONS IN DEFENSE RESEARCH.

Section 1207 of the National Defense Authorization Act of Fiscal Year 1987 (10 U.S.C. 2301 note) is amended—

(1) in subsection (a)—

(A) by inserting "(1)" before "Except";

(B) by redesignating clauses (1), (2), and (3) as clauses (A), (B), and (C), respectively; and

(2) by adding at the end the following new paragraph:

"(2) The Secretary of Defense shall establish a specific goal for the award of prime contracts and subcontracts to historically Black colleges and universities and Minority Institutions in order to increase the participation of such colleges and universities in the program provided for by this section."; and

(3) by striking out subsection (c) and inserting in lieu thereof the following new subsection (c):

"(c) TYPE OF ASSISTANCE.—(1) To attain the goal specified in subsection (A)(1), the Secretary of Defense shall provide technical assistance to the entities referred to in that subsection and, in the case of historically black colleges and universities and minority institutions, shall also provide infrastructure assistance.

"(2) Technical assistance provided under this section shall include information about the program, advice in preparation of pro-

posals, and other such assistance as the Secretary considers appropriate. If the resources of the Department of Defense are inadequate to provide such assistance, the Secretary may enter into contracts with minority private sector entities with experience and expertise in the design, development, and delivery of technical assistance services to eligible individuals, business firms and institutions, defense acquisitions agencies, and defense prime contractors. Department of Defense contracts with the entities referred to in subsection (a)(1) shall be awarded annually, based upon, among other things, the number of minority small business concerns, historically Black colleges and universities, and minority institutions that each such entity brings into the program.

"(3) Infrastructure assistance provided under this section may include programs to:

"(A) establish and enhance undergraduate, graduate, and doctoral programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(B) make Department of Defense personnel available to advise and assist faculty at the school in the performance of defense research and in scientific disciplines critical to the national security functions of the Department of Defense;

"(C) establish partnerships between defense laboratories and historically Black colleges and universities and minority institutions for the purpose of training students in scientific disciplines critical to the national security functions of the Department of Defense;

"(D) award scholarships, fellowships, and the establishment of cooperative work-education programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(E) attract and retain faculty involved in scientific disciplines critical to the national security functions of the Department of Defense;

"(F) equip and renovate laboratories for the performance of defense research;

"(G) expand and equip Reserve Officer Training Corps activities devoted to scientific disciplines critical to the national security functions of the Department of Defense; and

"(H) provide other assistance as the Secretary determines appropriate to strengthen scientific disciplines critical to the national security functions of the Department of Defense or the college infrastructure to support the performance of defense research.

"(4) The Secretary shall, to the maximum extent practical, carry out programs under this section at institutions that agree to bear a substantial portion of the cost associated with the programs.".

Mr. NUNN. Mr. President, I rise to offer an amendment to broaden the national defense research base by increasing the participation of historically black colleges and universities and other minority institutions in the performance of defense research.

Four years ago the Congress passed section 1207 of the National Defense Authorization Act for fiscal year 1987, which established a 5 percent goal for the award of certain DOD dollars to small disadvantaged businesses [SDB's], historically black colleges and universities [HBCU's], and other minority institutions [MI's]. The Department's 1990 report on the operation of this program indicates that SDB prime and subcontractors were awarded $5.2 billion in defense contracts. While the opportunity for participation of SDB's in defense contracting needs to be expanded, the record demonstrates that the legislation we enacted 4 years ago to establish the 5-percent goal has increased small disadvantaged business participation in defense contracting.

With regard to the participation of the historically black colleges and universities and other minority institutions in the defense research arena, much needs to be done. In fiscal year 1989, historically black colleges and universities were awarded little more than $6 million in the defense research awards. During this same period majority institutions of higher education received $1.2 billion in defense prime contracts alone.

To begin the expansion of our vital national defense research base and to address this critical problem, my amendment would direct the Secretary to establish a distinct goal for historically black colleges and universities and other minority institutions to increase their participation in defense research. This distinct goal for these educational institutions would be a part of the overall 5-percent goal established by section 1207.

My amendment would provide the tools necessary to accomplish this vital goal. Although section 1207 currently authorizes DOD to provide technical assistance, this assistance does not address the fundamental problems limiting the participation of historically black colleges and universities and minority institutions in the 1207 program. Many of these institutions do not possess the infrastructure necessary to compete in the defense research arena.

To address this problem, my amendment would authorize DOD to assist these institutions in enhancing the faculty, programs, and equipment necessary to successfully compete in the defense research arena. Where this assistance is provided the schools must bear a substantial portion of the cost associated with upgrading defense research capacity to the maximum extent practical.

In establishing programs for the award of scholarships, fellowships, and work-education programs in scientific disciplines critical to the Department's national security functions, I would expect DOD to fully utilize all authorities provided in current law to assist in the establishment of such programs.

To ensure the successful implementation of this authority, I would expect each military department to submit management plans to the Secretary of Defense, broken down by individuals buying commands, setting forth implementation schedules and milestones with specific actions to be taken to attain the goal established by the Secretary. The Secretary shall review and include in the annual section 1207 report to the Congress an assessment of the actions taken by the military departments to attain their goals.

Mr. LEVIN. Mr. President, the amendment would direct the Secretary to establish a specific goal for the award of contracts and subcontracts to historically black colleges and universities and minority institutions and these shall be part of the overall 5 percent goal which is previously established in section 1207.

Mr. GORTON. Mr. President, this amendment is one of which we highly approve.

The PRESIDING OFFICER. Is there further discussion?

If not, the question is on agreeing to the amendment.

The amendment (No. 2538) was agreed to.

Mr. LEVIN. I move to reconsider the vote.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2539

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for Mr. DOLE, proposes an amendment numbered 2539.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 261, on line 2, strike out "$61,800,000" and insert "$74,300,000".

On page 261, on line 5, strike out "$1,495,150,000" and insert "$1,482,650,000".

Mr. DOLE. Mr. President, it is my understanding that this amendment has been cleared on both sides of the aisle.

In the military construction portion of this bill, $12.5 million is provided for family housing improvements at Fort Riley, KS. Enlisted housing at Ellis Heights, Fort Riley, is in poor, substandard condition—it has not been renovated since it was built in 1959.

Since this bill was reported out, the Army has informed the Armed Services Committee that it would be less expensive to fund new construction in this case, than to fund whole house improvements.

Therefore, this amendment seeks to change the funding from improvements to new construction. With this change, 250 units of housing can be built, instead of 216 units being rebuilt. The result of this amendment is improved housing and greater cost-effectiveness.

Mr. GORTON. Mr. President, this amendment relates to housing at Fort Riley, KS, that slightly increases the authorization therefor. I believe it has been approved on both sides.

Mr. LEVIN. Mr. President, the amendment has been cleared on this side.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2539) was agreed to.

Mr. GORTON. I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2540

(Purpose: To require the Secretary of Defense to establish and conduct a Mentor-Protege Pilot Program)

Mr. LEVIN. Mr. President, I send an amendment to the desk on behalf of Senators NUNN, WARNER, BINGAMAN, and MCCAIN and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN] (for himself, Mr. NUNN, Mr. WARNER, Mr. BINGAMAN, Mr. MCCAIN, and Mr. LEVIN), proposes an amendment numbered 2540.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 181, between lines 8 and 9, insert the following:

SEC. . MENTOR-PROTEGE PILOT PROGRAM.

(a) ESTABLISHMENT OF PILOT PROGRAM.—The Secretary of Defense shall establish a pilot program to be known as the "Mentor-Protege Pilot Program".

(b) PURPOSE.—The purpose of the pilot program is to provide incentives for major Department of Defense contractors to furnish disadvantaged small business concerns with assistance designed to enhance the capabilities of disadvantaged small business concerns to perform as subcontractors and suppliers under Department of Defense contracts in order to increase the participation of such business concerns as subcontractors and suppliers in Department of Defense contract business.

(c) PROGRAM PARTICIPANTS.—(1) A business concern meeting the eligibility requirements set out in subsection (d) may enter into agreements under subsection (e) and furnish assistance to disadvantaged small business concerns under the pilot program pursuant to such agreement upon making application to the Secretary of Defense and being approved for participation in the pilot program by the Secretary. A business concern approved for participation pursuant to this paragraph shall be known, for the purposes of the pilot program, as a "mentor firm".

(2) A disadvantaged small business concern may obtain assistance from a mentor firm under the program upon entering into an agreement with the mentor firm as provided in subsection (e). A disadvantaged small business concern receiving such assistance shall be known, for the purposes of the program, as a "protege firm".

(3) In entering into an agreement pursuant to subsection (e), a mentor firm may rely in good faith on a written representation of a business concern that such business concern is a disadvantaged small business concern. The Small Business Administration shall determine the status of such business concern as a disadvantaged small business concern in the event of a protest regarding the status of such business concern. If the business concern is determined by the Small Business Administration not to be a disadvantaged small business concern, assistance furnished such business concern by the mentor firm after the date of the determination may not be considered assistance furnished under the pilot program.

(4) It is not necessary for a disadvantaged small business concern to obtain the approval of the Secretary of Defense before receiving assistance as a protege firm under the pilot program. However, the Secretary may disapprove the participation of a disadvantaged small business concern in the program on the basis of criteria which the Secretary shall specify in the regulations prescribed pursuant to subsection (k). If the Secretary disapproves the participation of a disadvantaged small business concern in the program, he shall transmit a written notification of such disapproval to the disadvantaged small business concern and the mentor firm furnishing the assistance. Assistance furnished that disadvantaged small business concern by the mentor firm after the mentor firm receives such notification may not be considered as assistance furnished under the pilot program.

(d) MENTOR FIRM ELIGIBILITY.—A business concern generally eligible for award of contracts by the Department of Defense is eligible to enter into an agreement with a protege firm under subsection (e) and to furnish assistance under the pilot program pursuant to that agreement if, during the fiscal year preceding the fiscal year in which the business concern enters into the agreement, the total amount of the Department of Defense contracts awarded such business concern and the subcontracts awarded such business concern under Department of Defense contracts was equal to or greater than—

(1) $100,000,000; or

(2) such lesser amount as the Secretary specifies in the regulations prescribed pursuant to subsection (k) for application to any business concern which is a disadvantaged small business concern or, except for the size of that business concern, would be a disadvantaged small business concern.

(e) MENTOR-PROTEGE AGREEMENT.—(1) Before furnishing assistance to a protege firm under the pilot program, a mentor firm shall enter into a mentor-protege agreement with the protege firm regarding the assistance to be furnished by the mentor firm to the protege firm. The agreement shall include the following:

(A) A program of assistance that is designed to develop the capabilities of the protege firm to perform as a subcontractor or supplier under Department of Defense contracts.

(B) The period, not to exceed four years, during which the mentor firm is to furnish assistance to the protege firm under the agreement.

(C) Procedures for the mentor firm or protege firm to terminate the agreement voluntarily and for the mentor firm to terminate the agreement for cause.

(2) A mentor-protege agreement under this subsection may cover more than one protege firm.

(f) FORMS OF ASSISTANCE.—A mentor firm may furnish the following assistance to a protege firm:

(1) Assistance, by using mentor firm personnel or other means, in—

(A) general business management, including organizational management, financial management, and personnel management, marketing, and overall business planning;

(B) engineering and technical matters such as production, inventory control, and quality assurance; and

(C) any other assistance designed to develop the capabilities referred to in subsection (e)(1)(A).

(2) Noncompetitive award of subcontracts under Department of Defense contracts to the protege firm.

(3) Payment of progress payments for performance of the protege firm under such a subcontract in amounts as provided for in the subcontract, but in no event may any such progress payment exceed 100 percent of the costs incurred by the protege firm for the performance.

(4) Advance payments under such a subcontract.

(5) Loans.

(6) Cash in exchange for an ownership interest in the protege firm, not to exceed 10 percent of the total ownership interest.

(7) Assistance obtained by the mentor firm for the protege firm from one or more of the small business development centers established pursuant to section 21 of the Small Business Act (15 U.S.C. 648), acting to the maximum extent practicable in cooperation with a historically Black college or university or a minority institution of higher education.

(g) INCENTIVES FOR MENTOR FIRMS.—(1) The Secretary of Defense shall provide for the reimbursement of a mentor firm for the total amount of any progress payment or advance payment made under the pilot program by the mentor firm to a protege firm in connection with a Department of Defense contract awarded the mentor firm.

(2) The Secretary of Defense shall provide for the reimbursement of a mentor firm for the costs of furnishing assistance referred to in paragraphs (1) and (7) of subsection (f) to a protege firm. The Secretary shall ensure that payment of reimbursements under this paragraph is provided for in a Department of Defense contract awarded to the mentor firm or in another agreement entered into by the Secretary and the mentor firm. The contract or other agreement shall specify the maximum amount of the reimbursement that may be made. The Secretary and the mentor firm may provide in the contract or other agreement for allocation of the costs to Department of Defense cost-reimbursement contracts awarded the mentor firm.

(3)(A) Any costs incurred by a mentor firm in furnishing assistance to a protege

firm that are not reimbursed pursuant to paragraph (2) shall be counted in the amount for which the mentor firm receives credit for purposes of determining whether the mentor firm attains a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract.

(B) The amount of the credit given a mentor firm for any such unreimbursed costs shall be equal to—

(i) four times the total amount of such costs attributable to assistance described in subsection (f)(7);

(ii) three times the total amount of such costs attributable to assistance furnished by the mentor firm's employees; and

(iii) two times the total amount of any other such costs.

(C) The amount of the credit given for any such unreimbursed costs may not exceed a maximum amount which shall be specified in the contract provision or agreement referred to in paragraph (2).

(4) The Secretary of Defense shall ensure that each Department of Defense contract awarded a mentor firm includes a provision for payment of an incentive or award fee to the mentor firm if the mentor firm exceeds the subcontracting participation goal, if any, applicable to such mentor firm under the contract.

(5) A mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for each subcontract for a product or service awarded under such contract by a mentor firm to a business concern that, except for its size, would be a small business concern owned and controlled by socially and economically disadvantaged individuals, but only if—

(A) the size of such business concern is not more than two times the maximum size specified by the Administrator of the Small Business Administration for purposes of determining whether a business concern furnishing such product or service is a small business concern; and

(B) the business concern formerly had a mentor-protege agreement with such mentor firm that was not terminated for cause.

(6) Notwithstanding subsection (j), a mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for any subcontract that the mentor firm awards under that contract to a business concern referred to in paragraph (5) within 9 years after the date on which the mentor firm and such business concern entered into the mentor-protege agreement referred to in clause (B) of such paragraph.

(h) NONAFFILIATION TREATMENT.—For purposes of the Small Business Act, a protege firm may not be considered an affiliate of a mentor firm solely on the basis that the protege firm is receiving assistance referred to in subsection (f) from such mentor firm under the pilot program.

(i) PARTICIPATION IN PILOT PROGRAM NOT TO BE A CONDITION FOR AWARD OF A CONTRACT OR SUBCONTRACT.—A mentor firm may not require a business concern to enter into an agreement with the mentor firm pursuant to subsection (e) as a condition for being awarded a contract by the mentor firm, including a subcontract under a contract awarded to the mentor firm.

(j) DURATION OF PILOT PROGRAM.—The Secretary of Defense shall conduct the Mentor-Protege Pilot Program during the period beginning on October 1, 1991, and ending on September 30, 1995.

(k) REGULATIONS.—The Secretary of Defense shall prescribe regulations to carry out the pilot program. The Secretary shall publish the proposed regulations not later than the earlier of April 1, 1991, or the date 180 days after the date of the enactment of this Act. The Secretary shall promulgate the final regulations not later than June 1, 1991, or the date 270 after the date of the enactment of this Act.

(l) DEFINITIONS.—In this section:

(1) The term "small business concern" means a business concern that meets the requirements of section 3(a) of the Small Business Act (15 U.S.C. 632(a) and the regulations promulgated pursuant thereto.

(2) The term "disadvantaged small business concern" means a small business concern owned and controlled by socially and economically disadvantaged individuals.

(3) The term "small business concern owned and controlled by socially and economically disadvantaged individuals" has the meaning given such term in section 8(d)(3)(C) of the Small Business Act (15 U.S.C. 637(d)(3)(C)).

(4) The term "historically Black college and university" means any of the historically Black colleges and universities referred to in section 1207(a)(2) of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note).

(5) The term "minority institution of higher education" means an institution of higher education with a student body that reflects the composition specified in section 312(b) (3), (4), and (5) of the Higher Education Act of 1965 (20 U.S.C. 1058(b) (3), (4), and (5)).

(6) The term "subcontracting participation goal", with respect to a Department of Defense contract, means a goal for the extent of the participation by disadvantaged small business concerns in the subcontracts awarded under such contract, as established pursuant to section 1207 of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note) and section 8(d) of the Small Business Act (15 U.S.C. 637(d)).

Mr. THURMOND. Mr. President, I rise in support of the amendment by the chairman, Senator NUNN.

The Department of Defense has an important stake in engaging historically black colleges/universities and minority institutions. It has a greater stake in assuring that both groups of institutions contribute to the national interest in meeting the defense challenges of the 21st century. If current funding patterns persist, historically black colleges/universities and minority institutions will remain conspiciously absent from the defense enterprise while the Nation faces the challenge of cultivating the best and the brightest minority talent in response to a 60-percent growth in science-related jobs in the service-producing industries by the end of the century.

Mr. President, Senator NUNN's amendment will provide the incentive to the Department of Defense to improve the participation of historical black colleges and minority institutions in defense-related activities. I urge my colleagues to support the amendment.

Mr. LEVIN. Mr. President, the purpose of the amendment of Senator NUNN is to broaden the defense industrial base by increasing the number and quality of small disadvantaged businesses in the defense subcontracting base. I believe this amendment has been cleared on the other side.

Mr. GORTON. Mr. President, this is, indeed, a very good small business amendment. It has been cleared on this side.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2540) was agreed to.

Mr. GORTON. I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. Mr. President, I ask unanimous consent that I be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2541

Mr. LEVIN. Mr. President, I send an amendment to the desk on behalf of Senator PELL and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for Mr. PELL, proposes an amendment numbered 2541.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 269, after line 25, add the following:

Newport Naval Underwater Systems Center, $13,700,000

Mr. PELL. Mr. President, this amendment makes provisions for significant long-range enhancement of our undersea defense capability, namely construction of a facility for advanced R&D on quiet propulsion for underwater vehicles.

The project involves the construction of a 100,000 square foot facility at the Naval Underwater Systems Center [NUSC] at Newport, RI. It will provide valuable capability to develop and test propulsion technology, with special emphasis on reduction of acoustic, electric and magnetic signatures of submarine launched weapons. This is a critically important component of the SSN-21 Seawolf submarine program which depends on substantial signa-

ture reduction to operate undetected at high speeds.

While this item was not included in the budget request, I am pleased to note that it is included in the House Military construction appropriation bill for fiscal year 1991, H.R. 5313, which provides $13.7 million for the project.

Notwithstanding the interest we all share in reduction in military spending in this era of reduced international tensions, I believe that prudence dictates that we maintain our technological lead in undersea defenses, which contribute so much to long range stability and security. This modest amendment will contribute significantly to that end and I urge its adoption.

Mr. LEVIN. Mr. President, this amendment would authorize the construction of a 100,000-square-foot facility at the Naval Underwater Systems Center at Newport, RI, and would provide capability to develop and test propulsion technology, with special emphasis on the reduction of acoustic, electric, and magnetic signatures of submarine-launched weapons.

Mr. GORTON. Mr. President, this amendment has been cleared on this side.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2541) was agreed to.

Mr. LEVIN. I move to reconsider the vote.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2542

(Purpose: To provide authority, under certain circumstances, to replace or restore certain property lost or damaged during Operation Just Cause)

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of Senator COATS and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON] for Mr. COATS, proposes an amendment numbered 2542.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate place in the bill, insert the following new section:

SEC. . AUTHORITY TO REPLACE OR RESTORE LOST OR DAMAGED PROPERTY.

(a) AUTHORITY.—In order to assist the entities described in this section to continue to provide services to the United States, The Secretary of the Army may replace or restore property of a contractor of the United States which was lost or damaged during Operation Just Cause begun on December 22, 1989, to the extent—

(1) such property was located on a military installation in Panama pursuant to the requirements of the contract and such military installation was used or occupied by United States Armed Forces prior to December 22, 1989;

(2) such damage was caused by United States Armed Forces; and

(3) such loss or damage was not caused in whole or in part by the negligent or wrongful act of such contractor or an agent or employee thereof.

(b) LIMITATION.—The Secretary of the Army may replace or restore property under this section only if—

(1) a request for such action is presented to the Secretary in writing within two years after such property was lost or damaged;

(2) the Secretary determines that such request is substantiated; and

(3) the Secretary determines that the contractor has made every reasonable effort to obtain compensation, replacement, or restoral of such property through other means.

Mr. GORTON. Mr. President, this relates to the restoration of certain property in Indiana and is approved on both sides, I believe.

Mr. LEVIN. Mr. President, the amendment has, indeed, been cleared on this side. We have no objection.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2542) was agreed to.

Mr. GORTON. I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2543

(Purpose: To ensure that the national defense science and engineering education initiatives covers persons traditionally underrepresented in the engineering and science progessions and includes authority for Department of Energy programs)

Mr. LEVIN. Mr. President, on behalf of Senators SIMON and BINGAMAN, I send an amendment to the desk.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for Mr. SIMON (for himself and Mr. BINGAMAN), proposes an amendment numbered 2543.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 179, between lines 3 and 4, insert the following:

"(d) In entering into education partnership agreements with public school systems under this section, each director of a defense laboratory shall give a priority to providing assistance to educational institutions serving women, members of minority groups, and other groups of individuals who traditionally are involved in the engineering and science professions in disproportionately low numbers.

On page 181, between lines 8 and 9, insert the following:

(c) DEPARTMENT OF ENERGY PROGRAMS.—The Secretary of Energy may establish programs and award grants for the purpose of enhancing the mathematics, science, and engineering education of students in elementary and secondary schools and institutions of higher education.

Mr. LEVIN. Mr. President, this amendment modifies section 854 of the act in two ways: It adds the requirement that educational partnerships with precollege public school systems given priority to populations underrepresented in science and engineering, and it grants the Secretary of Energy authority to establish programs and award grants to enhance science, mathematics, and engineering education at all levels, elementary through graduate.

Mr. GORTON. Mr. President, this is an important amendment with respect to science and mathematic education programs. We enthusiastically recommend its adoption.

Mr. LEVIN. We thank the Chair for this amendment. It is an important initiative.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2543) was agreed to.

Mr. LEVIN. I move to reconsider the vote.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2544

(Purpose: To require the Secretary of Defense to conduct a study to determine the effectiveness of the OH-58D helicopter for use in detecting drug smuggling across the southwest border of the United States)

Mr. GORTON. Mr. President, I send an amendment to the desk on behalf of Senator HATCH, and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for Mr. HATCH, proposes an amendment numbered 2544.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 212, between lines 20 and 21, insert the following new section:

SEC. 1103. STUDY OF UTILITY OF OH-58D HELICOPTER IN DETECTION OF CROSS-BORDER INTRUSIONS BY DRUG SMUGGLERS.

(a) STUDY REQUIRED.—The Secretary of Defense shall conduct a study on the feasibility and effectiveness of utilizing OH-58D Scout helicopters for detecting, monitoring, and conducting surveillance of the ground movements of drug smugglers along the southwest border of the United States. In carrying out such study, the Secretary shall consider in particular the following matters:

(1) The suitability of the OH-58D helicopter for performing the missions described in the first sentence.

(2) The feasibility of having personnel of the Army National Guard operate and maintain OH-58D helicopters when such personnel are not in Federal service.

(3) The desirability of having the Army pay for operation and maintenance expenses in connection with the OH-58D helicopters pursuant to a plan developed by the United States Customs Service or having the Secretary of Defense pay such expenses out of funds appropriated for National Guard counterdrug activities pursuant to a plan developed by the Governors of Southwestern States.

(4) The feasibility of coordinating National Guard activities and civilian law enforcement activities through the command, control and intelligence center of the United States Customs Service at Riverside, California.

(b) INTERAGENCY COORDINATION.—The Secretary shall carry out the study required by subsection (a) in consultation with the Commissioner of the United States Customs Service.

(c) SUBMISSION OF REPORT.—The Secretary shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report containing the result of the study required by subsection (a) not more than 180 days after the date of the enactment of this Act. The Secretary shall include in the report the conclusions of the Secretary based on the study together with such comments and recommendation as the Secretary considers appropriate.

Mr. HATCH. Mr. President, the amendment I am offering today requires the Secretary of Defense to conduct a study of the feasibility and effectiveness of using the OH-58D AHIP helicopter for detecting drug smuggling along the Southwest border.

Our ability to disrupt and deter air and sea drug trafficking operations has in part forced the drug cartels to resort to smuggling narcotics over land routes along our 2,000-mile border with Mexico. In many places, the border is poorly marked and the rugged terrain makes it difficult to patrol. In this environment, Federal, State, and local law enforcement agencies are attempting to suppress border intrusions by persons, vehicles, and aircraft. To date, these operations have yielded minimal success with the limitations resulting not from a lack of effort on the part of the agencies but from a shortage of manpower and capable equipment.

As the Army's premier scout helicopter, the OH-58D has the capability of becoming the long-range eyes for the civilian law enforcement community. Designed to detect enemy targets and relay that information to a command center, the OH-58D is ideally designed for flying drug detection and surveillance missions along the Southwest border. With its mast mounted sensor and enhanced technological design, the OH-58D can perform day and night operations and detect persons and vehicles at up to 6-10 miles and aircraft at distances up to 20-30 miles. Once a detection is made the data can be transmitted by data link to the Customs Service's Command, Control, Communications, and Intelligence [C-31] in California. This will allow the C-31 to get a real-time picture of what the OH-58D is seeing during a surveillance operation and be able to direct law enforcement assets to the location with an accuracy of 8 meters.

Mr. President, in undertaking this study, the Secretary will evaluate the effectiveness of the OH-58D in fulfilling this mission. In doing so, the study will look at the ability of the Army National Guard to operate and maintain the OH-58D. The National Guard has provided much needed assistance to the Customs Service at the ports-of-entry. I believe the Guard has a greater role to play, and my amendment will evaluate this potential. Moreover, within 6 months of enactment, my amendment requires the Secretary, after consultation with the Commissioner of the Customs Service, to issue a report to Congress on the findings, conclusions, and recommendations from the study. I am confident this study will confirm what many already know: the OH-58D will dramatically assist civilian law enforcement agencies in their effort to disrupt drug trafficking operations along our Southwest border.

While on the issue of drugs, I would like to speak on another matter of great importance.

During consideration of H.R. 4404, the dire emergency supplemental appropriations bill, the Senate passed by unanimous consent an amendment I offered to direct the President to transfer four AH-1J Cobras from the Marine Corps for use by the Colombian National Police in carrying out antidrug operations in Colombia. During conference with the House of Representatives the provision was dropped over a failure of the conferees to agree over a means to transfer these assets to Colombia. In dropping the amendment, the conferees stated, "the conferees are in general agreement with the purposes of the Senate amendment which provided for the lease of four helicopters to Colombia for its drug interdiction program." The conferees went on to "urge the President to use draw down authority to aid drug interdiction programs."

Subsequent to this, on May 24, 1990, I introduced S. 2695, the Anti-Drug Abuse Act of 1990, which among other things, contained authorizations for $40,000,000 for the procurement of additional AH-1W Cobra helicopters for the Marine Corps, and a directive that a similar number of Cobras be transferred by the Secretary of Defense to the Colombian Government to be used to support antinarcotic operations in that country.

As both distinguished managers of this bill know, the Colombians, particularly the National Police, are in desperate need of this aircraft and other assistance to bolster their courageous efforts to uphold the rule of law and democracy in Colombia. Moreover, this assistance will help protect the American personnel and equipment already engaged in the struggle to eliminate the cocaine business from Colombia.

In a letter supporting this proposal, Colombian Ambassador Victor Mosquera Chaux wrote:

> Your proposal, is very timely. The drug trafficking organizations are continuing to wage a campaign of terror and violence against Colombian society, and the government must press harder in its attempts to dismantle these groups. The Cobra gunships would provide much needed firepower to our transport helicopters when flying missions into dangerous territory. Unarmed transport helicopters can become easy targets for automatic weapon or missile fire and have a higher inherent risk of loss of equipment and human lives. The Cobra escort helicopters would decrease the dangers involved in drug interdiction operations conducted by our security forces.

Mr. President, it was my intention to offer an amendment to the Department of Defense authorization bill to authorize the procurement of additional Cobras, thus allowing the Marine Corps to declare four older J-model Cobras in the Reserve as surplus and turn them over to the Colombian National Police for antinarcotic operations. However, it is my understanding that the bill before us contains additional authorizations for the procurement of AH-1W Cobras for the Marine Corps Reserves and authority for the release of fiscal 1990 procurement funds for six additional Cobras. I am delighted to see that the committee has made this recommendation to the Senate. Moreover, it is my understanding that staff discussions with the Marine Corps have indicated that should additional Cobras be made available to the Reserves, they would be willing to declare a like number of J-model Cobras as excess to the needs of the Reserves and make them available for other purposes, including transfer to the Colombians to help them fight their drug war.

I cannot emphasize enough how important I believe it is that we provide this additional helicopter support to the Government of Colombia who is in the frontlines of the battle against the drug trafficking cartels. I believe that the J-model Cobra, with the proper

training, will assist their efforts to accomplish that objective in Colombia.

Mr. President, if the Senate position regarding AH-1W Cobras prevails in conference with the House in whole or in part, I will work to ensure that Senate conferees include language in the statement of the managers that would direct the Secretary of Defense to transfer a sufficient number of J-model Cobra helicopters to the Colombian National Police to help them in their antidrug efforts. Moreover, I pledge to work with all Members of Congress and the administration to make sure that these important military assets would be put to work in the antidrug effort in Colombia.

Mr. GORTON. Mr. President, this amendment requires the Secretary of Defense to conduct a study of the feasibility and effectiveness of using the OH-58D helicopter for detecting drug smuggling along the Southwest border.

Mr. LEVIN. Mr. President, we have cleared this amendment on this side. There is no objection

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2544) was agreed to.

Mr. GORTON. I move to reconsider the vote.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2545

(Purpose: To provide funds for the removal of certain obstructions at the Warfield Air National Guard Base, Martin State Airport, Maryland)

Mr. LEVIN. Mr. President, on behalf of Senator MIKULSKI I send an amendment to the desk.

The PRESIDING OFFICER. The pending amendment is set aside. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan [Mr. LEVIN], for Ms. MIKULSKI, proposes an amendment numbered 2545.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 302, line 25, strike out "$124,530,000" and insert in lieu thereof "$131,830,000".

Ms. MIKULSKI. Mr. President, this amendment provides for $3.7 million to be used to remove utility wires that are preventing full use of the runway at Martin State Air Field, home base of the Maryland Air National Guard.

Extending the runway at Martin will allow the Maryland Guard to handle any necessary mission through the 1990's and will provide more flexibility to the Air National Guard in its planning. In addition, Martin is often called upon to accept overflow traffic from Andrews AFB and needs the extra runway footage to accommodate certain aircraft.

Mr. LEVIN. Mr. President, this amendment provides for $3.7 million to be used to remove utility wires that are preventing full use of the runway at Martin State Airport, home base of the Maryland Air National Guard.

Mr. GORTON. Mr. President, this Milcon project has been cleared on this side.

The PRESIDING OFFICER. Is there further discussion? If not, the question is on agreeing to the amendment.

The amendment (No. 2545) was agreed to.

Mr. LEVIN. I move to reconsider the vote.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2546

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Washington [Mr. GORTON], for Mr. DOLE, for himself, Mr. WARNER, and Mr. LUGAR, proposes an amendment numbered 2546.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

FINDINGS.—The Senate makes the following findings:

(1) The United States and the Soviet Union are engaged in the Strategic Arms Reduction Talks (START).

(2) In the Joint Statement on the Treaty on Strategic Offensive Arms signed in June 1990, the two sides reaffirmed their determination to have the Treaty completed and ready for signature by the end of this year.

(3) Under the provisions of a START Treaty, both sides will carry out significant reductions in strategic offensive arms.

(4) In the Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability, the United States and the Soviet Union agreed to pursue new talks on strategic offensive arms, and on the relationship between strategic offensive and defensive arms.

(5) The objectives of these negotiations will be to reduce further the risk of outbreak of war, particularly nuclear war, and to ensure strategic stability, transparency and predictability through further stabilizing reductions in the strategic arsenals of both countries.

(6) The President's effort to negotiate such agreements is dependent upon the maintenance of a vigorous research and development and modernization program as required for a prudent defense posture.

(7) The Soviet Union has maintained a robust strategic modernization program throughout the course of the START negotiations which continues today.

It is the sense of the Senate that—

(1) The Senate fully supports United States efforts to enhance strategic stability.

(2) The United States should pursue stabilizing strategic arms reduction agreements while maintaining a vigorous research and development and modernization program for United States strategic forces.

Mr. GORTON. Mr. President, the amendment is acceptable to this side, and we urge its adoption.

Mr. LEVIN. Mr. President, the amendment has been cleared on this side. There is no objection.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 2546) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KERRY. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending amendment is a Nunn second-degree amendment to the Warner first-degree amendment.

Mr. KERRY. Mr. President, I ask unanimous consent that the amendment be temporarily set-aside for the consideration of an amendment according to a unanimous-consent agreement.

Mr. NUNN. Mr. President, will the Senator from Massachusetts agree to a time?

Mr. KERRY. If the Senator could reserve 20 minutes with the probability that I will give some of that back.

Mr. NUNN. Twenty minutes on each side?

Mr. KERRY. That would be all right.

Mr. NUNN. Mr. President, I ask unanimous consent that there be a time agreement on this amendment with 20 minutes one each side, a total of 40 minutes with all amendments to the Kerry amendment being required to be germane and relevant.

Mr. WALLOP. Mr. President, reserving the right to object, I shall not, I would like to have a short quorum call of 1 or 2 minutes.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KERRY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERRY. Mr. President, as a matter of inquiry, I believe we are prepared——

The PRESIDING OFFICER. If the Senator will withhold, may we have order.

Mr. KERRY. It is my understanding that the distinguished manager would like to try to keep this to 30 minutes. I would certainly be amenable to try to do that. Is that agreeable?

Mr. NUNN. That would be very agreeable. I appreciate the Senator making that suggestion.

Mr. President, I ask unanimous consent that on the Kerry amendment which is concerning Asat's there be a time limit of 30 minutes to be equally divided with no second-degree amendments, and with a vote on the amendment or pertaining to the amendment to occur at the conclusion of the allocated time.

The PRESIDING OFFICER. Is there objection?

Mr. KERRY. Mr. President, I understand that will be a vote up or down on the amendment?

Mr. NUNN. I do not know. I think there has been a request to move to table the amendment. I do not mind. I understand the minority wants the right to table.

The PRESIDING OFFICER. Is there objection? Without objection, the unanimous-consent request is agreed to.

AMENDMENT NO. 2547

(Purpose: To limit to $77,000,000 the amount of 1991 fiscal year funds that may be obligated for the kinetic energy Asat program)

Mr. KERRY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The pending amendment is set-aside.

The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts [Mr. KERRY] for himself, Mr. SIMON, and Mr. BUMPERS, proposes an amendment numbered 2547.

Mr. KERRY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, between lines 14 and 15, insert the following new section:

SEC. 225. LIMITATION ON FUNDS FOR THE KINETIC ENERGY ASAT PROGRAM.

Of the amounts appropriated pursuant to section 201, not more than $77,000,000 may be obligated for research, development, test, and evaluation in connection with the kinetic energy anti-satellite (ASAT) program.

Mr. KERRY. Mr. President, I send this amendment to the desk on behalf of myself, Senator BUMPERS, and the distinguished Chair.

This is a different amendment from the amendment on antisatellite weapons that we have debated on the floor of the Senate in previous years. In previous years we have discussed a moratorium on testing. This has nothing to do with moratorium on testing. It has nothing to do with the moratorium. It is not a restraint on the satellite program per se. It is a restraint on the speed with which the development and research program is currently being undertaken.

Mr. President, last year we spent some $73 million for the development of an Asat system, antisatellite weapons system. This year the mark in the committee bill at this moment is $208 million but the distinguished chairman has indicated that he is in agreement that $49 million of that is in excess at this point because the Army has reduced from two contractors to one contractor.

So there is already $49 million that you could draw back from the $208 million. My amendment would bring the spending for the development of the antisatellite weapons system back to last year's level plus inflation.

The reason for that ought to be very very clear to every Member of the Senate. We are cutting countless weapons systems. We have cut Milstar. We have cut in the course of the committee proceedings countless systems which we funded over the years. This is a research program. It is a development program. It is a development program in an area where clearly the Soviet Union we know has not tested in 8 years, and has a rudimentary system. It is evident from the CIA briefings and the private briefings that this is not something that at this moment in time given developments in Europe and the Soviet Union remains a frontline priority of the country.

I am not suggesting that this money be taken out of the defense budget. I am not suggesting that the money be transferred for another specific purpose within the budget. I am merely suggesting that this money be restrained in the rate of spending for this program.

This is the largest single increase in a research and development program in the entire military budget; 181 percent.

Mr. President, there is simply no rationale for that. The simple reality is that if you look at the deputy program manager's own statements you could even question the rationale for the system in the first place.

But I am not suggesting that we should not continue to research. The distinguished Senator from Wyoming will no doubt take the floor and point out that the Soviet Union has conducted research in other areas. I acknowledge that. That is not in contention here.

Yes, they have conducted that research. But the question is do we need in the face of changes in the Soviet Union and in the face of what has happened in Europe to prepare for a war-fighting strategy against satellites of the Soviet Union in a headlong rush to deployment at this particular moment in time? I do believe we ought to research adequately so that we prevent Soviet breakout in this field, and $77 million does that. I believe we ought to continue the research program in an adequate fashion to maintain the possibilities of the future, and $77 million does that.

But there are countless programs in the defense budget today that are not only not getting last year's budget, let alone plus inflation, but they are being cut in real terms.

Mr. President, I suggest respectfully that for those who have been clamoring about the deficit, clamoring about the budget, and raising a hue and cry about a budget from the defense markup that does not even meet the budget mark, this is an opportunity to restrain spending, and in a sensible and responsible way.

I am not even going to go into the issues of the realities of this program which I think are legitimate and ought to cause some people concern about this rate of expenditure. When you have the deputy program manager himself saying:

"When you examine Asat and wargame it, you reach a point where you say, well, if we have started to take out each other's satellites to this degree, nukes are flying. Your sensors and their sensors get nuked and it breaks down."

What they are saying is, quoting the former Asat Chief, John Petroski, he said "it is OK to the level of theater nuclear war."

Well, Mr. President, where in the world at this particular moment is there such a threat requiring a 181-percent increase because of the potential of a theater nuclear war? It is unrealistic for us to be spending that kind of money.

We have even taken our bomber force off the 24-hour alert for the first time in 25 years. It seems to me that at this particular moment, when we are about to see West Germany spending money to subsidize Soviet troops staying in East Germany for a period of time, it is extraordinary to me that we are going to be spending money to supposedly ward off an increase in threat from the very people the West Germans are supporting, when we are supporting the West Germans with our own troop forces in West Germany.

It seems to me that if we limited the funding, then this money could go to sensible programs. We can put it into the high altitude reconnaissance. We can put it into increasing funding for efforts to boost responsive launch capabilities, to research for the DARPA

satellite program for rapid replenishment of U.S. satellites.

It is extraordinary that we are cutting money from this budget from the building of our own satellites, which are the principal form of command and control for our country, and we are going to rush to judgment on a system to shoot down Soviet satellites when the Soviet threat is diminished beyond anything it has been in the last 40 years.

I reserve the remainder of my time, and I, at this point, yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. EXON. How much time is remaining on this side, Mr. President?

The PRESIDING OFFICER (Mr. SARBANES). Fifteen minutes.

Mr. EXON. I yield myself 5 minutes.

I have listened with great interest to the comments made by my friend and colleague from Massachusetts. I guess what I do not quite understand is where did the figure come from that he is suggesting that would be incorporated in the amendment that has been offered.

Apparently, the figure is last year's Asat funding level plus inflation; may I ask the Senator if that is correct?

Mr. KERRY. The Senator from Nebraska is correct. Last year's figure, according to the Army plan, was 72.9.

Mr. EXON. I thank the Senator.

With that, we have established, basically, a concern that we have in the leadership in the Armed Services Committee. It is simply, Mr. President, that the funding level in the amendment is arbitrary and has no internal logic as to, if we address it from a programmatic sense. It is certainly higher than the level that would terminate the Asat development effort, but much lower than the level required to keep the Asat effort on track toward a meaningful objective.

The committee will be addressing Asat in conference and I simply suggest that for the sake of maintaining a reasonable bargaining position with the House of Representatives, especially in view of the other strategic issues in which there is wide differences among the position taken by the House and the position taken by the Senate, we will certainly need all of the bargaining position that we can have.

Congress has repeatedly urged the current and previous administrations to pursue some sort of arms control initiative in the Asat area. Should the administration seek to negotiate some partial restrictions in the area of Asat, in START II, the United States will lead a forward leaning Asat development program as leverage for these talks.

At the present time, Mr. President, I point out that, as of right now, the Senate Armed Services Committee has a mark of $158.4 million. The House of Representatives has a mark of $100 million. If the amendment adopted by the Senator from Massachusetts would be accepted by the Senate, it would be even below the House mark, at the mark offered by the Senator from Massachusetts of $77 million.

Obviously, with that kind of a mark, we would be in not only a no-leverage position, but a no-win position, as we attempt to work out the compromises that are obviously going to have to be necessary in the very tenuous conference that we have upcoming with the House of Representatives on this matter.

I certainly suggest that the Armed Services Committee, before the debate is over, take a look at the funding level. But I simply say that I hope that the Senator's amendment is turned down for the reason I have outlined.

Mr. WALLOP. Will the Senator yield to me?

Mr. EXON. How much time would the Senator like to have?

Mr. WALLOP. About 2, 3 minutes. With the subcommittee chairman's permission, I would like to use as much of the remainder of that time as is necessary.

The PRESIDING OFFICER. The Senator has 10 minutes 20 second remaining.

Mr. EXON. I will yield 6 minutes to the Senator from Wyoming.

Mr. WALLOP. Mr. President, I strenuously resist any congressional limits on Asat testing, or a congressional attempt, as we have seen with so many other promising technologies, to keep bottled up forever in the laboratory Asat technology which is of so much potential value to our country.

Furthermore, I oppose any language that construes this funding reduction as a congressional condemnation of or criticism of the Asat Program, a program vitally needed to protect U.S. interests in space. This reduction is possible without damage to the program because of available savings costs already identified by the committee.

With that, I would like to read from two letters, one from the Secretary of Defense, signed by the Under Secretary for Acquisitions, Mr. Atwood:

I believe that the U.S. ASAT capabilities are critical to our ability to deter the Soviets from war and from exploiting their present ASAT space-based targeting capabilities. This report confirms the vital importance to national security of devloping U.S. ASTA capabilities.

And from the National Security Director, Brent Scowcroft, the following:

As I noted in a letter to Senator McClure last year "it is essential for the U.S. to develop an operational ASAT system to deter the Soviets from exploiting their space control and space-based targeting capabilities."

Indeed, the Soviet ability to target our forces from space alone constitutes a compelling rationale for deploying a U.S. ASAT system.

The ASAT program remains a top Administration priority, and I urge Congress to act favorably on the President's budget request.

I ask unanimous consent that those letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, DC, February 13, 1990.

Hon. SAM NUNN,
Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This letter forwards the Anti-Satellite (ASAT) Report to Congress, as requested in Senate Report 101-132 (Department of Defense Appropriation Bill, 1990) and in Senate Report 101-41 (Dire Emergency Supplemental Appropriations and Transfers, Urgent Supplementals, and Correcting Enrollment Errors Bill, 1989).

This report provides detailed information on the cost-effectiveness, military-effectiveness, and arms control implications of various kinetic energy (KE) and directed energy (DE) ASAT weapons. I believe that U.S. ASAT capabilities are critical to our ability to deter the Soviets from war and from exploiting their present ASAT and space-based targeting capabilities. This report confirms the vital importance to national security of developing U.S. ASAT capabilities. The policy sections have been reviewed and approved by other Executive branch agencies, including the National Security Council and State Department.

I hope this report will prove useful to your Committee and assure you of the Department's continued willingness to provide information on our ASAT effort for the consideration of Congress. An unclassified version of the report will be available at a later date.

Sincerely,

D.J. ATWOOD.

THE WHITE HOUSE,
Washington, June 22, 1990.

Hon. WILLIAM L. DICKINSON,
House of Representatives, Washington, DC.

DEAR CONGRESSMAN DICKINSON: The press report that the White House has reduced its commitment to the ASAT program is untrue. As I noted in a letter to Senator McClure last year "it is essential for the U.S. to develop an operational ASAT system to deter the Soviets from exploiting their space control and space-based targeting capabilities."

Indeed, the Soviet ability to target our forces from space alone constitutes a compelling rationale for deploying a U.S. ASAT system.

The ASAT program remains a top Administration priority and I urge the Congress to act favorably on the President's budget request.

Sincerely,

BRENT SCOWCROFT.

Mr. President, space is not merely one vital factor of U.S. security Space control, or at the very least assured space access and unrestricted freedom to operate, are indistinguishable from our long-term national security and prosperity, for the following reasons.

First, space is the ultimate strategic high ground, the terrain from which conflicts of the future will be decided.

We are embarking on a new revolution in military affairs, an era when traditional concepts and means of war fighting are yielding to the dominance of new high technologies and the importance of military assets in space.

Already our terrestrial forces, whether Army, Navy, or Air Force, rely heavily upon space for surveillance and intelligence, navigation, command, control, and communications. In many ways the crucial military leverage is shifting to space in such a way that space control may determine the course of events on the ground—without a shot ever being fired by terrestrial forces. These, in effect, are means by which we can keep the peace through deterrence.

The Soviets clearly understand the strategic dominance of space, and have a vigorous military space doctrine coupled to a formidable operational capability. Their low Earth orbit platforms pose a serious threat to United States and allied forces on the Earth's surface as well as in space. They can identify the location of U.S. naval units at sea, and provide effective and timely information to Soviet commanders on the status and location of U.S. forces worldwide.

In addition to extensive space platforms for surveillance, command, and control, the U.S.S.R. has had for more than a decade the world's only operational Asat system, always dismissed as incompetent. I suggest to you it is a great deal more competent than the nonexistent one that the U.S. possesses today, since as you know, the United States has no operational Asat. And they have been an extensive launch infrastructure and launch capability far exceeding that of the United States.

The Soviets may well believe that a military monopoly in space is the one thing that could salvage the dramatic unraveling of the Soviet empire. Certainly, they believe that denying space dominance to us assures their continued presence as a superpower on the world's stage.

If Gorbachev or some resurgent Stalinist leader should decide reform has gone far enough, or if the U.S.S.R. acquires a sufficient transfusion of trade, credits, hard currency, and western technology to resuscitate their dying empire; then a Soviet monopoly in space could reverse the supposedly irreversible process.

I can envision a future scenario in which the Soviets could checkmate us from the ultimate high ground, in keeping with their doctrine of victory without war. With a monopoly of military spacepower they would be able to dictate terms, to coerce us peacefully into submission. And if they can control the ultimate high ground of space, then it matters little who rules Poland or East Germany—their dominance and leverage would be global, and their diplomacy would reflect it. Control of space would enable them to engage in a new type of strategic intimidation, with the possibility of a more subtle but more powerful form of coercion than is possible even with traditional nuclear strike forces.

Conversely, to deny the Soviets the ability to blackmail us from space is one way to secure the victory which has begun, and ensure the one-time "evil empire" changes irrevocably into a nonthreatening confederation of democratic states or independent nations. And a key part of our ability to do so will be an operational Asat and substantial, secure presence in orbit.

This is why congressional attempts to limit testing or undermine Asat and other critical military space programs—including SDI—are so potentially damaging to the long-term security of America and the West.

Commitment to space will also give us inexpensive, reliable space lift, and free us from such dependence on the exorbitantly expensive and unreliable space shuttle.

Space is the great high seas of the future. It is the new frontier, with unique properties that will make possible forms of human endeavor generating wealth and benefits to mankind that we can now only begin to imagine, and make the United States truly competitive with the rising economic centers of Europe and the Pacific.

In the 16th and 17th centuries, the nations which learned to exploit the new frontier of the high seas prospered. Spain, Holland, and England in particular became great nations because they were sea-faring nations. In the same way the great nations of the future will be the space-faring nations. Consequently, it makes no more sense to kill off or restrict Asat and similar space programs than it does to mothball the U.S. Navy and give up assured access to the world's oceans.

Space will become increasingly essential for communications, data handling, and transportation. It will generate new forms of products manufactured in near-zero gravity, new minerals mined on the surface of the Moon and asteroids; even an inexhaustible source of energy if solar-power satellites prove feasible—something to keep in mind as current events in the Persian Gulf dramatize the vulnerability of our foreign oil supply. In any case, the list of possible civil and economic benefits to be gained in space is endless. But if the United States cannot protect both civil and military assets with a space navy, no business enterprise is going to risk the enormous investments required to get into space.

A number of my colleagues appear to see space as somehow sacrosanct, a realm which must remain unsullied by mundane human endeavors—and especially any endeavor with military applications. Mr. President, this attitude is naive at best, and dangerous to our future at worst. As long as there is conflict between nations and competing interests, it is inevitable that confrontation—either implicit or actual—must spill upward into space. It is naive and dangerous to believe that unilateral restrictions on our part will somehow preserve space inviolate from the self-interested actions of other nations.

The high ground of space is where the United States may renew its strength, and find new national purpose. Mankind benefited immeasurably from the exploration of the New World. Americans benefited immeasurably from the settlement of the western frontier. The same benefits are available in space if we do not turn our backs on them through unilateral, ill-considered decisions.

I again urge the Senate not to fall into the comfortable thought that somehow or other we are advancing peace by denying ourselves capability which the Soviets presently have and we could achieve.

Mr. President, we reserve the remainder of our time.

The PRESIDING OFFICER. Who yields time?

Mr. KERRY. Mr. President, I yield 2 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. SIMON. Mr. President, I support this amendment, although frankly I support one that went much farther than this. If a man from Mars came down here right now and looked at our budget he would assume, seeing we are spending $300 billion on defense and $22 billion for education, the assumption would be we face a massive military threat and our schools are in great shape. We know to the contrary.

If there is anything that is destabilizing in terms of the arms threat, it is the Asat weapon, because the reality is we can monitor each other through these satellite weapons in terms of any kind of arms control agreements and if you put antisatellite weapons out there we take away the ability to monitor any arms control agreements, and because our weapons are, frankly, more spohisticated than the Soviet weapons, we end up being the loser if we get into this race.

The Senator from Massachusetts has been, frankly, very, very generous to the defense establishment by letting it continue at the present rate plus inflation. But without this amendment we are going head on an antisatellite weapon that is destabilizing and we are going to increase the spending 181 percent. That just does not make sense, Mr. President, and I hope there will be enough people around here—though I confess I am

not optimistic—I hope there will be enough people around here to support the amendment of the Senator from Massachusetts.

The PRESIDING OFFICER. Who yields time?

Mr. KERRY. Mr. President, I yield 4 minutes to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 4 minutes.

Mr. BUMPERS. Mr. President, the thing that is discouraging to me about this debate is not just on the Asat, the thing that is discouraging to me is the whole process of arms control and ending the cold war.

If you go to Vienna or Geneva you will find that the Soviets are very forthcoming and have agreed to virtually everything we ever asked for. Just yesterday the Soviet Uniion announced that they were discontinuing the manufacturing of SS-24's, going to cut back about 20 from the number they originally intended to deploy. They condemned Iraq's invasion of Kuwait before we did. They announced they were not going to sell the Iraqis another single tank. And today you saw a spirit of cooperation between Secretary Baker and Foreign Minister Shevardnadze that 2 years ago would have sent chills down the spine of people to think that we were cooperating as closely as that on something as ominous as the Iraqi invasion of Kuwait.

And the Soviets had a proposal on the table almost "since the memory of man runneth not" to ban Asat's. We have not had any of that.

You ask yourself at the belt buckle level, common sense: Are we better off with the United States and the Soviet Union both having sophisticated Asat systems or would we be better off with an absolute ban on both sides of Asat's? That is a simple question, is it not?

What happens if we have a system and all of a sudden a couple of our satellites disappear? Is the threshold for nuclear war raised or lowered?

That letter from Secretary Cheney is absolutely staggering to say that our antisatellite capability is critical, critical and essential, to deter the Soviets from war. Name one system we have ever built that they did not respond to.

We develop a bomb, they develop a bomb; we go intercontinental, they go intercontinental; we develop a MIRV, they develop a MIRV; we put them on submarines, they put them on submarines; we put up satellites, they put up satellites. And where has it gotten us?

And now that we have an opportunity for some sane arms control proposals that would allow both countries to provide housing, medical care, education, and health care for their people, we just simply cannot handle it.

Mr. President, it is a curious thing. Just 6 years ago today, August 3, 1984, from Current News, this is the local defense paper:

> Senior military officers, countering the view of some civilian leaders, have expressed reservations about the need for a low-altitude antisatellite weapon, according to administration sources.
>
> Important segments of the Navy, in particular, are said to believe that ships at sea can evade detection by Soviet satellites, making it unnecessary to shoot them down.

There it is, 6 years ago.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KERRY. M. President, how much time is remaining?

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. KERRY. Mr. President, I reserve the remainder of my time.

Mr. President, will the Senator from Wyoming, or whoever is controlling time, agree to an additional 2 minutes on each side?

Mr. EXON. I have no objection to agreeing to 2 additional minutes.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request that each side be given an additional 2 minutes for debate? Hearing no objection, it is so ordered.

Mr. KERRY. Mr. President, I yield an additional minute to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 1 minute.

Mr. BUMPERS. Just to close out, make no mistake about it, we are not talking about beanbags. There is still $100 million in here for continuing research on antisatellite technology. And here, from "Inside the Pentagon," February 17, 1989, listen to this:

> A classified briefing by the Central Intelligence Agency [CIA] to Members of Congress on the Soviet's capability in antisatellite [Asat] weapons is showing the Soviets have negligible antisatellite weapons capability and have made little if any progress toward an Asat since 1985.

Now, why do we want to spend $200 million to keep up with somebody who is not even in the race, who is not proposing to get into the race; has not tested one since 1982, but who wants to embark on a program of a very sophisticated system—and we are not saying you cannot do it; we are simply saying let us save $100 million and spend it maybe to educate our children.

I thank the Senator for yielding.

Mr. KERRY. I reserve the remainder of my time.

Mr. EXON. I yield 1 minute to the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 1 minute.

Mr. WALLOP. Mr. President, it is always so easy to become glib in these dialogs and arguments. What the Senator read was only partly true. His definition of an Asat was a machine which would go up and destroy another satellite. But this idea somehow or another that the Soviets have not been testing Asat's is absolute rubbish. They have tested means of blinding those satellites that see, deafening those that hear, and silencing those that communicate.

Those are Asat weapons, and the Soviets work on them all the time. They have operated them from space platforms, and they have operated them by rote. There is no means by which anyone, the Senator from Arkansas, the Senator from Massachusetts, or anyone else can determine whether those things are going on and can verify that they do not exist.

Our livelihood as a spacefaring Nation depends on our ability in space. For us to naively pretend that the day when the lion will lie down with the lamb has dawned on us, is to at least say if we are going to be one or the other, it would be preferable for America to be the lion and not the lamb.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. EXON. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. EXON. Mr. President, I hope that, notwithstanding the arguments that we have had here today, we understand that the Asat Program is an integral part of our overall deterrent. The Senate should understand, as I tried to outline a few moments ago, that has not been responded to by those who want to make the cuts down to the mark suggested by the Senator from Massachusetts, that we feel it is absolutely necessary to go into a conference with a mark higher, somewhat higher than what he has recommended.

Certainly, the Asat Program is a critical part of our deterrent. I do not think there is any question but what we are going to be taking a very hard look at this.

With the 2 minutes that I have remaining, I would like to yield to the chairman of the Armed Services Committee with whom I have worked for a long, long time on this important matter. I would advise the chairman of the committee that we have approximately 23 minutes remaining on our side of the aisle. I know that he has been intricately involved in this program for a long, long time.

What I have been recommending is to hold with the position of the committee on this, and allow us to be in a position to bargain with the House on this and several other matters.

Mr. NUNN. Mr. President, I oppose the amendment offered by the junior Senator from Massachusetts. The Senator has accurately noted that due to a restructuring of the Asat develop-

ment program—which was not announced until the day after the armed services committee completed our markup—the full $207.8 million requested by the administration is no longer required.

However, the Senator's amendment would reduce the Asat level in fiscal 1991 to $77 million, and that is $80 billion below the Army's funding requirement, which has now been adjusted.

With regard to Asat policy, however, I do share some of the Senator's concerns. I have long thought the United States should have a forward-leaning posture in Asat arms control area. The United States has a greater stake than the Soviets in the survivability of space-based C3I assets, and thus has more to lose in an Asat arms race.

The development of U.S. Asat capability could encourage renewed efforts by the Soviets to require more modern Asat interceptors.

But I do believe that we are going to have additional effort in that respect—I hope we will—and by this administration. I do not think it is too late to do something about high altitude Asat's. I think that that would be in our interest. But it remains a matter of negotiation.

Mr. President, I also note the House Armed Services committee has reduced the Asat Program to a level in fiscal year 1991 of $100 million, and we will thus address the Asat issue again in conference.

We believe that it is really important to go forward with our Asat Program, while at the same time some of us will continue to push the administration to be more forward-leaning in the Asat arms control area.

I oppose the amendment.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Massachusetts, who has 2 minutes 52 seconds.

Mr. KERRY. Mr. President, I thank the distinguished Senator from Georgia for his comments. While he does oppose this amendment, I appreciated the concerns that he expressed.

Mr. President, the distinguished Senator from Wyoming said: Do not deny us the capability to proceed forward. There is nothing in my amendment that denies the capability for proceeding forward. There is nothing in this amendment that stops the Asat Program.

The question ought to be asked, why is the Asat Program different from so many others which have received cuts? And the question ought to be asked, why is it that the Asat Program could not tighten its belt a little bit and be redesignated in a way that does not require $120 million for the prime contractor next year?

There is only one reason. The distinguished Senator from Nebraska said it is not enough money to allow it to meet its objectives. Well, that is the objectives as defined with $120 million for the prime contractor. Why cannot the prime contractor get $80 million next year? Why can we not slow it down?

We have just been through that debate on the B-2 bomber. There is no military strategic rationale for rushing this program, and there is nothing in this amendment that denies us the capability or restricts us from developing this capacity. It merely suggests that we ought to be as rational and as hardnosed with respect to this program as we have been to every other program.

I thank the distinguished Senator from Arkansas for raising the issues about strategy that he raised, because they are very significant in the context of deciding how much money we ought to spend how rapidly.

I respectfully suggest, Mr. President, the Senator from Wyoming has given us the very reason why we should not proceed so rapidly. He said himself the satellites are critical to surveillance; they are critical to intelligence, and they are critical to command and control.

I would respectfully suggest that if we move too rapidly in this area, those very concerns—intelligence, command and control, and surveillance—will be the ones that will be threatened in the end.

Today they are not. So I respectfully suggest to my colleagues, if we are going to restrain the spending in every other area, we ought to be prepared to do it in this one where there is no rationale to proceed forward.

Mr. HEFLIN. Mr. President, I rise in strong opposition to the amendment offered by Senator KERRY. The Department of Defense has called the lack of an Asat capability the most vulnerable point in U.S. defenses. On the other hand, the Soviet Union does have an operational Asat Program and have had one for over 15 years.

Proponents of the amendment have stated that the Asat Program is not needed because of the reduced Soviet threat. Mr. President, the Soviets have not reduced their nuclear arsenal and have not abandoned their co-orbital Asat system. To fail to develop our own Asat capability would only perpetuate the destabilizing position we now find ourselves in.

Unfortunately, this unbalanced situation can not be rectified by an arms control agreement. Compliance with an Asat arms control agreement would be extremely difficult if not impossible to verify. The Soviets have stated that there is no way to verify such an agreement. There are simply too many types of systems which will accomplish the Asat mission.

In the past, some Senators have expressed concern about the possibility of violating the United States-Soviet moratorium on testing of Asat systems. Mr. President, this not the case now. First, the testing moratorium agreement has expired. Second, the U.S. Asat Program would not begin full scale testing until 1994. During the next few years, testing would be at the component level, which would be in compliance with the old moratorium if it were still in effect.

It is true that the Soviets have not actually launched and tested their Asat system in a fullup scenario for a number of years. They do, however, routinely conduct Asat missile crew drills so that they will be ready to use the system. Mr. President, the last such drill and simulated firing occurred just last year. They also continue to test the individual components of this system. For example, over the past few years, the booster motor has been tested several times. Some may ask whether, in a tight fiscal environment, this is the best use of our defense dollar. Mr. President, the Asat system is not like the Advanced Tactical Fighter program or the B-2 bomber which gives us defensive capabilities far greater than any other nation. The Asat program merely brings our defenses to the same level as the Soviets and insures the survivability and effectiveness of our existing forces.

I, therefore, urge my fellow Senators to vote against this amendment.

Thank you, Mr. President.

Mr. KOHL. Mr. President, I rise today in support of the amendment offered by my colleague, Senator KERRY, to reduce the Army's kinetic energy Asat Program request from $208 million to $74 million.

I am disturbed about the strategic implications that the Asat Program has for space weaponry. The committee bill and the administration are requesting an increase of 181 percent for the Army rocket Asat, a kinetic energy antisatellite weapon. The purpose of this request, and of the Asat Program itself, is to gain total and complete military control over the Earth's space environment.

Now if that goal is viewed in pure military terms—in isolation from political realities on Earth—there is no question that complete control of space would produce a significant military advantage. In a global conflict, the ability to destroy an enemy's satellites, while simultaneously having unimpeded command, control and communications capabilities in space for one's own tactical and strategic forces, would place any enemy in an untenable position. It is understandable why military strategists would pursue this goal.

But, Mr. President, I think we need to reconsider this course we are pursuing. To begin with, of course, the changing nature of our relationship with the Soviet Union has made it pos-

sible for us to cut back on a number of nuclear systems: the B–2 has been reduced, the MX road mobile has been delayed, restraints on submarines have been enacted, Milstar has been canceled—the list goes on. I'm not sure why we should expand Asat spending when we are constricting spending on other strategic systems because we recognize a reduced Soviet threat.

But even if that threat was to increase, I don't believe that military superiority is a concept which makes sense in terms of strategic nuclear systems. We all recall Henry Kissinger's almost tortured confession that nuclear superiority had no meaning when even the weaker nuclear power had the power to destroy life as we know it. And we remember that it was in the Nixon-Ford administrations that we began to recognize that our national self-interest was best served if we settled for equivalence rather than superiority. Expanding our Asat capabilities as the administration requests would upset the balance that now exists and inevitably drive the arms race into space just as we begin to control it here on Earth.

Now, some will say that the Soviet Union already has an Asat superiority and that the only way to compete with that threat is to build our own, and then—from a position of equal power—negotiate an elimination of them. I might be persuaded to accept that logic, Mr. President, if I thought we needed to improve our system before we could negotiate down. But that just isn't the case with Asat's.

To begin with, many experts dispute the actual level of Soviet Asat capabilities. And after all the testimony we have received on this subject, one conclusion emerges very clearly: no matter how effective the Soviet coorbital Asat might be, it poses no threat to our geosynchronous orbit satellites which are responsible for early warning, nuclear-attack assessment, and military communications. In addition, Soviet ability in laser Asat's remains questionable at best—the one facility our intelligence claimed was definitely a laser Asat facility turned out to have no such capability when it was visited by a delegation of U.S. Congressmen and scientists. They haven't tested their Asat system for 8 years and I don't think we are facing a threat in any meaningful sense from what they had or have.

The point, Mr. President, is that we don't need to spend hundreds of millions of dollars to attain parity so that we can begin to negotiate down. We have enough parity—and enough power—to begin serious negotiations to ban Asat's now. Under current conditions, with neither side having a true Asat capability, this approach would save us money while still protecting our military interests.

While we don't need to spend millions on Asat's, we should spend additional funds on research in promising verification technologies. With proper research and careful negotiating, the difficulties associated with verfiying a ban on Asat's could be overcome. But, on this point, I would simply suggest that verification isn't what is preventing Asat negotiations; it is the administration's attitude which is preventing real progress from being made in this area.

Asat's are a destabilizing weapon that ought to be controlled. If an enemy depends on satellites for its warfighting capability, a threat to those satellites is a vital threat to that Nation's security. That means that if our research succeeds and we develop a functioning Asat, the Soviet Union will need to have its finger that much closer to the nuclear trigger. Use of an Asat against an enemy in a tactical conflict could also provoke a dangerous escalation into nuclear war, as attacking an enemy's satellites is an assault on its nuclear fighting capability.

Mr. President, I believe we need to rethink our military strategy in space. I urge my colleagues to support this amendment, and no matter how this amendment is finally disposed, I hope the current momentum on arms control agreements will soon carry over into the Asat realm.

The PRESIDING OFFICER. The time of the Senator from Massachusetts has expired. The opponents of the amendment have 45 seconds.

Mr. NUNN. Has all time expired? I did not hear the Chair.

The PRESIDING OFFICER. The time of the proponents of the amendment has expired. The time of the opponents to the amendment still remaining is 38 seconds.

Mr. NUNN. Mr. President, I yield the remainder of our time. I move to table the amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has expired. There being no further debate, the question is on agreeing to the motion of the Senator from Georgia. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Washington [Mr. ADAMS] and the Senator from Oklahoma [Mr. BOREN] are necessarily absent.

I also announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 52, nays 45, as follows:

[Rollcall Vote No. 219 Leg.]

YEAS—52

Armstrong	Gorton	Murkowski
Bentsen	Graham	Nickles
Bond	Gramm	Nunn
Boschwitz	Grassley	Packwood
Bryan	Hatch	Pressler
Burns	Heflin	Roth
Byrd	Heinz	Rudman
Coats	Helms	Shelby
Cochran	Hollings	Simpson
Cohen	Humphrey	Specter
D'Amato	Inouye	Stevens
Danforth	Kasten	Symms
Dixon	Lott	Thurmond
Dole	Lugar	Wallop
Domenici	Mack	Warner
Exon	McCain	Wilson
Fowler	McClure	
Garn	McConnell	

NAYS—45

Akaka	Glenn	Metzenbaum
Baucus	Gore	Mikulski
Biden	Harkin	Mitchell
Bradley	Hatfield	Moynihan
Breaux	Jeffords	Pell
Bumpers	Johnston	Pryor
Burdick	Kassebaum	Reid
Chafee	Kennedy	Riegle
Conrad	Kerrey	Robb
Cranston	Kerry	Rockefeller
Daschle	Kohl	Sanford
DeConcini	Lautenberg	Sarbanes
Dodd	Leahy	Sasser
Durenberger	Levin	Simon
Ford	Lieberman	Wirth

NOT VOTING—3

Adams	Bingaman	Boren

So the motion to lay on the table the amendment (No. 2547) was agreed to.

Mr. NUNN. Mr. President, let me inform Senators who would like to know a little bit about what is happening, we are moving out a lot of amendments. We have few amendments left for rollcall votes. My estimate is now we have about 6 or 7 that will require rollcall votes. Assuming that Senators continue to cooperate, with the exception of SDI, within the next 2 or 3 hours we ought to be finished with virtually everything else.

Senator BINGAMAN will be getting back here late this evening. He had waited the other day all day willing to take up his SDI amendment and there were objections to taking it up at that time. So we will be taking up the SDI amendment, I assume, as soon as we get word that there is willingness to enter into some kind of time agreement.

But there is no reason that we cannot finish this bill tonight or, if the leadership desires, tomorrow depending on the leadership and the will of the body. We have a couple of amendments that can be accepted now and then we have a Bumpers amendment that will not be accepted. It will require a rollcall vote. We will be seeking a 30-minute agreement. So I notify Senators we will probably have a vote somewhere around 8:30.

Mr. WALLOP. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Georgia still has the floor.

Mr. NUNN. Mr. President I yield to the Senator from Wyoming for a question.

Mr. WALLOP. I would say to the able chairman that I am willing to enter into some kind of time agreement, but it is going to be some kind of time agreement when the Senate is awake. I am not going to do this from 1 to 4 in the morning for some other inopportune time. And if that is what is forced on me, then I will have a pile of things to read until we get to the time when we are awake. I hope we can come to some kind of reasonable arrangement, start early in the morning, conduct the debate in front of the Senate and in front of the public, because I still believe that this is the most important of the strategic modernization debates. It is really not principled or wise to do it in the middle of the night.

Mr. NUNN. May I say to my friend from Wyoming I think from the managers' point of view that is perfectly acceptable. We could work out something on SDI. There are three or four amendments on SDI. I know the one the Senator is focusing on and perhaps will take the most time is the Bingaman-Shelby amendment.

Mr. WALLOP. That is the one.

Mr. NUNN. If we could get a time agreement on that one, it seems to me the other SDI amendments could be handled probably with 15 minutes on each side. So I suggest to the Senator from Wyoming, if he would propose now or in a few minutes a suitable time ageement, I think, on behalf of Senators BINGAMAN and SHELBY, they would be willing to go along with anything that was equally divided and have a reasonable amount of time. It is an important amendment; it needs discussion, and I certainly respect the Senator in wanting to do it in daylight. That is fine with me.

Mr. WARNER. Mr. President, I wish to inform the manager that the amendment of the Senator from Virginia on SDI would require, I think, an hour equally divided.

Mr. NUNN. All right, that is one equally divided hour, and I believe that there is an SDI amendment or two on this side of the aisle. Does the Senator from Arkansas have an SDI amendment?

Mr. BUMPERS. I may or may not. I am willing to agree to a 30-minute time limit right now if I do offer it.

Mr. NUNN. We will not seek an agreement yet, but I say that means that is about an hour and a half plus whatever time the Senator from Wyoming deems necessary. If we could get an indication of that somewhere in the next hour and get that agreement nailed down, then we would be in a position to finish everything else I believe tonight and give people a chance to get some sleep.

Mr. METZENBAUM. Will the Senator from Georgia yield for a question?

Mr. NUNN. Yes.

Mr. METZENBAUM. The Senator from New York [Mr. D'AMATO] and myself have an amendment having to do with economic blockade. This pertains to Iraq. It is also my understanding that the House passed some legislation specifically dealing with that matter and that Senator PELL very well may make an effort to bring that matter to the floor yet this evening. Can we be informed as to whether or not there is any intention on the part of the Senator from Rhode Island—could I have his attention, please. I am inquiring of the fact Senator D'AMATO and I have an amendment having to do with an economic blockade of Iraq.

The PRESIDING OFFICER. Will the Senator from Ohio suspend momentarily. Senators will please take their seats.

Mr. PELL. What was the question again?

The PRESIDING OFFICER. The Chair recognizes the Senator from Ohio.

Mr. METZENBAUM. The question is, the Senator from New York and I have an amendment having to do with the economic blockade of Iraq. I have also been informed by my staff that the House has passed legislation on the subject of an economic blockade of Iraq and that the chairman of the Foreign Relations Committee may make an effort to pass that bill on the floor of the Senate before we adjourn. If that were the case, that I think is a more comprehensive piece of legislation. It would have some relevance as to whether or not Senator D'AMATO and I go forward with respect to our amendment on this bill.

Mr. PELL. The important thing is the national interest. Which bill is more strong and more successful. Is the Senator's bill stronger or the banking bill stronger?

Mr. METZENBAUM. I am not sure which is stronger, but I know our amendment has a place on the calendar, can be heard and can be voted on. I am not at all certain that the Senator from Rhode Island is going to be able to get the bill from the House up this evening, and I would be very happy to show the amendment that I have on the subject to the Senator from Rhode Island.

Mr. PELL. Why not talk about this informally and let me see it.

Mr. METZENBAUM. Very good. I thank the Senator from Georgia as well as the Senator from Rhode Island.

Mr. CRANSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

AMENDMENT NO. 2548

(Purpose: To require a report on andean antidrug efforts, and for other purposes)

Mr. CRANSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator will need unanimous consent to lay aside the pending amendment.

Mr. CRANSTON. I so ask.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will report the amendment of the Senator from California.

The assistant legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for himself, Mr. KENNEDY, Mr. PELL, Mr. BIDEN, Mr. SIMON, and Mr. SANFORD, proposes an amendment numbered 2548.

Mr. CRANSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title XI, add the following new section:

SEC. 1103. ANDEAN ANTI-DRUG EFFORTS.

(a) The Congress finds that—

(1) support for democratic process and civilian governance in Andean countries of Peru, Boliva, and Colombia, the first two of which have only recently emerged from periods of military rule, is a necessary precondition for the successful fight against narcotics production and traffic and long-term stability in that region;

(2) separation of military and civilian law enforcement functions has historically been a critical element in democracies around the world, including the United States;

(3) there is a need to determine whether existing U.S. policies unduly emphasize assistance to military entities rather than civilian law enforcement entities in the Andean antidrug effort and whether such policies might tend to undermine the dual long-term policy goals of the United States of stopping the traffic of drugs at their sources and the preservation of civilian control over the newly established democracies of this region; and

(4) there is a need to assess the impact that United States assistance in the Andean anti-drug effort will have on reducing drug activity and supporting democratic processes in this region.

(b)(1) Not later than 90 days after the date of enactment of this Act, the Secretary of State and the Secretary of Defense shall, in consultation with the Director of the Office of National Drug Control Policy, jointly submit a report to the Senate and the House of Representatives dealing current United States policies, anti-narcotics enforcement activities and associated training programs in the Andean region.

(2) Such report shall also include an analysis of the impact of the Andean countries' militaries' role in counternarcotics enforcement on democratic institutions in the region and how civilian institutions might be strengthened in order to assure the successful pursuit of antinarcotics strategy.

(3) Such report shall contain specific legislative recommendations as may be necessary to clarify and streamline United States assistance activities in order to avoid unneces-

sary duplications and contradictions in meeting United States policy goals in the Andean region.

Mr. CRANSTON. Mr. President, I believe this amendment is acceptable on both sides, so this will just take a very few moments.

Mr. President, this will just take a few moments since the amendment, I understand, is acceptable to both sides. It is concerned with the question of whether current United States efforts tend to give the military a leading role in the drug war in the Andean region, particularly in the countries of Peru, Bolivia, and Colombia. These three nations have been the focal point of efforts to win the anti-drug battle by stopping the traffic of drugs at their source.

Both Peru and Bolivia have only recently emerged from periods of military rule. In Colombia more than three decades of political violence have given the military an increasingly large role in policy. It is clear that support for the democratic process in Peru, Bolivia, and Colombia is a necessary precondition for the successful fight against narcotics production and traffic.

At the same time demilitarization of the Andean drug war raises fundamental questions about its efficiency. By focusing on the military role, I fear we might lose the drug war, exacerbate human rights and economic problems, and end up upsetting the delicate balance of civilian control over the Armed Forces in these countries.

As you know, Mr. President, the separation of military and civilian law enforcement functions has historically been a critical element in the democracies around the world, including our own country. Unfortunately, there appears to be insufficient information currently available to determine the extent to which existing United States policies unduly emphasize the assistance to military entities rather than civilian law enforcement agencies in the Andean antidrug effort.

I am concerned the present form of anti-narcotics aid may well contribute to the undermining of the dual long-term policy goals of the United States, of stopping the traffic of drugs at their sources, and the preservation of civilian control over the newly established democracies of this region.

The amendment I am proposing together with the my distinguished colleagues, Senators KENNEDY, PELL, BIDEN, SANFORD, and SIMON, seeks to elicit from the administration a report on current U.S. policy and activities relating to these concerns. Such a report will assist us in evaluating the current policy and determining whether there are any further actions necessary.

I thank the floor managers for their assistance in this matter.

The amendment is concerned with current United States activities which appear to have the effect of militarizing the drug war in the Andean region. It is meant to respond to a disturbing reality which is now vaguely beginning to make itself understood:

All is not quiet on the anti-narcotics front.

Mr. President, I am as committed as any Member of this body to fighting, and winning, the battle against substance production and abuse. Drugs threaten America's future, while making much of our present a nightmare of violence and degradation.

The question before us, however, is not whether something should be done, for surely it must. The question is: What should we do, while making our efforts fully consistent with our best selves?

In few areas of the antinarcotics struggle, do our intentions, our best selves, run smack into the realities of expediency, of quick-fixes, of policies that may create problems as grave as those they seek to solve, as they do in the Andean drug war. The prescription we are offering to democratic governments in that region represents a deadly mix that long ago our forefathers wisely decided contained ingredients that would be dangerously toxic for our own democracy.

The question is: Is the United States heading in the direction of strengthening the hand of the militaries of Latin America at the expense of fragile civilian governments, and thereby undermining other U.S. policy goals?

Mr. President, for 110 years the laws of the United States have largely forbidden the military from taking on the law enforcement responsibilities of our civilian police agencies. There has been a longstanding consensus in the United States that, by giving the military civilian law enforcement functions, they would have a role in our governance, through the illegitimate use of the tools of a police state.

Thus, these powers have remained the responsibility of civilianized police forces. This fact, so ingrained in the American psyche that it is rarely debated, has been a major factor for democratic stability. The principles set down in posse comitatus and similar restrictions on military intervention in internal security have helped keep our military, one of the world's largest and certainly over the past 50 years one of the most prepared, from suffering from the virus of militarism—the open intervention of the Armed Forces in partisan politics.

Law enforcement has remained primarily the responsibility of local government, and thus enjoys broad-based community support. The Armed Forces' almost exclusive mission has been to defend this Nation's physical borders, and in doing so admirably have, at the same time, avoided becoming immersed in domestic politics.

There are, of course, many nations in the world where the military are used for law enforcement. And by taking this first stelp, too many of these have eventually found themselves subject to military dominance of their politics.

Nowhere is this more true than in Latin America. Today, many of the governments there are recently emerged democracies which have barely shaken off the dark legacy of military rule. In almost all, elected civilian rulers still find their mandates questioned, and often openly challenged, by a politicized military officer corps.

What's more, in at least one of these countries, Bolivia, the last military regime was infamous for its own extreme involvement in the drug trade. Bizarre alliances by the highly politicized military with European Nazis such as Klaus Barbie, the "Butcher of Lyon"—fueled by the big bucks of international narcotics trafficking—left a trail of corruption and death that reached into the Presidential palace itself.

It is clear that support for the democratic process in countries such as Peru, Bolivia, and Colombia is a necessary precondition for the successful fight against narcotics production and traffic. At the same time, the militarization of the Andean drug war has raised fundamental questions about its efficacy. By focusing on the military, I fear we might lose the drug war, exacerbate human rights and economic problems, and end up upsetting the delicate balance of civilian control over the Armed Forces.

The question remains: Could not the same amount of resources, if devoted to civilian police agencies and to economic assistance, render a higher degree of effectiveness in the anti-drug battle?

There will always be the need for a tough law enforcement component to our international drug policy. However, the root of the drug production problem is clearly economic. Will not dealing with the region's economic crisis be in the long run more effective in eliminating the drug trade than a quick-fix military approach?

These questions, which reach deep into the heart of the democratization process throughout the region, have not been sufficiently addressed.

A fundamental problem with the militaries in most of these countries is that they feel "different and better" than their civilian counterparts. In a democracy, this is a corrosive idea.

Is this feeling, of being better and different, not certain to be reinforced by U.S. policies which encourage expansion of their role in the anti-nar-

cotics battle at the expense of civilian law enforcement agencies?

As corrupt and brutal as some police forces might be, the nature of civilian control over them at least allows for the possibility of change and renewal through democratic means. Would the increasing militarization of these societies allow for the same possibilities for reform?

I think not.

Mr. President, as I mentioned before, the genius of our system is reinforced by the clear distinction between national defense and public safety. Although there is certainly some, well-regulated, overlap, in general terms the military are responsible for the defense of our borders, and the police for maintaining internal order.

Unfortunately, in Latin America, this distinction has always been blurred, with the military often carrying out an important internal security function. In countries such as Argentina and Panama, the result has been that the Armed Forces of both countries ended up being incapable of either assuring public safety or providing for the national defense.

This confusion of roles has contributed to a legacy of authoritarian rule by the military in these countries. Despite the fact that both military officers and the police wear uniforms and carry guns, their functions and world views are in fact quite distinct.

In Latin America, a military officer swears allegiance "to the fatherland." A police officer, a good one at least, is a public servant at the service of his community.

And the differences run even deeper.

A military officer, when confronted with a threat, is trained to react immediately to destroy it. The threat is called the enemy.

A police officer is not trained to destroy a disturbance, but to control it. It is a more subtle task, governed by the rule of law and the protection of fundamental human and civil rights.

The military chain of command is strictly hierarchical. It has to be. A soldier cannot be expected—from his vantage point—to be able to take in the "big picture." His duty is to obey.

The police officer is given more latitude; his superiors expect that he will understand the law of the land better than they and that, acting within the law, will be able to arrive at the best decision.

Mr. President, there is a saying in Spanish, "no pidas peras al olmo," Don't ask for pears from an oak tree. Yet, apparently, that is what could happen by giving the military a leading role in the antinarcotics fight in Latin America.

In Colombia and Peru, the Armed Forces see their primary role as combating guerrilla organizations. U.S. aid cannot change that. We have already seen in Colombia that providing military aid has not resulted in a corresponding increase in antinarcotics operations by the military; in fact, except for a few high profile operations, it is the police who carry out the vast majority or drug-related operations. There has, however, been an increase in counter insurgency operations by the Colombian military. Mr. President, there have been voices in our own military that have been raised to question the rush to involve the Armed Forces in the antinarcotics fight. There is no question we must be tough, the toughest possible, in fighting drugs.

But it seems to me that we should be wise. And part of wisdom is taking stock of what we have, of what works, and being very careful about rash innovations that could cause problems of untold magnitude.

In June 1988, the Congressional Research Service held a seminar on narcotics interdiction and the use of the military. One of the panelists was Lt. Gen. Stephen G. Olmstead, then the Deputy Assistant Secretary for Drug Policy and Enforcement at the Defense Department. Let me quote a few passages from his remarks:

> I don't want a bunch of untrained soldiers performing law enforcement missions. Now, if the Congress of the United States does away with the [Posse Comitatus] Act and the President says, "go arrest people," obviously we're going to obey. * * * We believe in the Posse Comitatus Act, it's been a good act. One of the strengths of our Union is the distinction between military and civilian police powers. * * *
>
> Congress could pass a law to expand the military authority in law enforcement roles, but that's not what we really want to do. Those countries that have had a successful military police include Nazi Germany, the existing East Germany and many others around the world. That's against the American way of life. I want a policeman on the beat who is not one of my sergeants or one of my lieutenants.

And in another context, General Olmstead was even blunter. If the military does take on the "war," he said, it will be on its own terms. The Armed Forces "would use machine guns and not worry about Miranda rights."

Mr. President, the present course of militarization of the drug war in many respects bears an uncanny, and unfortunate, resemblance to U.S. security assistance programs in Latin America in the 1960's and early 1970's.

Eventually many of these programs were halted. Some of them were ended out of a healthy desire to disassociate the United States from military regimes which ran roughshod over their own people. Others were stopped after allegations—which I believe were often true—that we were turning a blind eye to, or condoning, brutal interrogation techniques.

But there was another aspect at work which also proved destructive of Latin democracies—in the final analysis, United States policymakers signaled Latin elites that it was their military, not their elected leadership, which we regarded as the bulwark for stability in the region. And this idea became self-fulfilling.

In the early 1960's, United States counterinsurgency plans began to stress a Latin military role that was significantly broader than the protection of a nation's borders. Through civil action training programs, Latin officers received training in fiscal planning, development policy and public administration.

In 1969, New York Gov. Nelson Rockefeller headed a Presidential Mission for the Western Hemisphere. In his report he hailed the nation-building potential of the Latin military. It was, he said, "the essential force for constructive social change."

Two years later, Luigi Einaudi—now the U.S. Ambassador to the Organization of American States—and academician Alfred Stephan III conducted a study for the Rand Corp. They reported that:

> A rationale sometimes used for certain U.S. military assistance programs is that "professionalism" contributes to lessened political involvement on the military's part, and to their concentration on exclusively military affairs. Logic, however, suggests that to the extent that military expertise, or professionalism, is increased in the area of counter-insurgency, nation-building and multi-sector development planning, the military would tend to become more rather than less involved in politics.

By 1976 all the nations of South America, except for Colombia and Venezuela, had fallen prey to military dictatorship. Rather than being "strong" regimes, most were merely brutal. But, as one Argentine admiral recently admitted, the Armed Forces had developed a planning ideology with which they believed they held the answers to a whole host of social ills. The subsequent dirty war in that country was perhaps one of the consequences of this nation-building concept run wild.

Mr. President, by militarizing the drug war, by making a country's Armed Forces, rather than its civilian political leaders and the law enforcement agencies under their control, the focal point of our antidrug efforts, I am afraid we would be doomed to repeal the experiences of the sixties and seventies.

The sheer dollar amounts of military assistance versus other kinds of aid proposed by the administration suggest that, once again, the armed forces of these countries, rather than their cash-strapped civilian leaders, are our preferred allies.

Yesterday we looked to the Latin military to carry out nation-building tasks—a mission that has nothing to do with protecting a nation's borders. Today, again we seem to be inventing

a new role for the Latin military—that of policeman—a role which our own military is not allowed to engage in and one that signals a complete lack of confidence in the ability of Latin civilian leaders to do the job that needs to be done.

Added to this conceptual confusion concerning military and law enforcement functions, Mr. President, is a certain hypocrisy in U.S. policy when it comes to drugs and other national security concerns. In a recent study, Coletta Youngers and John Walsh, of the Washington office on Latin America, point out that:

> To promote its policy interests in Central America, the U.S. Government fostered relations with Honduran military officials known to be linked to drug trafficking operations and blatantly kept Panamanian ruler Gen. Manuel Antonio Noriega on the CIA payroll long after his ties with Medellin drug leaders were known. Some evidence suggests that the Contras raised revenue through drug trafficking activities. The Central Intelligence Agency and other senior U.S. policy makers have had full knowledge about individual Contras involved with drug traffickers and some, in fact, advocated drug money as the solution to the Contras' financial problems.

It has also been widely reported that the same Argentine military officers who helped direct the Garcia Meza cocaine coup against the democratic government in Bolivia in 1980, were later sent to Central America by the Reagan administration to train the Contras.

Mr. President, I do not want to rehash old policy disputes. I believe that American foreign policy works the best when it is the result of a broad, bipartisan consensus. But there is increasing talk in this town that in countries such as Peru, making a distinction between antinarcotics assistance and counterinsurgency aid does not make sense. According to this line of reasoning, at some point the United States is going to have to bite the bullet and become actively engaged in supporting Peru's vicious counterinsurgency program.

United States involvement in the Peruvian counterinsurgency efforts would be a descent into hell, an accident or a foolhardy policy choice that could make Vietnam look like a picnic. There would be nothing so detrimental to the bipartisan foreign policy consensus we seek, as for U.S. antinarcotics policy to turn into a backdoor entrance into Peru's civil war. Such a step would be to turn our backs on two decades of effort to make Washington's rhetoric on human rights fully consistent with its practice.

In September of last year President Bush issued the national drug control strategy report, which includes unprecedented levels of military assistance and significantly bolsters the role of U.S. military operations overseas. The numbers provided by various Federal agencies since that time bear out this heavy reliance on the armed forces of Colombia, Peru, and Bolivia.

But, what have the civilian leaders of these countries been telling us about their needs in fighting this U.S.-consumption fueled battle on their national territory?

None of these countries have been using their military as the lead agency in the drug war, and one appear happy to do so now. All of the top civilian leadership seems genuinely concerned about the further empowerment of their militaries in what is essentially an internal security role.

For example, late last year Colombia's attorney general, Alfonso Gomez Mendez, said that drug barons in his country had infiltrated the military. It was a mistake, he said, for the army to become involved in the antinarcotics campaign.

The degree of infiltration and corruption by narcotics traffickers was infinitely less in the police forces than in the army, according to Mendez.

"It was really a mistake to place the Colombian Army in contact with the drug criminals, who have an immense capacity to corrupt," Gomez Mendez said. "The battle in the matter of repression should have been circumscribed within the police. This is a police function."

I should point out that in Colombia, some 90 percent of the seizures of drugs have been carried out by the police. Meanwhile, the Colombian military has become one of the worst violators of human rights in the Western Hemisphere. While the news media has presented a picture of unfathomable carnage in Colombia, it should be pointed out that violence by the drug barons is only a small—if spectacular—part of the story.

"Among United States policymakers," Latin American expert Alexander Wilde has pointed out, "much has been made of the so-called narco-guerrilla connection—an alleged alliance between drug traffickers and armed revolutionaries to overthrow electoral democracy.

"It is certainly true that during this last decade, different guerrilla groups protected and taxed local drug producers in various regions of the country," Wilde noted. "However, the far more striking and important connection for the drug mafias was the alliance they struck with extreme right-wing elements among large landowners, economic elites—and members of the Colombian security forces."

"Who will guard the guardians?" Was the question that perplexed the philosophers of Athenian democracy many centuries ago. It is clear that what Colombia does not need, in this moment of crisis, are steps that strengthen the Colombian Armed Forces. By taking power out of the hands of civilian law enforcement agencies and putting it in the hands of the military, the rule of law and the very civilian governments the U.S. says it is supporting are weakened.

Mr. President, recently Mr. Melvyn Levitsky, Assistant Secretary of State for International Affairs, testified before the Subcommittee on Western Hemisphere and Peace Corps Affairs and the Subcommittee on Terrorism, Narcotics and International Operations of the Committee on Foreign Relations.

Mr. Levitsky said three things which greatly disturbed me, for differing reasons.

First he said that U.S. security assistance will be negotiated with and has been negotiated with, approved by and deivered through civilian governments.

Second, he said an impoverished, poorly trained and equipped military, unable to feed its troops, is far more susceptible to corruption and human rights abuses.

And last, he noted that "our decision to encourage greater participation of local militaries in the counternarcotics efforts, parallels the evolution of our own policy that projects a greater role for the Department of Defense in the war on drugs."

All of these statements, on the face of it, seem unobjectionable. But each crumble when examined closely.

It is no secret that I, like many law enforcement officers and not a few military officers around the United States, strongly opposed increasing our Armed Forces' role in the antidrug battle. I stand by that position, which for the sake of time, I will not get into here.

But it seems to me, that—although I do not like the precedent of military involvement in law enforcement—civilian control over the Armed Forces in the United States is not immediately threatened. More than 200 years of highly successful civil-military relations in this country make it very unlikely that the drug war could undo these durable democratic traditions.

But what about a country like Bolivia, where there have been almost 200 coups since independence from Spain? What value do Mr. Levitsky's assurances about the growing role of our Department of Defense have in the case of Bolivia?

Little or none. I suspect. Presonally, I would bet more on President Bush in a game of horseshoes. Maybe a lot more.

Similarly, in the case of the Andean nations' "impoverished, poorly trained and equipped military, unable to feed its troops," I have a lot of trouble sharing Mr. Levitsky's obvious empathy. Impoverishment and a lack of education goes far beyond the barracks in all of these countries. It is a condition of life for many millions.

But to spend the money on the military, means that those resources are not available for civilian law enforcement, nor for the many alternative crop strategies our elected Latin allies tell us are absolutely essential for winning the war on drugs.

Also, Mr. Levitsky's own assurances on this point were contradicted by another segment of his own testimony. Speaking to the issue of military needs, he said: "We know the Peruvian military are in garrison. They cannot patrol. They do not have boots. They do not have food. They are likely to prey on the host population. What we are trying to do is get them involved in helping to solve this basic problem in this area, in a modest way, with the proper training and equipment."

Mr. President, I am frankly skeptical of the agrument that a military so prone, in Mr. Levitsky's own words, to prey on the civilian population, is a very reliable partner in the drug war. The record so far has not been encouraging in this regard.

Last, I am also skeptical about assurances that our security assistance is the result of friendly negotiations among mature partners.

In another part of Mr. Levitsky's testimony, there was an interesting exchange with our distinguished colleague, Senator DODD. Mr. Levitsky was talking about the reservations expressed on United States antinarcotics policy by incoming Peruvian President Fujimori. The exchange, I think, was revealing:

Mr. LEVITSKY. Yes, and we have talked with him (Fujimori) as well. Let me just say what I think the case is. I believe that this interview that you cited, and some previous comments he made, were reacting to questions about the introduction of U.S. forces to fight the narcotics war in Peru. We have never proposed that.

Senator DODD. Let me ask you this.

Mr. LEVITSKY. Okay.

Senator DODD. Call them advisers at this point, whatever, is the economic——

Mr. LEVITSKY. Trainers.

Senator DODD. Trainers. We will use your words. Are the existence of those trainers in this program, is his acceptance of that contingent—

Mr. LEVITSKY. No.

Mr. LEVITSKY. You mean, is the economic assistance contingent on that?

Senator DODD. Contingent on that.

Mr. LEVITSKY. No. It is contingent on performance. And I would add that—

Senator DODD. Performance of what?

Mr. LEVITSKY. Narcotics performance in effective programs.

Senator DODD. But is this not a catch-22 you are placing him in? You are suggestion that unless he goes with this program, he cannot demonstrate effectiveness.

Mr. LEVITSKY. Unless they can show results. That is right.

Senator DODD. And the only way he is going to get results is by accepting what we want to place in down there, and trainers, and that is how he gets the economics assistance package. I mean, you are placing him in a dreadful position in that sense.

Mr. LEVITSKY. Not necessarily, not necessarily. If, let us say, if the Peruvian—

Senator DODD. In other words, he could achieve success without us being involved, in your view?

Mr. LEVITSKY. I believe that they could achieve success, if they make a decision to commit the resources necessary to deal with the security situation, not necessarily dependent on U.S. military assistance. If they can do it on their own, and the Peruvian Army has the resources to do it on its own, to take on and make the security—we do not have to produce—we do not have to provide the military assistance.

Senator DODD. Do you think they could do it on their own?

Mr. LEVITSKY. It would take a decision on the part of the government to shift resources, I believe, and I do not know whether they would be willing to do that.

Mr. President, the answer is obvious. A government which is broke, in the mideast of a great civil strife, does not have many policy options. Their dilemma, as Senator DODD correctly pointed out, is a catch-22. Either they fight the drug war our way, or they shift mythical resources to that war—but in order to receive our help in other areas, the performance criteria are the same.

That, to, me is like the story about the man who was drowning 20 feet offshore, a passerby throws him a rope 11 feet long, and points out that he is meeting him more than halfway.

This is no option. And it does not take into account the many suggestions the civilian political leadership of these Andean countries are making, ideas which will be just or more effective in fighting drugs, while ensuring the sustenance of the democratic process. One of these, or course, and perhaps the most neglected in the current policy mix, is a targeted program of economic assistance.

Mr. President, I was one of those who was involved in the fight to shut down several security assistance programs during the 1970's, based on the record of excesses I alluded to earlier.

I, for one, believe it is now time to put the divisive policy debates of the 1970's and 1980's behind us. It is vital that the whole area of police and law enforcement assistance be reviewed, with a view to making future policy aid fully consistent with both our antinarcotics and human rights goals.

I believe it can be done, and must be done in order to strengthen our efforts to stop the traffic of drugs at their source and the preservation of civilian control over the fragile democracies of Latin America.

Mr. President, the amendment I am proposing together with my distinguished colleagues, Senators KENNEDY, PELL, BIDEN, SIMON, and SANFORD, seeks to elicit from the administration a report that addresses the concern that existing United States policies unduly emphasize assistance to Andean militaries rather than civilian law enforcement agencies, thereby undermining our goals of stopping the traffic of drugs at their source and the preservation of civilian control over the fragile democracies of this region.

I thank the floor managers for assistance in this matter.

Mr. President, I ask for unanimous consent that an article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TROOPS' DRUG-WAR ROLE QUESTIONED

(By Douglas Farah)

BOGOTA, COLOMBIA, July 23.—U.S. efforts to expand the Colombian military's involvement in fighting drug traffickers has generated controversy here and in the United States, as legislators and analysts voice fears that the policy will lead to human rights abuses and a weakening of civilian rule and government officials defend it on national security grounds.

Critics of the U.S. policy contend that drugs are a law-enforcement and judicial problem and advocate giving most responsibility and resources to the police and courts. Bush administration officials say drug trafficking is a threat to U.S. and Colombian security that requires the military of both countries to take a broader role. The administration denies any plan to involve U.S. troops in combat.

Under the Bush administration's current Andean strategy, the Office of National Drug Control Policy projects that military aid to Colombia in fiscal 1990-94 will total $282 million, nearly triple the $100 million allocated for law enforcement.

With the additional aid, the military is expected to take primary responsibility for interdicting chemicals used to make cocaine, raiding cocaine laboratories, gathering intelligence and chasing leaders of the Medellin cocaine cartel and other narcotics rings. Until now, those functions have been performed largely by the National Police.

U.S. and Colombian officials say the military carried out a spectacular raid on March 3 that netted 18 tons of cocaine, but more than 80 percent of all drug raids are carried out by the police, despite their getting less aid.

A European narcotics specialist said the military remains geared primarily to threats from outside the country, not the internal fight against traffickers. As an example, he cited the navy, which recently spent millions of dollars repairing submarines but little on developing a small-boat, "brown-water navy" to patrol the rivers along which most chemicals are transported.

Many Colombian leaders agree that the Colombian military, which traditionally has been used to combat Marxist guerrillas, is ill-prepared to take on the traffickers and reluctant to do so out of fear that cocaine money will corrupt the institution.

There is strong evidence, according to human rights workers and senior government officials, that some military officers in rural areas cooperated with and aided drug traffickers and their paramilitary bands in the slaying of peasants suspected of being Marxist guerrillas. An alliance was forged, they say, because many in the army still view the guerrillas, not the drug traffickers, as the principal enemy.

Rep. Peter Kostmayer (D-PA.), a leading critic of U.S. policy, accused the Bush administration in a recent interview in Wash-

ington of seeking a "quick fix" in the drug war.

"I think we are headed down the wrong road, and a very dangerous road at that," said Kostmayer. "We are asking for trouble by providing assistance to a military with very serious human rights problems. There are problems with the police too, but not as great."

Some analysts also fear the large influx of military aid will shift the balance of power from the civilian government to the military in South America's oldest democracy, although few believe there is a possibility of a military coup.

"The National Police are much more subject to civilian control than the military," said Jorge Orlando Melo, director of the Institute for Political Studies at the National University. "What is needed is greater investigative capacity, controlled by civilians, and a greatly increased judicial capacity, not a great military campaign.

Melo said that while most people who go into the police do so as a career, all military personnel except officers are drafted for two years, are paid less than police and are thus more susceptible to corruption.

Sources close to President-elect Cesar Gaviria, who takes office Aug. 7, say he favors the police as the lead agency and wants most U.S. aid directed to them and toward strengthening the fragile judicial system. Outgoing President Virgilio Barco had fewer reservations about getting the military involved.

Responding to the growing concern, William J. Bennett, the Bush administration's drug-policy chief, defended military aid in a speech last month and blasted the "anxious hand-wringing among certain members of the press and Congress"' over providing military assistance to Colombia, Peru and Bolivia.

"If these efforts are caricatured as another Vietnam, an American invasion or involvement in a foreign war, then we risk crippling a series of strengthened relationships that our president and the presidents of the Andean region have recently forged," Bennett said.

Administration officials say the aid to Colombia and other Andean nations was carefully negotiated with the host governments. "If those countries want to change the mix, we will continue to work with them," said John Walters, Bennett's chief of staff and national security adviser, in an interview.

The debate in Colombia also centers on whether a strategy of repression, by police or the military, can work at all if demand in cocaine-consuming countries is not cut substantially.

Rodrigo Losada, an analyst of Colombian social violence at the Ser Institute of Investigation, said that repression, whether by the police or army, would have little impact on cocaine production because it is such a lucrative business.

"In that sense, it is very similar to Vietnam, where one is seeking an enemy that has great possibilities of moving and hiding," Losada said "And repression has not worked. If the United States, with all its technology and military might, cannot control its own borders, why does it think it will work in a foreign country?"

Mr. KENNEDY. Mr. President, I rise to support an amendment being offered to the Defense authorization bill by Senator CRANSTON to require the administration to report on antinarcotics law enforcement efforts in Latin America.

The United States is pursuing a militarized antinarcotics program in the Andean nations that could foster the destruction of the fragile democracies in these countries and lead to another protracted war in Latin America. Expanding the role of the military has become a critical issue in our foreign relations with the Andean countries and Senator CRANSTON's amendment, which would provide the Congress with a detailed analysis of the administration's antinarcotics programs, deserves all of our support.

During the past year, the Bush administration has put heavy pressure on these governments to expand the role of their armed forces in antinarcotics law enforcement activities. According to the Ambassadors from Peru, Bolivia, and Colombia, United States Government officials have indicated that continued United States economic support is contingent on their acceptance of military aid—which none of these countries requested.

In addition, as part of its drug war in Peru, the administration has announced its intention to use United States military assistance to support the Peruvian Army in its civil war against the Shining Path guerrillas in areas where there is narcotics trafficking.

Although the administration's goal of formulating a coordinated international drug strategy is commendable, expanding the role of military forces in the antinarcotics campaign is likely to be detrimental to long-term U.S. policy objections. Militarization of the antinarcotics campaigns could undercut our most important policy objective of all in Latin America strengthening their new civilian democracies.

Supporting the Peruvian counterinsurgency effort with United States trainers and advisers risks drawing the United States into yet another unwinnable war in the Third World. As in El Salvador, Nicaragua, Angola, Cambodia, and Afghanistan, it is far easier to commit ourselves to these conflicts than it is to extricate ourselves.

Moreover, bolstering the military, especially during the current period of political transition in these nations, could shift the delicate balance in power between civilian and military leadership. Following President Fujimori's recent victory over Vargas Llosa in Peru, crowds of supporters surged through the streets in downtown Lima chanting "coup, coup, coup."

In the face of these events, the United States should be doing everything it can to support democratic institutions and civilian control in Latin America—not enhancing the power in the hands of the military.

U.S. support for militaries with poor human rights records is also antithetical to U.S. human rights policies. Peru's military has flagrantly violated basic standards of international law with respect to fundamental freedoms and has one of the most abysmal human rights records in Latin America. While battling the Shining Path guerrillas the Peruvian Army has killed thousands of civilians. Last year alone the military was responsible for nearly 300 disappearances. In addition, the Colombian military has cooperated with drug traffickers in killing peasants suspected of being Marxists.

Finally, a militarized antinarcotics strategy fails to address the root cause of the drug problem. Many of the resources employed under the administration's emphasis on a military solution would be better spent in alternative economic strategies designed to address the drug problem, such as substitute crop programs and job training programs.

Obviously, combating the narcotics traffickers in the Andean countries demands skills that the military possesses and civilian-controlled law enforcement agencies do not possess. But we must do all we can to see that the military role is narrowly tailored to preserve human rights and civilian control over law enforcement activities and democratic institutions.

The pending amendment requires the administration to detail all current antinarcotics enforcement activities and training programs in Latin America. In addition, it requires the administration to make recommendations on how civilian institutions can best be strengthened to assure the success of antinarcotics strategies. By requiring the administration to address these issues, the amendment takes a significant step toward achieving our long-run goals in the region, and I urge the Senate to adopt it.

Mr. NUNN. Mr. President, I think this is an excellent amendment. I believe that we need to focus on our policy in the Andean region. I believe very strongly it has to be much broader than simply law enforcement policy. It has to include economic analysis, it has to include crop substitution, and it has to include trade policies.

I support the amendment and urge its adoption.

Mr. WARNER. Mr. President, likewise, this side accepts the amendment that has been offered.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from California.

The amendment (No. 2548) was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. I yield to my distinguished colleague, Mr. President.

AMENDMENT NO. 2549

(Purpose: To impose certain restrictions on the Airborne Self Protection Jammer program)

Mr. PRYOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arkansas [Mr. PRYOR] proposes an amendment numbered 2549.

Mr. PRYOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, between lines 6 and 7, insert the following:

SEC. 113. PROCUREMENT OF THE AIRBORNE SELF PROTECTION JAMMER.

(a) PROHIBITION ON USE OF FUNDS.—Funds appropriated pursuant to this Act may not be obligated or expended for the procurement of the Airborne Self Protection Jammer or of any component or spare part for the Airborne Self Protection Jammer.

(b) BUDGET LINE ITEM REQUIRED.—If the budget submitted to Congress pursuant to section 1105(a) of title 31, United States Code, for fiscal year 1992 includes funds for the Airborne Self Protection Jammer program, the President shall specify in such budget the amount included for such program.

(c) LIMITATION RELATING TO MILESTONE III DECISIONS.—A decision to proceed with low-rate production of a second or subsequent lot of the Airborne Self Protection Jammer, or to proceed beyond low-rate production of the Airborne Self Protection Jammer, may not be made until the Director of Operational Test and Evaluation has certified to the Committees on Armed Services of the Senate and the House of Representatives that the Airborne Self Protection Jammer—

(1) has undergone thorough and effective operational testing; and

(2) has met or exceeded all operational test criteria.

Mr. PRYOR. Mr. President, I thank my friend and senior colleague, Senator BUMPERS, for meeting in here for 60 seconds, relating to an amendment on the ASPJ. The ASPJ is, of course, the airborne radar system that has never really worked. In its wisdom and at my request, the Armed Services Committee deleted $113 million that was earmarked for production. It allowed $48 million still for the Navy that it claimed it absolutely must have to perform the testing on this particular jammer.

Mr. President, I think in its wisdom also, the Armed Services Committee attempted to fence this particular program until the proper tests were completed. What I am doing, Mr. President, is making certain that fence is constructed high enough so that no production will take place until all of the tests have been completed.

Mr. President, the amendment I am offering will prohibit any fiscal year 1991 production funding for a military program that is one of the worst Pentagon horror stories in recent history.

The $4 billion Airborne Self Protection Jammer, or ASPJ, program is the Divad of the nineties. It miserably failed preproduction tests, it is $1 billion over budget, it is years behind schedule, and investigations of the ASPJ Program have found mismanagement, coverups, and bad judgment by top officials.

I will discuss a Defense Department inspector general's investigation of abuse in the ASPJ Program shortly.

Despite the ASPJ's failures, the Pentagon's fiscal year 1991 request for ASPJ was roughly $173 million. The Armed Services Committee deleted $113 million that was earmarked for production but allowed $48 million the Navy says it absolutely must have to perform testing on the jammer. The committee also retained roughly $10 million for ASPJ spare parts.

At my request and the request of the appropriations committees, the General Accounting Office is reviewing Navy budget documents to verify that this money is indeed needed for further tests. Their analysis will be ready in time for the appropriations bill.

I can go along with providing testing money but think it is ridiculous to fund further ASPJ production. Accordingly, my amendment strictly prohibits the use of any funds in this bill for any form of ASPJ production. Practically speaking this will delete the $10 million for spare parts that is provided for in this bill and any other production funds that may be buried in the budget.

My amendment does not kill the ASPJ Program, it simply enforces a fly-before-you-buy policy. Already over $660 million has been authorized to produce 120 ASPJ's despite all the evidence against it. We cannot recover these funds, but at least we can stop further waste.

Now, Mr. President, let me turn to the case against the ASPJ.

A good place to start is about 1 year ago—after ASPJ tests found serious problems with the jammer's performance and reliability. The Pentagon was then considering whether to begin producing the ASPJ, which at the time was a $9 billion program.

At about the same time, Secretary Cheney proudly released his "Defense Management Review." In it, he firmly stated that all weapons systems must meet strict performance and cost criteria. In other words, weapons must work as advertised before production begins.

On July 13, the Under Secretary of Defense for Acquisition, Michael Stone, told his colleagues on the powerful Defense Acquisition Board, "Based on my review of the alternatives for ASPJ, I believe terminating the ASPJ must be seriously considered due to issues of operational effectiveness, demonstrated reliability, and affordability."

On July 25, 1989, Stone wrote his superior, the Deputy Secretary of Defense, Donald Atwood. He said, "There is clearly no doubt that the ASPJ has not satisfactorily met the criteria for the authorization to proceed to (production)." In effect, Stone was saying the ASPJ was a test case for Secretary Cheney's "Fly Before You Buy" procurement policy.

He also wrote that program costs were underestimated by at least $1 billion and then said, "The services all vote in favor of (production). Most of the Office of the Secretary of Defense staff votes to terminate. My disposition is to terminate. * * *"

On July 31, Deputy Secretary Atwood wrote back to Stone. He said that the ASPJ "has not satisfactorily passed the tests relative to cost, performance and reliability * * * This is a clear case of not meeting the exit criteria for transition from the Full Scale Development Phase to the Production Phase."

Secretary Atwood concluded that "it appears mandatory that one of two actions be taken: (1) cancel the program. (2) Discontinue all production efforts and relegate the program to an effective test and evaluation activity."

He considered limited ASPJ production but stated, "It is difficult to see how this is realistic given that the system has been in development for 13 years and as yet has not proven out."

So last Summer DOD's acquisition chief Stone wanted to kill the ASPJ, Deputy Secretary Atwood wanted to kill the ASPJ, and many of Secretary Cheney's staff wanted to kill the ASPJ.

Yet, last August these same men not only approved keeping the ASPJ, they also voted to spend $420 milliion to start production for 100 jammers.

What magic occurred in those weeks? What made these good men trade their convictions on a $9-billion gamble?

Last September, the Senate Appropriations Committee wondered the same thing and cut over 90 percent of the ASPJ production funds and told the Pentagon to withhold all production pending further tests. The Pentagon thumbed its nose at the restriction and started production anyway.

During the fall, the truth about the ASPJ began coming out. In early December, Secretary Cheney approved a

memorandum that terminated the entire ASPJ Program. Let me say that again, Secretary Cheney killed the ASPJ Program.

However, 4 days later a memorandum by the Deputy Secretary brought the ASPJ back to life.

The ASPJ is like a cat with nine lives. Secretary Cheney says cancel the program, but then Secretary Atwood, a man who suggested canceling the program 5 months earlier, says no; it should be continued.

If this is not crazy enough, at roughly the same time as Mr. Atwood canceled Mr. Cheney's cancellation, the U.S. Air Force canceled its 60-percent participation in the program. In January, Secretary Cheney proudly put the Air Force part of the ASPJ Program on the list of terminated programs he presented to Congress. This left the Navy all alone with rising ASPJ unit costs.

This could almost be comical if billions of dollars and national security were not at issue.

This spring, the inspector general released the results of his report on the ASPJ. Some of the results were:

First, ASPJ did not pass effectiveness, performance, or reliability standards;

Second, the Navy plans to spend over $1 billion producing the ASPJ before further tests are completed;

Third, the Navy and a top Pentagon procurement panel essentially whitewashed bad ASPJ test results to make it look good; and

Fourth, the Air Force's withdrawal from the ASPJ Program will inflate ASPJ unit costs.

In our hearing on this system last May, inspector general and General Accounting Office witnesses recommended against any further funds for the ASPJ in fiscal year 1991.

To top all of this off, Mr. President, I have received new allegations of abuse relating to the ASPJ. The charges claim that over 30 contract specifications have been waived for an ASPJ contractor. This could indicate lowered quality standards for the ASPJ. I have referred this and other allegations I received after an oversight hearing this spring to the Defense inspector general for investigation.

In light of this, my amendment seems mild. We are not killing the ASPJ, we are simply saying what Secretary Cheney and his executives should have said last summer, which is: Fly Before You Buy—no more money will be wasted until the system proves itself.

This amendment also creates a budget line item for the ASPJ. This is because ASPJ costs are so deeply buried in the budget that it takes a GAO investigation just to find all of them. And finally, the amendment instructs the Pentagon to withhold all further production decisions until operational tests are completed. The current Pentagon schedule calls for the next production decision based only on inadequate tests to be conducted by ASPJ contractors in ASPJ contractor factories. This is an end run around all of the Pentagon's independent testing office and is bad procurement policy.

Mr. President, there is no better example than the ASPJ of a Pentagon program that does not deserve a large influx of scarce defense dollars. This amendment is consistent with White House policy, congressional policy, and just plain common sense.

I ask for my colleagues' support.

Mr. President, I ask that a summary of the IG investigation, Pentagon memoranda, several press clippings, and other background material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF DOD IG INVESTIGATION OF THE ASPJ MAY 1990

Tests to date indicate that the ASPJ does not meet effectiveness (performance) or reliability standards.

Deputy Secretary Atwood was aware of ASPJ performance and reliability failures and a $1 billion understatement of costs when he approved low rate production in August, 1989.

The Navy currently plans to commit $1 billion on production contracts before operational tests are completed. $668 million is already on contract.

The Navy's arguments in support of ASPJ production, vendor base dry up and 1,000 aircraft without jammers, was overstated.

The Air Force withdrawal from the joint Navy/Air Force program will increase unit costs to the Navy.

The Navy Acquisition Review Board, chaired by the NAVAIR Commander, unduly directed operational testers to present favorable test results during the Defense Acquisition Board review process.

The Review Board directed such actions because the testers briefed test results and conclusions that did not present a clear and supportive recommendation for initial production.

The C3I Systems Committee provided minutes of their review of the ASPJ program to the Defense Acquisition Board that falsely stated that the ASPJ had satisified test requirements and that the Navy testing commander fully supported initial production.

[From the New York Times, July 9, 1990]

PENTAGON PLANS $4 BILLION DEVICE THAT HAS FAILED KEY FLIGHT TESTS

(By Eric Schmitt)

WASHINGTON, July 7.—Breaking its own rules on buying major new weapons, the Pentagon is pressing ahead with a $4 billion electronic radar-jamming device that has failed crucial flight tests on fighter planes it is designed to protect.

The system, the Airborne Self-Protection Jammer, has provoked debate at the highest levels of the Pentagon and become a litmus test of Defense Secretary Dick Cheney's ability to reverse a decadelong pattern of buying weapons before all the bugs have been worked out.

Under Mr. Cheney's direction, the Pentagon last summer adopted guidelines requiring that major projects pass strict performance tests before the Government buys them. The guidelines were intended to guard against embarrassing failures in major projects such as occurred with the Divad, an antiaircraft gun that the Pentagon spent $2 billion on, but canceled in 1985 after it failed in tests.

The battle over the jammer also underscores a frantic scramble among Pentagon weapons-buyers to secure a piece of the dwindling military budget for their pet projects.

The jammers are designed to identify dozens of incoming radars, distinguish which are the most threatening to the plane, then emit electronic signals to block or confuse the enemy air defenses that aim deadly antiaircraft missiles. The system was designed to handle more enemy radars more efficiently than existing jammers.

The Defense Department has spent more than $1 billion on the project, but the system is five years behind schedule and engineers have yet to build a prototype that works as promised. The Air Force, which was to have been the jammer's largest customer, has dropped out of the project because the system costs too much.

Internal Defense Department memorandums indicate that senior Pentagon officials, including the Deputy Defense Secretary, Donald J. Atwood, expressed grave reservations about the program last year. Mr. Cheney, in fact, approved a decision to cancel the program.

A few days later, intense lobbying by the Navy, which argued that 1,000 warplanes would be vulnerable to attack without the jammers, persuaded senior officials to award production contracts for the first 100 devices last fall. The decision to proceed was made despite the new Defense Department acquisition guidelines.

"This program is an example of absolutely thumbing your nose at the systems of checks and balances," said Senator David Pryor, an Arkansas Democrat and the jammer's fiercest critic in Congress.

Flight-test results on the jammer's effectiveness and reliability are not expected until 1992, and the program's supporters and opponents are bracing for a showdown in the next several weeks, when Congress will decide whether to approve the Pentagon's request for $173 million for a second batch of jammers.

PRICE RISES TO $4 MILLION

The devices initially were to cost about $3 million each, but the Air Force's decision to drop out of the program is likely to raise the cost to about $4 million, some experts said.

Mr. Pryor and other critics argue that the program should be canceled or, at the least, delayed until flight-test results are available. Moreover, they say that the easing of tensions with the Soviet Union and the emerging democracies in Eastern Europe has diminished a major threat to United States warplanes.

Pentagon officials say that the need for the jammers is too great and the problems with it too small to warrant canceling the program. They say that flawed testing methods were largely to blame for the test failures and that modifications that have been made since the tests were conducted

have yielded near-perfect results in laboratory simulations.

Mr. Atwood has promised Congress that the Pentagon would not spend anymore money on the jammer until it met all performance standards. "This system, if it proves out in tests, will be well worth everything we put into it," Mr. Atwood recently told the Senate Governmental Affairs Subcommittee on Federal Services. "If it does not, we will cancel it."

Great expectations have enveloped the jammer since its beginning 15 years ago, when Navy and Air Force engineers set out to build a sophisticated electronic countermeasure device to protect United States warplanes on the battlefields of the future.

In the largest electronic combat project pursued jointly by the Navy and Air Force, the Pentagon planned to buy the jammers in bulk, about 2,300 in all, with 800 going to the Navy. The Pentagon said buying the jammers in bulk would save hundreds of millions of dollars.

But tests in 1988 and 1989 at the China Lake Naval Air Weapons Center in California and at Eglin Air Force Base in Florida showed that the device, carried aboard F-16 and F-18 fighters, had difficulty detecting, identifying, and jamming some older types of radar. The tests also revealed serious problems with the jammer's reliability and its ability to diagnose internal malfunctions.

Engineers have struggled for the past two decades to develop electronic defensive systems, but Anthony R. Grieco, the Defense Department's director of electronic combat, concedes that such devices' reliability has been "poor."

A classified General Accounting Office report shows that four jamming devices bought by the Air Force have failed operational tests. In some cases, it said, entire systems were bought, at $200 million to $300 million, and shipped to warehouses, never to be used.

The Airborne Jammer's poor test results set off a debate in the Pentagon last summer, putting military program managers against civilian Defense Department budget officials intent on canceling a troubled program.

A Defense Department Inspector General's investigation earlier this year found that acquisition officials had manipulated the testers' reports to play down the device's flaws and emphasize its strengths.

The Pentagon denies that the test results were misrepresented in any way.

Pentagon program managers are under increasing pressure to present projects in the most optimistic light to secure financing in competition with other projects, acquisition experts say.

Internal Defense Department memorandums that tell of last summer's debate over the device indicate that senior Pentagon officials had strong reservations about the jammer.

"Terminating the ASPJ program must be seriously considered due to issues of operational effectiveness, demonstrated reliability and affordability," said Michael P.W. Stone in a July 13, 1989, memorandum to members of a high-level Pentagon acquisition review board. Mr. Stone was then acting as Under Secretary of Defense for Acquisition.

By the end of July, a compromise plan was under discussion to begin limited production. "If you decide to go ahead with a very limited production, then it must be mandatory that full demonstration of the performance and reliability be demonstrated within one year," Mr. Atwood wrote on July 31, in reply to Mr. Stone. "If it is not, then the program must be canceled."

In August, just weeks after Mr. Atwood outlined the Pentagon's new acquisition guidelines, the Defense Department approved the limited initial production.

"Here was a major decision right on the heels of their stated position where they just ignored the things they set out," said Louis J. Rodrigues, who is responsible for electronic warfare issues at the General Accounting Office.

Navy and Pentagon officials say that despite dramatic political changes in the world, the Airborne Jammer, flaws and all, is still more effective than any existing alternative.

"We have had growing pains in the electronic combat business, no question about that," said Duane P. Andrews, the Assistant Secretary of Defense for Command, Control, Communications and Intelligence. "But we can fix this a lot cheaper than starting over from scratch."

RADAR JAMMER FOR WARPLANES RUNS INTO SNAGS

(By Richard H.P. Sia)

WASHINGTON.—Future production of Westinghouse Electric Corp.'s much-ballyhooed radar jammer, a computerized set of black boxes designed to protect U.S. fighter pilots from enemy missiles, has run into strong interference because of marginal test results, long delays and runaway costs.

At stake are billions of dollars in future military contracts, potentially hundreds of jobs and, some defense officials say, the survival of subcontractors and parts suppliers.

Also at stake, critics of the project argue, are the lives of U.S. pilots who need reliable protection from radar-guided missiles and other air defenses into the next century.

The project, dubbed the Airborne Self-Protection Jammer and made at the Westinghouse plant near Baltimore-Washington International Airport, doesn't provide the needed protection—at least not yet, according to Pentagon reports.

"I don't understand why we continue to sink money into this weapon, which doesn't work, at a time when we are being forced to slash other weapon systems that have already proven to be effective." Sen. David H. Pryor, D-Ark., said recently.

Troubles for the project have been mounting steadily this year.

At the Pentagon, the chief weapons tester recently opposed a Navy plan to buy more than a quarter of its planned new radar jammers before tests are completed to show off the system works as designed. Testing is not scheduled to end until April 1992.

The ASPJ's inability to meet established cost, performance and reliability criteria does not justify going beyond the initial production units needed for testing, said Robert C. Duncan, director of Operational Test and Evaluation, in a March 29 memo obtained by The Sun.

It was an unusually tough call, considering that the testing office has been criticized for years for being too timid in evaluating the performance of complex weaponry.

An unclassified version of the 1989 annual report by Mr. Duncan's office, released last month, confirmed that the Navy's initial operational tests on prototypes rated the system marginally effective and marginally suitable for aerial combat. It added that Air Force testers found the jammer "was unable to meet several user requirements."

The Air Force, which was to have been the biggest buyer of the high-technology jammers pulled out of the program in January, mainly because it was too expensive.

Last week, an Air Force spokesman said the service had no plans to buy even a smaller, cheaper version of the jammer recently offered by Westinghouse, preferring instead to seek funds in the fiscal 1992 budget for an alternative system.

Some Navy officials, who see the entire project becoming more vulnerable to cancellation, are bitter. The Air Force is cutting everything to get money for the B-2 [Stealth bomber] groused a senior Navy officer.

Pentagon Inspector General Susan Crawford and the General Accounting Office are wrapping up separate investigations on how the flawed project was able to move from the drawing board to the initial production phase.

Ms. Crawford already has urged the Navy to stop work temporarily so that costs can be re-evaluated in the wake of the Air Force withdrawal.

Deputy Defense Secretary Donald J. Atwood, a key player in major procurement decisions, has been concerned recently that the project may have advanced too hastily, said a knowledgeable Pentagon source. "He's the kind of guy who believes you can't put quality in at the end of a program," the source said.

In Congress, longtime critics of Pentagon weapons-buying practices have renewed their attack on the project, which they consider the latest in a series of boondoggers since the ill-fated DIVAD anti-aircraft gun was canceded in 1985. A hearing has been set for Friday by Senator Pryor, who worked successfully last fall with Sen. Charles E. Grassley, R-Iowa, to cut 95 percent of the project's current financing.

The Airborne Self-Protection Jammer—produced jointly by Westinghouse Electronic Systems Group, based near BWI Airport, and ITT Avionics, of Nutley, N.J.—is designed to increase the ability of fighter planes to survive in combat by sorting out a barrage of enemy radar signals and then jamming or deceiving the radars of the most threatening anti-aircraft weapons.

The jammer consists of five to seven boxes installed inside each plane, unlike more typical external jamming "pods" that create drag and take up space that could be used for weapons.

It has been touted widely as the most advanced in the U.S. inventory, capable of defeating any known enemy weapons system while being easily reprogrammed to counter new threats through the year 2000.

The project began in 1976, when defense officials, seeking to minimize wasteful duplication, ordered the Air Force to collaborate with the Navy on a common jammer for Air Force F-16s and Navy F/A-18s, F-14a, A-6Ea and AV-88s.

Production was supposed to begin in 1965, but it fell four years behind schedule because of several technical difficulties, the GAO reported. By lst August, when the project advanced to limited production, its original $1.8 billion price tag had soared to between $4.8 billion and $5.5 billion for 2,200 jammers—1,450 for the Air Force and 750 for the Navy. A subsequent estimate before the Air Force withdrew from the program pegged the cost at $9 billion.

Representative Thomas McMillen, D-MD-4th, whose district includes the Westing-

house unit producing the jammer, has spearheaded a defense of the project, but his efforts have been modest, even as threats to its survival have increased. In February, he criticized the Air Force withdrawal in a House floor speech and promoted the radar jammer as "the most thoroughly tested system in the history of jammer developments," with more than 8,000 hours of ground tests and 500 hours of flight tests.

"ASPJ is ready, and it performs," he said.

Neither contractor concedes the program is in serious trouble, and a confident ITT spokesman even declared recently, "I don't believe the Air Force is out of the picture."

Both companies said the current production model of the jammer is an improvement over the 12 prototypes that performed poorly in the initial testing.

Early tests failed to evaluate what they consider probably the best feature of the jammer, namely its ability to wreak havoc on air-defense radars to prevent missiles from ever being launched, they said.

The latest congressional attack aims squarely at heading off Navy plans for a second production lot of radar jammers which would add another 127 devices to an initial order last October of 100.

Senator Pryor, who thinks high-technology military hardware should not be bought in mass quantities until it passes rigorous performance tests, has advocated putting the jammer program on hold "until its bugs can be worked out."

"We all know the power game around here," he said. "After one year of production, after another quarter-billion dollars into the jobs and factors associated with the production, it will be almost impossible to stop."

[From Defense Week, May 14, 1990]

NAVY GAVE "INCOMPLETE" ASPJ TEST DATA

(By Tony Capaccio)

Following orders to stress positive test results, Navy officials last summer presented "incomplete and misleading" information to Pentagon officials reviewing a $3.7 billion aircraft jammer program, according to a report by the Pentagon's inspector general.

The misleading description of the test results was part of a flawed Pentagon decision last August to produce the first 100 Airborne Self Protection Jammers (ADPJ), according to the report and congressional testimony.

Despite eight years of development, the system has yet to demonstrate that it can protect pilots and meet its reliability goals. The Navy intends to buy 770 of the jammers for $3.5 million apiece.

The program came under fire Friday during a hearing convened by Sen. David Pryor (D-Ark.), chairman of the Senate Governmental Affairs subcommittee on federal services.

Combined, the testimony and documents give a rare inside glimpse at a breakdown in the oversight of billion-dollar weapons systems.

The ASPJ is touted as the Pentagon's next generation aerial combat radar jammer. But citing cost and performance concerns, the Air Force pulled out of the program this year.

Navy testers got their orders to soft-peddle the test results during an April 20, 1989 meeting of the ASPJ Acquisition Review Board, according to service documents uncovered by the IG. According to the meeting minutes, "it was also recommended that positive test results would be stressed" to a Pentagon board of officials reviewing the program.

Deputy Inspector General Derek Vander Schaaf in his testimony said these instructions led Navy testers to provide "incomplete and misleading" information to the Pentagon panel. The Navy ADPJ Board was chaired by now retired Vice Adm. J.B. Wilkinson, then-commander of the Naval Air Systems Command.

The Navy testers failed to inform the panel of major limitations in the testing and "significant" unresolved testing issues concerning the jammer, Vander Schaaf said.

According to Vander Schaaf, the transmittal of misleading information about the test results did not stop with the Navy. Instead, the panel of Pentagon communications experts informed the DAB before its decision that the Navy's top operational tester "fully supported" a decision to produce low quantities of the jammer, Vander Schaaf said.

But when questioned by IG investigators, the test commander said he did not back a low-rate production decision, Vander Schaaf said.

Despite the rosy test assessment, DAB members were aware of the ASPJ's problems when they decided to allow production of the first 100 systems, Vandar Schaaf said. The decision led to the award of $420 million in contracts to ITT Avionics and Westinghouse Electric Systems Group.

Internal Pentagon documents reveal that weeks before the DAB decision, two board participants, Deputy Secretary of Defense Donald Atwood and then-acting Under Secretary for Acquisition Michael Stone, considered killing the 14-year-old program.

Atwood recommended July 31, 1989 that the jammer be canceled if it did not demonstrate by this summer it can protect pilots in combat, according to an internal memo.

Atwood wrote to Stone, who is now secretary of the Army, that it was difficult to envision how the jammer could within a year demonstrate its effectiveness "given that the system has been in development [since 1976] and as yet has not proven out." Atwood also wrote it was mandatory that the program be canceled this year if it did not demonstrate its performance and reliability.

But according to the Navy's operational testing schedule it will be difficult to meet Atwood's deadline because the next round of exercises are not scheduled to begin until August 1991 and run through April 1992.

Navy Secretary Lawrence Garrett testified that he was confident in the service's ability "to manage satisfactorily the ASPJ program and successfully fulfill our requirement." Garrett said that the contract for the first 100 jammers "is always under scrutiny" and that the Navy was considering delaying award of a second contract for up to 127 more jammers until additional testing is completed.

Garrett said that ASPJ performance demonstrated during the early operational tests "was superior to any existing system in terms of the number and types of threats to which it responds. The performance can only improve from there."

In contrast. Stone warned Atwood last year: "There is clearly no doubt that the ASPJ has not satisfactorily met the criteria to proceed to low rate production . . . Despite a program that now goes back almost 13 years, system progress has been extremely slow and many enemy threats cannot be satisfactorily handled."

THE DEPUTY SECRETARY OF DEFENSE,
Washington, DC, July 31, 1989.

Memorandum for Mike Stone.

Subject: Airborne Self Protection Jammer (ASPJ).

This is in response to your memorandum of July 25, 1989, relative to the Airborne Self Protection Jammer.

Your memorandum indicates that the program has been in development since March 1976, and to date it has not satisfactorily passed the tests established relative to cost, performance and reliability. This is a clear case of not meeting the exit criteria established for transition from the Full Scale Development Phase to the Production Phase. Therefore, it appears mandatory that one of two actions be taken:

1. Cancel the program.

2. Discontinue all production efforts and relegate the program to an effective test and evaluation activity. If the system demonstrates the required performance and reliability and is cost effective, then a production program could be initiated.

There is one alternative to the above which could be considered. This is based on the fact that the services feel that the system is essential and that it will ultimately meet the performance and reliability targets. If this is the case and can be demonstrated within a reasonable period (i.e. one year), then in order to maintain program continuity, it might be acceptable to proceed with a very *limited* production phase while test and evaluation is conducted.

However, it is difficult to see how this is realistic given that the system has been in development for 13 years and as yet has not proven out. If, in spite of this you decide to go ahead with a very limited production, then it must be mandatory that full demonstration of the performance and reliability be demonstrated within one year. If it is not, then the program must be cancelled.

DONALD J. ATWOOD.

Mr. PRYOR. Mr. President, I want to take a personal opportunity at this time to thank Kirk Robertson, on the Governmental Affairs staff who, for a period of 1 year, has tracked this system, who has found the savings of several million dollars in this system and who has also, in working with the minority and majority staffs, come up, we think, with a very good solution.

I want to thank Kirk Robertson, and I want to thank both of the managers for accepting what I believe to be acceptance of this amendment.

Mr. President, I have nothing further. I yield the floor.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Arkansas.

The amendment (No. 2549) was agreed to.

AMENDMENT NO. 2550

(Purpose: To Improve the Process for Base Closures and Realignments)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection the pending amendments are set aside.

The assistant legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] (for himself, and Mr. FORD, Mr. CRANSTON, Mr. MCCONNELL, Mr. LAUTENBERG, and Mr. SHELBY), proposes an amendment numbered 2550.

Mr. BUMPERS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

CLOSURES AND REALIGNMENTS OF MILITARY INSTALLATIONS

(a) FORCE-STRUCTURE PLAN AND TERMINATION OF OPERATIONS INSTALLATIONS OUTSIDE THE UNITED STATES.—(1) The Secretary of Defense shall formulate a force-structure plan for the Armed Forces of the United States based on an assessment by the Secretary of the probable threats to the national security in the five-year period ending September 30, 1996, and of the anticipated levels of funding that will be available for national defense purposes during such period. Such plans shall include, without any reference directly or indirectly to military installations inside the United States that may be closed or realigned under such plan—

(A) a description of such assessment;

(B) a description (i) of the anticipated force structure during and at the end of such period for each military department (with specifications of the number and type of units in the active and reserve forces of each such department), and (ii) of the units that will need to be forward based (with a justification thereof) during and at the end of such period;

(C) a description of the anticipated implementation of such force-structure plan; and

(D) the plan described in paragraph (2).

(2) The Secretary shall formulate and implement a plan for reducing and terminating military operations by the United States at installations outside the United States.

(b) REPORTING REQUIREMENT.—(1) As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing—

(A) the force-structure plan formulated pursuant to subsection (a)(1);

(B) a description of the actions carried out and to be carried under subsection (a)(2), including a list of the installations outside the United States at which military operations by the United States will be reduced or terminated and an estimate of the extent of each such reduction;

(C) a legislative proposal containing (i) a fair process, as described in paragraph (2)(A), by which military installations inside the United States could be selected for closure and realignment as part of the implementation of the force-structure plan referred to in subsection (a)(1), and (ii) the policy referred to paragraph (2)(B); and

(D) a proposal for assistance (including worker retraining and economic conversion assistance) for individuals and communities that will be adversely affected economically by the closure or realignment of military installations inside the United States under such force-structure plan, including recommendations for any legislative action that the Secretary determines is needed to provide such assistance.

(2) The legislative proposal referred to in paragraph (1)(C) shall provide—

(A) administrative procedures and a methodology which result in a fair and non-partisan process for selecting military installations inside the United States for closure or realignment solely on the basis of objective criteria designed to achieve effectively and efficiently the military objectives of the Department of Defense contained in the force-structure plan transmitted under paragraph (1). The Secretary is urged to consult with Congress on a bipartisan basis as he develops his legislative proposal.

(B) A policy ensuring the prompt environmental restoration of all property that will become excess to the needs of the Department of Defense as result of a military installation inside the United States being selected for closure or realignment.

(3) The proposal for economic assistance referred to in paragraph (1)(D), in addition to providing for economic assistance generally to individuals and communities adversely affected economically by the closure or realignment of a military installation, shall provide for appropriate economic assistance to State and local governments that made expenditures in reliance on, and in support of, Federal plans to establish or continue to operate a military installation that was not opened or was selected for closure.

(c) MILITARY INSTALLATIONS INSIDE THE UNITED STATES.—(1) None of the funds available to the Department of Defense may, except as provided in paragraph (4), the expended (whether obligated before the date of enactment of this act or not) to—

(A) identify, through any transmittal to the Congress or through any other public announcement or notification, any military installation inside the United States as a installation to be closed or realigned or as an installation under consideration for closure or realignment; or

(B) close or realign any military installation inside the United States.

until specifically authorized by law during the 102nd Congress or until September 30, 1991, whichever occurs first.

(2) None of the funds appropriated pursuant to authorizations in this Act may be obligated or expended, except as provided by paragraph (4), to initiate any study necessary to meet the requirements of section 2687 of title 10, United States Code, or the National Environmental Policy Act that are applicable to the closure or realignment of military installations.

(3) In providing for the repair and maintenance of facilities at military installations inside the United States during fiscal year 1991, the Secretary of Defesne and the Secretaries of the military departments shall, except as provided in paragraph (4), expend an amount during such fiscal year, with funds appropriated for operation and maintenance pursuant to authorizations made by this Act and with other funds that may be available for such purpose for such fiscal year, for repair and maintenance at each such installation equal to not less than 50% of the average annual amount expended for repair and maintenance of facilities at the installation concerned during fiscal years 1985 through 1989.

(4) Paragraphs (1), (2), and (3) shall not apply to—

(A) Closures and realignments carried out under title II of Pubic Law 100-256; and

(B) closures and realignments to which section 2687 of title 10, United States Code, is not applicable.

(d) PROHIBITION AND REMEDIAL ACTION.—(1) The provisions of the transmittal to the Congress by the Secretary of Defense, dated January 29, 1990, identifying certain military installations as candidates for closure, and the provisions of any other proposal (whether transmitted to the Congress or not) developed during the year ending on the date of the enactment of this Act with respect to identifying military installations for closure, shall not be used as the basis for any decision concerning the assignment of mission, personnel, or resources to any installation identified in such provisions.

(2) The Secretary of Defense—

(A) shall review all actions taken during the year ending on the date of the enactment of this Act with regard to any installation identified in any provision referred to in paragraph (1); and

(B) shall take such steps as may be necessary to remedy the damage to such installations that has resulted from any such action.

(e) DEFINITIONS.—(1) For purposes of this section—

(A) the term "military installation" means a base, camp, post, station, yard, center, homeport facility or any ship, or any other activity under the jurisdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility, except that such term shall not include any facility used primarily for civil works, rivers and harbor projects, or flood control projects;

(B) the term "United States" means the several States and the District of Columbia; and

(C) the term "realignment" has the meaning given such term by section 2687(e)(3) of title 10, United States Code.

(2) Section 2687 of title 10, United States Code, is amended—

(A) by striking out paragraph (2) of subsection (a) and inserting in lieu thereof the following:

"(2) any realignment with respect to any military installation referred to in paragraph (1) that would result, during any two-year period, in a reduction of more than 1,000 in, or by more than 50 percent of, the number of civilian personnel authorized to be employed at such military installation at the beginning of the two-year period concerned; or"; and

(B) in subsection (e)(3), by striking out "includes" and inserting in lieu thereof "means".

(3) For the purpose of making determinations with respect to closures and realignments carried out on or after the date of the enactment of this Act, the amendment made by paragraph (2)(A) shall be applied to include reductions of civilian personnel occurring during any two-year period beginning after the date that occurred two years before the date of the enactment of this Act.

(E) CLARIFYING AMENDMENT.—Section 2687(e)(1) of title 10, United States Code, is amended by striking out "under the jurisdiction of the Secretary of a military department" and inserting in lieu thereof "under the jursdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility,".

Mr. BUMPERS. Mr. President, this is the so-called base closing amendment.

Mr. NUNN. Mr. President, would the Senator yield? Do we have a time agreement?

Mr. BUMPERS. We have 40 minutes equally divided. That is not a matter of record.

Mr. WARNER. Mr. President, I urge our colleague from Arkansas to reduce that amount of time.

Mr. BUMPERS. Perhaps we can. I would like to be accommodating. I may be able to yield time back, but I have two or three people who want to speak.

Mr. WARNER. Could we start with 30 minutes equally divided in the hopes that could be efficiently used and then determine in the course of the amendment if a few minutes are additionally required?

Mr. BUMPERS. I would rather do it the other way. We are going to spend 10 minutes here arguing.

Mr. NUNN. May I suggest we have a 30-minute time agreement with 20 minutes on his side and 10 minutes on the opposition.

Mr. BUMPERS. I will buy that in a New York minute.

Mr. NUNN. I ask unanimous consent there be a period for 30 minutes on the Bumpers amendment, 20 minutes managed by Mr. BUMPERS, and 10 minutes managed by the managers of the bill, with no second-degree amendments, and with a vote to occur on expiration of the time on or relation to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. This amendment is characterized as the base closing amendment. I hope that a number of colleagues who are not on the floor are watching this debate because I consider it a very serious one. I hope they do too.

Most people know that back in January of this year, Secretary Cheney sent us a list of bases that he proposed to close. On the face of it, there is absolutely nothing wrong with that. He was complying with the law. He did what he had the authority to do.

Under present law, he would come back after the first of the year and formalize these, along with an environmental statement, and say these are the bases I am going to close.

Nobody, we have debated this in a small way earlier in the day, no Senator, no Congressman likes to get a military establishment closed in his State.

As I said earlier today, the late Senator JACKSON used to say he wished he did not have any bases in his State because he got no credit for getting them, and he got all the flak for losing them.

But I will tell you something. Having said that, you are dealing with human trauma. You are dealing with people's jobs, their livelihood. This is not an amendment that says you cannot close bases. Everybody in this audience, everybody in the Senate, and the Congress knows we have to close bases.

What we are talking about is how are we going to close them? What kind of an environmental impact statement, what kind of criteria?

Mr. President, after Secretary Cheney submitted his list of bases that he proposed to close over here, a study was done. I invite your attention to the results of that study. The study showed that 99 percent—I repeat 99 percent—of the 44,000 civilian jobs that would be lost happened to be in Democratic congressional districts.

Mr. President, I cannot speak for Navy and Marine Corps or Air Force, but 60 percent of the Army bases in this country are in Democratic districts; 59 percent of the membership of the U.S. House of Representatives is Democratic; and here we have 99 percent of 44,000 jobs to be eliminated under the Secretary's base closing proposal in Democratic districts.

Some people came up to me today and said, "maybe there are just more bases there." I just gave the statistics showing you that the number of Army bases is almost identical to the number of percentage Democrats in the House. Do you know what the statistical chances of that happening by coincidence are? One in 244. Do you want to hear the rest of the story? I invite my friends on the other side of the aisle to indulge me in something that is not meant in any way as a reflection on them. I am not sure if the Secretary of Defense were a Democrat, it would not have turned out the very opposite.

But in addition to 21 base closures, there are 14 realignments. What is that? That is where you take men, planes, tanks, airplanes, from one base and transfer them to another. So we find that not only in the 21 bases closures are 99 percent of the jobs in Democratic districts, but how many of these people who are being transferred to other bases do you think are going to bases where it is a Republican district? You guessed it, Mr. President; 87 percent.

Some of us may not be "broke out with brilliance," as we say back home, but you do not have to be a rocket scientist to know this did not happen by coincidence.

So, Mr. President, what this amendment does is say, Mr. Secretary, we have a problem with this. We are not really shaming you or anything like that. And I know that you are going to say, Mr. Secretary, there they go again; they say they want to cut defense spending, but you try to cut a little military base in their State, and they squeal like a pig under a gate.

Do you know what? Since that list was submitted to Congress, President Bush has said that three times. Well, yes, I am squealing like a pig under a gate. If I am going to lose a base, I want to lose it on the criteria that Congress has set up, on an environmental impact statement, on an economic impact statement; but, above all, Mr. President—and this is where I invite my distinguished friends from the other side of the aisle to join me on this, and forget politics for a moment—the U.S. Congress is entitled to know in these very dramatic times when we are cutting down on manpower, cutting down on weaponry, the people of the Congress and people of the United States are entitled to know what is our force posture going to be: What is our force structure going to be for the next 5 years? And then once you tell us that, Mr. Secretary, you can go back, and on September 30 of next year you can submit another list of bases. But we do not want a list from you, Mr. Secretary, that is highly suspect on a political basis, without us even being privy to what our force structure is going to be over the next 5 years.

People may come in here and they may defeat this. But I will tell you one thing, the people of this body, you take the politics out of it and assume there is not a single base in a single Senator's district being closed, and this amendment which says do not go running off and closing bases that we may want left open because we think they make good military sense. So give us your force structure, then submit us a list, and we will consider it.

Mr. President, incidentally, I ask unanimous consent that Senator HOLLINGS be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I am not trying to slow down the process. Speed is just fine with me, if we are going to do this. But I want this to be done in a fair and impartial manner.

I have some other things I want to say on this amendment later on. How much time do I have remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 12 minutes remaining.

Mr. SHELBY. Mr. President, I rise today in support of the amendment of the Senator from Arkansas. I believe that this amendment would place an element of fairness into the current base closure process.

While Secretary Cheney is certainly within his rights to propose or recommend the closure or realignment of military facilities, it seems to this Senator that the list that was received as part of the fiscal year 1991 defense budget was put together in a haphazard fashion, with little thought to economic or environmental effect. Moreover, this latest list was put together

without any real coordination within the services.

Fort McClellan, in my home State, is a perfect example of such an activity. I have found through many conversations with DOD and Department of Army officials, as well as through testimony before the Readiness Subcommittee of the Armed Services Committee that little or no thought was given to the environmental impact of the closure of this military facility. Instead, a decision seems to have been based solely on the size of the base.

The Alabama delegation came in possession of the memo that was the basis by which a decision was made. When asked, however, who was the author of such a memo, no officials within the Department of the Army would claim authorship. What we were left with was a decision to propose closure, but no one willing to tell us who made the decision.

The Bumpers amendment would put some sanity into this process. It allows for a more coordinated effort to be made before any further actions are taken on this or any new list that might be presented to Congress. I would have preferred a 2-year moratorium, instead of a moratorium of 1 year. However, the House has a similar provision in its bill that calls for 2-year period. Thus, adoption of this amendment would allow for a much better position in conference with the House than we currently maintain.

Mr. BUMPERS. Mr. President, I yield 3 minutes to my distinguished colleague from Kentucky, Senator FORD.

Mr. FORD. Mr. President, I rise in strong support of the Bumpers amendment on base closure and realignment. We have to bring some order to these proceedings, Mr. President, we must have a set and impartial procedure for establishing candidates for closure—if for no other reason than to avoid the air of capriciousness that surrounds the Cheney list of January.

I want to give you one case in point, that of the Louisville Naval Ordnance Station [NOSL], which embodies two of the major criticisms of the Cheney list. First, there have been allegations, backed up by head counts, that over 90 percent of the installations targeted for closure are in Democratic districts. Such is true of the Naval Ordnance Station; it is in the district of my friend RON MAZZOLI who, as a Democrat, has represented his district since 1970. Congressman MAZZOLI had a hard primary this year from which he emerged victorious, but the inclusion of the NOSL on the new closure list played a role in his opponent's attack against him.

Second, other than for reason of politics, there is no apparent justification for the NOSL even being considered for closure. As Acting Secretary of the Navy for Shipbuilding and Logistics, Frank Swofford said, "I find Naval Ordnance to be a gold mine of skills and opportunity that doesn't exist elsewhere." It is a unique installation which performs work done nowhere else in the world. When the guns on Navy ships run into trouble, as in the case of the U.S.S. *Iowa*, the Navy calls the Navy Ordnance Station. The NOSL is also the sole provider of overhaul and maintenance support for the Phalanx system, which is scheduled to remain in the Navy inventory for years to come, as well as for other weapons which will remain in use even though our active duty forces are being drawn down. Finally, the work force at the NOSL is top flight and highly skilled; its performance is absolutely beyond reproach.

I do not see how the Navy can honestly justify closing the Louisville Naval Ordnance Station. In fact, through an internal Navy document obtained a few months ago by a House defense subcommittee, we have already seen evidence that it cannot. That document indicated it would cost the Government $201.8 million to close down the NOSL, while only $1 million a year would be saved in the closure process. What kind of a hot deal is it that would take over 200 years to be realized?

The case of the Louisville Naval Ordnance Station is precisely why, Mr. President, we are so in need of the Bumpers amendment. We need a process which will guarantee that the next round of candidates for closure and realignment is politically impartial and that these bases really are no longer needed in the new defense environment. The Bumpers amendment will provide just that and I urge my colleagues to support it.

The PRESIDING OFFICER. Who yields time?

The Senator from Virginia.

Mr. WARNER. Mr. President, I rise in strong opposition to this amendment. Every night, just about, the Secretary of Defense is on national television trying to defend his actions in cutting back military personnel. The proposed plan by the President is 25 percent over 5 years, many of them being forced out against their will.

Every night, the Secretary is explaining how he has to cancel this contract and that contract. And now we are about to handcuff him and not allow him in an orderly way of managing, sizing down the Department of Defense and to leave all of the bases and installations in the various States of the Members of Congress.

Mr. President, the Senate Armed Services Committee, in its bill this year, carefully laid down some 12 pages here of guidelines by which base closures, installations, and the like should be eliminated from the future defense budgets.

I hope that the Members will not slip into this trap, as I call it, with no disrespect to my good friend, to really obviate the necessity of even putting this section in our bill. It would basically postpone it for 2 years, and allow us to stand back here and get the criticism from the American public that we are beginning to protect our own interests because we cannot face up to the fact that a reasonable management of this department requires at the same time we reduce people, the same time we reduce contracts, the same time as we reduce O&M and steaming hours and flying hours, and today we were able to curtail a pay raise, all of these steps to, in an orderly way, reduce the size of our defense establishment and sit back here and preserve as hallowed ground the bases and installations until the Members of Congress can cease to quarrel about it.

I hope the Members of this body will see through this amendment and it will not be accepted.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, while the Senator from Virginia is still on his feet, first of all I would like to say this does not postpone anything for 2 years. This amendment is not precisely the amendment that is in the House version. This says that the Secretary will submit a 5-year force structure to us, and that he will on September 30, 1991, just a little over a year from now, or when the 102d Congress changes the law and dictates otherwise, whichever is first, submit his base closures.

I want to correct the record on this. It is not a 2-year delay or moratorium for 2 years. I have two questions for the Senator from Virginia.

On page 295 of the committee report, the last paragraph, it says that:

> The committee anticipates that the Department will be providing the Congress a number of base closure decisions next year with the submission of the fiscal year 1992-1993 budget request. The committee expects that these decisions will be accompanied by a full description of the Department's 6-year force structure and basing plan for fiscal years 1992-1997. This long term force and base structure plan, addressing both domestic and overseas installations, will be essential to Congressional review of the Secretary's closure decisions. The committee serves notice that, absent a long term force and base structure plan accompanying recommended base closures, it will be impossible for the committee to adequately assess closure recommendations by the Department.

That is in the committee report. I ask the Senator, does he agree with that?

Mr. WARNER. Mr. President, it is important, and I agree with it.

Mr. BUMPERS. The Senator should vote for my amendment, because all it does is codify what he said. The words,

there is nothing mandatory here. You say the committee anticipates; the committee expects; the committee serves notice. The Secretary can thumb his nose at that, and you are powerless to do anything about it.

I am saying to the Secretary, you will do these things because they make good military sense; they make good economic sense.

Mr. WARNER. Mr. President, the time is short, and I will defer to the chairman momentarily.

The PRESIDING OFFICER. Who yields time?

Mr. WARNER. I yield myself time.

The PRESIDING OFFICER. The Senator has 7½ minutes.

Mr. WARNER. The schedule laid down in the proposed amendment by the Senator from Arkansas simply would not enable many of these things to be accomplished for a period of 2 years. I say to my good friend, I just think it is a management handcuff that the Secretary of Defense does not need at this critical time.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, I agree with some of the points the Senator from Arkansas has made. I think the Secretary would have been well advised instead of announcing a list of bases to be closed to have formed another commission, which worked so well on the last commission where Congress was basically in on the act and was assured that the commission that was going to look at these bases was going to be a nonpartisan commission composed of people who had the respect of both sides of the aisle so that we could take politics out of it.

That is the reason that Base Closing Commission report was approved by the Congress, even though there was some 88 bases closed, or something of that nature. There were a lot of people who got hurt in that, a lot of communities that got hurt, but Congress accepted it. It was not even a close vote, because they thought it was fair and impartial.

The Secretary of Defense and I had a conversation last November. My advice to him was then when he told me he knew there were going to more bases that had to be closed, I agreed with him that there would be and advised him to go back to the same route we did before with the Base Closing Commission. I am sure for his own good reasons he thought that was not the way to go, and he went the other direction.

The result is we have a whole lot of communities now that think their bases are going to be closed, with a whole list of bases being closed, and with charges of tremendous bias and partisanship in the entire exercise.

I have to say, frankly, that I have not looked at the details of the list. I have not looked at whether it is a Democratic district or Republican district. I know the Senator from Arkansas has taken a closer look at this, and I trust his analysis is correct.

Our committee is going to have to get into this, but I urge all of our colleagues, do not tie the hands right now of the Secretary of Defense to the point that we are saying to the whole country: We are going to reduce defense force structure 25 percent over the next 5 years, but for the next 2 years we are putting a moratorium on, and you cannot do anything about military bases.

We all know that certain installations have to be closed, but as I understand the Bumpers' amendment, it would not allow any kind of identity or identify through any transmittal to Congress, or any other public announcement or notification to any military installation of the United States as an installation to be closed or realigned.

It would not allow the closing or realignment of any military installation, and it would not even allow the study, initiating a study necessary to meet the requirements of the National Environmental Policy Act. That is the way I read it.

Mr. President, I just believe this amendment goes too far. I think we would be putting the situation in almost an absurd position where we know we are reducing force structure; we know we are reducing expenditures in the military; we know we are pulling back forces in bases around the world. And we simply have to be willing to make some changes.

I hope this amendment will not be agreed to. I just think our colleagues ought to recognize the things the Secretary already has to do under existing law. Under existing law, the bases that he wants to close, he first has to send up in a budget. He has done that. Then he has to send up in a subsequent budget six reports. That means next year, he will have to send up six reports relating to these bases. He cannot do anything before that.

It is not like anything is going to happen in the next 6 months; it is not. He has to send up an economic report as to the economic affect; he has to send up an operational report; he has to send up an environmental report; he has to send up a local fiscal report; he has to send up a budgetary report; and he has to send up a strategic report.

After that, Congress has 30 calendar days, or 60 legislative days—30 days or 60 days—to react. So Congress has the ability to react in that time. In addition to all of that, the only way you can close any bases is to seek appropriations from the Congress to close the base. We would have to fund the base closures.

There is no appropriation being requested now to close these bases. That will come next year. If the Secretary does not change his mind on these bases, he will ask for appropriations. Without the money, he cannot close the bases.

So setting up this additional 2-year or 1-year—whatever it is—moratorium saying they cannot initiate or even study it just seems to me goes too far. We are going to be in conference on this proposal because the House has passed something very similar to this, and I would say that in the conference we are going to have some time to work on it and perhaps to come up with something more like a commission.

So the Senator raises a legitimate point, but if this provision is put on the Senate bill tonight, there will not be any flexibility in Congress. This will be the law. We are basically going to be saying to the Secretary of Defense and executive branch: Reduce military expenditures by billions of dollars. We are cutting your budget $25, $26 billion, but you cannot even study closing a base.

I think that would be not only counterproductive, I think it would really send a signal to the American people that the Congress has a lot of rhetoric in terms of cutting defense expenditures, but when it comes down to the base structure, we are not willing to make any adjustments.

I would have to close by saying that, while I am against this amendment, I can assure the Senator from Arkansas that whatever we come out of conference with will be aimed to prevent bias and partisanship in any kind of final package of bases to be closed. I can assure him that we will not be permitting that in any kind of base package that comes out of our committee. I am sure it will not be permitted on the appropriation bill, and I am sure it will not be permitted when we have an appropriation requested for base closure. We are not going to see a Secretary of Defense under a Republican administration pinpoint Democratic bases all over the United States and exempt Republican bases and close Democratic bases. I am not charging he is doing that because I have not been able to analyze it. I have not, frankly, had time. But I can assure you that is not going to happen in the final analysis.

I urge this amendment be defeated.

Has all time expired?

The PRESIDING OFFICER. The managers have 30 seconds. The Senator from Arkansas has 6 minutes, 13 seconds.

Mr. NUNN. Mr. President, when the Senator from Arkansas is prepared, we will yield back the remainder of our time.

Mr. BUMPERS. Mr. President, I want to point out to the Senator, and I think he already knows this, the Senator from Georgia heard my statistics

on what we consider to be the political aspects of this, did he not?

Mr. NUNN. I did.

Mr. BUMPERS. Can the Senator tell me whether or not he could go with me to Blytheville, AR, and speak to roughly 25,000 people there with those statistics and say to them that this has been a very closely studied proposition and we have decided that our force structure, which we do not know yet what it is going to be, demands that we close and realign these bases, and it is a sheer coincidence that 99 percent of these jobs just happen to be in Democratic districts and the fact that 87 of the jobs in realignment go to Republican districts. Please do not think that is political now; I am sorry about your getting hurt in this.

Do you think you could go do that with a straight face, I ask the Senator?

Mr. NUNN. No, I do not and I would not.

MR. BUMPERS. I thank the Senator for that.

Let me make one additional observation.

Incidentally, I ask unanimous consent that my colleague, Senator PRYOR, be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. We are not just handcuffing the Secretary. Incidentally, contrary to what the Senator from Georgia has said, we are not prohibiting him from studying this. We are prohibiting him from transmitting the list prior to September 30, 1991, just a little over a year away. I am telling you the reason we are doing this is precisely the reason the Armed Services Committee asked for the same thing in their committee report.

All in the world this amendment does is codify almost precisely the language of the committee report of the Armed Services Committee saying we expect the Secretary to do this, we anticipate the Secretary will do this, and we are serving notice on the Secretary that if he does not, we are going to have a close look at it and we will say, in light of the numbers that are so palpably suspicious, we are telling you to do it, we are not giving you any option.

And if we do not do that, Mr. President, we are the ones, Congress is the one that is handcuffed. We are saying Mr. Secretary, you can make the most blatantly political decision you want, but we are going to stick with the law which gives you the right to do that. We are going to handcuff ourselves and say, Mr. Secretary, do it to us again as often as you want because we are not going to change the law. We love it.

Mr. President, when it comes to handcuffing people we are handcuffing ourselves. We should say to the Secretary of Defense, Mr. Secretary, this just smells too badly.

Now, this does not cost anything, Mr. President. The money for closing bases has to be appropriated, as the chairman has correctly said. But we all know that you save nothing from closing a base. For example, at Eaker Air Force Base in my State, you do not save a dime until 5 years after you close it. And the truth of the matter is not a single base on the Secretary's list saves a dime in less than 2 to 3 years, none of them, and some of them much longer.

Mr. President, I am saying here is a fair way to address this. I want to say to all good friends on the other side of the aisle, please be patient. This is not meant as any reflection on you. But I can promise you that if you were in our shoes, you would be raising the same kind of Cain I am raising here tonight.

I want to say to all of you who breathed a sigh of relief because your base was not on there, this is just the tip of the iceberg. If you let the Secretary get by with this tonight, you will get another list next year and another list the next year. So do not anybody think because you dodged the bullet this time you are going to dodge another.

Does the Senator from Delaware wish to speak?

Mr. BIDEN. Yes.

Mr. BUMPERS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has remaining 1 minute and 45 seconds.

Mr. BUMPERS. I yield to the Senator from Delaware for 1 minute.

Mr. BIDEN. Mr. President, I strongly support the efforts of the Senator from Arkansas.

Mr. BUMPERS. Mr. President, mea culpa. I made a mistake and I apologize to the Senator from Georgia. This does include a study—

None of the funds appropriated pursuant to authorizations in this Act may be obligated or expended, except as provided by paragraph (4), to initiate any study necessary to meet the requirements * * *

I am prepared to modify the amendment. I will tell you that it is too late to do that, but I am prepared to tell the Senator from Georgia that he certainly, if this should prevail, has my permission, and I hope the permission of the Senate, to strike that part of the provision because I think he certainly ought to have a right to have a study before he could make a decision.

Mr. NUNN. I would say that is in conflict. Does the Senator from Arkansas want him to make this study?

Mr. BUMPERS. Absolutely.

Mr. NUNN. I always felt it probably almost unconstitutional, if not unconstitutional, if not unenforceable, to tell anybody in the executive branch that they cannot study something.

Mr. BUMPERS. That is like telling somebody they cannot pray.

Mr. President, I hope the Members of the Senate will not misunderstand anything I said or consider it a reflection on any one of them, but I think we will be making a very bad mistake if we allow this proposal of the Secretary to stand.

Mr. WARNER. Mr. President, I think in fairness we ought to allow the Senator to modify the amendment.

Mr. BUMPERS. Mr. President, all of our time is up.

Mr. WARNER. I am quite certain the managers will prevail in the vote.

Mr. BUMPERS. If the managers are willing, I ask unanimous consent that we have a quorum call for, say, 2 minutes in order to allow me to modify that part of the amendment.

Mr. NUNN. I have no objection to that.

The PRESIDING OFFICER. Is there objection. Hearing none, it is so ordered.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEFLIN. Mr. President, I rise in support of Senator BUMPERS' amendment on base closing.

In my own State, Fort McClellan, the home of the U.S. Army Chemical School, is on Secretary Cheney's list. Even though it is the only facility in the United States where live agent training may be performed, the Department of Defense recommended this base be closed without considering alternative locations for its mission.

Mr. President, the Department of Defense did not use a rational plan when determining which bases to close. When I questioned Secretary Cheney and asked him for a copy of the study used, he could not provide one.

Mr. President, I believe this course of action is foolish. Though I certainly hope tensions in the Middle East will ease, we must continue to be prepared for the worst. In the past, Iraq has used chemical weapons, not only against Iran, but also against members of their own population. I am certain they will not hesitate to use these chemical weapons again. In view of our vital interest in the area, I am proud soldiers in our Army have been training to meet this treat. They received this vital training at Fort McClellan. But in its rush to close bases, the Defense Department suggested the fort without investigating whether it would be feasible to move this training facility to another location.

I am sure this is just one case out of many. We must take action to ensure the DOD takes time to review its decisions on base closure before it takes

action. I therefore urge my colleagues to support Senator BUMPERS' amendment. Thank you Mr. President.

BASE CLOSINGS

Mr. CRANSTON. Mr. President, I rise today as a cosponsor of this amendment which would create a more equitable process for base closings, a process which would be driven by the changes we will be making in our force structure.

As one who has called for deep cuts in defense spending over the next decade, I am well aware that bases in this country, and perhaps even in my State, will be closed.

However, I am deeply troubled by the political way in which Secretary Cheney has proceeded with this next round of potential closures and realignments. Rather than proceeding with an independent commission, as we had in the last round of closures, the Defense Department leaked a list of candidate bases for closure to deflect attention from the fiscal year 1991 budget.

I understand that there were some questions about the last base closure commission and the criteria it used to close bases. Those bases were to be closed primarily on cost savings grounds. Although cost savings are always a primary consideration, we are now closing bases for very different reasons. We are closing bases as a result of changes in our force structure and reductions which make many of our bases irrelevant.

We need a base closure process which is based on broader assessments about our force structure needs. We need a process which looks at all of our bases, not just the few that may have been considered during a previous round, as I suspect is how this latest list was put together. And we need a process which is nonpartisan.

Eleven of the twenty one bases proposed for closure are from my State of California—over 50 percent of the bases on the list, yet only 12 percent of all domestic bases are actually in California. Eight of these facilities are Navy facilities. If we actually go through with these closures, and there are rumblings from the Navy would be pulling out of northern California. We would be closing one of the most efficient and profitable naval shipyards, the Long Beach Naval Shipyard. And we would be leaving many unanswered questions.

I have noted a common theme in many of the communities around the bases in California, "We understand why bases are being closed, we just don't understand: why this particular base?" When I asked Secretary Cheney and Navy Secretary Garrett this question, their answers were sorely lacking: DOD said that the Navy chose the bases, and the Navy said that DOD made them put together a list. We need a process which can provide answers to these questions for the dedicated men and women who serve in these facilities.

Mr. President, one final word to my colleagues who do not have bases on the latest list, and who may be disinclined to support a process to close bases. This is only the beginning. There are more closures down the road. It is imperative that we step back and set in place a process to ensure that bases are closed in a manner which reflects our defense needs and is implemented in a nonpartisan fashion.

Mr. BIDEN. Mr. President, I strongly support the Bumpers amendment regarding future base closures. His amendment is a common sense approach to the base closure process.

This amendment is not designed to prevent base closures; far from it. Everyone recognizes that more base closures are coming—no one doubts that. Given the major troop reductions that will be made over the next few years, it is obviously logical that base closures will follow.

But let's not kid ourselves—the process of closing military installations in this country has long been a political football—in both Democratic and Republican administrations. That's why we couldn't close any bases for over a decade until we created the commission in 1988.

The amendment before us is a sound approach to this difficult problem. It defers base closures until the Secretary of Defense formulates a force-structure plan for the next 5 years. It directs the Secretary to submit a proposal for a process by which domestic bases could be closed. And it prevents the Pentagon from "bleeding" bases—not spending construction money that Congress has appropriated—which it is only considering for closure.

I commend the Senator from Arkansas for his amendment. I urge my colleagues to support it.

Mr. BUMPERS. Mr. President, I modify my amendment. I hope this is consistent. I believe it is. I modify my amendment to strike paragraph (c)(B)(2); to strike that paragraph. Under the title "Military Installations Inside the United States."

The PRESIDING OFFICER. The amendment is so modifed.

The amendment, as modified, is as follows:

At the appropriate place in the bill, insert the following:

CLOSURES AND REALIGNMENTS OF MILITARY INSTALLATIONS

(a) FORCE-STRUCTURE PLAN AND TERMINATION OF OPERATIONS INSTALLATIONS OUTSIDE THE UNITED STATES.—(1) The Secretary of Defense shall formulate a force-structure plan for the Armed Forces of the United States based on an assessment by the Secretary of the probable threats to the national security in the five-year period ending September 30, 1996, and of the anticipated levels of funding that will be available for national defense purposes during such period. Such plan shall include, without any reference directly or indirectly to military installations inside the United States that may be closed or realigned under such plan—

(A) a description of such assessment;

(B) a description (i) of the anticipated force structure during and at the end of such period for each military department (with specifications of the number and type of units in the active and reserve forces of each such department), and (ii) of the units that will need to be forward based (with a justification thereof) during and at the end of such period;

(C) a description of the anticipated implementation of such force-structure plan; and

(D) the plan described in paragraph (2).

(2) The Secretary shall formulate and implement a plan for reducing and terminating military operations by the United States at installations outside the United States.

(b) REPORTING REQUIREMENT.—(1) As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing—

(A) the force-structure plan formulated pursuant to subsection (a)(1);

(B) a description of the actions carried out and to be carried under subsection (a)(2), including a list of the installations outside the United States at which military operations by the United States will be reduced or terminated and an estimate of the extent of each such reduction;

(C) a legislative proposal containing (i) a fair process, as described in paragraph (2)(A), by which military installations inside the United States could be selected for closure and realignment as part of the implementation of the force-structure plan referred to in subsection (a)(1), and (ii) the policy referred to paragraph (2)(B); and

(D) a proposal for assistance (including worker retraining and economic conversion assistance) for individuals and communities that will be adversely affected economically by the closure or realignment of military installations inside the United States under such force-structure plan, including recommendations for any legislative action that the Secretary determines is needed to provide such assistance.

(2) The legislative proposal referred to in paragraph (1)(C) shall provide—

(A) administrative procedures and a methodology which result in a fair and non-partisan process for selecting military installations inside the United States for closure or realignment solely on the basis of objective criteria designed to achieve effectively and efficiently the military objectives of the Department of Defense contained in the force-structure plan transmitted under paragraph (1). The Secretary is urged to consult with Congress on a bipartisan basis as he develops his legislative proposal.

(B) A policy ensuring the prompt environmental restoration of all property that will become excess to the needs of the Department of Defense as the result of a military installation inside the United States being selected for closure or realignment.

(3) The proposal for economic assistance referred to in paragraph (1)(D), in addition to providing for economic assistance generally to individuals and communities adversely affected economically by the closure or realignment of a military installation, shall provide for appropriate economic assistance

to State and local governments that made expenditures in reliance on, and in support of, Federal plans to establish or continue to operate a military installation that was not opened or was selected for closure.

(c) MILITARY INSTALLATIONS INSIDE THE UNITED STATES.—(1) None of the funds available to the Department of Defense may, except as provided in paragraph (4), be expended (whether obligated before the date of enactment of this Act or not) to—

(A) identify, through any transmittal to the Congress or through any other public announcement or notification, any military installation inside the United States as an installation to be closed or realigned or as an installation under consideration for closure or realignment; or

(B) close or realign any military installation inside the United States,

until specifically authorized by law during the 102nd Congress or until September 30, 1991, whichever occurs first.

(2) In providing for the repair and maintenance of facilities at military installations inside the United States during fiscal year 1991, the Secretary of Defense and the Secretaries of the military department shall, except as provided in paragraph (4), expend an amount during such fiscal year, with funds appropriated for operation and maintenance pursuant to authorizations made by this Act and with other funds that may be available for such purpose for such fiscal year, for repair and maintenance at each such installation equal to not less than 50 percent of the average annual amount expended for repair and maintenance of facilities at the installation concerned during fiscal years 1985 through 1989.

(3) Paragraphs (1), (2), and (3) shall not apply to—

(A) closures and realignments carried out under title II of Public Law 100-526; and

(B) closures and realignments to which section 2687 of title 10, United States Code, is not applicable.

(d) PROHIBITION AND REMEDIAL ACTION.—The provisions of the transmitted to the Congress by the Secretary of Defense, date January 29, 1990, identifying certain military installations as candidates for closure, and the provisions of any other proposal (whether transmitted to the Congress or not) developed during the year ending on the date of the enactment of this Act with respect to identifying military installations for closure, shall not be used as the basis for any decision concerning the assignment of mission, personnel, or resources to any installation identified in such provisions.

(2) The Secretary of Defense—

(A) shall review all actions taken during the year ending on the date of the enactment of this Act with regard to any installation identified in any provision referred to in paragraph (1); and

(B) shall take such steps as may be necessary to remedy the damage to such installation that has resulted from any such action.

(e) DEFINITIONS.—(1) For purposes of this section—

(A) the term "military installation" means a base, camp, post, station, yard, center, homeport facility or any ship, or any other activity under the jurisdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility, except that such term shall not include any facility used primarily for civil works, rivers and harbor projects, or flood control projects;

(B) the term "United States" means the several States and the District of Columbia; and

(C) the term "realignment" has the meaning given such term by section 2687(e)(3) of title 10, United States Code.

(2) Section 2687 of title 10, United States Code, is amended—

(A) by striking out paragraph (2) of subsection (a) and inserting in lieu thereof the following:

"(2) any realignment with respect to any military installation referred to in paragraph (1) that would result, during any two-year period, in a reduction of more than 1,000 in, or by more than 50 percent of, the number of civilian personnel authorized to be employed at such military installation at the beginning of the two-year period concerned; or"; and

(B) in subsection (e)(3), by striking out "includes" and inserting in lieu thereof "means".

(3) For the purpose of making determinations with respect to closures and realignments carried out on or after the date of the enactment of this Act, the amendment made by paragraph (2)(A) shall be applied to include reductions of civilian personnel occurring during any two-year period beginning after the date that occurred two years before the date of the enactment of this Act.

(f) CLARIFYING AMENDMENT.—Section 2687 (e)(1) of title 10, United States Code, is amended by striking out "under the jurisdiction of the Secretary of a military department" and inserting in lieu thereof "under the jurisdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility,".

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment.

The Senator from Virginia.

Mr. WARNER. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. NUNN. Does the Senator from Arkansas desire the yeas and nays?

Mr. BUMPERS. Yes, I do, Mr. President.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, I move to table.

Mr. BUMPERS. I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays are now ordered on the motion to table by the Senator from Virginia. The question is on agreeing to the motion of the Senator from Virginia.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN] is absent on official business.

I also announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 43, nays 54, as follows:

[Rollcall Vote No. 220 Leg.]

YEAS—43

Baucus	Fowler	McClure
Bond	Garn	Murkowski
Boschwitz	Gorton	Nickles
Bradley	Grassley	Nunn
Bryan	Harkin	Packwood
Burns	Hatch	Pressler
Chafee	Hatfield	Robb
Coats	Helms	Roth
Cochran	Humphrey	Rudman
Cohen	Jeffords	Stevens
D'Amato	Kassebaum	Symms

NOT VOTING—3

Armstrong	Bingaman	Boren

So the motion to lay on the table the amendment (No. 2550), as modified, was rejected.

Mr. BUMPERS. Mr. President, I move to reconsider the vote.

Mr. METZENBAUM. I move to lay that motion on the table.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Georgia [Mr. NUNN].

Mr. NUNN. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of

the Senator from Arkansas [Mr. BUMPERS].

Mr. NUNN. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been previously ordered. The question is on agreeing to the amendment of the Senator from Arkansas.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. I announce that the Senator from Arkansas [Mr. PRYOR] is necessarily absent.

I also announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG] is necessarily absent.

The PRESIDING OFFICER (Mr. LEVIN). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 43, nays 54, as follows:

[Rollcall Vote No. 221 Leg.]

YEAS—43

Akaka	Heinz	Moynihan
Biden	Hollings	Pell
Breaux	Inouye	Reid

NOT VOTING—3

Armstrong	Bingaman	Pryor

So the amendment (No. 2550) was rejected.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The manager, the Senator from Georgia, is recognized.

Mr. NUNN. Mr. President, I am about to propound a unanimous-consent request on the SDI amendments, and I hope the Senate will give me their attention.

Mr. President, I yield the floor. We can go ahead with the Moynihan dialog. I do not want to hold him up.

The PRESIDING OFFICER. The Senator from New York.

AMENDMENT NO. 2551

(Purpose: To require the publication as parts of the President's annual budget statement an unclassified aggregate figure for expenditures on intelligence activities)

Mr. MOYNIHAN. Mr. President, on behalf of myself and Mr. SPECTER, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New York [Mr. MOYNIHAN], for himself and Mr. SPECTER, proposes an amendment numbered 2551.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert:

Section 1105(a) of title 31 of the United States Code is amended to add at the end thereof—

(27) a separate, unclassified statement of the aggregate amount of budget outlays for the prior fiscal year for national and tactical intelligence activities. This figure shall include, without limitation, outlays for activities carried out under the Department of Defense budget to collect, analyze, produce, disseminate or support the collection of intelligence.

Mr. MOYNIHAN. Mr. President, the Founders of the United States were very emphatic when they came to the subject of money. The Congress would dispose of public funds and the public would monitor expenditures. Article I, section 9, clause 7 of the Constitution states:

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; *and a regular Statement and Account of all Receipts and Expenditures of all public Money shall be published from time to time.*

There were many things that we sacrificed during the cold war. We compromised our commitment to international law by mining harbors. We compromised our commitment to free speech by excluding foreigners with "dangerous" opinions. But we also compromised our constitutional obligation to provide the American people with "a regular statement and account of the receipts and expenditures of all public money." Mr. President, the American people have never been told how much they are spending on intelligence activities. The figure for 1989 is just one of the literally 6,796,501 secrets created by the United States last year, and not shared with the American people according to the annual report of the Information Security Oversight Office.

Mr. President, I speak of the secrecy system. It withholds information from the American people. It protects intelligence errors, it protects officials from criticism. Even with the best of intentions the lack of public information tends to produce errors; the natural correctives—public debate, academic criticism—are missing. We must begin to end this secrecy system and the best way to start is by letting the American people know how much the intelligence community costs them in tax dollars. They should know that much at least. It is their constitutional right.

It may well be that the secrecy system has cost the American taxpayers much more than the direct cost of its satellites, planes, listening posts, and salaries. Is it the case that trillions of dollars were spent unnecessarily because of intelligence errors? Perhaps. Throughout the cold war we were forever responding to bomber gaps which did not exist, missile gaps which did not exist, a Sino-Soviet alliance which had ceased to exist. Now we have learned that for 40 years we were responding to dynamic Soviet economic power which did not exist. According to the Central Intelligence Agency the Soviet economy was estimated to have reached 62 percent of the United States level in 1975. Even today, according to Michael Boskin, the chairman of the President's Council of Economic Advisers, the CIA is overestimating the size of the Soviet economy by almost $1 trillion. The secrecy system protected and perpetuated these errors.

This is not a partisan matter. Both parties helped to create and expand the secrecy system. The CIA's Soviet economic analysis took place under five Republican Presidents and three Democratic Presidents.

Nor do I claim to have been immune to the siren's song of national security concerns. In 1977 in the Senate Select Committee on Intelligence I voted not to disclose the figure for total intelligence spending for 1978. Whatever the justification for keeping this figure secret in 1977, there can be none now. I believe that disclosure of this figure will not damage our national security. Others agree. For instance, for more than a year Adm. Bobby Ray Inman, former Deputy Director of Central Intelligence, and before that Director of the National Security Agency, and Director of Naval Intelligence, has been arguing that this figure should be released.

One important reason for releasing this figure is that it will allow us to consider the defense budget and the intelligence budget independently. The reductions that will inevitably occur in defense spending are due to factors which may or may not apply with equal force to spending on intelli-

gence collection. We should be careful to ensure that the two are not simply merged together in the public mind. Spending on intelligence is an important subject in its own right. The public has an active interest in the debate over defense spending; it should as well be allowed to have at least the basic information concerning total expenditures on intelligence.

Mr. President, this is a simple amendment. It provides that a separate and unclassified statement on the aggregate global outlays of the intelligence community be published once each year. The reasons for it are many. And we have inquired into this subject before.

As I have mentioned, in 1977 the Senate Select Committee on Intelligence asked whether this would not be a useful thing to do. It asked whether the public had a right to know and a need to know and whether, indeed, the whole of the Congress had a need for a public figure because not every Member chose to inform himself or herself in this regard.

At that time the Director of the Central Intelligence Agency, Admiral Turner, testified before us that disclosure would be in the public interest. No witness spoke against the release of the figure for just one year. A number of Senators, myself included, thought it was not a good idea and, although the Senate committee proposed that this be done, the House did not. It did not happen.

In the interval there has been great change in the world and there are now those, including Admiral Inman, who say that this aggregate number should be known lest the size of the intelligence community shrink greatly under the press of demands elsewhere in the defense system, without anyone knowing about it.

The argument can also be made that we should know if it continues to grow, whilst national defense funding declines.

We propose simply that the number be published, and the public, as well as the Congress, can make judgments in that regard.

Mr. President, my distinguished cosponsor, the Senator from Pennsylvania is on the floor and on his feet. I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I am pleased to join my distinguished colleague from New York, Senator MOYNIHAN, in cosponsoring this amendment.

Basically it is my view that the public has a right to know the total expenditure for intelligence purposes. It would in no way compromise the confidentiality of what those funds are being expended for, but it would provide the public with that overall figure.

In addition to the public's right to know, Mr. President, I think it would be salutary and would promote more prudent public policy. In this way we could consider whether enough or too much money was being spent on intelligence matters.

After having served on the Intelligence Committee for almost 6 years now, I believe that we do not have enough of our resources devoted to intelligence issues; that the current problems in the Mideast, for example, with Iraq, would benefit enormously if we had more intelligence information.

When we seek to locate our hostages, we are unable to find them because of the lack of Humint, the shorthand for human intelligence.

When we seek to locate those who are under indictment for terrorism around the world—Mr. President, may I suggest the Senate is not in order.

Mr. MOYNIHAN. Mr. President, may we have order.

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order.

Mr. SPECTER. The point I was making involved the terrorists under indictment. We cannot locate them. If we had more human intelligence we might be able to do so.

The distinguished Senator from New York has recounted the many agencies and commissions: Rockefeller Commission, Church Committee, House Spy Committee, the Inouye Committee, when our distinguished colleague from Hawaii chaired the Intelligence Committee.

I offer one additional concern, and that is a constitutional concern. The Constitution provides in article I, section 9, clause 7 that there be "a regular Statement and Account of the Receipts and Expenditures of all the Money * * * published from time to time."

While there has been broad latitude for what the Government does, Mr. President, I suggest that the thrust and the policy and the intent of the framers was to have an overall figure published. I think that would be very salutary indeed.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I thank my two distinguished colleagues for bringing this matter to the Senate and for offering this amendment. It is a matter that is certainly worthy of our thought and of our discussion.

Both of the authors of this amendment, of course, have had long experience with the intelligence appropriating process. The distinguished Senator from New York served long and well as a member of the Intelligence Committee and indeed as a vice chairman of that committee at a very important period of time.

The Senator from Pennsylvania serves as a very important and active member of the Intelligence Committee at the current time and makes a great contribution to the deliberations of our committee.

It is, indeed, true that Senate Resolution 400 under which the Intelligence Committee operates and under which it exercises its jurisdiction, called upon the committee to make a study of whether or not the final amount of appropriations, at least in aggregate, should be made a part of the public budget. As the Senator from New York just explained, that was done about 13 years ago. In 1977, the committee undertook such a study.

I do not think that there is any doubt that while there is certainly a policy of the Government and embodied in the Constitution that wherever possible, wherever we can make information public without comprising the national security interests that it should be done so.

At the same time, there is, I think, constitutional precedent for maintaining secrecy where necessary. The Supreme Court ruled in the case of United States versus Richardson in 1974 that a taxpayer does not have standing to challenge the constitutionality of the secrecy of the CIA budget under article I, section 9, clause 7 of the Constitution.

In addition, there is historical precedence dating back to the earliest days of the Republic. In 1793, a contingent fund was approved allowing the President to account for certain expenditures by certification without disclosing the amount.

The Constitution itself recognizes the need for secrecy in some of our provisions. Article I, section 5, clause 3 states that each House shall keep a journal of its proceedings and from time to time publish the same except such parts as in their judgment requires secrecy.

So I think there is legal and constitutional authority to maintain secrecy, it is incumbent upon us from time to time to revisit the issue and to determine whether or not it is now appropriate for us to make public at least an aggregate figure in terms of the intelligence budget of the United States.

We do under the current rules, I might say, make every effort that all 100 Members of the U.S. Senate be thoroughly informed. The vice chairman, Senator COHEN, and I, for example, wrote a letter to all Members of the Senate on July 20 of this year indicating that we have reported a bill, including the appropriations for fiscal year 1991 for U.S. intelligence activities, and inviting all Members of the Senate to come and view the entire bill and to ask any questions they wish to

ask. We offered in this letter to make arrangements for Members to do so.

Mr. President, I ask unanimous consent that a copy of this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
SELECT COMMITTEE ON INTELLIGENCE,
Washington, DC, July 20, 1990.

The Honorable ——,
U.S. Senate, Washington, DC.

DEAR ——: The Select Committee on Intelligence has reported the bill, S. 2834, authorizing appropriations for fiscal year 1991 for U.S. intelligence activities.

The classified nature of such activities prevents the Committee from disclosing the details of its budgetary recommendations in its public report (Senate Report 101-358). However, the Committee has prepared a classified supplement to the report, which describes the full scope and intent of its action.

In accordance with the provisions of Sec. 8(c)(2) of the Senate Resolution 400, the classified supplement is available to any member of the Senate and can be reviewed in the Committee's offices at room SH-211. Should you wish to do so, please contact the Committee's Director of Security, Mr. Jim Wolfe, at 224-1700 to arrange a time at your convenience for such review.

Sincerely,

DAVID L. BOREN,
Chairman.
WILLIAM S. COHEN,
Vice Chairman.

Mr. BOREN. Mr. President, we certainly understand our responsibility to other Members of this body and other committees.

There may be reasons why the figures should remain secret. This could be circumstances, for example, in which a major new initiative of such size and magnitude might be undertaken in the intelligence community that it might cause a bump up in the total figure in a way that it might disclose or indicate to those in other parts of the world that we have made some major new initiative at a time when it might not be in our national interest to have this known.

On the other hand, as the Senator from New York has pointed out and the Senator from Pennsylvania has pointed out, much has changed in the world since 1977 when this matter was last reviewed. There may be good reason, the kind of reasons suggested by the Senator from New York who himself, as he has indicated on previous occasions, has felt that the figures should remain secret, that that decision should change.

We are, indeed, in a new environment and a new environment in which the role of the Central Intelligence Agency itself is going to be changing dramatically. Different kinds of assets are going to be required as has just been said by both of my colleagues. There will be more of an emphasis on human intelligence and human intelligence of a different kind, personnel with economic expertise, with linguistic and cultural skills to penetrate narcotics rings and terrorist groups and others are going to be much more essential.

I think all of our colleagues need to be assured, as the Senator from New York has said, that adequate funds are being approved for this purpose, especially for those areas in which human intelligence is involved that requires adequate appropriations to secure the human and personnel skill that is necessary for a rapidly changing world.

I would say to my two colleagues, as they both know, under Senate Resolution 400, this is a matter that the Intelligence Committee is directed to consider from time to time. I see my distinguished colleague, the vice chairman of the committee, the Senator from Maine, on the floor. I would like to defer to him to comment before we hear additional responses from our colleagues, the two cosponsors of this measure. It would be my thought—and I would hope that my colleague from Maine would agree—we should put this matter on the agenda of the Intelligence Committee; we should have hearings on this issue: that we should call in not only experts familiar with the intelligence community and former members of the community, perhaps, but also invite all of our colleagues, including the distinguished past vice chairman of our committee, to share in these deliberations, and other colleagues who might be interested in these deliberations, and fully reconsider whether the changed circumstances in the world should result in a change in our policy.

I suggest that I think that perhaps is the best way to consider this very serious matter that should be addressed, that needs to be reevaluated in light of changes in the world, perhaps the better, more appropriate forum than would be for us to try to decide this matter tonight in the midst of so many other pressing issues that are before us that divert our attention because I think this is a matter that does require a great deal of thought, it does merit it, and I believe it merits discussion in a forum and a time in which all of our colleagues can really devote the attention to this subject that it deserves.

If I could, I would like to yield the floor and yield to my distinguished vice chairman of the committee, Senator COHEN, who is my working partner in every way on this committee and who has operated truly in a bipartisan spirit. He has an excellent perspective on the work of this committee.

I yield for any comments he might like to make.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, I agree completely with my distinguished chairman that this is not the appropriate place to be debating this issue this evening. I also agree that it is perhaps time that we review the decision that was made back in 1977. But I would like to offer a few comments in terms of my own personal perspective on this.

The Senator from New York, I know, is unhappy with the CIA's analytic performance in recent years, particularly as it pertains to an analysis of the Soviet Union's economic potential.

The Senator from Pennsylvania has indicated perhaps we need more humint, or more human intelligence, as it applies to the Middle East.

My own reaction, if there is really a question about whether we are doing enough or we are doing it well, is that we can either get more people or better people or both or perhaps even cut people. I fail to understand what the value would be of identifying publicly a single figure for global intelligence activities.

We ask the question, what is in a name? What is in a number? If we were to publish a number, I fail to understand what that would do, other than to prod, what is behind the number? What does this number mean?

Let us suppose, if we are required to disclose our financial worth, that we simply publish one number, no breakdown, no indication of assets, liabilities, holdings, nonholdings real property, personal property. The next thing we are asked is, be a little more specific. As has been said of our own financial disclosures, it is sort of like a fan dancer's fan. What it reveals is interesting, but what it conceals is vital. We need not apply that particular test, I think, to the intelligence budget of this country.

For example, what would be under this number? Would it be hardware? How much for hardware? How many satellites are we, in fact, producing? How about covert action? How about human intelligence? How about signals intelligence? We would like to see a breakdown so we can determine whether we need more or need less.

As our chairman has indicated, suppose there is a bump or swing one year in the budget. Suppose we have a dramatic increase in the intelligence budget one year, what does that mean? A new satellite collection system? Is that what we want to disclose at that time? Whose interest would that be at that point? Domestic critics who would like to kill the program or foreign intelligence services who would like to target it for whatever information they could?

So I think that we gain nothing, in my personal view, by publishing a single figure on what is being spent. If there is a question of whether we are spending enough, we should look to

the chairman of the Armed Services Committee, we should look to the ranking Republican member of the Armed Services Committee, both of whom serve on the Intelligence Committee, in addition to myself and Senator BOREN.

In addition, we should go to the President of the United States, the ultimate Commander in Chief. He makes an analysis of what is required for intelligence as part of the overall defense of this country. He has the backup of the chairman of the Armed Services Committee and the ranking Republican member, as well as those in the House.

So I think, Mr. President, from a personal point of view, the notion that we publish one figure and that that is going to satisfy a desire for disclosure, an impulse to exhibit what, in fact, we are spending would be counterproductive, to say the least. But nonetheless, there is room for legitimate difference. In fact, there was legitimate difference back in 1977. I believe the Senate committee voted 9 to 8 to publish. The House voted overwhelmingly against publishing. As a result, a decision was reached not to go forward with publishing that figure.

I think, Mr. President, that it is worthy of debate. It would entail significant debate this evening if we were to go forward. But I am happy to join my chairman in suggesting that perhaps next year the Intelligence Committee should have an open, public set of hearings, during which time the distinguished Senator from New York and the Senator from Pennsylvania and others would make the case for publishing a number.

Mr. MOYNIHAN. Mr. President, I have heard from the learned Senator from Maine the suggestion that he and the chairman, next year, next Congress, hold open public hearings on this subject, and that we discuss all these matters. This seems to me a very useful approach. That was the approach we took 13 years ago. A very close vote was the result.

I wonder if my cosponsor, the Senator from Pennsylvania, would not agree that this was more than satisfactory outcome at this point; that having this agreement we could take down the measure.

Mr. SPECTER. Mr. President, if this colloquy sounds scripted, I certainly would not want to appear to be the cause. But I think that the suggestions my colleagues would be a good resolution to this issue because it is complicated, it is involved, and there ought to be hearings.

If I might, while having the floor just for another moment or so, disagree respectfully with the very distinguished vice chairman. It is true that one number will not tell everything, but it will show a proportion of intelligence to other defense matters. It will show a proportion of intelligence to the overall budget, and therefore there will be a picture as to how the intelligence budget changes from year to year. So some information will be useful.

It may be, as suggested, this will just be a starting point. It is not a commitment. But it is not unusual to raise an amendment in this form and then to move to the next step: to have hearings. I think that is a very constructive result, especially one at which we arrived in a fairly brief period of time. In light of the hour and the interest of the Members to move on to other matters, I yield the floor.

Mr. BOREN. Mr. President, I am very pleased to hear the comments of my two colleagues, the cosponsors of this amendment. I might say I think the colloquy and the expression of differing views that we have just heard in summary form between the Senator from Pennsylvania and the distinguished vice chairman, the Senator from Maine, indicates why this matter is a very serious one that merits the attention that can be given in the proper forum at the proper time.

There are, indeed, competing arguments that need to be carefully weighed in this matter and thoughtfully considered and I believe in a forum in which that is the sole focus of the discussion, as opposed to the situation in which we find ourselves tonight.

So I appreciate the suggestion of the Senator from New York and the Senator from Pennsylvania that the amendment might be drawn down tonight.

I again reiterate our pledge to hold hearings, including open public hearings on this matter. I invite not only the input of the distinguished Senator from New York and, of course, our current member of the committee, the Senator from Pennsylvania, but also other Members of the body, as well as others who have experience in this field outside of Government, former members of Government and academics that we can bring in to discuss this matter.

It would be my hope we could do so in a very full and complete way.

I thank my colleagues for the indication of their willingness to allow us to consider it in that form.

Mr. EXON. May I ask a question of the chairman of the committee.

I have been listening with great interest to this debate. I get the feeling it is unanimous among the leadership of the committee that this total figure should be made public. I am not a member of the committee. But the committee has some financial arrangements with the committee with which I am associated, so I happen to know something about it.

Do I understand the chariman of the committee is indicating he thinks it would be a great idea to publish this figure?

Mr. BOREN. I say to my colleague from Nebraska that is not what the Senator from Oklahoma has indicated. In fact, the Senator from Maine has just indicated to the contrary, that he does not believe it should be made public.

Mr. EXON. The committee is going to hold hearings, on whether it should or should not be?

Mr. BOREN. I have indicated we would hold hearings. It has been 13 years since we examined this issue. I must say I would be skeptical, I would start from the point of view of skepticism as to whether or not it would be advisable to make it public.

As I indicated, it could cause some divulging of information if we had a large initiative, it might show a bump in the appropriation that would not be a financial interest.

I certainly would be willing to have an open mind, to have a full discussion, and to do so on an impartial basis to try to determine the right way to proceed.

As I indicated to the Senator from New York, I do not believe tonight, as we have our attention diverted to the pending bill, would be the time to make a change in policy of this magnitude.

Mr. EXON. I am pleased to know at the present time before the hearing the chairman and ranking member are opposed to the concept. I thank the Senator.

Mr. MOYNIHAN. Mr. President, may I simply make two points. The first is that the amendment offered refers only to outlays and not to authorizations, having very much in mind the question of the bubble which has been suggested as a problem.

In 1977, Admiral Turner specifically suggested it was not a problem

In any event, we have an agreement to hold public hearings on an important subject.

I would like to make the final point that those who are concerned for the intelligence community would be interested to know if it was being cut in half without their knowledge, just as others would be interested to know if it was being doubled without their knowledge.

So, Mr. President, with the agreement of my distinguished cosponsor, I would ask that the amendment be withdrawn and express the gratitude of Senator SPECTER and myself to Senator BOREN, the chairman, and Senator COHEN, the vice chairman, of the select committee.

The PRESIDING OFFICER. The Senator has a right to withdraw his amendment.

The amendment (No. 2551) was withdrawn.

UNANIMOUS-CONSENT AGREEMENT

Mr. NUNN. Mr. President, I ask unanimous consent that at 9 a.m. tomorrow, Senator WARNER be recognized to offer an SDI ATBM amendment on which there shall be 1 hour for debate, with time between 9 and 9:30 a.m. to be divided as follows: 20 minutes for Senator WARNER, 10 minutes for Senator NUNN; that the Warner amendment be laid aside at 9:30 a.m., and Senator BINGAMAN be recognized to offer his SDI amendment, on which there shall be 4 hours for debate to be equally divided between Senator BINGAMAN and Senator WALLOP; that no second-degree amendments be in order to either the Warner or the Bingaman amendments; that upon the completion or yielding back of time on the Bingaman amendment the Senate proceed to vote on or in relation to the Bingaman amendment; that upon the disposition of the Bingaman amendment, the Senate resume consideration of the Warner amendment with remaining time to be equally divided between Senators NUNN and WARNER; that upon the completion or yielding back of that time, the Senate proceed to vote on or in relation to the Warner amendment; that upon the disposition of the Warner amendment, Senator KERRY be recognized to present an amendment on behalf of Senator KERRY and Senator HARKIN on SDI, on which there would be 1 hour for debate to be equally divided in the usual form and with no second-degree amendment in order thereto; and that upon the disposition of these amendments, no other amendment on the subject of SDI be in order to the bill.

Mr. DOLE. Mr. President, as I understand, we have not seen the Kerry-Harkin amendment on this side.

Mr. WARNER. That is my understanding, Mr. President.

Mr. NUNN. My understanding is that it is a simple reduction amendment, and one of the authors is in the chair. I believe it is simply a dollar reduction amendment.

Mr. WARNER. If we could have the occupant of the chair temporarily relieved from his prestigious duties, maybe he could come to the floor and explain that amendment.

Mr. EXON assumed the chair.

Mr. HARKIN. If the Senator will yield, the amendment that Senator KERRY and I are offering would reduce the SDI by $400 million, and we will argue that $200 million would be to go to fight the war on drugs, and $200 million would go to veterans' benefits.

Mr. WARNER. We understand the amendment to be a straight cut of a $400 million allocation of those funds to two other accounts.

Mr. HARKIN. Exactly.

Mr. NUNN. I see the Senator from Arkansas, Mr. President. May I ask whether I may have overlooked something? Does he have an SDI amendment?

Mr. BUMPERS. I do .

Mr. NUNN. Could the Senator indicate the amount of time, because I would add him to this unanimous-consent request if he could indicate the time he needs, and also perhaps he could describe the amendment.

Mr. BUMPERS. My amendment is a pretty straightforward amendment. It cuts about $600 million from SDI.

Mr. NUNN. That is not part of the Harkin amendment.

Mr. BUMPERS. It is not. I would say probably 30 minutes.

Mr. NUNN. Equally divided?

Mr. BUMPERS. Yes.

Mr. NUNN. Mr. President, I add to the unanimous-consent agreement as follows: Upon the disposition of the Kerry-Harkin amendment, the Senator from Arkansas, Senator BUMPERS, be recognized to offer an SDI amendment on which there shall be 30 minutes to be equally divided in the usual form, and no second-degree amendments be in order to the Bumpers amendment.

Mr. DOLE. Mr. President, reserving the right to object, is that just a $600 million cut, or allocated somewhere?

Mr. BUMPERS. I am sorry?

Mr. DOLE. Is that simply a reduction, or a reallocation?

Mr. BUMPERS. No. It is just a plain reduction. It goes on the deficit.

Mr. WALLOP. Reserving the right to object, Mr. President. The first thing one would ask is if we are likely to be finished with the amendment tonight before we start at 9 in the morning.

If we are, it might be of some use to start a little earlier.

Mr. NUNN. I say to my friend from Wyoming, I really believe—I do not know that anyone would object. Let us put it this way. If we get through in the next couple of hours, then I would suggest we start at 8:30 or 8 o'clock. I would suggest we nail down this agreement, and then we could ask unanimous consent to slide it forward.

I do not think anyone—Senator WARNER would be the first up. He would have no trouble. He will be here. We could be here as late as 4 or 5 o'clock in the morning. We have seven Grassley amendments. We do not know what they are. We think we have only one more rollcall vote required on this side with the Glenn amendment.

Right now, if we get through at 4, 5 o'clock in the morning, it would be hard to get people in here at 8.

Mr. DANFORTH. Reserving the right to object——

Mr. WALLOP. Would the Senator let me try to finish?

As the chairman well knows, I have spoken to him and I had reserved earlier the right to add an additional SDI amendment.

But I had thought we had squared the circle, as it were, and the Bumpers amendment is a new concept. I am reluctant to ask for authority to offer yet another one. But if this continues to keep going on, I will not agree to the end of the unanimous-consent request that no further amendments regarding SDI be in order.

We are going to have one, Warner, Bingaman, Shelby; we are going to have the straight Harkin-Kerry cut and reallocation.

Mr. NUNN. Will the Senator yield? The Bumpers amendment has been on the list all along.

Mr. WALLOP. So have two of mine.

Mr. NUNN. If the Senator would like to add one on here, we will do it.

Mr. WALLOP. Let me reserve the right to offer an amendment, 30 minutes equally divided, which I probably shall not offer. But I would like to reserve some rights in defense.

Mr. NUNN. I add to the unanimous-consent request that upon the conclusion of the disposition of the Bumpers amendment, that the Senator from Wyoming [Mr. WALLOP] be recognized for an SDI amendment on which there will be 30 minutes equally divided with no amendments thereto, and that upon the conclusion of the time there be a motion on the amendment, or pertaining thereto.

Mr. WALLOP. I would agree to that. It would be the hope of the Senator from Wyoming that both of those amendments would fall on the basis of the performance of the Senate up to that time.

Mr. NUNN. I thank the Senator.

Mr. DANFORTH. Reserving the right to object——

Mr. WILSON. Reserving the right to object.

The PRESIDING OFFICER (Mr. HARKIN). The Senator from Missouri.

Mr. DANFORTH. I wonder if the manager of the bill can tell us how much time in the aggregate would be spent under this time agreement on the subject of SDI?

Mr. NUNN. I say to my friend from Missouri that the way I count it, Senator WARNER would have an hour; Senator BINGAMAN'S amendment would have 4 hours; Senators KERRY and HARKIN'S amendment would have an hour; Senator BUMPERS' amendment would have a half hour; and Senator WALLOP'S amendment would have half hour. That is 7 or 8 hours.

Mr. DANFORTH. I just wonder if it is basically one subject; is it not? Is there some way to consolidate some of that? Maybe stack votes?

Mr. NUNN. I say I hope that can be done tomorrow. But if we can get this agreement now, I think that nature would take its course then. I think maybe with 4 or 5 hours of debate, we

will be able to make a move in that direction.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Reserving the right to object, may I make an inquiry of the distinguished chairman and make this comment, without intending to offend anyone who is offering a serious amendment?

The question was just asked as to the total time that we consume by all of these amendments. I think it points up the fact that we could consume the entire day in this debate. I do not begrudge that. It is an important subject.

On the other hand—this is where I do not wish to offend anyone—a series of amendments that simply step down the amount are not nearly as important as focusing upon the fundamental question that is proposed in the Shelby-Bingaman amendment, or the Bingaman-Shelby amendment.

The chairman has just indicated in his response what I am sure is a heartfelt wish on his part, and that is tomorrow there will be some who wish to not prolong the debate. It seems to me that the quality is more important than the quantity.

Perhaps we might advance the quality by focusing upon the central issue, the Bingaman-Shelby amendment, by setting a time certain for a vote. I suggest that if we are to achieve the kind of full participation the Senator from Wyoming wants in the debate so that there are people actually present on the floor and people willing to be counted, that it would be well to consider an ordering of these amendments that would allow debate and a vote at a time certain, sometime prior to noon.

Mr. NUNN. I say to my friend from California, that we could not make a vote, because the time limit itself would start at 9 o'clock in the morning, and we would move for one-half hour on the Warner amendment and 4 hours on the Bingaman amendment. That makes it 1:30. Another one-half hour on the Warner amendment, and then we vote on the Bingaman amendment. So I think everyone would know, if my arithmetic is correct, that is in the neighborhood of 2 o'clock.

Mr WARNER. Mr. President, on that, I have to say that I think it is best we keep absolute flexibility within the control of the managers and the time agreement, in the hopes that we can condense some of these times, and the sequence of voting could be changed.

Mr. NUNN. Nobody can be assured we would not have time yielded back and vote earlier in the day. That is our hope. But, on the other hand, I think everybody can be assured, if this unanimous-consent agreement goes through, we would be voting no later than 2 o'clock.

Mr. WALLOP. If the chairman would yield, it would be and it is my intention that some of the time be yielded back. As I understood it, the consent agreement as propounded was that the vote would take place at the conclusion of the debate on the Bingaman amendment.

Mr. NUNN. That is exactly right. That could take place at 11 o'clock, 11:30, or 12. But it will take place at the conclusion of the debate, when all time is yielded back.

Mr. WALLOP. I urge Senators not to be too far away and to listen to the debate.

Mr. NUNN. Anybody trying to play an early round of golf should play only nine holes tomorrow.

Mr. WILSON. Is there, as part of the unanimous-consent request, a definite order? I do understand that the first item in this order would be the Warner amendment, to be followed by the Bingaman-Shelby amendment?

Mr. NUNN. Debate will be on the Warner amendment, but the first vote on the Bingaman amendment. The Warner amendment will have one-half hour of debate without a vote, followed by 4 hours of debate on Bingaman, followed by a vote on Bingaman, followed by another one-half hour on Warner.

Mr. WILSON. I thank the Chair. I do not object.

Mr. NUNN. Mr President, I propose the request.

The PRESIDING OFFICER. Is there objection?

Hearing none, it is so ordered.

The text of the agreement is as follows:

Ordered, That Senator Warner be recognized at 9:00 a.m., Saturday, August 4, to offer an amendment on SDI, on which there shall be 1 hour for debate, with the time between 9:00 and 9:30 a.m. divided with 20 minutes under the control of Senator Warner, and 10 minutes under the control of Senator Nunn.

Ordered further, That at 9:30 a.m., the Warner amendment be laid aside and Senator Bingaman be recognized to offer an amendment on SDI, on which there shall be 4 hours for debate, equally divided and controlled between Senator Bingaman and Senator Wallop.

Ordered further, That no second degree amendments be in order to either the Warner or Bingaman amendment.

Ordered further, That upon the expiration or yielding back of time on the Bingaman amendment, the Senate proceed to vote on, or in relation to, the Bingaman amendment.

Ordered further, That upon the disposition of the Bingaman amendment, the Senate resume consideration of the Warner amendment, with the time remaining to be equally divided and controlled by Senator Warner and Senator Nunn.

Ordered further, That upon expiration or yielding back of time on the Warner amendment, the Senate proceed to vote on or in relation to the Warner amendment.

Ordered further, That upon the disposition of the Warner amendment, Senator Kerry be recognized to offer, on behalf of himself and Senator Harkin, an amendment on SDI, on which there shall be 1 hour for debate to be equally divided and controlled in the usual form.

Ordered further, That no second degree amendments be in order to the Kerry-Harkin amendment.

Ordered further, That upon the expiration or yielding back of time on the Kerry-Harkin amendment, the Senate proceed to vote on or in relation to the Kerry-Harkin amendment.

Ordered further, That upon disposition of the Kerry-Harkin amendment, Senator Bumpers be recognized to offer an amendment on SDI, on which there shall be 30 minutes for debate, equally divided and controlled in the usual form.

Ordered further, That no second degree amendments be in order to the Bumpers amendment.

Ordered further, That upon the expiration or yielding back of time on the Bumpers amendment, the Senate proceed to vote on or in relation to the Bumpers amendment.

Ordered further, That upon disposition of the Bumpers amendment, Senator Wallop be recognized to offer an amendment on SDI, on which there shall be 30 minutes for debate, equally divided and controlled in the usual form.

Ordered further, That no second degree amendments be in order to the Wallop amendment.

Ordered further, That upon the expiration or yielding back of time on the Wallop amendment, the Senate proceed to vote on or in relation to the Wallop amendment.

Mr. NUNN. Mr. President, I thank all Senators. I thank the Senator from Wyoming for his cooperation. I thank the Senator from Alabama [Mr. SHELBY] and I thank Senator BINGAMAN for his cooperation, in coming back in here late tonight. He has had a very strenuous day. He has had illness in his family. I thank the Senator from Virginia.

I propose to the Chair at this point that we go to the Glenn amendment. My understanding is there will be a 30-minute limit on that.

Mr. WARNER. Reserving the right to object, and I shall not, can we have the further understanding that, at the conclusion of the Glenn amendment, Senator GRASSLEY would be recognized for the purpose of propounding his amendment?

Mr. NUNN. I think that would be fine. The Senator is not propounding it in the unanimous consent but as a matter of information.

Mr. GORE. Reserving the right to object, Mr. President.

Mr. NUNN. I do not think there is a unanimous consent propounded as yet.

Mr. GORE. I thought consent was requested that we go to the Glenn amendment. I do not intend to object. I was just going to say that the Senator from New Mexico [Mr. BINGAMAN] and the Senator from Arizona [Mr. MCCAIN] and I have worked all through the last couple of days, and finally have reached agreement on a significant amendment we thought might be controversial, but now has been cleared on both sides. It is not expect-

ed to take any length of time at all. I simply ask that after the Glenn amendment, and before we get into a long series of other subjects, that we might be able to take that up, and we would agree to any time limit the manager would suggest.

Mr. NUNN. I have no objection to that. I wonder if he would not want to wait until Senator BINGAMAN was here before bringing that one up.

Mr. GORE. We have consulted with him on that matter. It is the Bingaman-Gore-McCain amendment. Because he is going to be absorbed in the other matter when he returns here, he expressed a preference that we go ahead and do this, as he returns after midnight.

Mr. NUNN. I would like to accommodate my friend from Tennessee, but I have a request from Senator GLENN, who has a controversial amendment that has to have a rollcall, and then Senator GRASSLEY has six or seven amendments, and we would like to give him a chance after Senator GLENN, because it demands a rollcall vote. If we have an interlude where we can work it in, we will do that.

Mr. GORE. I say to the Chairman we would accept the time limit of 10 minutes equally divided. It is just that we were hoping to do this before we got into six amendments that would take so long.

Mr. NUNN. Has that amendment been worked out?

Mr. GORE. Yes

Mr. NUNN. How long will it take the Senator to explain it?

Mr. GORE. We would accept a time limit of 10 minutes equally divided.

Mr. NUNN. Mr. President, I say to my friend from Tennessee, I think what we are trying to do now is alternate. We have had several amendments on this side, and we have not had any on that side. We have not had Senator GRASSLEY here to present his amendments, but he is coming. I suggest that we go to the Senator from Ohio at this point in time, and I will work with my friend from Tennessee.

Mr. WARNER. Mr. President, if we can accommodate the Senator from South Carolina at his earliest possible convenience.

Mr. NUNN. Mr. President, I yield for a question to the Senator from Ohio.

Mr. METZENBAUM. We have been spending a lot of time talking about how much time will be allocated on each amendment. I have no problem about that at all, but the Senator from Ohio, and I think some others as well, would like to have an opportunity at some point to debate the merits of the whole bill, and I just want to be assured that there will be no effort made by the managers of the bill to preclude that from happening, when we are off the floor, with some unanimous-consent agreement that we vote at a time certain and therefore preclude the opportunity to debate the substance of the bill

Mr. NUNN. I say that we are going to be here all night, or as long as necessary, until everyone is finished, everything but SDI. We do intend to propound a unanimous-consent agreement sometime this evening that we would have a time certain for final passage.

Mr. METZENBAUM. I will stay and I will object, because I do not think we ought to have to debate the merits of this bill in its entirety at 4 o'clock in the morning. I do not think that is reasonable. I think it is appropriate to expect to be able to debate it during the daylight hours, and I am not talking about a filibuster or any extended debate.

Mr. NUNN. How much time would the Senator like to have? Perhaps we can get unanimous consent for that now.

Mr. METZENBAUM. Sometime tomorrow, one-half hour.

Mr. NUNN. Would the Senator be willing to start at 8:30 in the morning?

Mr. METZENBAUM. No. I would not.

Mr. NUNN. What time does the Senator desire? When would the Senator want to have the one-half hour?

Mr. METZENBAUM. 10:30, 11 o'clock, 1 o'clock, 2 o'clock.

Nr. NUNN. I will try to work with the Senator, and if he objects to a final passage——

Mr. METZENBAUM. I am just asking the manager of the bill not to ask for unanimous consent with respect to a time certain for final passage, unless the Members of the Senate are given adequate notice so we can be here to object.

Mr. NUNN. I will do my best to accommodate the Senator. I am sure the staff will note his objection to a unanimous-consent agreement on final passage. I want to put the Senator on notice, it is my intention to seek a definite time for that. A lot of Senators want that. I am getting requests from people who want to know when we are going to finish the bill.

Mr. METZENBAUM. I understand what the Senator is saying, but I am sure the Senator respects the right of each Member of this body to be able to divest himself or herself to the substance of the bill.

Mr. NUNN. I do, and the Senator makes a reasonable request. Does the Senator from Ohio, Senator GLENN, agree to 30 minutes?

Mr. GLENN. Yes.

Mr. NUNN. Mr. President, I ask unanimous consent that the Senator from Ohio be recognized for an amendment on a 30-minute time period, with 15 minutes on each side, and that there be second-degree amendments and, upon concluding the debate and yielding back of time there will be a vote on or release to the Glenn amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The Senator from Ohio is recognized.

Mr. GLENN. Mr. President, I yield to the Senator from Nebraska.

Mr. EXON. Mr. President. having been involved in the debate of the Defense authorization bill, I am encouraged that so many Members of this body have become increasingly aware of the complexities of the defense bill and the many systems that we deal with in the committee.

There has been considerable debate on the legitimate concerns of many about assuring as best we can that there are adequate tests and assessments before we launch into full production of any system. That is good and I assure all that the Armed Services Committee focus on this proposition of "fly before you buy."

Incorporated in the bill this year there is further protections than ever before to carry out this concept. Often-times the committee has been unjustly criticized for wanting to "micro—manage" the programs. We would rather not "manage" but are convinced that greater involvement by the committee is necessary both to carry out the intent of the laws that we pass and to keep in operation the checks and balances that are necessary by our system. Two things are paramount, protecting the taxpayers' investment are providing for a sound national defense.

We welcome the suggestions of others. We call for and received information, briefings, reports as we discharge our oversight responsibilities. Any suggestions for additional key information is welcome.

We frequently call on the General Accounting Office and others for studies and reports back to us on a variety of issues. While we do not always accept at face value such reports they have been very helpful and are oftentimes balanced with other expert witnesses called before our committee.

We have had extensive debate on the B-2 system. There have been good questions asked by both opponents and proponents. As a committee we have been addressing concurrency in this expensive system along with others.

The 13 fences or hoops that we have included in this bill for the B-2 is vivid demonstration of how the committee is insisting on proceeding only on a most prudent basis. There are billions of dollars not yet spent because of restrictions on the B-2 from last year's authorization.

The Rail-Garrison MX Program also was found by the GAO to have substantial concurrency between acquisi-

tion of the trains and the start of test launches of MX missiles from a rail-car launcher. For this reason, the committee eliminated all the procurement funding for the MX trains. Of course, the committee is also aware that the Air Force has proposed in its fiscal years 1992-97 POM to abandon all mobility options for both MX and the small ICBM, but we will not know whether or not Secretary Cheney accepts that proposal before the fall. Accordingly, the committee has fully funded the requested R&D Program for both the rail-garrison MX and the small ICBM, maintaining options for mobility and preserving the leverage of our arms control negotiators.

A second element of guidance was to maintain nuclear deterrence at lower force levels, and, by inference, at lower overall cost. Accordingly, the committee made several important decisions.

First, the administration was unable to tell us authoritatively how many Trident submarines they seek. Secretary Cheney said "20 or 21 Tridents" in testimony earlier this year. Navy witnesses at first declared the answer to be "24, with 21 accountable." However, when asked to state how many Tridents were in the Navy's fiscal years 1992-97 POM submission to Secretary Cheney, they gave evasive answers. Two days later the press exposed the fact that the Navy proposed in the POM submission to stop at 18 Tridents.

Given this conflicting evidence, the committee has authorized the 18th Trident submarine in this bill, but has authorized no advance procurement for any Trident submarines beyond this. Should the administration decide and the Congress agree that more than 18 Tridents are needed, new Trident submarines will have to be authorized at a slower pace, such as 2 every 3 years, or perhaps 1 every other year.

Second, after careful consideration and extended debate, the committee accepted my recommendation to terminate the troubled and costly Milstar Strategic C3 Satellite Program. Long-delayed and well over budget, Milstar would have required us to spend some $40 billion over the next 20 years, to acquire and operate this Rolls Royce of Strategic C3. Given the budget outlook, the committee decided that the Nation couldn't afford either the monthly payments or the gas money for a new Rolls Royce.

Indeed, we concluded that the $40 billion we have invested over the last decade in improving Strategic C3 has provided us with at least the equivalent of a Chevy—good, basic, reliable Strategic C3. In addition, one of the major capabilities Milstar would have provided is what SAC and the DOD call dynamic planning. In plain English, this means they want the capability to replan our targeting of strategic weapons—that's the SIOP—right in the middle of World War III.

If you accept this concept, then Milstar would be needed to send out all those changed orders to bombers flying over the North Pole, and so forth. In my view, we don't need that capability for deterrence and we can't afford it. We have invited DOD to put together a cheaper and less gold-plated substitute for Milstar, for our consideration on next year's authorization bill.

The committee's third action under this heading was to reduce the funding for the strategic defense initiative by $887 million in DOD and by $85 million in DOE. This puts the DOD figure at the same level as last year, $3.573 billion, and cuts DOE funding below last year's level. In its report, the committee took exception to the administration's plan to make, in the summer of 1993, an informed decision on development of a phase 1 missile defense system. In our view, the SDI will not be ready for such a decision by then—a view which was strongly supported in a GAO report released last week.

We were prepared to debate and vote in committee proposals for a fundamental restructuring of the SDI Program, but, at the chairman's request, we decided to defer this debate until the bill reached the floor. I am sure we will have a vigorous debate over the Bingaman/Shelby amendment.

Since I mentioned DOE, let me take a minute to outline adjustments to the budget request for DOE defense programs. As Members will recall, in each of the last 2 years, the committee transferred a substantial sum from DOD accounts to the Department of Energy in order to increase the funds available for cleanup of DOE sites. However, this has led to problems with 302B allocations, to friction with the two sets of appropriate funds pursuant to this authorization, and to the prospect of a continuing, long-term drain on DOD funds at a time when the DOD defense budget is itself plummeting.

Accordingly, last year we put down a marker telling the administration that, if it didn't fund DOE cleanup adequately in this year's request, rather than transferring money from DOD accounts, we would take money from the DOE weapons accounts and put it into cleanup. Sure enough, the administration didn't request adequate funds for DOE cleanup again this year; as a result, we have taken $380 million from the DOE weapons accounts and given it to the DOE cleanup fund.

Let me repeat last year's warning to the administration. This underfunding problem at DOE is getting worse, not better. The latest DOE estimate for the 5-year cost of cleanup at DOE facilities is $28 billion, or between $5 and $6 billion per year, and roughly 90 percent of that bill has to be paid by DOE defense programs. That rate is two to three times greater than the funding level for cleanup in this bill. Next year we will have to spend still more on cleanup. The Armed Services Committee will not, repeat, will not, transfer DOD funds to DOE to cover cleanup costs next year. Indeed, DOD's own cleanup costs are about to go through the roof, as we close down bases and installations, here and abroad. So, I hope my message is clear—if cleanup is not adequately funded in the DOD and the DOE budget requests next year, we intend to cut the requests for weapons programs in both DOD and DOE, and use those savings to increase the cleanup funds in both Departments.

Finally, Mr. President, let me quickly enumerate the other terminations or cancellations in the strategic forces area. The bill terminates further DOD participation in the National Aerospace Plane—or NASP—Program. We have canceled funding for the development of Follow-on-to-Lance, the new 155MM nuclear artillery shell, the Bigeye binary chemical bomb, the binary warhead for the MLRS system, and the 155MM binary chemical artillery round. All of these actions are consistent with recent administration policy decisions.

Overall, the committee reductions to strategic forces total over $5 billion from the amended budget request. While many of these decisions were difficult and the cuts will be painful, I must reiterate the message that this is only the beginning. It is quite likely that further reductions to this bill will be required before the Congress adjourns, and next year we will be required to make further difficult termination, slowdown, and deferral decisions. To those who say, "How can you cut this program?" I would simply say, "Tell me what you would propose to cut instead." Indeed, in my judgment, it would be irresponsible for this body to accept any amendment which would increase defense BA outlays unless that amendment also clearly identifies offsetting BA and outlay reductions.

Mr. President, in closing I would like to thank all the members of the Strategic Forces and Nuclear Deterrence Subcommittee for their assistance and support during this difficult process. I also want to thank the chairman of the full committee, Senator NUNN, and the ranking minority member, Senator WARNER, for their clear and compelling guidance and leadership. And, above all, I want to recognize the able leadership and stalwart activities of my friend and colleague, the ranking minority member on my subcommittee, Senator STROM THURMOND, and who has made major contributions to

the work of the Strategic Subcommittee.

Mr. President, I shall have much more to say about particular decisions on strategic forces during the course of the debate on this bill.

The PRESIDING OFFICER. The Senator from Ohio.

AMENDMENT NO. 2552

(Purpose: To strike out sections 2809 and 2810, relating to the use of funds from the leasing and disposal of Department of Defense property)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio, [Mr. GLENN] proposes an amendment numbered 2552.

Mr. GLENN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 321, beginning on line 4, strike out all down through line 19 on page 323.

Redesignate sections 2811 through 2814 as sections 2809 through 2812, respectively.

Mr. GLENN. Mr. President, I had a "Dear Colleague" put around on each one of the desks here that explains the basic parts of this amendment, and why I am putting it in. I hope people will take time to read it.

This amendment deletes sections 2809 and 2810 from the bill. Mr. President, these provisions provide that the revenue obtained from the sale of excess Department of Defense land and from the lease of Department of Defense assets not go back into the Treasury they normally would, but be returned to the Department of Defense.

This may have been OK at one time, when there were very small amounts. When the funds were not that large but that was in the past. Now we are going to be disposing of major chunks of property, and splitting properties up. And where properties are split up, the way the law reads now, what is provided in this bill, is that when property is sold the money goes back to the Defense Department.

The current law provides for the funds from the sale to be earmarked for the land and water conservation fund and the funds from lease of Government property are generally to be returned to the Treasury.

My amendment would continue the current law. It would not permit the additional amounts to be given to the Department of Defense.

The Department of Defense requested this change. I thought this was rather interesting. The reason the Department of Defense requested this change was to provide an incentive, they said, to encourage their commanders to pursue excess property disposal and lease of department assets.

The Defense Department request was that only 50 percent of the proceeds be returned to them, but here in the Senate this amount was raised to 100 percent.

Mr. President, it is my opinion that pursuing property management of all their resources, whether it is real estate, real property, personnel or anything of a value, is already a duty. It is a responsibility of these commanders. I am not in any way convinced that incentives are required to motivate them to do their job. If incentives are required, then there is something wrong with the system and something wrong with the people assigned to these particular jobs.

In addition, I am concerned that DOD should be singled out of all Government agencies to receive this authority. If we do it for one department we should do it for all.

What happens in Interior when they sell some park lands, should that money go back to the Interior Department, or should it go back to the Treasury to be applied to the national debt? I think most would say it should go back to the Treasury. That is not what is happening in the Department of Defense with what is provided in this bill.

The provisions in the sections that I wish to delete limit the expenditure of these funds to facility maintenance and repair, and for environmental restoration. This is true. However, separate accounts within the Defense Department budget already provide for these accounts. We already provide for maintenance and repair facilities and for environmental restoration, by other accounts. So this, in effect, lets them bring back in surplus money that can be used for other things. Providing this extra money wil give the Defense Department ability, to upgrade the facilities without the proper oversight, for which we in Congress are responsible.

That begins to be a very questionable procedure to me. I have been informed that the General Services Administration thinks there should be some provision like this, but for application governmentwide. However, their request will limit the agency share to 50 percent, not the 100 percent that is in this bill.

So GSA opposes the provisions in the DOD bill because of this difference.

Mr. President, I do not favor a provision which provides a monetary reward to agencies for selling or leasing Government property. That smacks of a contingency fee; it smacks of a formation of a slush fund. I do not think we need any more of those set up in Government.

However, if we must implement something like this, it is appropriate that we wait for the GSA proposal, that we hold hearings on governmentwide implementations, and only then take action.

I see no reason why Defense should be singled out, especially when there is no oversight on their expenditure. I am uncertain how much money these provisions would generate. In the past, we have talked about $20 million, $40 million, $45 million. I have been given an estimate from the Defense Department of about $80 million a year. However, the rational accompanying the estimate lacks any detail, and I do not know whether or not this is a fair representation.

The Interior Department has said that the portion of the proceeds that went to the land and water conservation fund in fiscal 1988 was $36.7 million. But listen to this. That was in 1988. It was $36.7 million. The estimate for 1990, just 2 years later, is $214 million.

It has gone up about 6 to 7 times in just 2 years. And that may just be the start. However, this may be just another of the rosy estimates of receipts to support deficit projections. I do not know how much money it is; I think $80 million is too conservative by any estimate. And if this is correct, then it is $80 million more spent on Defense facilities than prudent review by the authorization appropriations committees adjudged was necessary and available under current conditions.

In other words, what was necessary for this type operation was already provided. This money comes back as extra money. And it comes back, let me tell my colleagues, outside of authorization control by the Congress, outside of an appropriation control by the Congress, and it would give authority to spend this money, however large the account became. There is no limit on it.

As we get into a period where there is liable to be more, instead of less, money coming back to the Government because of land sales and asset turnover, because of our drawdown of our defense capability, it means that more and more comes back into an authorized, unappropriated account for use by the Defense Department or base commanders at their discretion and with no control, no oversight by the Congress whatsoever.

So, Mr. President, finally, this money has to come from somewhere. Currently the Government gets back about $50 to $100 million a year from all these accounts. If we give this to DOD and they spend it, it means that much that is not being used to eradicate the debt. In other words it adds that much to the debt.

I urge the adoption of this amendment. I want to see us set up a very responsible policy into the future, and, to me, this is not the way to do it.

I reserve the remainder of my time.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator has 6 minutes and 36 seconds left. The Senator from Illinois controls 15 minutes of time.

Mr. DIXON. Mr. President, I yield such time to my colleague from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. WILSON. Mr. President, I urge my colleagues to oppose the Glenn amendment. The Glenn amendment, I think, is overreaction to an understandable desire on the part of Members of not just the Senate Armed Services Committee but those concerned with our national security, to try to provide some flexibility and some material assistance to those who routinely find that the easiest thing for us to cut in the Defense budget is military construction, the kinds of things, the kinds of routine maintenance that seems to be endlessly deferred as the path of least resistance.

What is proposed here is very simply that base commanders have an option not simply to cast caution to the winds, indeed they would have to gain appropriations in order to spend the money that would be the proceeds of the sale or lease of property.

But what we are talking about is not an enormous amount of money to begin with. It is $40 million annually. It is not enough, in fact, to do something that I wish we could do, which is to put a great deal more into the environmental cleanup fund within the Pentagon to deal with those sites that are on the national priority list. It does not begin to approach that magnitude to permit that kind of accelerated cleanup.

What it does do is to allow a base commander who is faced, perhaps as he comes to relieve his predecessor and finds that there is serious long-term deferral of maintenance that is routine, it gives him the opportunity if a farmer says to him, I would like to lease 20 acres that you do not seem to be using and I would like to be able to farm there, the base commander can receive the proceeds from that sale and he can gain approval of their expenditure for routine maintenance.

I think, Mr. President, that in a time in which we are increasingly faced with the reality of constraints upon defense spending and particularly upon military construction, and particularly upon routine maintenance, that this is simply a flexibility that is highly desirable.

I see no reason to cloud the recommendations that brought this to us. It came from recommendations of the defense management review. It was in that legislative package. And what we have done is go it better, slightly. It is true that they recommended that half be kept. We are allowing discretion to be made over the full procedure.

Let me suggest, Mr. President, that when we go to conference there will be in the House conferees a dissimilar passion and that this gives us some bargaining power. If in fact we intend to come out at that point that was recommended by the defense management review, then we had better start by having the kind of provision that passed out in the committee report and in the committee bill.

Mr. President, how much time remains?

The PRESIDING OFFICER. There are 11 minutes and 30 seconds remaining.

Mr. DIXON. Mr. President, I yield 5 minutes.

I thank my friend, the Senator from California, for his observations. I totally agree with him. My friend from Ohio is a very astute and fine Senator and an excellent member of the committee.

But I put it to my colleagues in the Senate: We live in a time where for years and years and years as far as the eye can see in the future, the amount of money for the Department of Defense and its efforts is going to be substantially reduced.

Let me tell my colleagues what we are talking about here is a limited thing. The sales or leases or monetary dispositions of real estate and property of the Department of Defense, under the provision of the bill that came out of my subcommittee that I chair Mr. President, would be funds that would go into the Department of Defense account rather than the general revenue fund.

Now let me tell my colleagues several things. First, those funds would have to be appropriated by the jurisdictional committee, the Appropriations Committee and, obviously, I think in almost every case, the Subcommittee on Defense Appropriations. That is No. 1.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. DIXON. May I conclude first?

Second, the money must be used for real property maintenance and environmental purposes. Can I tell the Members of the Senate one thing that is clear: We have been cutting real property maintenance for years in my subcommittee. I am telling you, if you do not believe this Senator, go around the country. Any person that is involved in the Armed Services Committee or cares about the quality of life and the maintenance of real property in this country, it will bring tears to your eyes to see what we are doing to our real property in the country by not keeping it up like you keep up your own home.

I see my friend, the Senator from Nevada. He just bought a house on the Hill. He is trying to fix it up. I just went through it myself. I will tell you if you own a piece of real property, you have to fix it up once in a while—paint it a little bit, fix it up, put some hinges on the doors.

We are not doing that now. This money is going to be used for real property maintenance that has been getting it in the neck year after year and it is going to be used for environmental purposes, I say to my friends on this side who cry and are always concerned about what we do for environmental concerns. This is the money from the real estate that we sell from our bases and the leases and rentals we collect being used by the armed services, the Department of Defense, for real property and maintenance.

Now let me make this last point. Near my hometown of Belleville, 7 miles from my hometown is a great airbase, Scott Air Force Base. It is the Military Airlift's communications command, transportation command. Right now my hometown of Belleville and the whole State of Illinois is trying to start joint usage at that airbase so we will have commercial aviation that could go in there that cannot fit in from St. Louis—my friend from Kentucky knows when you try to get in St. Louis they are backed up to often—trying to put joint use in their passenger airplanes.

If that base wants to cooperate, and they do, and they want to lease some land so we put in joint use, so cargo airplanes, Federal Express, maybe if we are lucky American Airlines, TWA, United sometimes come in when they cannot get into St. Louis and other things, we that is the inducement to do it. If they do it now, the money goes into the Treasury to the general revenue fund for other purposes.

But under this amendment in our subcommittee that money would be used for real property maintenance to paint those buildings and fix those hinges and do the things that benefits Scott Air Force Base and maybe clean-up some of the shooting ranges in places where there is environmental concerns.

My friend from Ohio is a great Senator, and there is no more valuable person on the Armed Service Committee. But I am going to tell you something. I will bet when they come in this Senate next time and they want to do this with GSA, which goes into his subcommittee, he will like that all right.

This is fair, it is reasonable. Now if my good friend the Senator from Ohio will say we are not going to look at it anymore, then he would be right. We are going to be looking at this every year in the Appropriation Committees. This is a good bill now and we should not adopt this amendment. I urge my colleagues to not support the amendment of the Senator from Ohio.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 6 minutes, 36 seconds. The Senator from Illinois has 6 minutes, 33 seconds.

Mr. GLENN. Mr. President, I yield myself 3 minutes.

The distinguished Senator from California said $40 million is not a big amount. It is a big amount, but comparatively he is right. But that was the DOD figure based on 50 percent. The DOD estimate that they gave us was that if we go to 100 percent, which is in the bill right now, that takes it up to $80 million right there.

And GSA, quite contrary to what my friend from Illinois says, GSA says one of their objections in this bill is that there is no authorization and no appropriation process. And if the distinguished floor manager will listen, I am commenting on what he said a moment ago, that GSA's comment on this is there is no authorizing process or no appropriations process. This becomes a giant slush fund. That is all you can call it. Why we let these people go out and say I am going to get this money back, and then I am going to decide where it goes, and I am going to try to attract an airline into a certain base in Illinois at their discretion to pursue these funds.

When defense dollars are reduced, we need better control, not less. We are the ones that establish a maintenance schedule at a base, and a base planning schedule and a base refurbishing schedule. We provide maintenance funds to do that every year in this budget.

Now we are saying "But we are going to give them a big slush fund that they can use as they see fit out there." How ridiculous. We just discovered all the M accounts that nobody ever knew anything about. I had a hearing the other day on the merged account where there are billions of dollars in authority over there and we are in effect going down that same track, setting up more M accounts, more slush fund accounts. I submit we need more control instead of less.

Contrary to what was said, this money that will come back in does not go through an authorizing process. It does not go through an appropriate process. And that is one of the things that GSA wants to provide when they bring the bill up.

I must say, I get a little incensed when implication is cast around here that the reason I am doing this is so when it comes back from GSA, it will come to the Governmental Affairs Committee. Nothing could be further from the truth. I really do not want to deal with this in particular, but I see this as an inequity and a potential M account, a potential slush fund account, a potential account here that is not covered by authorization, it is not covered by appropriations processes, and ordinarily we would be really out there objecting to something like this except it happens to be in this bill.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, my friend has laid so much emphasis upon what GSA told him that I have the painful duty to tell him that they have misinformed him. He has laid great emphasis upon the fact that there is not sufficient oversight; there is no appropriation required, he has been told, by GSA.

Let me invite the attention of GSA, and my good friend from Ohio, to the language in the bill at page 321, line 24:

> The amount deposited in such account with respect to the disposal of any such land shall be available to the extent provided in appropriation acts as follows.

I think my friend has been misinformed by GSA.

Mr. DIXON. Will my colleague yield for a moment?

Mr. WILSON. I will be happy to yield.

Mr. GLENN. Where are you reading from?

Mr. DIXON. I want to inform my friend from California—who is absolutely correct that that is what the bill provides—when we got it from the administration, it did not provide it and we put it in in committee. It does now provide it. My friend from California is absolutely correct, that was the work of the subcommittee and then the committee, and it is appropriated funds now.

Mr. WILSON. Mr. President, let me simply continue by saying the other argument that my friend from Ohio makes is that this will create a slush fund. I wonder if he thinks the Federal building fund is a slush fund? It is, after all, the fund into which we deposit the proceeds of sale of Federal buildings.

GSA administers that fund. I do not think GSA more competent than the Congress of the United States when we are required, as the law requires, as set forth in the language that I quoted, to exercise our powers of appropriation.

Mr. President, what we have is something very similar to what happens now when Federal buildings are sold. The proceeds go into a Federal building fund. The purpose of that fund is to finance the construction of new Federal buildings.

It does not seem to me to be terribly different than what is being proposed here in order to address what has been perennially shortchanged, maintenance projects which do not quite make the cut in those tight years, year after year, in which we find the path of least resistance is to cut the military construction budget and, in particular, those maintenance projects that are not very glamorous, those environmental programs which do not begin to come to the magnitude of national priority listings.

But, at the very least, we should allow these base commanders to be good corporate citizens. We should allow the Air Force, the Army, the Navy, and the Marine Corps to be good corporate citizens. We do not want their property to be a blight upon the neighborhood. We do not want them to be shabby. And we certainly do not want them ignoring their environmental duties.

What we are saying is that whether we lease or sell some portion of an existing military site, that with congressional oversight, with the requirement for congressional appropriation, we permit the use of these funds in the very same way that the proceeds of sale from Federal buildings go back into a Federal building fund to be used for the acquisition of new Federal buildings by the GSA.

Mr. President, that is all this is. It is a very good idea, and if we are to recognize and realize the full value of this good idea, then I think we ought to leave it as the subcommittee and the committee passed it. Leave it this way. If there are changes to be made in conference to diminish it by those who are eager to see it go into the hands of GSA exclusively, then let the conferres do battle. Let us not change it here on this floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. I will make a short remark and yield back the remainder of my time if the floor managers are willing to do that.

Mr. President, whether it is authorized or appropriated, this is an effort as they stated when they proposed this, that they wanted this to encourage people to go out and raise money, which they would be able to spend on their own bases, for their own purposes. Whether it is authorized or appropriated is something else. But to me it is not the right incentive.

We normally provide the funds for maintenance and for upkeep of these bases. It should not be up to the base commanders to have to go out and do that, to try and get some of the money which the committee cut back. We went from 50 percent up to 100 percent. We are not talking about small amounts of money.

The Interior Department has said the portion of the proceeds that went to the land and water conservation in fiscal 1988 was $36.7 million. They estimate that for fiscal 1990 it could be as much as $214 million. That is not small money. That is getting up close

to a quarter of a billion dollars, or 20 percent of a billion dollars when we get up there. We are not talking about little amounts of money. We are talking about giant amounts of money out there.

Mr. President, I think when we are doing away with M accounts and things like that, it just seems to me we are going in the wrong direction with this, and that is the reason I put this amendment in. I urge support for it.

If there are not comments on the other side I yield back the remainder of my time.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. DECONCINI). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. In the brief couple of minutes we have left, let me say to my colleagues this whole thing was designed to be an incentive for bases around the country to sell some of their real estate from time to time or to lease some of it, if it is advisable.

Under this kind of law on the books, they will do that because the money will accrue to their benefit for real property maintenance and for environmental purposes only if it is appropriated properly by the appropriators in the Congress. If we do not do that, why would they ever sell any real estate? Why would they ever lease any? Why would they put it right in the general revenue fund for some other purpose, whatever it might be, that does not accrue to their benefit? There is absolutely no incentive to do it. I hope my colleagues see that.

This is a good, commonsense amendment. The Congress positively has a right to control it by the appropriating process. It is a real good idea; we studied it carefully. I assure my colleagues it makes good sense. I admire my colleague from Ohio. I ask my colleagues to oppose his amendment.

I yield back whatever time we have left.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. I would rather see this money go back into the U.S. Treasury. We have enough debt. We provide the money for the maintenance of these bases. It should not be up to them to generate their own funds. What I want these funds to do is go back into the U.S. Treasury to be used for the debt, not out there as some sort of slush fund.

Mr. President, I yield the remainder of my time and ask for a vote.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment of the Senator from Ohio.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arkansas [Mr. PRYOR] is necessarily absent.

I also announce that the Senator from New Mexico [Mr. BINGAMAN] is absent because of illness in the family.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARMSTRONG] is necessarily absent.

I also announce that the Senator from Alaska [Mr. MURKOWSKI] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 29, nays 67, as follows:

[Rollcall Vote No. 222 Leg.]

YEAS—29

Biden	Grassley	Mitchell
Bumpers	Harkin	Moynihan
Burdick	Hatfield	Pressler
Cohen	Heinz	Reid
Conrad	Kerrey	Roth
Cranston	Kohl	Sanford
Daschle	Leahy	Sarbanes
DeConcini	Levin	Sasser
Fowler	Lieberman	Simon
Glenn	Metzenbaum	

NAYS—67

Adams	Ford	McClure
Akaka	Garn	McConnell
Baucus	Gore	Mikulski
Bentsen	Gorton	Nickles
Bond	Graham	Nunn
Boren	Gramm	Packwood
Boschwitz	Hatch	Pell
Bradley	Heflin	Riegle
Breaux	Helms	Robb
Bryan	Hollings	Rockefeller
Burns	Humphrey	Rudman
Byrd	Inouye	Shelby
Chafee	Jeffords	Simpson
Coats	Johnston	Specter
Cochran	Kassebaum	Stevens
D'Amato	Kasten	Symms
Danforth	Kennedy	Thurmond
Dixon	Kerry	Wallop
Dodd	Lautenberg	Warner
Dole	Lott	Wilson
Domenici	Lugar	Wirth
Durenberger	Mack	
Exon	McCain	

NOT VOTING—4

Armstrong	Murkowski
Bingaman	Pryor

So the amendment (No. 2552) was rejected.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WARNER. Mr. President, I yield to the majority leader if he seeks recognition.

Mr. MITCHELL addressed the Chair.

Mr. LEAHY. Mr. President, I make a point of order that the Senate is not in order.

Mr. DIXON. Mr. President, the Senate is not in order.

Mr. LEAHY. Those of us who are standing 4 feet from the majority leader cannot hear him.

The PRESIDING OFFICER. The majority leader is not talking. That is why you cannot hear him. [Laughter.]

Mr. LEAHY. I knew there was a reason.

The PRESIDING OFFICER. The Senate will be in order.

The majority leader.

Mr. MITCHELL. Mr. President, I commend the managers for the perseverance that they have displayed in moving this bill forward.

I understand that we are now close to the point when there will be no further amendments requiring rollcall votes other than the SDI amendments, which are already scheduled for consideration tomorrow under the previous order.

I suggest that any Senators who have amendments which are to be presented and will require rollcall votes should come forward to present them now so we can complete the voting that is necessary. The managers can then take whatever other amendments will be required, and we can have everything done, except for the debt limit, which remains for consideration this evening, and then the SDI amendment tomorrow. We can have final action on the bill sometime tomorrow afternoon.

Mr. McCLURE. Mr. President, will the majority leader yield?

I say to the distinguished majority leader I have a problem because I do not know what amendments are going to be offered. I do not know whether the amendments that I have on the list are precautionary, in the event that something else is done that has been on a prior list, and I do not know whether those other items are still on the list or not. If they are off the list, mine will go away. If they are still on the list, mine are there. They may require a rollcall.

Mr. MITCHELL. Might I suggest to the distinguished Senator that the respective staffers, majority and minority, are maintaining current lists of the status of amendments.

Mr. McCLURE. I understand that. But until we have an agreement with respect to whether or not these amendments are going to be offered, any person can come in and offer any amendment that they wish. All I can say is I would like to be able to assure everyone that I have no amendments. I can make that assurance as soon as I know that the other amendments will not be offered. The only way I know to get that done is to have an agreement entered on the RECORD that says these amendments and only these amendments shall be offered.

Mr. REID. Will the majority leader yield?

Mr. MITCHELL. Yes.

Mr. REID. I have been waiting around for 2 days to offer an amendment. We had two amendments. One

we worked out during the day, and I had another tentative agreement worked out with the Senators from New Mexico. It is my understanding now that the senior Senator from Wyoming has a problem with the amendment.

I wanted to make sure that I was still on the list. I waited a long time to offer this amendment.

Mr. NUNN. Is that the atomic veterans amendment?

Mr. REID. The underlying bill is floating around in the committee some place, and has been for a long time. There are 39 cosponsors.

Mr. NUNN. We know about the amendment that Senator BINGAMAN also, I think, is involved in. I do not know about the second amendment.

Mr. RUDMAN. Let me say to the distinguished leader that I have an amendment that would be, I think, of very substantial interest to this entire body because it would remove a quirk from the law which I tell my colleagues will make every military base that is closed in this country impossible to develop because of a quirk in the environmental law. I have been hoping it would be accepted. I cannot believe that it would not be.

I do not want a rollcall vote on this, but I am concerned because when a base is closed you could not have anybody to go to work there. If the Environmental Committee would advise me that they will accept it, I will not require a vote or even any debate.

Mr. MITCHELL. Mr. President, this represents an effort on my part to expedite matters and accommodate the many Senators who do not have amendments to offer, and would like to have the matters promptly disposed of so they could, understandably, leave and go home. They are all very tired, having been here many long nights.

But it appears I was a little premature. This is one of those many occasions where the effort to save time is merely spending time. Might I suggest under the circumstances that the managers simply proceed and let us get as many more amendments as possible completed. At the earliest time that we deem wise and appropriate, we will make another effort.

Mr. SIMPSON. Mr. President, the Republican leader will return in a few moments, but at this time we will try to assess, the best we can, if I could get some evidence from those of us on our side of the aisle, those who would require rollcall votes on their amendments, if they could stand and identify themselves or let the minority leader know who on our side of the aisle will require a rollcall vote.

I heard the explanation of the Senator from Idaho. I understand that. Either that or seal off the amendments and just have a unanimous consent where we just say no more amendments will be accepted, and I think we are at that point. We might do that.

Mr. NUNN. I say to my friend I think that is a good idea. The problem is we are going to have to consolidate lists. We have one list over here that is being worked hard on that side, and another list over here. We will try to do that. We do not have a consolidated list. There is no way you can refer to a list when there are several lists floating around. We will try to get a consolidated list together.

But at this time, we really are not in a position to know which ones are there. I would say all Senators ought to be on notice that we are at some point going to ask all amendments be closed out.

Mr. MITCHELL. Mr. President, might I suggest, so we do not waste any more time, why do not the staffs of the respective majority and minority attempt to consolidate a list of those amendments that remain that have been indicated to be offered. Let us proceed with an amendment now, and, after the next vote, we will attempt to limit the amendments to those that are on the list. Hopefully, all of those will not be offered. But at the very least the Senate is going to have the assurance that there will be nothing added to that list. So let us proceed in that fashion.

Do the managers have another amendment ready to go that will require a rollcall vote?

Mr. NUNN. We do not have one that necessarily requires a vote. We have several we think we may work out. We cannot tell whether we will have a vote.

Mr. President, we have an amendment that will take about 20 minutes to debate.

The PRESIDING OFFICER. The Senate is not in order. The majority leader has the floor.

Mr. MITCHELL. Mr. President, I will yield to the managers with the understanding that sometime within the next ½ hour we will attempt to get an agreement limiting the amendments to those on the list to be described at that time. In the meantime, I yield the floor.

Mr. NUNN. Mr. President, the Senator from South Carolina, I know, has been trying to get recognition for a couple of hours on his amendment. I believe that is one of the amendments that is going to be controversial. I suggest that the Senator from South Carolina be permitted to proceed. I know he will seek recognition in his own right.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I am willing to agree to about 12 minutes to the side to save time.

Mr. NUNN. I have no objection to that. I would like to have even a more compressed time.

Mr. WARNER. Mr. President, the distinguished Senator from South Carolina has an amendment which I understand has been cleared on the other side. The rare coincidence is that I am going to interpose an objection, but I may be alone. So my suggestion is as follows: that the Senator bring up his amendment, I will address those objections that I have, and then if there is no further consideration, it could well be voice voted.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

AMENDMENT NO. 2553

(Purpose: To amend Title 18, United States Code to prohibit any Person who is being compensated for lobbying the Federal Government from being paid on a contingency fee basis)

Mr. THURMOND. Mr. President, I ask unanimous consent to set aside the pending amendment. I have an amendment I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside. The clerk will report.

The Senator from South Carolina [Mr. THURMOND] for himself, Mr. LEVIN, Mr. SIMPSON, Mr. GRASSLEY, Mr. MACK, Mr. HELMS, Mr. DOMENICI, Mr. BUMPERS, Mr. DANFORTH, Mr. EXON, Mr. BURNS, Mr. HATFIELD, Mr. LUGAR, Mr. CONRAD Mr. MCCONNELL, Mr. SIMON, Mr. D'AMATO, Mr. GRAHAM, Mr. NICKLES, Mr. PRYOR, Mr. PRESSLER, Mr. SPECTER, Mr. HEINZ, Mr. FOWLER, Mr. COATS, Mr. STEVENS, Mr. MURKOWSKI, Mr. JEFFORDS, Mr. WILSON, Mr. MCCAIN, Mr. KASTEN, Mr. RIEGLE, Mr. DODD, Mr. LAUTENBERG, Mr. DURENBERGER, Mr. LEAHY, Mr. BAUCUS, Mr. BENTSEN, Mr. DIXON, Mr. BURDICK, Mr. FORD, Mr. BRYAN, Mr. HEFLIN, Mr. MOYNIHAN, Mr. SASSER, Mr ROTH, Mr. DOLE, Mr. KERREY, Mr. CRANSTON, Mr. DASCHLE, Mr. REID, Mr. ROCKEFELLER and Mr. DECONCINI, proposes an amendment numbered 2553.

Mr. THURMOND. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, add the following:

That chapter 11 of title 18, United States Code, is amended by—

(1) inserting between sections 219 and 223, the following new section:

"§ 220. Contingency fees in lobbying

"(a)(1) It shall be unlawful for any person to make, with intent to influence, any oral or written communication on behalf of any other person other than the United States, to any department, agency, court, House of Congress, or commission of the United States, for compensation if such compensation has knowingly been made dependent—

"(A) upon any action of Congress, including but not limited to actions of either the House of Representatives or the Senate, or any committee or member thereof, or the

passage or defeat of any proposed legislation;

"(B) upon the securing of an award, or upon the denial of an award, of a contract or grant by establishment of the Federal Government; or

"(C) upon the securing, or upon the denial, of any Federal financial assistance or any other Federal contract or grant.

"(2) The provisions of paragraph (1) shall not apply in any case involving the collection of any amount owed on a debt or on a contract claim owed to a person by the Federal Government.

"(b) Any person who violates the provisions of this section shall be fined not more than $50,000 or imprisoned not more than 2 years, or both.

"(c) The Attorney General may bring a civil action in any United States district court, on behalf of the United States, against any person who engages in conduct prohibited by this section in lieu of or in addition to an action taken pursuant to subsection (b), and, upon proof of such conduct by a preponderance of the evidence, may recover twice the amount of any proceeds obtained by that person due to such conduct. Such civil action shall be barred unless the action is commenced within six years after the later of (1) the date on which the prohibited conduct occurred, or (2) the date on which the United States became or reasonably should have become aware that the prohibited conduct had occurred."; and

(2) amending the table of sections by striking out the item between the item relating to section 219 and the item relating to section 224 and inserting in lieu thereof the following:

"220. Contingency fees in lobbying.".

SEC. 2. This Act and the amendments made by this Act shall become effective on the date of enactment of this Act and shall apply to any contract entered into on or after such date of enactment.

Mr. THURMOND. Mr. President, today, I rise to offer an amendment which would prohibit any person who is being compensated for lobbying the Federal Government from being paid on a contingency fee basis. This measure is identical to S. 91, a bill I introduced on the first day of this Congress. This legislation takes an important step towards ensuring integrity in the administration of the Federal Government.

The underlying goal of this amendment is to help ensure integrity in Government procurements. Congress has a great responsibility to ensure integrity in the administration of the Federal Government at all levels—including the Department of Defense. This amendment addresses these same goals. Now that we have entered the era of the $1 trillion Federal budget, this amendment is even more important. Vast sums of money are appropriated by Congress for various projects and studies. Contracts worth millions of dollars are regularly entered into by Federal agencies. This Defense authorization bill carries a price tag of approximately $289 billion. The competition for these funds and contracts is intense.

While it is not always easy to legislate integrity, we can undertake appropriate efforts to remove certain incentives to use undue influence and to enter into contracts which are contrary to the fiscal and ethical interests of our Nation. Accordingly, I have introduced this legislation which will prohibit payment for lobbying on a contingency fee basis.

Mr. President, I have heard reports of certain lobbying activities which greatly disturb me. Specifically, I was informed that one lobbyist approached an institution and inquired as to how much Federal money was needed to fund a particular project. When the response was $12 million, the lobbyist responded that he would ask Congress for $14 million. If successful, he would be paid $2 million. If he was unsuccessful, only a base fee would be charged. When our Nation is bridled with such a huge debt, we certainly cannot afford to borrow more money to provide such suspect incentive payments which work to further increase the deficit.

Last session, Congress passed, and the President signed into law, a major ethics bill. Included as part of that bill was an amendment offered by our colleague from West Virginia, Senator BYRD, which attempts to address the type of lobbying abuses I outlined above. The Byrd provision prohibits the spending of Federal funds to pay lobbyists, either directly or indirectly. Anyone who is awarded a Federal contract, grant, loan, loan extension, or enters into a cooperative agreement with the Federal Government, must file a written declaration. However, it does not prohibit the practice of contingency fee lobbying. In fact, lobbyists appear to be ignoring the Byrd reporting requirements. For example, for the period of December 23, 1989 to March 31, 1990, only one disclosure form was filed with the Department of Defense.

Mr. President, the question of the propriety of contingency fees in lobbying activities is not a new one. Common law has held such contracts unenforceable for decades. In fact, in 1916, the Supreme Court ruled on the character of such financial arrangements in the case of Crocker versus United States. The Court, quoting from a prior case, stated:

All contracts * * * should be made with those * * * who will execute them most faithfully, and at the least expense to the Government. Contingency fee arrangements * * * tend to introduce personal solicitation, and personal influence, as elements in the procurement of contracts; and thus directly lead to inefficiency in the public service, and to unnecessary expenditures of the public funds.

Mr. President, recognizing the improper incentives contingency fees for lobbyists have injected into Government, 40 States have laws on the books which prohibit payment for lobbying on a contingency fee basis. My home State of South Carolina has prohibited this type of lobbying since 1935.

At the Federal level, contingency fee arrangements are addressed to some extent in the executive branch in addition to the Byrd provisions. Two laws covering contracts awarded by the executive departments—41 U.S.C. 254 (a) and 10 U.S.C. 2306 (b)—restrict the use of "commission, percentage, brokerage or contingent fee" arrangements to secure these contracts. However, the scope of these statutes is deficient in two respects. First, the violation of these provisions carries little penalty. The Government can only annul the contract secured by a contingency fee arrangement, or deduct from the contract the full amount of the contingency fee. Second, these statutes only apply to the executive branch and not to activities involving Congress.

Mr. President, the amendment I am offering would make contingency fee arrangements to influence Government action a criminal offense under Federal law. Any person who violates the provisions of this section shall be fined up to $50,000, or imprisoned not more than 2 years, or both.

Moreover, the Attorney General is empowered to bring a civil action to recover twice the proceeds obtained by that person due to such conduct. This act is prospective in nature and would only apply to contracts entered into after enactment.

Lobbyists often provide expertise and helpful information not otherwise available. I want to be clear on this point. There is an important role for lobbyists, but I am opposed to contractual arrangements which impugn the integrity and efficiency of our system. Clearly, a person should be entitled to reasonable fees for legitimate services in presenting officials of the Government with information as may apprise them of the character and value of the project or service offered, and thus enable those officers to act for the best interest of the Nation. However, the law has long recognized that contingency fees are not appropriate in areas such as criminal and domestic law. These fees are inappropriate because they introduce improper incentives into the system. Similar principles should apply to contingency fees for lobbying.

Mr. President, I urge my colleagues to support this amendment. The public deserves action on the part of Congress.

Mr. WARNER. Mr. President, I certainly want to join with my distinguished colleague and do anything we can to promote the integrity of Government. But I am concerned about the manner in which this particular bill is drawn up. It has a very stiff penalty of $50,000, or 2 years in prison, or both, and I am not entirely sure that

the language is not subject to the challenge of constitutional vagueness.

I wonder if I might ask my distinguished colleague a question. This is a criminal statute to amend title XVIII. Of course, the Armed Services Committee has no jurisdiction over it. I am perplexed as to why it should be added to this particular bill.

We, of course, have had no hearings on it. So my first question to my distinguished friend and colleague would be, have there been any hearings by the Senate on this important piece of legislation?

Mr. THURMOND. There have been no hearings on it, but I say to the Senator, it is a very simple matter. It simply provides that anyone who is going to lobby the Government cannot do it on an incentive basis. It is very clear and very simple. It is time. We need to pass this legislation and stop some of this corruption that is going on in this country.

Mr. WARNER. I might propound an additional question to my friend. I am not familiar with the lobbying business, and in my career I have not engaged in it. I am going to ask a somewhat basic question.

I understand there is a common practice of what is known as "value billing," whereby you charge a standard fee and then, should your efforts produce a very satisfactory result, it is common practice that your fee, understandably, can be doubled. Would that be covered by this?

Mr. THURMOND. Yes, it would.

Mr. WARNER. Supposing a firm that had a standard retainer was quite successful before a Government agency, or, indeed, before the Congress, and the client was desirous of paying a bonus; would that be subjected to this statute?

Mr. THURMOND. Yes, it would. You get on a contingency basis.

Mr. WARNER. I am not entirely sure. I think that question might be dependent on the intent of the client as to whether or not it was considered a bonus which was not part of the original contract.

This type of question, I say to my good friend, I think should be carefully explored before we place this criminal statute on the books of the United States. I think we owe it to the very large segment of those who work in this area to have the opportunity to be heard before it becomes law.

Mr. THURMOND. There is no question about it. When one is on a contingency fee basis, this is incentive to gouge the Government and get all they can out of the Government because they make more. Lawyers or lobbyist can operate on a basis of fair and equitable fees. That is what they ought to do in dealing with the Government. If they want to deal with private business and private contracts that is a different matter. When they deal with the Government this should not be allowed. It is a temptation to gouge the Government.

Mr. WARNER. I yield such time as required by the Senator from Idaho.

Mr. McCLURE. Mr. President, I am troubled by the amendment for quite a different reason than ennunicated, although I certainly share the feelings stated by the Senator from Virginia. I do not think it is a casual matter. I do not think it should be treated as casual matter. I am afraid we are doing that tonight.

The distinguished Senator from South Carolina made up his mind and other people who have not thought about it are persuaded to come in in a rush of emotion. I think this is the wrong way to legislate.

Beyond that we are not talking about gouging the Government despite that rhetoric. We are talking about an arrangement with two people who are not in Government dealing with each other. It has nothing to do with dealing with the Government. It is their private relationship and how they will compensate one for services provided to the other.

I practiced law for 16 years before I was elected to the Congress, and in that period of time I never once had a contingent fee because I did not believe in a contingent fee. Most of the brothers at the bar did accept cases on a contingent fee basis, and I lost more than one client. People that came in and said, "I want you to have a contingent fee because I want you to be interested in the outcome," my response was always, "If you think you have to pay me extra to be interested in the outcome, then you got the wrong fellow in the first place. Go get another attorney." And they did, because I did not believe in the contingent fee. But that was my business and my client's business.

Whether I was dealing with a third party or dealing with the Government, it has nothing to do with the question of whether or not the Government will get gouged or not. It has to do with the private arrangement between one private citizen and another private citzen who happen to be arranging the kind of terms of compensation to be given to them in that relationship and for the services rendered.

I do not think it is right for us to attempt to regulate that kind of private relationship. As a matter of fact, I am not certain at all that it is constitutional for us to restrict the way in which people contract between themselves with respect to the way they exercise their right either to approach Government or in the freedom of speech between themselves or between themselves and their Government.

I feel that this is simply wrong. Even though I personally do not like contingent fees and never charged them in my practice of the law, I do not think it is right for us to say it is morally reprehensible for people to make that kind of arrangement which they find to be suitable as between themselves. I am strongly opposed to the amendment. Although with the number of cosponsors, I suppose maybe unless some cosponsors change their minds, it is a fait accompli and it will be agreed to.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Again I must confess not to have the background that the distinguished Senator from South Carolina has on this issue. It was handed to me a short time ago. It appears to me the judicious thing for the Senate to do is hold hearings in that committee of jurisdiction, namely the Senate Judiciary Committee.

But, nevertheless, I agreed with my good friend that I would not ask for a RECORD vote, and I urge others not to do so. We can voice vote this matter and then consider it at an appropriate time during the course of the conference.

So, I do not know how I will eventually come down on this thing, yea or nay. I sound the alarm bell I am concerned about the procedures we are following at 4 minutes before midnight on a piece of legislation that could result in criminal penalties.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I rise to support the amendment of Senator THURMOND. It gets to a really deep problem that we have and that is a perception that the fee of somebody that is lobbying for a Government contractor for an award of some kind is going to be contingent and indeed is contingent upon the success. The fee that is received by that person will be determined by whether or not the award is made. If an award is made, these then become Government funds. This is not quite the same as a private contract. This involves a Government award or a Government contract.

We have many restrictions on lobbyists already. It is not unheard of that we have restrictions. We have regulations of persons lobbying the Government, requiring them to register. We have a restriction in last year's Interior appropriations bill, I believe it was the Byrd amendment, that says that you cannot lobby with appropriated funds. We have a requirement in the Defense Department, a requirement of certification by the persons obtaining a defense contract that in fact the person lobbying for that contract did not have a contingent fee. So we already have a civil prohibition on the use of contingent fees inside the Defense Department when it comes to lobbying for defense contracts.

This type of a prohibition on contingent fees exists in 37 States, or 35 States. Thirty-five States have laws that prohibit the use of contingent fees by lobbyists. We know what the odor is with these kind of fees. We saw it in the Wedtech deal where a lobbyist was going to receive a $200,000 payment if he obtained a Navy contract of one type, and a fee of twice that amount if he obtained a different kind of a Navy contract.

These kind of contingent fees contract simply do not pass the smell test. We ought to do what 35 States have done, which is to prohibit these kind of contracts and I would urge the adoption of the Thurmond amendment.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, very briefly because there is anxiety in the Chamber to conclude, the substance of the amendment offered by the distinguished Senator from South Carolina is fundamentally different from a contingent fee arrangement for a lawyer because that contract is entered into where the client can afford to pay a fee and can secure a lawyer only if the lawyer gets a share of the recovery.

When the distinguished Senator from Idaho comments about his interest in a case, whether or not he has a contingent fee, he is talking about a client who can afford to pay him a fee in advance.

What this amendment really goes to is the problem of corruption where you have lobbying and the enormous sums of money which may be obtained, and if someone has a percentage of a contingency on the result there is the motivation for a corrupt practice. I am not 100 percent sure, as I listened to this matter, that there is a broad evidentiary base, but I do think that a hearing would likely advance that cause substantially. That is why I support this amendment.

The PRESIDING OFFICER. Is there futher debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from South Carolina.

The amendment (No. 2553) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORE addressed the Chair.

The PRESIDING OFFICER. The Senator is advised that there are pending amendments.

Mr. GORE. Mr. President, I ask unanimous consent that the pending amendments be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2554

(Purpose: To enhance the United States' missile non-proliferation policy)

Mr. GORE. Mr. President, I send an amendment to the desk on behalf of Mr. BINGAMAN, myself, Mr. MCCAIN, Mr. PELL, and Mr. HELMS, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. DASCHLE). The amendment will be stated.

The asssistant legislative clerk read as follows:

The Senator from Tennessee [Mr. GORE], for Mr. BINGAMAN (for himself, Mr. GORE, Mr. MCCAIN, Mr. PELL, and Mr. HELMS), proposes an amendment numbered 2554.

Mr. GORE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Missile Technology Control Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the global spread of weapons of mass destruction, accompanied by the proliferation of sophisticated missile delivery systems and missile technology, poses a serious threat to stability and peace in many regions;

(2) the Missile Technology Control Regime (MTCR) was established in 1987 to restrict such proliferation;

(3) nothwithstanding the existence of the MTCR, companies situated in countries which are adherents to the MTCR have transferred, in violation of the principles of that agreement, missile equipment and technology to nonadherents;

(4) the MTCR is further weakened as it does not include the Soviet Union, China, Agrentine, North Korea, Brazil, and other countries, which have transferred missiles and missile technology to countries without this capability;

(5) missile proliferation could be better controlled if MTCR adherents shared a common interpretation of the MTCR principles and strictly enforced its provisions;

(6) the spread of missiles can be effectively restricted only if all countries involved in the transfer of such missiles and technology agree to restrict such transfers;

(7) coordination and cooperation between the agencies charged with responsibility for carrying out United States policy on missile control is essential; and

(8) greater consultation between the President and the Congress is needed to ensure that Congress is being kept fully informed about missile proliferation and development, and ongoing measures to halt missile proliferation.

SEC. 3 PURPOSE.

It is the purpose of this Act—

(1) to restrict the proliferation of missiles and missile equipment and technology;

(2) to encourage greater international adherence to the Missile Technology Control Regime (MTCR) of 1987;

(3) to strengthen the MTCR through increased cooperation among adherents to strengthen coordination of export controls;

(4) to seek further bilateral and multilateral agreements which complement the MTCR;

(5) to encourage countries without missiles to forego the development or acquisition of these weapons; and

(6) to require stricter enforcement procedures and improved cooperation among the U.S. agencies responsible for controlling missile and missile technology exports.

SEC. 4. AMENDMENT TO THE ARMS EXPORT CONTROL ACT.

The Arms Export Control Act is amended by inserting after chapter 6 (22 U.S.C. 2795b. et seq.) the following new chapter:

"CHAPTER 7—CONTROL OF MISSILES AND MISSILE EQUIPMENT AND TECHNOLOGY.

"SEC. 71. POLICY.—It is the policy of the United States to improve the control of and reduce the proliferation of missiles and missile equipment and technology by taking all appropriate measures—

"(1) to improve enforcement and seek a common and broader interpretation among Missile Technology Control Regime (MTCR) members of MTCR principles;

"(2) to increase the number of countries that adhere to the MTCR;

"(3) to explore with nations that do not adhere to the MTCR and which export missiles and missile equipment and technology the negotiation of bilateral and multilateral agreements consistent with the principles of the MTCR or which, at a minimum, do not undercut the MTCR;

"(4) to promote the international review of measures and development of common standards to reduce the proliferation of missiles and missile equipment and technology; and

"(5) to seek binding multilateral agreements prohibiting the global spread of missiles that are subject to MTCR guidelines.

"SEC. 72. DENIAL OF THE TRANSFER OF MISSILE EQUIPMENT AND TECHNOLOGY BY UNITED STATES PERSONS.—(a) SANCTION.—If the President determines that a United States person has transferred, or conspired to transfer or facilitated the transfer in violation of the provisions of section 38 of the Arms Export Control Act (22 U.S.C. 2778), section 5 or 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2404, 2405), or any regulations issued under any such provisions of

(1) MTCR category II missile equipment and technology then the President shall deny to such United States person for a period of two years

(A) U.S. government contracts relating to missile equipment and technology, and

(B) licenses for the transfer of missile equipment and technology controlled pursuant to this Act.

(2) MTCR category I missile equipment and technology, then the President shall deny to such United States person for a minimum of two years.

(A) all U.S. government contracts, and

(B) all export licenses and agreements for items on the United States Munitions List.

(b) DISCRETIONARY SANCTIONS.—In the case of any determination made pursuant to subsection (a), the President may pursue any sanctions listed in Section 38(c) of this Act.

(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

(1) the product or service is essential to the national security of the United States; or

(2) such person is a sole supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments;

SEC. 73.—TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY BY FOREIGN PERSONS (a) SANCTIONS.—If the President determines that a foreign person has transferred, after the date of enactment, MTCR missile equipment or technology that would be, if it were United States-origin equipment or technology, subject to the jurisdiction of the United States under this Act,

(1) within category II of the MTCR annex or the President has made a determination under section 11B(b)(1) of the Export Administration Act of 1979, as amended, then the President shall deny, for a period of two years

(A) U.S. government contracts relating to missile equipment and technology, and

(B) licenses for the transfer to such foreign person of missile equipment and technology controlled pursuant to this Act.

(2) within category I of the MTCR annex, then the President shall deny for a period of not less than two years

(A) all U.S. government contracts with such foreign person, and

(B) licenses for the transfer to such foreign person of all items on the U.S. Munitions List.

(b) DISCRETIONARY SANCTIONS.—If the President determines that a foreign person has transferred missile equipment and technology he may impose any sanction described in Section 11A(b) of the Export Administration Act of 1979, as amended.

(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

(1) in the case of an item the transfer of which has been authorized by an MTCR adherent, after consultation with the licensing government, the transfer did not violate the principles of the MTCR guidelines;

(2) the product or service is essential to the national security of the United States;

(3) such person is a sole source supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments; or

(4) the foreign person has been appropriately sanctioned by its national government.

"SEC. 74. PROHIBITION ON SATELLITE LICENSING.—The United States Government shall not, through the issuance of licenses under this Act, assist any missile program of the People's Republic of China, directly or indirectly, and shall not, through the issuance of licenses under this Act, permit the export or the shipment of United States satellites for launch on Chinese space launch vehicles and shall revoke any previously issued licenses granted for the export of such satellites unless the President certifies to the Congress that, in the one year prior to the certification, China has not supplied missiles, missile equipment and technology, or chemical or biological weapons, including precursors intended for use in such weapons, to Iran, Iraq, Syria, Libya, or any non-MTCR adherent, and has provided reasonable assurances that no future sales of missiles, missile equipment and technology or chemical or biological weapons to such countries are planned.

"SEC. 75. REPORT ON MISSILE PROLIFERATION.—(a) CONTENTS OF REPORT.—Not later than 90 days after the date of enactment of this Act, and every 180 days thereafter, the Secretary of State shall submit to the Congress a report on international transfers of aircraft which the Secretary has reason to believe may be intended to be used for the delivery of nuclear, biological, or chemical weapons (hereafter referred to as "NBC capable aircraft") and international transfers of missiles and missile equipment and technology to Syria, Iraq, Libya, and Iran, and any other nation seeking to acquire such equipment or technology in violation of MTCR principles, other than those listed in subsection (d) that shall include—

"(1) the status of missile and aircraft development programs in such nations, including efforts by those nations to acquire missiles and missile equipment and technology and NBC capable aircraft and an assessment of the present and future capability of those countries to produce and utilize such weapons;

"(2) a description of particular significant assistance provided, after the date of enactment, to such

"(3) a list of companies which continue to provide missile equipment and technology to such nations, as of the date of the report;

"(4) a description of diplomatic measures that the United States has taken or that other MTCR members have made to the United States with respect to activities of private firms and countries suspected of violating the MTCR;

"(5) an analysis of the effectiveness of the regulatory and enforcement regimes of the U.S. and its MTCR partners to control the export of missile and missile technology; and

"(6) a determination as to whether transfers of missile equipment and technology by any country pose a significant threat to the national security of the United States.

"(b) CLASSIFICATION.—The President shall make every effort to submit all of the information required by subsection (a) in unclassified form. Whenever the President submits any such information in classified form, he shall submit such classified information in an addendum and shall also submit simultaneously a detailed summary, in unclassified form, of such classified information.

"(c) CONSTRUCTION.—Nothing in this section—

"(1) requires the disclosure of information in violation of Senate Resolution 400 of the Ninety-fourth Congress or otherwise alters, modifies, or supersedes any of the authorities contained therein; or

"(2) shall be construed as requiring the President to disclose any information which, in his judgment, would seriously—

"(A) jeopardize the national security of the United States;

"(B) undermine existing and effective efforts to meet the policy objectives outlined in section 71 of this Act; or

"(C) compromise sensitive intelligence operations, with resulting grave damage to the national security interests of the United States.

"(d) EXCLUSIONS.—Australia, Belgium, Canada, Denmark, Federal Republic of Germany, France, Greece, Iceland, Israel, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey and the United Kingdom.

"SEC. 77. DEFINITIONS.—For purposes of this chapter—

"(1) the term 'Missile Technology Control Regime' or 'MTCR' means the policy statement, between the United States, the United Kingdom, the Federal Republic of Germany, France, Italy, Canada, and Japan, announced on April 16, 1987, to restrict sensitive missile-relevant transfers based on annex of missile equipment and technology, and any subsequent amendments;

"(2) the terms 'missile' and 'missile equipment and technology' means those items listed in the MTCR Equipment and Technology Annex, as amended;

"(3) the term 'person' includes the singular and plural and any individual, partnership, corporation, or other form of association; and

"(4) the term 'foreign person' means any non-United States person.

SEC. 5. TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY TO COUNTRIES THAT TRANSFER OR RECEIVE MISSILE EQUIPMENT AND TECHNOLOGY.

(a) SANCTIONS.—If the President determines that as of the date of enactment of this act, or at any time thereafter, a MTCR non-adherent, authorizes the transfer of, receives, or attempts to acquire missiles or missile equipment and technology that contributes materially to the development of missile systems capable of delivering at least a 500 kg payload to a range of at least 300 km, then the President shall deny all export licenses for the transfer of—

(1) all items on the U.S. Munitions List, and

(2) missile equipment and missile technology controlled pursuant to the Export Administration Act of 1979, as amended.

(b) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions pursuant to subsection (a) if the President certifies to Congress that—

(1) to do so would be in the national security interests of the United States; or

(2) the transfer in question was licensed by a government adhering to the MTCR; or

(3) the transfer in question is for an item for which the President has received reliable assurances that that item is intended for civilian end use.

(c) REMOVAL OF SANCTIONS.—The President may remove the sanctions imposed pursuant to subsection (a) if the President determines that the country under sanction has suspended attempts to acquire, transfer or receive missile equipment and missile technology for a period of at least one year.

The PRESIDING OFFICER. The Senate is not in order. It is very difficult to hear.

Mr. WARNER. Mr. President, will the Senator yield?

Mr. GORE. Yes.

Mr. WARNER. Given the lateness of the hour and given the fact this amendment has been accepted on both sides, I am wondering if the Senator from Tennessee, and perhaps other Senators, recognizing that the amendment could be accepted, could make his statement somewhat brief out of courtesy to others.

Mr. GORE. I would say to the Republican manager of the bill, I fully

intend to do that. Indeed, earlier when my colleagues and I sought recognition, I made that point.

Mr. WARNER. I did not mean to be in any way offensive.

Mr. GORE. I fully intend to be brief in propounding the amendment.

I might say, however, Mr. President, that I believe this to be a matter of some importance.

Mr. President, Senator BINGAMAN's statement will speak for itself. As our colleagues know, he was detained and unable to be here to propose this amendment himself.

This amendment has been more than a year in the making. The Senator from Arizona [Mr. MCCAIN] and myself introduced a similar measure some time ago. Just before that, the Senator from New Mexico [Mr. BINGAMAN] introduced a separate measure.

The two bills were very different but, over the course of the last year, we have narrowed our differences and found ways to create a measure superior to the versions we each had at the beginning of this process.

I want to thank my colleague, Senator MCCAIN, for the very close working relationship that he and I have had in this measure and, of course, as I already noted, Senator BINGAMAN for his leadership, both on the issue and in the committee.

I would like to just take a moment to thank the Senator from Virginia [Mr. WARNER] and the Senator from Georgia [Mr. NUNN] for their help. Finally, I would like to say a special word about the contribution of Senator PELL, the chairman of the Foreign Relations Committee, who has given his good offices and worked extremely diligently to help us solve many problems so that we could bring this measure to the floor. The ranking Republican member of the Foreign Relations Committee, Senator HELMS, has done so, as well.

This issue involves the control of ballistic missile technology, which is now being exported by companies interested in making a profit, to foreign countries that are often extremely irresponsible. For example, Iraq has received ballistic missile technology. Let me quote from a report on U.S. export control policy published by the Rand Graduate School:

> On December 7, 1989, Hussein Kamel, Iraqi minister of industry and military industrialization announced that his country had demonstrated its ability to launch satellites two days earlier by firing a three-stage rocket. The rocket launch was later confirmed by members of the U.S. intelligence community. Hussein also claimed that Iraq had fired two surface-to-surface missiles with sufficient range to reach Cairo, Istanbul, all of Iran and southern parts of the Soviet Union.

We have for years attempted to control the proliferation of fissionable material in order to prevent the spread of nuclear weapons. We have not applied the same diligence to the effort to control the technologies which go into the manufacture and creation of those systems which are capable of delivering nuclear weapons over great distances. The same missiles, of course, are capable of delivering chemical and biological weapons over long distances, and this is a matter of grave importance.

Last year, the issue of missile proliferation was still at the periphery of attention for many Members, although by and large it was getting to be well recognized that this was an important problem. Now, the situation is different. We can clearly see that even as the threat of war with the Soviet Union recedes, other actors are on the stage bent upon acquiring weapons of mass destruction and the means to deliver them.

Moreover, unlike the Soviets—upon whose caution and ultimate rationality we have depended—these new actors are not necessarily operating by rules we comprehend. In their zealotry and ferocious nationalism, they might well be capable of doing the unthinkable—or at least what we have considered unthinkable. In a sense the threshold of the unthinkable has already been crossed, with the first use of poison gas in open warfare since the First World War.

The fight against the proliferation of missiles can easily be lost. These are items that can be shipped, or technologies that can be transferred with much less difficulty than is the case for nuclear weapons. Once the technology has been passed to the wrong parties it will be reexported, and a chain reaction will take place after which proliferation is complete, and the fight is lost.

What every study on this subject emphasizes is how widespread proliferation is becoming, how rapidly it can proceed once past the threshold stage, and how it can quickly move beyond our grasp. It also documents the fact that the spread of these missiles and their technologies is propelled by the desire to turn a profit: Whether that is a desire felt by a company somewhere in Europe, or by the Soviet Union or the PRC, or perhaps by a country in Latin America—such as Brazil—for mass production and reexport to whomever.

That is why we have to act firmly now. It is specifically why the very gradual diplomatic processes that have been underway among potential suppliers of missiles and their related technologies are too slow. And it is for that reason that Congress should act in accordance with its sense of the urgency of the matter, rather than in the light of concerns about the most comfortable pace of diplomats.

The purpose of our proposal is simple. We wish to create new and important areas of action by the President, designed to inhibit the flow of missile technology by hurting those who engage in this traffic where we can most easily reach them: In the pocketbook. We wish to make it clear that corporations or parastatal groups that operate as corporations must consider a choice between such gain as they may obtain by sneaking missile technology to others, and such loss as they may incur through a cutoff in their ability to do business with the U.S. Government.

Let me be clear about why we think we can have an impact. We believe that this technology is being sold in many instances by corporations—perhaps domestic, perhaps foreign—that either do or want to do business with the Government of the United States or with its permission. It is a tidy matter on the side for some corporations and some governments to dally in the proliferation of these technologies. We want to make them think about their larger interests. Our proposed penalties do that. So too does a reporting requirement which we intend would name names and strip away respectability from corporations and governments that are willing to speed the proliferation of ballistic missiles regardless of the consequences.

I think it is also important to know some things that this bill will not do, even though some may assert otherwise. We are not proposing to legislate for countries that are partners with us in the MTCR. If they grant exports licenses on to corporations that apply on the up and up, it will not matter if we disagree with their judgment: This bill and its sanctions do not apply. We are also not proposing to bind the President's hands. He has mechanisms in the bill that give him considerable flexibility as to the severity of his response, and even as to waiver of a response.

The fact remains that the missiles which have already found their way into the arsenals of some of the most dangerous governments on Earth were sold for profit. Technologies for the creation of such delivery systems have been sold for profit. Time is running out. We respect the administration efforts to use diplomacy to regard the spread of these weapons, but we reject their contention that they are succeeding. We are losing the fight. Congress has a duty to assert its views in this matter. Let us therefore deal a blow to proliferation of missiles at its core, by passing the Bingaman-Gore-McCain amendment.

Mr. BINGAMAN. Mr. President, the amendment that was just sent to the desk, the Missile Technology Act of 1990, represents the culmination of a long legislative process. I am joined by Senators GORE, MCCAIN, PELL, and HELMS in offering the amendment.

The amendment we are offering is a composite of the contributions of many Senators. Last year, I introduced S. 1227 and Senators GORE and MCCAIN introduced S. 1830. Both of these bills were intended to be comprehensive approaches to controlling the spread of this critical and dangerous technology, which in the hands of a Saddam Hussein or Mùammar Qadhafi would destabilize whole regions.

Both bills were referred to the Foreign Relations Committee, where hearings were held last October 31. Since sections of both bills also amended the Export Administration Act, we have also worked closely with the Banking Committee, especially in the last few days to ensure what we are doing in this amendment is consistent with their work on the Export Administration Act reauthorization, S. 2927, which was reported by that committee on July 27.

I am pleased to say that both committees are now in accord on a comprehensive approach this legislation. The amendment I have sent to the desk includes all elements of this legislation which pertain to the Arms Export Control Act. Senators RIEGLE and GARN have agreed to include in the managers' amendment to S. 2927, a provision amending the Export Administration Act, which complements the amendment we are currently debating. My understanding is that S. 2927 will be taken up before we recess tomorrow. I ask unanimous consent that the text of my EAA amendment be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MODIFICATION OF MISSILE TECH SECTION

1. On page 30, line 12, delete all from "(a)" through "(1)" on line 13 and insert the following:

"Proliferation Control Violations.

"(a) VIOLATIONS BY UNITED STATES PERSONS.—(1) SANCTION.—If the President determines that a United States person has transferred or conspired to transfer or facilitated the transfer, in violation of the provision of section 38 of the Arms Export Control Act (22 U.S.C. 2778), section 5 or 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2404, 2405) or any regulations issued under any such provisions, of any item on the annex of goods and technology to the Missile Technology Control Regime, then the President shall deny to such United States person for a period of two years licenses issued pursuant to this Act for the transfer of missile equipment and technology.

"(2) DISCRETIONARY SANCTIONS.—In the case of any determination referred to in subsection (a), the Secretary may pursue any other appropriate penalties available under section 11 of this Act.

"(3) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

"(A) the product or service is essential to the national security of the United States; or

"(B) such person is a sole source supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments.

"(b) TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY BY FOREIGN PERSONS.—(1) SANCTION.—"

2. On page 30, line 15, strike "1 year" and insert "2 years".

3. On page 30, line 15, after "(b)" insert "—(A)".

4. On page 30, line 24, after "State" insert ", or (B) the President has made a determination under section 73(a) of the Arms Export Control Act."

5. On page 28, line 24, after "technology" insert ", including all dual-use goods and technology on the Missile Technology Control Regime Annex,".

6. On page 30, line 3, strike "." and insert ", or is a potential channel of diversion identified pursuant to paragraph (5) of this subsection."

7. On page 30, after line 7, insert: "(5) The Secretary shall establish a procedure for information sharing with appropriate officials at the Central Intelligence Agency and the Defense Intelligence Agency that will ensure effective monitoring of flows of MTCR technology to all countries that the Secretary of State has determined are of concern to the United States regarding missile proliferation in order to ensure detection of channels of diversion."

Mr. BINGAMAN. Mr. President, the Armed Services Committee conferees and the Banking Committee conferees will need to work very closely in their respective conferences with the House Foreign Affairs Committee to ensure that the end result of the legislative process this year remains consistent in the respective bills. Senators RIEGLE and GARN have assured me that that is their intention and it is certainly mine.

Mr. President, I particularly want to commend the work of Senator PELL on this legislation. He was an original cosponsor of S. 1227. I worked closely with him in formulating the nonproliferation approach in this bill. He has long experience in these matters, particularly from his work on chemical, biological, and nuclear nonproliferation. I appreciate his counsel.

The same is true for the senior Senator from Ohio [Mr. GLENN]. He has done more than any other individual in this body to combat the proliferation of nuclear weapons. The model for the legislation I am offering this evening is the landmark Nuclear Non-Proliferation Act of 1978. I was delighted to have him as an original cosponsor of S. 1227.

Finally, I want to commend Senators GORE and MCCAIN for their tremendous contributions to this legislation. We have, I believe, put together the best parts of the two bills, which fundamentally pursued a common approach.

Mr. President, the problem we are addressing with this legislation is truly frightening. Last year, before the Senate Governmental Affairs Committee, CIA Director William Webster estimated that by the year 2000, 15 countries would have intermediate range ballistic missiles. Many of these countries are in the most unstable regions of the world. Regional arms races are not new. However, they are unfortunately now fueled by missile technology transfers, open and covert, both from East and from West. This raises the potential for much greater destruction and for broadening of regional conflicts beyond their borders.

POTENTIAL FOR MASS DESTRUCTION

Moreover, it is a very real possibility that atop these missiles, nations will place nuclear or chemical warheads. It makes little sense, from either a military or an economic perspective, to make the large investment required to develop longer range missiles, if the intent is not to couple that capability with warheads of great lethality.

HAIR TRIGGER INSTABILITY

Finally, the introduction of long-range missiles with potential chemical or nuclear warheads into regional hotspots is likely to increase instability and bring on conflict. Few, if any, of the Third World nations currently developing long-range missile capabilities will have the resources to address survivability or command and control requirements as part of their efforts. Their potential foes may well see preemption as an attractive option. Knowing that, these nations may put their small missile forces on hair-trigger alert, increasing the likelihood of accidental launch. Finally, whatever potential ballistic missile defenses will be an affordable option in the Third World. As a consequence, the potential for military confrontations getting out of hand will be significantly increased by the proliferation of long-range ballistic missiles.

SIMILARITY TO NUCLEAR PROLIFERATION PROBLEM

It is easy to spin out frightening future scenarios. It is far more difficult to come up with effective means of blocking, or at least delaying them. The problems we face in constructing an effective missile nonproliferation regime are strikingly similar to the problems we earlier faced in developing an effective nuclear nonproliferation regime. It seems to me that we have today arrived at the same crossroads on the missile proliferation issue as we were at in 1976 and 1977 in dealing with nuclear proliferation.

GROWING LIST OF PROLIFERATION CASES

We have recently seen missile technology proliferation developments that raise grave concerns: Iraqi attempts to obtain technology, Saddam Hussein's threats to his entire region,

covert transfers from Western Europe to Argentina, Chinese sales of CSS-2 missiles to Saudi Arabia, Indian testing of the Agni missile, statements in the Egyptian press that Egypt now can manufacture its own surface-to-surface missiles, reports of West German scientists in Libya working on a ballistic missile, and the list could go on.

Fifteen years ago, we faced similar developments in the nuclear arena: The 1974 Indian nuclear explosion, carried out after diversion of Canadian supplied technology, and a growing number of cases of transfer and indigenous development of nuclear reprocessing and enrichment technologies, such as the West German-Brazil reactor deal into which reprocessing technology was thrown as a sweetener to win the contract. These developments helped focus international attention on the problem. Both the Ford and Carter administrations played a leadership role in shaping the international response, and Congress was motivated to act as well with the overwhelming passage of the landmark Nuclear Non-Proliferation Act [NNPA] of 1978.

DUAL-USE TECHNOLOGIES WITH MANY SUPPLIERS

The problems we are dealing with in both the nuclear and missile arenas are very similar and I believe we can learn a great deal from our earlier experience with combatting nuclear nonproliferation.

In both cases we are dealing with technologies that have both peaceful and military purposes. The question we faced in the nuclear sphere was how to build additional barriers between legitimate nuclear energy development and weapons programs. The Nuclear Nonproliferation Treaty and the International Atomic Energy Agency safeguards were already in effect. But more was needed. We chose then to focus on the concept of timely warning. Certain nuclear technologies, such as enrichment and reprocessing technologies, brought nations so close to a weapons capability that we decided with other suppliers to restrict their transfer.

Since the United States was by no means the sole source of enrichment and reprocessing technologies, or of special nuclear materials, such an agreement with fellow suppliers was absolutely necessary. We could not go it alone.

In the missile arena, the technology is less specialized, and, as a result, there are even more suppliers. Furthermore, our technological dominance has declined in the past 15 years, and our commercial position has deteriorated in parallel. Thus, the commercial interests of others may be even harder to check. Moreover, drawing technical lines may be more difficult in the missile area, although the timely warning concept is still valid. The equivalents of reprocessing and enrichment technologies in the nuclear case are rocket launchers, guidance systems, and reentry vehicles in the missile case. The equivalents of the reactors and fuel cycle services which we were willing to supply in the nuclear case, are space launch services and peaceful space cooperation.

SOLUTIONS ON NUCLEAR SIDE

Let me summarize then the actions taken both on a multilateral basis and in the Congress in the mid-1970's to deal with nuclear proliferation.

MULTILATERAL

The major nuclear technology suppliers, East and West, came together and created the London Suppliers Group they agreed on guidelines aimed at stopping sensitive nuclear technology transfers, in particular transfer of reprocessing and enrichment technologies, while peaceful nuclear power development continued.

The nuclear suppliers agreed not to be drawn into a commercial competition which required the transfer of reprocessing and enrichment technologies as technology transfer sweeteners in order to win lucrative contracts for nuclear energy facilities. By avoiding such a competition, the supplier nations hoped to avoid giving Third World countries the means for nuclear breakout.

CONGRESSIONAL

At the same time, the U.S. Congress wisely saw fit to legislate tools for U.S. involvement in multilateral action and for unilateral action in the event that multilateral arrangements should breakdown or prove ineffective. On March 10, 1978, the Congress enacted Public Law 95-242, the Nuclear Non-Proliferation Act of 1978. The act relied on multilateral efforts to promote peaceful uses of nuclear energy and to prevent military uses, while at the same time tightening the U.S. nuclear licensing process and holding out the risk of unilateral U.S. sanctions should other members of the international community fail to uphold the nonproliferation regime as laid out in the Nuclear Non-Proliferation Treaty and the London suppliers group guidelines.

SOLUTIONS ON MISSILE SIDE

As the 1980's conclude, a similar process is underway to control missile proliferation. However, the international community is not very far along in developing solutions to the threat of missile proliferation. I believe that the only viable solution is to construct a multilateral system of incentives and controls as we did in the nuclear case, with the United States taking the mantle of leadership, including a willingness to exercise unilateral controls and sanctions, where a multilateral regime fails.

In the past few years, there has been some success in building a multilateral approach to controlling missile proliferation. The Reagan administration did successfully negotiate the missile technology control regime [MTCR] with the United Kingdom, Canada, Japan, France, Italy and West Germany. Recently, The Netherlands, Spain, Belgium, Luxembourg, and Australia have all joined the MTCR, and the Soviet Union has said it will cooperate in this area as well. The MTCR has to be at the core of the international missile control regime, and I support broadening it as widely as possible. I commend the President and the Vice-President for expressing their grave concerns about missile proliferation and for making controlling it a high priority of the administration. I fear that they are going to have their mettle tested all too often by events around the globe as they try to construct an effective antiproliferation regime. And I believe that legislation in this area is essential to bolstering their effectiveness, just as it was in the nuclear case.

WHY LEGISLATION?

The administration will question why we need legislation. The same question was raised by some during the Carter administration on the need for the Nuclear Non-Proliferation Act of 1978, on which Senators GLENN and Percy played the leading role. My answer now will parallel theirs then, and our legislation parallels theirs as well in its essential features.

First if the United States is to show leadership, I think that it is important that we enumerate a clear national policy in this area. That policy must transcend the time in office of any single administration or personality, and this is only possible through the legislative process. Our amendment attempts to outline such a policy.

Second, there are some very real deficiencies in the current multilateral approach, which we need to take the lead in correcting, if we hope to stop or at least effectively control the proliferation of missiles. Not only are there far too few countries committed to the MTCR or any other proliferation restraints, but also those that are committed disagree on what technologies are controlled and whether or not exceptions are allowed. In addition, the MTCR may not be adequately designed to add controls on currently uncontrolled items, which becomes necessary when existing or on-the-horizon technolgy turns out to have missile applications.

A thoughtful and deliberative legislative process, such as we have had on this amendment, can be helpful in developing a consensus, not only here but abroad, on how to correct those deficiencies. Our amendment lays out an approach for strengthening the multilateral missile nonproliferation regime.

Third, there are problems in the U.S. export licensing system that need to be corrected to be sure that we are above reproach in carrying out our own obligations under the MTCR. Problems of interpreting our obligations under the MTCR have, at times, been pervasive in the administration.

Let me cite some cases. Last year, the Commerce Department was reportedly prepared to approve the export of hybrid digital analog computers to Iraq for use at its Sa'ad 16 complex. We use these computers at the White Sands Missile Testing Range. The issue reportedly had to be elevated to the NSC before the license was blocked. Recently, Commerce again was prepared to export titanium forging equipment to Iraq before congressional and interagency discussions led to denial of the license.

Last year, the administration had to go through some regulatory gymnastics in order to find a way to make the right decision to deny a license for export of a reentry vehicle heat and vibration simulator to India. Commerce did not feel that it had the authority to deny the license, so the item had to be added to the munitions control list. Some at State were still prepared to approve the license because of concern over our relations with India. The NSC had to finally intervene to block the deal.

A good example of problems in export control for new technologies arises with remotely piloted vehicles [RPV's]. RPV's are an annex one item of the MTCR. However, many do not have the range and payload by themselves to constitute a missile threat. However, with the implementation of the global positioning satellite system by the Air Force, foreign nations could tap into the GPS to improve RPV range and accuracy and thus use RPV's as cruise missiles.

These and other cases have convinced me we need to improve the coordination of our separate licensing processes in this area. I am pleased to say that we have worked with the Foreign Relations and Banking Committees to reach an accord on a comprehensive approach that includes such a provision. Senators RIEGLE and GARN have agreed to include a provision amending the Export Administration Act in the managers' amendment to S. 2927, which will complement this amendment and strengthen coordination among the agencies.

Cooperation between agencies has improved in recent months and that DOD is now seeing far more export cases. Nevertheless, that improvement does not obviate the need for legislation. The bad old days were very recent and could return without the sort of legislative mandate for cooperation in the Export Administration Act amendments.

Let me add, I am not one who generally endorses a strong Defense Department role in the export of dual-use technologies. Too often DOD has tried to control too many products and too many technologies at the expense of our competitiveness, rather than focusing in on truly critical technologies. But, the missile technology area is one area where I believe the consequences of proliferation are so great that we should err on the side of restraint.

Fourth, legislation is needed to ensure that the executive branch has an appropriate set of incentives with which to bring other nations into a missile nonproliferation regime and of sanctions with which to deal with violators of the regime.

INCENTIVES

Our amendment does not include additional incentives to nations not to develop their own missiles or space launch vehicles. This is an area the Congress may want to explore further in future legislation.

From a strictly economic perspective, developing independent space launch services is already unattractive for Third-World nations. The United States, France, The Soviet Union, and China already offer relatively inexpensive launch services, although unfortunately our prices, even for expendable launch vehicles, appear to be at the high end of the spectrum, largely because of subsidies provided to our competitors. We could do a better job in this area.

We could also, I believe, do a better job in involving Third World nations in our peaceful space exploration program, both manned and unmanned. NASA, ESA, and the U.S.S.R. have included foreign nationals in their space programs in the past. More involvement in these kinds of opportunities is a positive incentive which should be expanded.

However, we should not, and I wish to emphasize this, we should not be providing space launch vehicles or related technology as an incentive not to proliferate, as suggested in a State Department report submitted to Congress last year. It is simply too difficult to prevent such technology from being used for missile purposes. Timely warning of diversion to military uses would be lost.

SANCTIONS

Our amendment does include sanctions on both United States and foreign violators of missile nonproliferation restraints. As in the Nuclear Non-Proliferation Act of 1978, sanctions are among the most controversial sections of our amendment. In the amendment, sanctions are calibrated to the degree of violation. Exporters of missile equipment and technology will risk losing export licenses and U.S. Government contracts for missile technology, for varying lengths of time, subject to a Presidential waiver.

The administration will say that there are already numerous mechanisms available to send signals to foreign governments and companies about sensitive missile transfers. The problem is that interagency coordination is poor, and there is often disagreement about whether a missile technology transfer has occurred and what is sensitive. Different standards of proof and different definitions abound. Presidents also tend not to use broad powers to address narrow problems. The President needs sanctions specifically tailored to missile proliferation. In addition, there will always be U.S. interests arguing against the imposition of sanctions that hurt them. Denial of export licenses, for example, will affect cooperative projects of U.S. firms with foreign violators of missile controls. We need some degree of automaticity to the sanctions to insure that they actually take place.

I believe that we need to be on record as to whom we will do business with. Companies, whether domestic or foreign, who endanger international security and stability by proliferating missile technology for short-term profits, should not have the benefit of U.S. Government contracts or technology transfer. In the Nuclear Non-Proliferation Act of 1978, Congress established similar sanctions for transfer of enrichment and reprocessing technology and, in so doing, helped crystallize an effective multilateral regime against transfer of those technologies. Legislation should be clear, however, that sanctions apply to everyone, whether members of the MTCR or not.

CONCLUSION

In conclusion, Mr. President, legislation in this area can help foster greater dialog between the executive branch and the Congress on this problem. I fully recognize that missile proliferation is a problem we are going to have for as long in the future as I can see. It is going to have to be managed year in and year out. The problem is not going to be solved by a single piece of legislation. That is why our amendment puts in place several new reporting requirements to ensure that the executive branch keeps Congress fully informed on a timely basis on its successes and failures in stemming the flow of missile technology.

Mr. President, this amendment and its counterpart on S. 2927 provide a comprehensive strategy for restricting the transfer of ballistic and cruise missiles. If passed, it will allow the United States to take the lead in restricting the development and transfer of intermediate range ballistic and cruise missiles.

It improves export controls and enforcement; it takes a global approach to enforcement which will not disadvantage American industry. It pro-

vides sanctions calibrated to the degree of violation, which are sufficiently strict to discourage countries and companies from cheating by denying American missile equipment and technology.

It allows the United States to take the lead in seeking international cooperation in restricting the transfer of ballistic and cruise missiles. It reenforces U.S. adherence to the missile technology control regime [MTCR], encouraging the administration to seek a common and broader interpretation of MTCR provisions and more adherents to the MTCR.

If the administration is serious about the President's commitment to control missile proliferation, this legislation sets the agenda. It the administration is serious about keeping missiles out of the hands of unstable nations and terrorist groups, this legislation will help it do that. If the administration is serious about keeping America safe, this legislation places appropriate restrictions on a set of potentially destabilizing technologies and thereby promotes a more peaceful world.

Nonproliferation of missiles is not a partisan issue. Rather it is an issue of the gravest concern to every one of us. The decision before Congress is not whether we should pass legislation to prevent missile proliferation, but what type of legislation will best ensure the effective implementation of a missile nonproliferation policy.

Mr. President, I submit that this amendment is the best strategy for restricting the spread of ballistic and cruise missiles around the globe.

I urge adoption of this amendment.

Mr. GLENN. Mr. President, I would like to enter into a colloquy with my distinguished colleague from New Mexico, Senator BINGAMAN.

Mr. BINGAMAN. I would be pleased to engage in such a colloquy with my friend from Ohio, Senator GLENN.

Mr. GLENN. The proposed amendment addressing missile proliferation will signal to the world that America's support for the guidelines of the Missile Technology Control Regime is not limited to words alone. We are not only willing, but able, to take concrete actions in defense of that regime and the principles for which it stands. And what are these actions?

The amendment straightforwardedly provides that if a foreign firm illicitly exports controlled missile technology, it will pay a price as far as the United States is concerned. What price? The firm will lose its ability to do business with U.S. Government agencies. It will no longer be able to import U.S. missile-related technology, and it will stand a good chance of being exposed to the public. A similar penalty would be imposed on U.S. firms that may engage in such activities.

I do wish to take a moment to comment briefly about one provision in this amendment. The reporting requirement contains language exempting 18 nations that are friendly with the United States from the Secretary of State's missile reporting requirement. As I vote for this amendment, I do so with the understanding that if any of these nations should engage in illicit sales of equipment or technology that is specifically designated for special controls under the Missile Technology Control Regime, Congress would be so informed in those portions of the required report dealing with the would-be recipients.

Mr. BINGAMAN. I share the Senator from Ohio's understanding.

Mr. GLENN. I would like to ask my distinguished colleague if it is his interpretation of this reporting requirement that illicit sales by West Germany, for example, to Iraq of controlled missile technology would be the type of transaction that would be included in the Secretary's report?

Mr. BINGAMAN. The Senator is correct.

Mr. GLENN. I thank the Senator and will vote for the proposed amendment.

Mr. PELL. Mr. President, I am very pleased to be an original cosponsor of this amendment. The proliferation of ballistic missiles capable of carrying nuclear, chemical, or biological weapons poses an extremely serious threat to regional stability and peace in many parts of the world. The events of the last 48 hours show only too clearly that there are still governments willing and able to use force to crush those weaker than they. We must do everything in our power to prevent nations such as Iraq from adding to their already considerable military capabilities.

The amendment before the Senate provides for a framework for an effective U.S. policy to respond to the growing threat of missile proliferation. Broadly speaking, the bill mandates sanctions against United States and foreign companies that engage in the transfer of the most dangerous categories of missiles and missile technology. In addition, the legislation mandates the denial equipment to certain countries that transfer or receive missiles or missile equipment and technology. Finally, the bill includes reporting requirements that I believe will provide a clearer view of the threat posed by missile proliferation and, equally important, will highlight the companies that are engaged in the transfer of these deadly weapons.

In addressing the threat posed by the proliferation of delivery systems for nuclear, chemical, and biological weapons, this amendment provides an important and necessary complement to the Chemical and Biological Weapons Control Act adopted by the Senate earlier this year.

I would like to commend Senators BINGAMAN, GORE, and MCCAIN for their outstanding initiatives in this field. I had hoped that the Foreign Relations Committee would be able to act on a missile proliferation measure in advance of the defense authorization bill. Unfortunately this was not possible. However, the excellent legislation before the Senate now has been developed by our staffs and has been agreed to by Senators BINGAMAN, GORE, MCCAIN, as well as Senator HELMS and myself.

Mr. President, I think this is an important piece of legislation, and I think it is a timely piece of legislation. I urge my colleagues to support it.

Mr. MCCAIN. Mr. President, I thank Sennator GORE, Senator BINGAMAN, Senator PELL, Senator HELMS, and Senator SPECTER for their contribution to this, important amendment. I have worked with Senator GORE and Senator BINGAMAN on this amendment for over a year now, I as well as with Congressman BERMAN in the House. I think it is long overdue.

Mr. President, the time has come to stop talking about proliferation and to do something to prevent it. It has now been nearly a decade since Iraq first used chemical weapons in the Iran-Iraq war. It has been more than 5 years since Iraq first made massive use of poisonous gas to practice genocide against its own citizens.

It has been more than 2 years since Iran and Iraq launched a war of missiles against their respective capital cities. We are nearing the second anniversary of the time when both Iran and Iraq casually used poisonous gas to butcher innocent Kurdish civilians.

Proliferation proceeds unabashed, unconstrained by words and unaddressed by actions. We have yet to use the power of our leadership, the strength of our economy, or our vast information gathering capability to curb this deadly progression. The end result is a situation that Secretary of Defense Richard Cheney made brutally clear in a recent speech:

> As we look around the world's potential tinder boxes, perhaps the most disturbing development we can foresee is the likely proliferation of weapons of mass destruction. Ten years from now, by the year 2000, the number of developing countries producing their own ballistic missiles is expected to be up to 15. Some of the 15 are already producers, and others are likely to have this capability by the end of this decade. And that list of 15 does not count the countries that could end up buying missiles on the international arms market.
>
> Included among the 15 are such countries as Iran, Iraq, Libya, Syria, and North Korea. That is hardly a list that can make an . . . audience feel comfortable. And at least six of the 15 countries will have intermediate range missiles by the turn of the century—not merely short range missiles.

Missiles that can be equipped to carry a wide variety of warheads—chemical, biological, and nuclear, as well as conventional. Some of the countries now developing missiles are ones that have nuclear weapons programs and by the end of the decade, the list of nuclear club members with missiles will almost surely be far larger than it is now.

As for chemical and biological weapons, 23 foreign countries have confirmed or suspected chemical warfare programs, and ten have or may have biological warfare programs. Many of these countries have, or soon will have, ballistic missiles. Once again, that list would include Iran, Iraq, Syria, Libya, and North Korea.

These words are backed by our intelligence community, experts from virtually every major research group studying foreign policy, the global military balance, and news report after news report. Mr. President, we are no longer dealing with a theoretical situation, this is a real and worsening threat to global peace.

The threat of proliferation is immediate, not simply a threat for the mid or late 1990's. Iraq—a nation armed with long-range missiles and chemical weapons—has threatened the very survival of Israel and before it invaded ruthlessly intimidated Kuwait with the prospect of annhilation from chemical weapons.

Iraq has missiles permanently targeted at Israel, and has recently borrowed from the Nazi manual of international behavior by invading Kuwait—despite Kuwait's repeated attempts to pacify Iraqi aggression. Not since 1938, have we seen such bold intentions and open aggression.

Further, this spring we saw India and Pakistan—two nations that can rapidy assemble nuclear weapons, and that are rapidly acquiring long range missiles—nearly go to war. These supposedly stable democracies suddenly, and with little warning, lost much of their moderation and restraint. For the first time, we heard rumors of plans to attack nuclear facilities, and veiled threats of escalation. Mr. President, this is dramatic proof that there are no good or safe proliferators.

We may not face such threats to our own territory today, but no one can deny that we are likely to face them tomorrow. It does not take great vision to imagine what may happen if a leader like Saddam Hussein, a madman who has threatened to "let our fire eat half of Israel" and to "retaliate for days and weeks and years" is able to equip his long range missile boosters with nuclear warheads.

It does not take much imagination to envision the horrors which a nuclear armed Qadhafi, a man who has already threatened the United States with "our special means, the right to actually practice terrorism against the American presence everywhere" might inflict upon an unsuspecting world.

Rear Adm. Thomas A. Brooks, the Director of Naval Intelligence, has referred to the present Missile Technology Control Regime as largely ineffective and likely to remain so. This legislation would finally address the failure of all existing arms control agreements.

Fortunately, we now have an the opportunity to take an important step forward to deal with this grave situation. The legislation we are debating would carefully target sanctions against both the sellers and buyers of such missiles and technology, it would strengthen the Missile Technology Control Regime, and it would require semiannual reporting by the President that would expose the names of merchants of mass destruction.

It would complement the legislation this body approved on chemical and biological weapons, and take an important step toward the comprehensive approach to fighting proliferation that I beleive is the only approach that can succeed.

The vast resources of the U.S. Government would be used to expose the names of both proliferators and merchants of mass destruction. The reporting provisions would shed light where today there is only darkness. Additionally, they would apply to aircraft when the President has reason to believe they are being used to deliver weapons of mass destruction.

This requirement to report on such aircraft recognizes the fact that while missiles are ultimately the most dangerous threat to the United States, for at least the next decade aircraft are most likely to be used to deliver large amounts of chemical and biological weapons against our friends and allies in the developing world.

If we do not act now, we and the Soviet Union will beat our swords into plowshares, only to see the rest of the world beat their plowshares into swords. We owe our sons and daughters a sense of vision and a far better legacy than this.

Mr. GARN. Mr. President, I rise in support of adoption of the amendment offered by Senators BINGAMAN, GORE, and MCCAIN to create a sanctions regime for proliferation of missile technology. I strongly support this amendment even though it does only half the job. The other half of the puzzle, controls and sanctions under the Export Administration Act, was something I proposed along with Senator HEINZ in the EAA reauthorization bill recently reported by the Banking Committee. Our provisions are being further modified by a Bingaman amendment to the banking bill that I will be happy to support. Taken together, this amendment and the Banking Committee amendments will put individuals, companies, and countries that assist the proliferation of missile systems on notice that the United States stands ready to impose severe penalties for their actions.

My support for this legislation represents the continuation of a 15-year personal effort in the Senate to stop the transfer of sophisticated Western technology to our adversaries. My recent efforts have focused on stopping such transfers by punishing the companies that profit from them. This effort began with my 1987 Toshiba amendment and continued with sanctions for chemical weapons proliferation first championed by the Republican leader and adopted by the Senate as part of S. 195, the Chemical and Biological Weapons Proliferation Act of 1990.

The combined effect of this amendment and the Banking Committee legislation would place sanctions on countries and individuals that assist missile proliferation. Like my Toshiba amendment and the CBW bill, the company sanctions title places authority to impose sanctions on foreign persons that assist proliferation through sale of so-called dual use technology in the Export Administration Act. In cases of proliferation involving munitions items, the bill also permits sanctions under the Arms Export Control Act. Unlike those other proposals, there is a crossover of sanctions between the two acts because the multilateral control arrangement for missile technology, the Missile Technology Control Regime, covers both munitions as well as dual use goods and technology.

While this legal structure is sound, the task we face is very difficult. Many countries have the technology and many of them are not cooperating in multilateral controls. There are many channels of diversion, and more coming as we free up trade with the former Soviet bloc. Our ultimate control mechanism, the threat of sanctions, always raises howls of protest from foreign governments and industry. But just as in the Toshiba-Kongsberg case, we must put the world on notice that there are some crimes we will not tolerate. We must stand ready to take unilateral action, hitting violators with criminal and financial penalties, to stop the spread of this deadly technology.

With regard to the details of the amendment, I have worked with the sponsors to conform the language to the well established structure of laws and regulations for controlling critical exports to our adversaries, punishing violators, and projecting our policy internationally. These laws—the Export Administration Act and the Arms Export Control Act—have been developed over many decades and provide a well understood structure of legal procedures and safeguards for U.S. policy. When it is possible to fit new policies into the existing structure of laws, this offers the best chance to produce sensible and consistent policy. We have done this.

Because of the complexity of the law in this area, this legal structure is somewhat complicated and will involve coordination of provisions in two different legislative conferences. There will have to be close coordination of Armed Services conferees and Banking conferees in our respective conferences with the House Foreign Affairs Committee to ensure that the resulting policy is balanced and sensible. I have spoken with the other Members involved with this issue and I am confident that we will produce such a policy.

I thank the sponsors of the amendment for their cooperation and look forward to working with them in conference on this issue.

Mr. LUGAR. Mr. President, the committee draft bill on missile proliferation addresses an important issue, the severity of which threatens to grow. Every member of this committee seeks to curb missile proliferation. By the same token, the authors of the draft purport to wish to strengthen the Missile Technology Control Regime through this legislation.

But the committee needs to be certain that this legislation, in fact, contributes to, and does not detract from, the fight against missile proliferation and the efficacy of the Missile Technology Control Regime.

There are several elements in this draft legislation that unwittingly might harm U.S. efforts to control missile proliferation. In particular, this committee must determine whether the imposition of unilateral U.S. sanctions on foreign firms could hurt rather than help our promising efforts to deal with this difficult problem through the Missile Technology Control Regime [MTCR].

MTCR BACKGROUND

In order to determine whether such legislation is helpful or harmful to these efforts, the committee needs to understand what the Missile Technology Control Regime is and what it is not. The MTCR is the primary international, multinational mechanism for sharing information and controlling missile proliferation. It was created in 1987 by the G-7 countries—the United States, the United Kingdom, France, Canada, Japan, West Germany, and Italy. Its mandate consists of a set of export guidelines for missiles and related components and technology, and applies to missiles capable of delivering a 500-kilogram payload a distance of 300 kilometers.

Two categories of items and technology are covered. Category I items—those of greatest sensitivity—include complete rocket systems and complete subsystems—reentry vehicles, engines, guidance sets, and so forth. Category II items are items of lesser sensitivity: propellants, structural materials, avionics equipment, and so forth. Greater emphasis is placed on transfers of category I items, for obvious reasons. They are licensed on rare occasions only, where the licensing government takes all necessary steps to ensure that the item will be put to an acceptable end-use.

It is important to stress that the MTCR is a voluntary, cooperative arrangement. It is not binding, and for good reason. Unlike chemical weapons, there is neither an international consensus against development and use of missiles, nor a legal basis for prohibiting their use. At the time the MTCR was created in 1987, a regime based on voluntary participation was all the traffic would bear. This is, unfortunately, still the case today.

To be sure, the MTCR is far from perfect, but is has nonetheless had a significant impact on worldwide missile proliferation:

It has hindered—not prevented—but hindered missile development programs in Argentina, Brazil, India, Iraq, Libya, and other countries.

It has established a range/payload standard for missile transfers around which an international consensus has formed.

It is supported by most of the remaining missile supplier countries. Some, while not wishing to join formally, have implemented controls on missile technology similar or identical to those of the MTCR.

Moreover, the MTCR is currently expanding. Australia, Belgium, Luxembourg, and The Netherlands have all recently joined. Most importantly, the Soviet Union very recently not only has stated that it supports the MTCR objectives, but it has asked to join the MTCR. This I find to be a most significant development.

The MTCR partners have just concluded a successful meeting in Ottawa, Canada. Some of the results coming out of Ottawa included:

A meeting of technical experts to review licensing and other implementation procedures and to work toward greater harmonization.

A strengthened commitment to even further expansion of the Missile Technology Control Regime.

Strengthened coordination procedures.

The MTCR has its limitations, but it is critical to a multilateral effort against missile proliferation. The United States cannot fight missile proliferation alone; we need the cooperation of our allies, our friends, and even some of our enemies.

PROBLEMS WITH SANCTIONS

A key question for this committee to consider is whether mandatory sanctions as contained in the draft legislation will aid in the multilateral effort against missile proliferation. Will such sanctions, no matter how carefully crafted and well-intended, contravene the spirit of the MTCR and damage its cooperative nature?

The G-7 countries in the MTCR, whose cooperation we need to combat missile proliferation, are firmly opposed to unilateral U.S. sanctions. They believe that such sanctions will weaken the MTCR as well as erode the political consensus within their countries to continue with this effort.

An important element of the MTCR is information-sharing on activities of government and private companies. The United States routinely discusses with its partners the activities of some of their companies which may be involved in missile proliferation. In general, the MTCR partners are very open in these discussions. But the question must be posed: Would such partners be as willing to share sensitive information on missile-related activities of their own companies if such a sharing could lead to U.S. sanctions? Even an exemption for companies in the MTCR countries themselves would do nothing for those countries which cooperate with the United States on missile proliferation, but without formally joining the MTCR—that is, Sweden and Switzerland.

SPECIFIC PROBLEMS WITH DRAFT LEGISLATION

Let me just enumerate some of the problem areas in the draft legislation which the committee ought to consider in reaching a judgment on the bill.

In general, part of the problem with the draft legislation stems from the fact that it is free-standing and its relationship to other legislation is unclear. Specifically, it is often unclear which type of export licenses are referred to. The term "missile equipment and technology" is defined as items on the Annex, but in many places it seems limited to dual-use items on the Annex, since it is juxtaposed with U.S. munitions list items.

The bill is subject to all of the problems of other bills mandating unilateral U.S. sanctions against foreign companies, including those previously mentioned.

It could damage the cooperative nature of the MTCR. Sanctions may anger MTCR partners to the point where their willingness to share information on missile-related activities of their own companies could be substantially reduced.

It could transform productive discussions with allies on how best to deal with missile proliferation into an adversarial dialog on the extraterritorial reach of U.S. law.

The bill uses the missile technology control regime to define the prohibited act. The problem is that, although the MTCR is an internationally agreed document, it has no special status under United States or foreign law. To be sure, using the MTCR to define prohibited conduct may appear to be simply holding other partners to what they have previously agreed to. However, under the MTCR each ad-

herent has preserved the sovereign right to export covered items. In short, this legislation goes far beyond anything the MTCR partners have agreed to.

The Annex is a poor standard to employ. No MTCR partner, including the United States, has incorporated the Annex into its national law. Indeed, there is disagreement among technical experts about what exactly is covered by some items in the Annex. The partners began work at the MTCR meeting in Ottawa this month on correcting these problems. Nevertheless, there are inherent problems in using a document for a purpose for which it was never intended.

If the MTCR partners know that their companies may be punished for trading in items on the Annex, they may be inclined to take items off the Annex or reword them very narrowly, thereby defeating the very purpose of the Missile Technology Control Regime. To be sure, the prohibited transfers could be spelled out explicitly in the bill, perhaps by limiting it to the most important items such as complete rockets or rocket stages, guidance equipment, et cetera. However, by seeking to punish foreign companies for exporting items identified by the United States rather than the MTCR, the extraterritorial nature of the legislation would become both clearer and more contentious.

PROBLEM AREAS BY SECTION

Many of these general problems can be found with greater or lesser degrees of specificity in individual sections of the draft legislation. A few examples may suffice for illustrative purposes:

Section 16, sanctions against U.S. violators, is potentially very sweeping in its scope and provides few safeguards to protect the due process interests of any individuals involved. Moreover, the waiver provided for in this section seems to apply to the procurement sanctions, not the export license prohibition.

Section 7(b) allows the President to waive the sanctions against foreign persons where the transfer is authorized by an MTCR adherent and where it does not violate the principles of the MTCR guidelines. However, limiting this waiver to MTCR adherents could adversely affect cooperative relationships with countries such as Sweden and Switzerland which, while not formally adhering to the MTCR guidelines, are committed to observing them in practice. Moreover, it is unclear what is meant by principles. The United States and its partners license hundreds of category II items annually—all presumably in keeping with the principles of the MTCR.

The second and third waiver provisions of section 7(b) seem only to apply, again, to the procurement sanctions, while the fourth provision—allowing the President to waive these sanctions if the foreign government has appropriately sanctioned the offending firm—is probably necessarily vague. However, it would be difficult to apply in practice, given the differences between U.S. export controls and those of other countries.

CONCLUSION

The purpose of these comments is not to discourage efforts aimed at curbing missile proliferation. Quite the contrary. We have some nascent efforts underway in this area through the vehicle of the Missile Technology Control Regime. I applaud the efforts of the committee staff in attempting to draft appropriate legislation. In fact, it may prove to be impossible to legislate constructively in this area.

In any event, the committee should be certain that efforts to legislate in this area are helpful to, or at least consistent with, the MTCR efforts—and do not run counter to or undermine the multilateral efforts to control missile proliferation.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. The majority accept the amendment.

Mr. SPECTER. Mr. President, this amendment clarifies the President's authority to impose sanctions on any foreign person engaged in the transfer of Missile Control Technology Regime [MCTR] category I or MCTR category II missile equipment or technology. The amendment further requires the President of the United States to determine whether transfers of these technologies pose a significant threat to the national security interests of the United States.

Without an effective means of curbing the proliferation of ballistic missile technology, there is a danger that any regional conflict, especially in the Middle East, could escalate toward a massive conflagration. Accordingly, I believe we need to prepare ourselves to send a strong signal to any country actively disseminating or seeking these technologies, that such actions are unacceptable and risk permanently damaging our relations. This amendment clarifies the President's authority to take such actions and through the reporting requirement provides him with a rationale if our national security interests are directly threatened.

Mr. President, Iraq's invasion of Kuwait illustrates how quickly crises can arise in some regions when one state possesses an overwhelming military capability and a will to use it. This situation is made even more dangerous since many countries in the region have developed ballistic missile capabilities to offset conventional deficiencies and match the missile capabilities of countries such as Iraq.

During the Iran-Iraq war, between February and May 1988 the Iraqis fired more than 190 Scud missiles against Iranian cities, while the Iranians in turn fired approximately 75 missiles at Iraq. The Iraqi missile used during these exchanges had a range of between 600 and 900 kilometers. This so-called War of the Cities illustrates how vulnerable states are to missile attacks. This fact becomes even more ominous given Iraqi efforts to jointly develop an intermediate range missile, the Condor II, with Egypt and Argentina. In 1988, it was reported that Iraq had developed and tested an intermediate range missile called the Tammuz I, with a range of approximately 1,250 miles.

The threat to stability posed by Iraq's missile capabilities must be viewed in the context of the larger missile buildup taking place throughout the Middle East and the subcontinent. In addition to Iraq and Iran, Egypt, Syria, Libya, Saudi Arabia, Israel, India, and Pakistan have all developed intermediate range ballistic missile capabilities. Since these weapons can easily be fitted with chemical and biological warheads, the potential for large-scale destruction is clear. Moreover, given the demonstrated willingness of someone such as Saddam Hussein to use these types of weapons, it is possible that in a crisis a country may consider preemption which could escalate to a full-scale exchange.

Mr. President, we need to take concerted action to stem the flow of these technologies. It may be wishful thinking to presume that we can dissuade certain states from pursuing ballistic missile capabilities, but we can at least discourage them from seeking superiority and assisting other countries in acquiring the technology. I believe that the provisions contained within the underlying amendment contain the necessary steps to achieve this objective. I have offered a provision, which was accepted and incorporated by the principal authors, to ensure that an attempt is made to understand how any foreign person's transfer of these technologies may affect our national security interests. With this knowledge we can better gauge what type of action, if any, is appropriate.

The PRESIDING OFFICER. Is there further debate?

Mr. GORE. I ask unanimous consent Senator PELL and Senator HELMS be added as original cosponsors.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment offered by the Senator from Tennessee.

The amendment (No. 2554) was agreed to.

Mr. WARNER. I say this in a friendly spirit to my colleagues, but there are 30 amendments known to exist on this side of the aisle and an approximate equal number on the other side of the aisle; two indicated rollcall votes on this side of the aisle; one indi-

cated rollcall vote on this side of the aisle.

I draw my colleagues' attention to the clock. It is 10 minutes past the hour of midnight.

Mr. GORE. Will the Senator from Virginia yield?

Mr. WARNER. If I can just finish? Those amendments which are to be accepted on both sides, I leave it to your judgment as to how much time shall be required so as to minimally inconvenience the Senators.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GORE. Mr. President, I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. Mr. President, I wonder if I might suggest we have those who are going to require rollcalls, so three-fourths of the Senators can go home. Those who want their amendments accepted can stay here and talk by themselves. Why should the rest of us have to listen to amendments that are going to be accepted and listen to 20 minutes of debate? We are not going to give any more agreements until we get the ones with rollcalls out of the way so the rest of the Senators can go home. It is quarter after 12. If we have to stay here while everybody makes a speech when their amendment is accepted it will be 4 or 5 in the morning.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. I agree with the Republican leader. We really would like to get all the rollcall amendments up now. Those who have uncontested amendments, they will not take very long, we can do them very quickly. In fact, the floor managers can do them on behalf of Senators once they have been accepted on both sides. They can be done rapidly and the Senators who would like to depart after rollcall votes are over will be able to do so and get a little sleep before tomorrow morning.

I say to the Republican leader we have one amendment that Senator BINGAMAN will be involved in. He should be back here, I understand, very shortly. That is going to require a rollcall vote.

Beyond that I know of no other rollcall vote requirements on this side. Perhaps I am missing one?

Mr. REID. Do not forget about me.

Mr. NUNN. I was talking about the Reid amendment, but I mentioned it as Bingaman. On this side.

Mr. DOLE. Will the tobacco amendment be offered?

Mr. NUNN. I do not know, but I hope not.

Mr. DOLE. That will bring us to a halt pretty quickly.

Mr. NUNN. May I inquire of the Republican leader about which amendments on the Republican side might require rollcall votes at this time, that he knows about?

Mr. DOLE. The Senator from California is the only one we know of, and maybe the Senator from Idaho, depending what the problems are on that.

Mr. NUNN. The amendment of the Senator from California we recommend accepting.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. NUNN. I will be glad to yield.

Mr. McCLURE. As I said a moment ago, the moment I know what amendments are going to be offered I can tell the Senator. Until I know what amendments are going to be offered I have no way of responding to the question.

Mr. NUNN. We are trying to consolidate the list out there right now.

Mr. DECONCINI. Will the Senator from Georgia yield? I wonder, even if we had to have a vote on the Bingaman-Reid amendment, we could have the vote tomorrow. If we want to have a debate now, have the debate now and have the vote at 8:30 or 9 in the morning. Everybody is tired. Maybe everybody is not tired. Maybe it is just me. It seems to me it is getting ridiculous. I see the majority leader in here. It is 12:15. We have 8 hours, if I am correct, on SDI, could be maximum.

There are only so many hours we can put in here, I think, to keep a civil relationship.

It seems to me it is time to fold the tent for the evening.

Mr. NUNN. May I say to my friend from Arizona we are trying to get the list together. The list has been coming down. Senators have been cooperative. Usually I get two questions from Senators, and the two questions are when are we going to get out of here, and the second one is, "I have another amendment I would like for you to take a look at."

Those two questions may not be incompatible and inconsistent to the ones who are asking them but to the managers of the bill they are both inconsistent. We are getting new amendments all the time.

I would love to be able to close them out if we can get a consolidated list and then knock off all amendments.

I am prepared, if the leadership is prepared, to ask that this many amendments be the limited number and not have any more beyond that. If we can simply get the consolidated list. We have asked for it. I assume we will get it in the next 10 or 15 minutes.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, may I say to the distinguished minority leader I have two amendments that are my own amendments. I have been a good boy and managed all day. They are agreed to. As long as they are doing nothing, I would surely like to get rid of those and usefully employ the time we have.

I am not going to make a long speech.

Mr. DOLE. I think we ought to accept every amendment where people agree not to talk.

Mr. DIXON. All right.

Mr. McCAIN. We accept the amendment.

AMENDMENT NO. 2555

(Purpose: To authorize pap smear and mammogram tests under CHAMPUS without extra charge.)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for himself, Mr. BINGAMAN, Mr. GLENN, Mr. DOLE, Ms. MIKULSKI, and, Mrs. KASSEBAUM, proposes an amendment numbered 2555.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, line 23, strike out "$22,110,045,000" and insert in lieu thereof "$22,068,345,000".

On page 16, line 24, strike out "$23,359,084,000" and insert in lieu thereof "$23,343,784,000".

On page 17, line 1, strike out "$20,856,814,000" and insert in lieu thereof "$20,845,714,000".

On page 17, line 2, strike out "$8,373,663,000" and insert in lieu thereof "$8,372,263,000".

On page 39, line 21, strike out "$373,280" and insert in lieu thereof "$369,641".

On page 39, line 22, strike out "$329,217" and insert in lieu thereof "$327,897".

On page 39, line 23, strike out "$247,420" and insert in lieu thereof "$246,443".

On page 39, line 25, strike out "$98,717" and insert in lieu thereof "$98,603".

On page 91, between lines 5 and 6, insert the following new section:

SEC. 805. PROVISION OF PAP SMEARS AND MAMMOGRAMS UNDER CHAMPUS.

(a) CARE AUTHORIZED.—Section 1079(a)(2) of title 10, United States Code, is amended by inserting before the semicolon the following: ", except that pap smears and mammograms may be provided on a diagnostic or preventive basis".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1990, and shall apply to the provision of pap smears and mammograms under section 1079 or 1086 of title 10, United States Code, on or after that date.

Mr. DIXON. Mr. President, this is an amendment by Senator BINGAMAN, Senator GLENN, and myself. It provides for CHAMPUS coverage for routine pap smears and mammogram examinations, agreed to on both sides.

Mr. McCAIN. We accept the amendment with great pleasure.

Mr. BINGAMAN. Mr. President, I am pleased to join my good friends and distinguished colleagues, Senators DIXON, GLENN, and MIKULSKI, as a sponsor of this simple, yet important, amendment. This amendment would allow CHAMPUS, the Civilian Health and Medical Program for the Uniformed Services, to provide coverage of routine Pap smears and mammograms for military personnel and their dependents.

I urge my colleagues to support this long over-due amendment. Its importance to thousands of military women and their families cannot be understated. It is, literally, a life-saving measure because through the simple, relatively inexpensive tests that our amendment would make more readily available, a variety of life-threatening infections and cancers can be detected early, at stages when they can be successfully—and usually inexpensively—treated.

The importance of early detection through tests such as mammograms and Pap smears was recently underscored for all of us when we learned that Marilyn Quayle, the wife of our Nation's Vice-President, had undergone surgery for cervical cancer. I am confident that I speak for every Member of this body when I wish Mrs. Quayle a safe, speedy, and complete recovery. Fortunately, Mrs. Quayle is expected to fully recuperate because of early detection. A simple, inexpensive Pap smear, performed in the course of a routine examination, detected her condition before it had progressed into more deadly stages of development.

Since its introduction nearly 50 years ago, the Pap smear has been credited with saving thousands of lives every year and has become the single most important test for detecting and preventing cervical cancer. The American College of Obstetricians and Gynecologists, or ACOG, estimates that deaths from cervical cancer have dropped 70 percent since the test was developed in 1943. Still, nearly 6,800 women die annually because of cervical cancer. The great tragedy of these deaths is that 90 percent of them—6,120 deaths—could have been prevented if more women had regular Pap smears.

The statistics regarding breast cancer are even more dramatic: according to ACOG, breast cancer accounts for nearly 30 percent of all cancers in U.S. women, and one in ten women will develop breast cancer during her lifetime. In 1988, about 135,000 women in the United States developed breast cancer. Of those, 43,000 have died, or will die, from this deadly disease. Many of these deaths could be prevented if more women, particularly those at higher risk for developing breast cancer, had mammograms. Women at higher risk include women whose mother or sister have had breast cancer or women who notice specific breast changes during monthly self-examinations.

All too often, however, the cost of preventive care, which most health insurance companies do not cover, discourages women from having these crucial, yet simple, tests. For the sake of humanity and economy, it is time that we offer some form of assistance to these women and their families. I believe this assistance should begin with the members of our country's armed forces, but I am hopeful that private insurance companies will see the wisdom of our decisions and follow our lead.

Mr. President, as I stated earlier, this amendment would allow CHAMPUS to pay the costs of routine Pap smears and mammograms for military personnel and their dependents. The cost to the Government would be minimal—about $13 per Pap smear, according to CHAMPUS' fiscal year 1989 statistics. Because mammograms are more complex, their cost per procedure is somewhat higher. The total cost of this amendment is estimated at about $55 million annually. That figure may seem high, but when it is compared with the expected savings in health care costs and lives, I believe it becomes clear that it is a wise investment for the Department of Defense and the Federal Government. It is an investment in cost-effective, preventive health care, which should be the ultimate objective of all health care legislation.

Mr. President, I am pleased that our colleagues in the House of Representatives recognize the wisdom of an investment such as the one we are proposing today. Through the diligent and capable leadership of Representative BEVERLY BYRON, chairperson of the subcommittee on Military Personnel and Compensation, the House Armed Services Committee recently included in its fiscal year 1991 Defense Authorization Bill language identical to our amendment. Representative BYRON has long championed this issue, and to ensure that her provision is retained in the bill we will eventually send to the President, I urge my colleagues to support this amendment.

In closing, I want to commend my good friend, Senator MIKULSKI, for the leadership she has shown in the Senate on this issue and other vital issues related to the health and well being of women and their families. Without her guidance, compassion, and diligence, I doubt that this amendment would have been possible. Senator MIKULSKI has increased the sensitivity of every Member of the Senate, the administration, and the American public to the dangers and costs incurred by ignoring women's health issues. As a nation and as individuals, we will reap the benefits of her work long into the future, and we will owe her a debt of gratitude that probably can never be repaid.

Mr. President, I urge my colleagues to recognize the need for this salient measure. I urge my colleagues to recognize the wisdom and cost effectiveness of prevention. I urge my colleagues to support this amendment. Thank you.

Mr. President, I ask, that two news articles, one from the July 24, 1990, edition of the Washington Post on the importance of Pap smears and another from today's edition of the New York Times on breast cancer and mammograms, be included in the RECORD following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE IMPORTANCE OF PAP TESTS

(By Sally Squires)

Medical experts say that Marilyn Quayle's surgery for cervical cancer underscores the need for women to have an annual Pap smear, one of the oldest—and often most misunderstood—screening tests for cancer.

Many women do not understand the scope of problems that can be detected by the Pap test. These range from a variety of infections to invasive cancer of the cervix.

Pap smears also tend to give false readings in a significant number of cases. About 10 to 15 percent of the time, the results do not reflect a problem when one exists. This is why Pap smears need to be repeated at regular intervals, usually each year, once a woman has become sexually active.

"That way if they get a false negative test result this year, it will be picked up the next year," said Ralph M. Richart, chief of gynecological pathology and cytology at the Columbia-Presbyterian Medical Center in New York City.

Introduced in 1943 by Greek-born George Papanicolaou, the Pap smear has been credited with saving thousands of lives. "We have made an enormous impact in reducing the incidence and mortality of cervical cancer," said Robert Kurman, professor of obstetrics and gynecology at the Johns Hopkins Medical Institutions in Baltimore.

Deaths from cervical cancer have dropped 70 percent since the test was introduced, according to the American College of Obstetricians and Gynecologists (ACOG). The disease strikes 14,000 American women a year and causes 6,800 deaths.

What's more, public health officials estimate that 90 percent of these deaths could be prevented if more women had regular Pap smears. A 1983 national survey showed that only 57 percent of women, ages 40 to 70, had a Pap smear at least once every three years. In younger women, nearly 80 percent had regular Pap tests.

In the vast majority of cases, abnormal Pap test results do not indicate cancer but precancerous conditions of the cervix, Richart said. Since it takes an average of 10 years for most of these precancerous cells to develop into full-blown cervical cancer, early detection and prompt treatment are usually enough to cure the disease.

In addition, a growing number of studies since the mid-1970s have shown that many abnormal Pap test results are actually caused by infections with human papilloma virus (HPV), a sexually transmitted disease.

More than 22 different strains of HPV have now been identified in the female genital tract. Many cause no apparent symptoms, but others produce genital warts and can lead to cancer. Estimates are that "between 40 to 90 percent of cervical cancers are now related to HPV infections," said George Malkasian, past president of ACOG and a senior consultant to the Mayo Clinic's department of obstetrics and gynecology.

Because of this, many physicians are now advising women with abnormal Pap smears and those with cervical cancer to have their sexual partners tested. "We find that a significant number of the partners of women with abnormal Pap smears [are also affected]," said Columbia-Presbyterian's Richart.

The examination for male partners, called an androscopy, is usually performed by a specially trained dermatologist. Treatment involves the use of topical drugs, such as podophyllin or trichloroacetic acid. In cases where the man is found to have precancerous cells, laser therapy is used to kill the cells.

In Malkasian's view, women who have an abnormal Pap test should ask their physicians if it is related to an HPV infection. "If the answer is yes, then they should ask, "Should my husband or partner be tested too?" he said.

Doctors also have a new test to detect HPV infections in women—the Virapap. Gynecologists perform the Virapap the same way they do a regular Pap smear. They scrape cells from the cervix, the lower part of the uterus, which is the doorway to the vagina, place the cells on a slide and send them to a laboratory for analysis. Instead of looking for abnormal cells as the Pap test does, the Virapap detects genetic material from the human papilloma virus, and in many cases can identify which strain is present.

After one abnormal Pap smear result, the test is usually repeated to confirm the findings. Some doctors are now recommending that a colposcopy be performed after the first abnormal smear. This relatively painless procedure involves examining the cervix under magnification. It takes about 10 to 20 minutes to perform in the doctor's office.

During the colposcopy, which means literally looking at the cervix, doctors search for abnormal-appearing cells, particularly in the endocervical junction—a region located inside the cervix, near the floor of the uterus. It is at the junction—also known as the transformation zone—where cervical cancer is most likely to arise.

As part of the colpolscopic exam, doctors often sample or biopsy a small portion of suspicous-looking tissue. Test results are available in a week to 10 days.

When the diagnosis is a precancerous condition or related to an HPV infection, "most of the time these patients can be treated in the office," Richart said. Usual therapy is cryosurgery—literally killing the abnormal cells by freezing. Another option is laser surgery, which also destroys the cells. Both procedures take about 20 minutes to perform.

If the abnormal cells involve a large area or extend high into the cervical canal close to the uterus, doctors usually turn to a more invasive procedure called conization. This therapy is performed under general anesthesia and involves either an overnight stay in the hospital or treatment in a same-day surgery unit. In conization, doctors remove a cone-shaped piece of tissue around the abnormal cells. Childbearing is not affected by this procedure.

For most women, treatment is successful. Only about "one in 500 will ultimately require a hysterectomy," he said.

In a minority of women who have an abnormal Pap test, doctors find that the cancer has already grown about an eighth of an inch into the surface of the cervix or that it is a relatively fast-growing type of cervical cancer. Treatment for these women is a hysterectomy that removes the uterus and cervix.

If more invasive cancer is present, then doctors will also remove nearby lymph nodes, as well as the cervix and uterus. Another option is radiation therapy, which is about as effective as surgery for advanced cervical cancer.

For most women, however, regular Pap smears can assure that this kind of surgery is not necessary.

"The overwhelmingly majority of women—if they have Pap smears taken on a regular basis—will have abnormalities detected in a stage when they can be readily treated and are virtually treatable 100 percent of the time," Richart said.

PERSONAL HEALTH—IN FIGHT AGAINST BREAST CANCER MAMMOGRAMS ARE A CRUCIAL TOOL, BUT NOT FOOLPROOF

(By Jane E. Brody)

The incidence of breast cancer is rising among American women. One woman in 10 will eventually get this disease, up from one in 11 just four years ago.

The disease is the most common life-threatening cancer and the second leading cause of cancer deaths in American women. This year it will strike 150,000 women and claim 44,000 lives.

Lacking a cure or a clear-cut way to prevent breast cancer, specialists are urging women to take advantage of the one measure they know can reduce deaths from it: mammography.

When this specially designed X-ray of the breast is properly performed and correctly interpreted, it can often pick up very tiny, highly curable cancers that have not yet formed a lump that can be detected by touch.

For the earliest cancers detectable by mammography, the cure rate exceeds 90 percent. Some experts estimate that if women followed current mammography guidelines, which have been endorsed by 11 major health organizations, deaths from breast cancer could be cut at least 30 percent.

Under these guidelines, women who are 40 to 49 years old are urged to have a mammogram every year or two, and women 50 and older are urged to have one annually. For women from 35 to 39, a single exam is recommended as a baseline for use as a comparison with results of X-rays after age 40.

A TEST OFTEN AVOIDED

But all is not sanguine with screening mammography, which would be applied to millions of ostensibly healthy women. (Women with suspicious symptoms in their breasts are given diagnostic mammograms, which are more elaborate than the two-view x-rays taken when symptom-free women go through a routine screening.)

Fewer than 40 percent of women over age 40 have ever had a mammogram, and only a relative handful of women have one annually. When women are asked in surveys why they do not have such tests, two answers predominate: They see no need for a mammogram, presumably because they have no symptoms or family history of the disease, and their physicians never advised them to have one.

The potential influence of a woman's physician can be seen in another survey finding: Ninety-four percent of women whose doctors tell them to have mammograms had one in the previous two years, but only 36 percent of women whose doctors said nothing about a mammogram had one.

Of course, many women are relieved not to be urged to get a mammogram, because they are afraid something might be found. They do not realize that 95 percent of women are given an immediate clean bill of health, and for the remaining 5 percent follow-up tests on most show no cancer.

But if a cancer is present, it is best found and treated as soon as possible. The prognosis can only get worse if cancer is not detected early.

A woman already uncertain about getting a mammogram can easily find other deterrents. One is concern about radiation. Although radiation exposure is not negligible, when a mammogram is done with modern, properly maintained equipment, the amount of radiation even from 30 years of annual exams is believed by experts not to be hazardous, particularly for women past menopause.

But some experts are concerned that the accumulated radiation may be a greater risk to young women, whose hormone-stimulated breast tissue is more sensitive to radiation. Furthermore, clear-cut benefits of screening mammography for women under 50 have not yet been demonstrated in well-designed studies, in part because early cancers are harder to pick up in the denser breasts of younger women.

On the other hand, about 10 percent of breast cancers occur in women in their 40's, and these women have more to gain if early detection saves their lives. At the least, premenopausal women with a family history of breast cancer should discuss with their doctors the advisability of annual mammography.

Another deterrent is cost and availability. More than 7,000 mammography sites exist in the United States, but not all are top quality. And while the average screening mammogram costs $100 to $125, through the efforts of the American Cancer Society low-cost mammography—about $40 to $50 per exam—is available in many areas, often through special screening centers or mobile units. And in about two dozen states, including New York, insurers are obliged to cover part or all the cost of a routine mammogram.

FINDING EXPERT MAMMOGRAPHY

For a list of accredited mammography facilities, call the National Cancer Institute at (800) 4-CANCER, or ask the local chapter of the American Cancer Society. If no accredited facility is nearby, the Center for Medical Consumers, a public interest organization based in New York City, suggests that a woman ask about the following before making an appointment for a mammogram.

Is the radiologist certified by the American Board of Radiology or the American Osteopathic Board of Radiology?

If not certified, has the radiologist had at least two months training in reading mammograms?

Are the technicians certified by the American Registry of Radiologic Technologists or the state licensing board?

Is the X-ray equipment specifically designed to do mammograms?

Is mammography a regular part of the practice?

Specialists say that the technician should administer and the radiologist should read a minimum of 10 mammograms a week to maintain expertise.

PROBLEMS WITH THE TEST

But proponents and opponents agree that a serious problem exists with mammography: A large proportion of test sites use substandard equipment, are staffed by inadequately trained technicians and radiologists, or are rarely if ever inspected to be sure the equipment is working properly at a minimal dose of radiation.

Three years ago, the American College of Radiology began an accreditation program to correct these problems. Of the 2,936 test sites that have applied for accreditation, 29 percent failed on the first try. The organization has accredited 1,560 sites so far and 1,400 are still under review.

Then there is the question of negative mammograms. Even in the best of circumstances, mammography is not perfect. About 10 percent of breast cancers do not show up in mammograms.

Hence, the continuing importance of monthly breast self-examination and a yearly physicial breast exam by a physician.

Finally, there is the debate over how to treat those early, noninvasive lesions that are virtually 100 percent curable through surgical removal. Experts estimate that about half of these malignant lesions never develop into a full-blown cancer, but it is currently not possible to predict which half. Thus, most cancer specialists advocate removing all that are found rather than waiting to see if an invasive, and thus less curable, cancer will result.

Women interested in more detailed information about early detection of breast cancer can consult a new book, "Make Sure You Do Not Have Breast Cancer" (St. Martin's Press, $15.95) by Dr. Philip Strax, a radiologist who pioneered breast cancer screening in this country.

The PRESIDING OFFICER. Is there further debate? There being no further debate, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 2555) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2556

(Purpose: To express the sense of Congress regarding the closure of United States military installations outside the United States)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Sentor from Illinois [Mr. DIXON] proposes an amendment numbered 2556.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, after line 24, insert the following new section:

SEC. 1216. SENSE OF CONGRESS REGARDING THE CLOSURE OF UNITED STATES MILITARY INSTALLATIONS OUTSIDE THE UNITED STATES

(a) FINDINGS.—Congress makes the following findings:

(1) It was reported in the July 28, 1990, European edition of the Stars and Stripes publication that General John R. Galvin, Commander-in-Chief of the United States European Command, has submitted to the Secretary of Defense a list of United States military installations located outside the United States that the General recommends be closed.

(2) During consideration of legislative proposals authorizing appropriations for the Department of Defense for fiscal year 1991 by the Committee on Armed Services of the Senate, General Galvin indicated he would announce a list of 100 United States military installations outside the United States he recommends for closure.

(3) Many members of Congress strongly believe that United States military installations outside the United States should be closed in lieu of closing military installations located in the United States.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of Congress that—

(1) the Secretary of Defense should make public any recommendations made to the Secretary of Defense by General John R. Galvin regarding the closure of United States military installations outside the United States and any other recommendations submitted to the Secretary by other commanders of combatant commands regarding the closure of United States military installations outside the United States; and

(2) The closure of such installations located outside the United States should be accomplished at the discretion of the Secretary of Defense at the earliest opportunity.

Mr. DIXON. Mr. President, this is an agreed amendment that simply says that the list that General Galvin has sent to the Department of Defense suggesting 100 bases to be closed be publicized and that the Secretary of Defense use his discretion at his earliest convenience to look at closing some of those bases.

It is agreed to on both sides.

I also ask unanimous consent that a July 28, 1990, article from the European Stars and Stripes be printed in the RECORD. It is entitled "Galvin Wants To Close 100 Bases."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From European Stars and Stripes, July 28, 1990]

GALVIN WANTS TO CLOSE 100 BASES

(By Vince Crawley)

STUTTGART, WEST GERMANY.—Gen. John R. Galvin said Thursday that he's sent to Washington for approval a list of 100 bases that he wants closed.

Galvin, who is NATO's top general in Europe and the commander of the U.S. European Comd, would not reveal the list's contents during an interview with The Stars and Stripes. He told the Wall Street Journal earlier this month that most of the bases are in West Germany and that 12 are major military complexes.

"We've got all the planning done," Galvin said Thursday afternoon at his Stuttgart headquarters.

Galvin hinted that the contents of his list probably won't be revealed anytime soon. After congressional approval, there will still be "government-to-government consultations" between the United States and the host nations.

"Then it will be a matter of coordination at the local level, and we intend to do plenty of that with the German side and with the other host nations," he said.

"Obviously, we're going to listen very carefully to host nations' opinions (about base closings). We have done that already. Of course, you don't live with your neighbors, as we have with the host nations, and not know what their desires are.

"And, we will continue to regard their decisions as part of the equation."

In the interview, Galvin also talked about the historic NATO summit held three weeks ago in London.

"The declaration (after the summit) was pretty clear that we want to use arms control as a way to reduce the level of confrontation," Galvin said. "The declaration made a statement that we no longer consider the Warsaw Pact nations as adversaries."

The summit also called for a change in NATO's strategy of forward-deployed forces, "and we are now, on the U.S. side, looking at what that means to all of us," Galvin said.

"We already know, of course, that arms control means smaller forces," he said. He pointed out that NATO's "overall aim is to bring the Soviets down to parity and be willing to take reductions in order to make that happen."

He said he expects that diplomats in Vienna, Austria, will reach a Conventional Forces in Europe agreement by year's end.

"I don't mean that there won't be any glitches," Galvin said of the imminent U.S. troop reductions and withdrawals from Europe. "You don't do an operation as big as this without some (problems)."

He acknowledged that "there will be some people who will leave (the military) involuntarily. And if you don't want to be one of them . . . you have to make sure your record looks good."

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (No. 2556) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania.

AMENDMENT NO. 2557

(Purpose: Expressing the sense of the Senate to facilitate the creation of a multilateral anti-narcotics strike force)

Mr. SPECTER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 2557.

Mr. SPECTER. Mr. President, I ask unanimous consent that reading of the amemdment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

It is the sense of the Congress that the President should call for international negotiations for the purpose of agreeing on the establishment of an international strike force to counter major international drug traffickers.

SEC. . CREATION OF A MULTILATERAL COUNTER NARCOTICS STRIKE FORCE.

(a) FINDINGS.—The Congress finds that—

(1) the United States Congress has in the past sought approval for a multilateral strike force dedicated to the war on drugs;

(2) the proposal to create a multilateral, international counternarcotics force as proposed by Prime Minister Michael Manley of Jamaica, is a plan worthy of consideration; and

(3) the Manley plan is the first operative proposal for the use of a multilateral force against the drug cartels in Latin America made by a government leader in the Western Hemisphere.

(b) SENSE OF THE CONGRESS.—It is therefore the sense of the Congress that—

(1) Prime Minister Manley of Jamaica is to be commended for his proposal; and

(2) the United States should work through the United Nations and other multilateral organizations to determine the feasibility of such a force and to assist in the establishment of this force, if it is found to be feasible.

Mr. SPECTER. Mr. President, this amendment has been cleared on both sides. It expresses the sense of the Senate to facilitate the creation of a multinational antinarcotics strike force. I urge its adoption.

Mr. DIXON. We support the amendment on this side, Mr. President.

Mr. McCAIN. Mr. President, we support the amendment.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment of the Senator from Pennsylvania.

So the amendment (No. 2557) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from California.

AMENDMENT NO. 2558

Mr. WILSON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California [Mr. WILSON] proposes an amendment numbered 2558.

Mr. WILSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

"SEC. . DEADLINE FOR COMPLETION AND EXECUTION OF AGREEMENTS WITH THE ENVIRONMENTAL PROTECTION AGENCY.

"(a) Whenever a Department of Defense facility is proposed to be listed on the National Priorities List pursuant to the Comprehensive Environmental Response, Compensation and Liability Act, as amended, including those facilities proposed for listing as of the date of enactment of this Act, the Secretary of Defense shall, not later than one year after the date of such proposal or the date of enactment of this Act, whichever is later, enter into an interagency agreement with the Administrator of the United States Environmental Protection Agency, which shall be subject to and comply with the Comprehensive Environmental, Response, Compensation and Liability Act, as amended, and shall include, but not be limited to, a procedural framework and schedule for developing, implementing, and monitoring appropriate response actions for any such facility in accordance with the Comprehensive Environmental, Response, Compensation and Liability Act, as amended.

"(b) This section shall be construed consistently with any existing federal laws, and nothing in this section shall be construed as limiting any rights, authorities, requirements, or obligations of or provided by any existing Federal laws. Nothing in this section shall be construed as preempting, affecting, or modifying any state laws, including, but not limited to, any laws concerning removal or remedial action, enforcement, discharge control, solid waste disposal, or the application of such laws to facilities owned or operated by a department, agency, or instrumentality of the United States.".

Mr. WILSON. Mr. President, this amendment has been cleared on both sides.

Mr. President, all of us are only too aware that many of our Nation's military installations have serious problems with environmental contamination. Maintenance cleaning of military machinery at a number of these bases has resulted in ground water pollution, and in some cases the contaminated ground water plume threatens drinking water supplies of nearby residential areas.

We need to ensure that these problems are addressed, and we cannot tolerate any unreasonable delay. My amendment is a very straightforward attempt to eliminate delay in the cleanup at these installations, and I would respectfully suggest to my colleagues that it is an amendment which deserves their support.

Very simply, my amendment would require the Department of Defense to accelerate the process by which it enters into cleanup agreements with the Environmental Protection Agency once a military installation has been proposed to be listed on the National Priorities List under the Superfund statute. The amendment would require such agreements to be executed within 1 year after the proposal to list.

Now the Defense Department already has a duty to execute these agreements under existing law. The problem is that it has been taking DOD as many as 4 or 5 years after its installations are proposed for inclusion on the National Priorities List to conclude such agreements. Frankly, that is much too long. It delays cleanups that are necessary to protect the public health and environment, and it cannot be tolerated.

Let me note here that this is hardly a matter of concern only to my State of California. This National Priorities List is a list of the most contaminated sites in the country. Last year at this time, nearly 90 military installations from some 24 States were on that list. Those States included Alaska, Arizona, Florida, Georgia, Hawaii, Iowa, Idaho, Kansas, Massachusetts, Maine, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Utah, West Virginia, and Wyoming.

And as if that list was not long enough, EPA then proposed to add roughly 50 more military bases to that list. So this problem is a large one, and it is growing.

California, unfortunately, has had to deal with at least 20 of these installations that are on the NPL, and the progress has been excruciatingly slow. Norton Air Force Base was first proposed for listing on the NPL in October 1984—but the interagency agreement between DOD and EPA wasn't concluded until June 1989. Sharpe Army Depot also was proposed for NPL listing in October 1984—but, again, the interagency agreement was not completed until 1989. The Naval Air Station at Offutt Field was proposed for inclusion on the list in April 1985, and DOD and EPA were still negotiating the interagency agreement 4 years later.

Mr. President, 4 years' delay in executing these agreements is simply too long. These military bases that are contaminating drinking water supplies must be cleaned up promptly. That is why I am offering this amendment. It is a needed amendment, it protects the public health, and it furthers the goals of our environmental laws that are already on the books—not only Superfund but also the Defense environmental restoration account that is the source of DOD's money for cleaning up these installations.

And again, this is a very straightforward amendment. It simply takes the existing duty of the Defense Department to execute these agreements, and requires that the agreement process be concluded within 1 year of the time any particular military base is

proposed to be listed on the NPL. This is a reasonable approach. It is an approach that would provide quicker environmental restoration at a number of military installations around the country. It is the very least we can do for the local communities that have been suffering the effects of contamination.

Mr. President, I have personally visited the Norton Air Force Base, Mather AF Base, and the Sharpe Army Depot, and Moffatt Field, and others. I have met with the people affected by contamination at these military installations, and I have worked to ensure that prompt remedial actions are taken. I have shared their frustration at the pace with which that action has proceeded. These communities have waited long enough. The time to clean up these sites has long since arrived. So let us seize this opportunity now to accelerate the process and move forward on an expedited basis to clean up these military installations and restore the environment.

I urge my colleagues to support this amendment.

Mr. LAUTENBERG. Mr. President, I would like to ask the Senator from California a few questions about his amendment on the execution of agreements with the Environmental Protection Agency [EPA]. What impact would your amendment have on the current EPA approaches to interagency agreements?

Mr. WILSON. Mr. President, my amendment would, in effect, codify what I understand to be the current EPA approach to the interagency agreement process, already being pursued pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as amended [CERCLA, as amended]. EPA currently attempts to enter into such agreements with Federal facilities at an early stage in the process. Such agreements include a procedural framework and schedule for developing, implementing, and monitoring appropriate response and remedial actions for any such facility in accordance with CERCLA, as amended. Such agreements incorporate all content specified by section 120(e)(4) of CERCLA, as amended, and are subject to and comply with CERCLA, as amended. So my amendment would not disrupt this process; it would simply add a new and clear deadline and requirement to section 120 of Superfund for the execution of these agreements.

Mr. LAUTENBERG. Mr. President, I would like to ask the Senator from California for a clarification of his amendment's requirement that the agreements are subject to and comply with CERCLA, as amended.

Mr. WILSON. Mr. President, by indicating that such agreements are subject to and comply with CERCLA, as amended, the amendment makes clear that the agreements in the amendment are subject to and must comply with all requirements, authorities, rights, and obligations of CERCLA, as amended, including but not limited to the content specifications of section 120(e)(4), the public participation requirements of section 120(e)(2), and section 117, all other provisions of section 120, and other CERCLA provisions, including section 310 authorities on citizens suits, and section 121 cleanup standards.

Mr. LAUTENBERG. Mr. President, I would like to ask the Senator from California to elaborate on the amendment's effects on State and Federal laws.

Mr. WILSON. Mr. President, while the amendment creates a new requirement to execute the agreements in question by a specified deadline, the amendment does not limit any rights, authorities, requirements or obligations of or provided by any existing Federal laws. In addition, the amendment clearly does not preempt, affect, or modify any State laws. The amendment preserves the applicability of all Solid Waste Disposal Act, as amended, enforcement authorities and corrective action requirements at Department of Defense facilities, including those proposed for or listed on the National Priorities List [NPL]. This includes preserving the rights of States at proposed and final NPL sites to enforce all requirements of the Solid Waste Disposal Act, as amended, including corrective action requirements, as well as any State laws, regulations, and requirements pertaining to solid waste.

Mr. LAUTENBERG. On last year's DOD authorization bill, the Senator from California offered and withdrew a related amendment, that specifically referenced States as parties to the agreement. I note that the Senator's current amendment does not reference States as parties, and would like to ask him to confirm that the current amendment does not change the obligations, rights, or role of States with respect to the current CERCLA interagency agreement process.

Mr. WILSON. Mr. President, the Senator from New Jersey is correct, in addition to other modifications to the amendment from last year, the reference to States has been dropped in an effort to conform to the current CERCLA section 120 process. The current amendment in no way changes the obligations or role of States with respect to the interagency agreement process. As is the case currently, were this current amendment enacted, States have free choice about such agreements. They can enter into such agreements or exercise their freedom not to enter such agreements.

Mr. President, simply stated, this is a requirement that the Department of Defense and EPA enter into an interagency agreement for the cleanup of contaminated military bases within 1 year after the listing of those bases on the Superfund National Priorities List. It is an effort to accelerate attention to needed environmental cleanup on military installations. It has been cleared on both sides.

Mr. NUNN. Mr. President, we have looked at the amendment of the Senator and I think certainly it is aiming in the right direction. There may be some things we have to look at in conference after we hear a little more from the Department of Defense, but I recommend we accept the amendment.

Mr. McCAIN. We recommend acceptance of the amendment.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from California.

So the amendment (No. 2558) is agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote.

Mr. WILSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, we now have, I believe, a list of all the amendments that are known to us. What we would like to do at this time is propose that these amendments be all the amendments that will be eligible for debate or for consideration on this bill, with the exception of those amendments, of course, that are set forth in the unanimous consent request relating to SDI.

The PRESIDING OFFICER. The Senator will suspend. This will be an important list. The Senator needs to be heard. All Senators will cease audible conversations. The Senate is not in order.

Mr. DIXON. Mr. President, while the distinguished manager is doing his work, may I make a statement that will eliminate another amendment?

The PRESIDING OFFICER. The Senator may proceed.

Mr. DIXON. Mr. President, I had a Korean fighter FSX amendment on the list, and it may now be deleted from the list.

Mr. President, I had intended to offer an amendment today on the Korean fighter program, with the cosponsorship of Senator BYRD, Senator FORD, Senator BRYAN, and Senator HEINZ. However, the distinguished leadership has requested that we not address this issue today, in the interests of finishing the Defense authorization bill. I would be pleased to accommodate this request and not offer this amendment now, however, I ask unanimous consent that the amendment be printed in the RECORD.

Mr. President, my amendment would have provided that the Korean fighter program not be carried out unless Congress passed a joint resolution of approval. I realize that the Korean fighter program is not the FSX: It is a coproduction rather than a codevelopment program. However, it involves many of the same basic issues, and must be a matter of congressional concern. I believe this program should have been handled differently from the beginning: Specifically, the Koreans could have bought the F/A-18's off the shelf, rather than insisting on coproduction.

Congress must take some kind of action to make clear to the administration that we are concerned about the way it handles these types of programs, and that the deal itself—if carried out—does not harm U.S. interests. Although I will not offer my amendment today, I plan to offer legislation on the Korean fighter program in the future.

The Korean fighter program involves 120 F/A-18 *Hornets.* 12 will be purchased off the shelf, 36 will be assembled from kits in Korea, and the remaining 72 will be coproduced in Korea by Korean industry under U.S. license—with U.S. industry providing technical assistance and training. I believe that given the special circumstances surrounding the United States-Korean relationship, there should have been no doubt that this would be an entirely off-the-shelf sale.

The United States maintains over 40,000 troops in Korea, at a cost of $2.6 billion per year. We have given Korea billions of dollars in economic assistance, which has played a major role in building Korea's present day prosperity. The United States trade deficit with Korea remains large, even though it has been declining. Korea has engaged in unfair trade practices with the United States, and in 1989 only narrowly escaped being named a priority country under the Super 301 provision of United States trade law. Given these circumstances, I believe that common sense requires that Korea buy our planes outright, rather than require a coproduction arrangement.

Moreover, I have serious reservations as to whether this coproduction arrangement is in the long-term interest of the United States. For example, is it in the United States interest to help Korea build an aerospace industry that we will later have to compete with? The GAO testified earlier this year that the Korean fighter program "involves the transfer of manufacturing and assembly know-how." In addition, the GAO indicated that "the Koreans' desire for a coproduction program has been driven by their industrial goals and interests."

Also, I question whether it is in our interest to give manufacturing and assembly know how on the F/A-18 to a country that is widely known to have violated coproduction agreements in the past. Classified GAO testimony, that is available to all the Members of this body, provides details on this matter. My concern is whether we can guarantee that Korea will not allow dangerous countries access to the F/A-18.

Finally, Mr. President, I understand that the administration is not, as of now, planning to provide the memorandum of understanding on the Korean fighter program to Congress for consideration. I do not see how Congress can carry out its constitutional responsibility to regulate foreign commerce if we are not even able to examine the agreement, and make sure that it is not detrimental to U.S. interest.

Mr. BOND. Mr. President, on behalf of Senator DANFORTH and myself, I object to the amendment proposed by Senator DIXON. There are so many problems with the amendment before us that I am not sure just where to start.

This amendment would set aside the law under which all arms sales are now considered—the Arms Export Control Act—and would establish, in its place, a new unworkable and unnecessary process for considering the Korean fighter deal.

There is simply no reason to take this action. The Arms Export Control Act establishes a reasonable framework for addressing arms sales—one that has worked well over the years. Under the act, the administration provides Congress with notice of a sale. Congress then has 30 days to review the proposed deal. That is in addition to another 20 days during which the administration routinely provides informal notice to allow Congress to begin to prepare for the formal notification. During the formal notification period, any Member of Congress who choose to oppose the sale, may introduce a resolution of disapproval and that resolution must be dealt with under expedited procedures. Put simply this is a deal killer directed at the sale of 120 F/A-18 *Hornets* to Korea.

These are not lax or unreasonable procedures, and this Congress has found them adequate for all past coproduction arms deals.

I would further point out that it makes no sense to make a major modification to the Arms Export Control Act in a floor amendment which has never been considered in a hearing and which is being debated under the time constraints we now face.

I would like to point out to my colleagues that there is nothing unusual, new or unique about this deal. It is a standard coproduction agreement—almost identical to many that have taken place in the past, all without interference, or even much interest—on the part of Congress.

Under the proposed deal, the United States and Korea will coproduce F/A-18 fighter aircraft. We are currently participating in similar coproduction deals on the F/A-18 with Canada, Spain, and Australia. In addition, we have a comparable coproduction arrangement with Turkey for the F-16 *Falcon.*

I ask my colleague from Illinois, what is the difference? Why is he opposed to this deal? Why did he not oppose earlier such arrangements?

Mr. President, I also would like to point out to my colleagues that the Korea fighter is not the "Son of FSX" as some would have you believe. The FSX deal, which we debated extensively last year was a codevelopment deal under which the United States and Japan will develop a new fighter plane. And that deal involves transfers of technology between the two countries and the development of new systems and technologies. That is not at all what we are talking about here.

The Korean fighter program is a procurement of 120 F/A-18 *Hornet* aircraft. Unlike the FSX, the *Hornet* is a fully developed fighter and no changes will be made to the plane beyond those necessary to make it adaptable to Korean Air Force needs. No development or design work will be transferred to Korea. High-technology items are excluded from coproduction—the radar, electronic countermeasures, and avionics, for example—will be completely produced in the United States.

Another objection that has been raised is that this program will establish Korea as a competitor in the commercial aerospace field. This is truly a specious argument. If helping the Koreans to develop an aerospace industry is a mistake, then we've been making that mistake for years. Korean companies currently produce parts of the Boeing 767, 757, and 737, as well as the McDonnell Douglas MD-80. And that is not all. The Koreans also have done work on the F-15, the F-16, the F-4, the F-5 and the C-130, not to mention the MD-500 and Bell 212 helicopters.

I have to say I am perplexed as to what is the motivation behind this amendment. I do not understand the reasons behind it, but I certainly know what the likely results will be if it is passed.

At the very least this amendment will strengthen in the minds of potential customers throughout the world the image of U.S. companies as unreliable and problematic suppliers of defense items. But the impact could be a lot worse than that. If this amendment results in an extended delay in getting the program under contract, the entire deal could be jeopardized by price increases.

I am deeply concerned about that possibility because it has a direct and major impact on workers in my State. Defense workers in Missouri have seen tough times in recent weeks and they are likely to see further cuts in the next few years. I do not want to go back to them and try to explain why—at a time when they are struggling to find any way to keep workers on the line—Congress saw fit to put roadblocks in the way of a deal that will keep U.S. aerospace workers employed for years to come.

The men and women who live in Missouri and Illinois and work on the F/A-18 program support this program and they oppose efforts to impede it. Last night I spoke to Mr. Cass Williams, head of the Machinists Local 837 that represents McDonnell Douglas workers. He told me in no uncertain terms that the men and women of the union need all the work they can get and they support the Korean deal 100 percent. He asked that I pass that message to my colleague from Illinois.

I ask unanimous consent that a letter from Mr. Williams be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

INTERNATIONAL ASSOCIATION OF MACHINISTS AND AEROSPACE WORKERS, AFL-CIO, AEROSPACE DISTRICT LODGE 837,
Hazelwood, MO, August 2, 1990.

Senator CHRISTOPHER BOND,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR BOND: We believe that the Korean Fighter Program (KFP) is good for American Labor:

Almost 3 years of production for 8,000 people employed on the FA-18 program at MCAIR;

About 23 million manhours of work in the U.S.;

Spare parts, weapons and other systems which are sold along with the fighters will provide additional work.

There is no need for more delays in giving U.S. labor these jobs. KFP negotiations have already dragged on for two years, and there have been plenty of opportunities for all parties to be heard. The deal is good enough as it is.

The Koreans are trying to "buy American." Labor will not understand if Congress does something that makes this hard, especially at a time when U.S. Navy production rates are falling. Delaying or killing the program will only help the British and French, who are trying to sell Tornados and Mirage fighters to the Korean Air Force.

Your help in this matter will be greatly appreciated!

Yours very truly,

CASSELL WILLIAMS.

Mr. BOND. Mr. President, at a time when U.S. defense companies are facing declining defense budgets and the need to curtail programs and cut back on jobs, it seems to me that we ought to be taking actions to help them sell more, not less. Foreign sales such as this one are the only hope that workers such as the members of local 837 in St. Louis have of ensuring their jobs beyond the next few years. I cannot understand how we could afford to bomb this deal with a major procedural delay.

In conclusion, I would just point out that this is a good deal for the United States. It will reduce the United States-Korean trade imbalance by almost $4 billion, and that does not include follow-on purchases and spares. It will provide work to approximately 1,500 U.S. companies and it will mean more than 23 million man-hours of jobs for American workers. We can pass this amendment and take a step toward sending those jobs to France or the United Kingdom, but I am pretty sure my colleagues do not want to do that. I certainly hope they do not. I know I do not.

I yield to my colleague.

Mr. KERRY. Mr. President, I simply want to indicate my strong support for the FA-18 arrangement between the United States and our Korean allies. I too opposed the FSX deal with Japan as an arrangement that was not in the long-term, best interests of the United States, particularly from an economic competitiveness standpoint. However, the current proposal regarding United States-Korean cooperation on the FA-18 poses no such threat. In fact, General Electric engines for the FA-18 under this arrangement will be built in Lynn, MA, where we make and have made for years the finest jet engines manufactured anywhere in the world. This is a coproduction agreement, not a codevelopment agreement, and it makes sense.

Mr. President, this is a good deal for the Koreans and a good deal for the American people and a good deal for the workers in Lynn and I am pleased to join in the comments of my colleagues in support of this important agreement with our Korean allies.

Mr. DANFORTH. Mr. President, this Senator, who had strong reservations about the codevelopment arrangement with Japan for the FSX last year, has absolutely no doubt about the wisdom of the Korean arrangement. It is entirely different from the Japan transaction. This does not involve codevelopment.

In this agreement, the Commerce Department has been involved since the outset in the deliberations, unlike the FSX deal with Japan.

Mr. President, I ask unanimous consent that a letter I have received from Thomas J. Murrin, Acting Secretary of Commerce, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF COMMERCE,
Washington, DC, August 3, 1990.

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, DC.

DEAR SENATOR DANFORTH: Thank you for your inquiry today concerning the Korean Fighter Program (KFP). As you are aware, the U.S. and Korea completed negotiations on this agreement in June 1990. While the Koreans have not yet signed the Memorandum of Understanding (MOU) pending their own approval process, the Administration has received assurances of their intent to implement the program. Based on this stated intent, the Department of State submitted the KFP agreement to Congress under informal notification on July 16, 1990.

The Department of Commerce has been involved in the KFP since June 1989 when we received our initial in-briefing from the Defense Security Assistance Agency (DSAA). The Department of Defense has kept Commerce updated on all developments since that time. More recently, Commerce and Defense have cooperated in the review and negotiation of the MDU. In January 1990, we co-chaired an interagency review that assessed the economic, technical, and industrial effects of the KFP MOU. The results of this review indicated that the Korean Fighter Program would have an overall positive effect on the U.S. industrial base. Also, our Commerce staff has been part of the U.S. negotiating teams that met with the Koreans in March 1990 and June 1990. Commerce will continue to actively monitor the industrial arrangements associated with the KFP.

In September 1989, Secretaries Mosbacher and Cheney reached agreement with Korean Minister of National Defense Lee Sang Hoon to limit the industrial offsets associated with the program to 30 percent of the contract value. This 30 percent limit is stipulated in the Offset Side Letter to the MOU. Commerce played an important role in assessing the probable effects of the McDonnell-Douglas proposed offset package on the U.S. aerospace industry. In addition, Commerce was very much involved in determining whether all Korean work associated with the program would fall within the 30 percent limit. We have concluded that the U.S. aerospace industry will not be adversely affected by either the quality or quantity of Korean co-assembly work.

We believe the level of cooperation proposed in the KFP will be beneficial to the U.S. aerospace industry and the trade and economic interests of the United States. Based on our independent assessment, and the cooperative review performed by the interagency group, we strongly support the Korean Fighter Program.

Sincerely,

THOMAS J. MURRIN,
Acting Secretary of Commerce.

Mr. BYRD. Mr. President, I compliment Senator Dixon for his leadership on this issue. He was among the first to bring attention to possible problems with the Korean Fighter Program last year. I was pleased to cosponsor his amendment in July 1989 focusing light on the negotiations between the Republic of Korea and our Defense Department. At that time we were in the midst of an acrimonious debate over the FSX fighter program with Japan. It was my hope that we could avoid a repeat of that extremely divisive argument.

I still hope it is possible to avert such an outcome, but the administration seems determined to push Congress into another fight. I thought we

made it clear last year that we had a continuing interest in this program and in all such coproduction and codevelopment ageements in the future. To the Defense Department's credit, they have made an effort to provide staff briefings as the negotiations have progressed. Unfortunately, now that the deal is completed, the administration tells us that the unsigned memorandum of understanding is a confidential document because it is part of Executive negotiations with a foreign power. They say that there are no surprises in the final agreement, but they will not share the details with Congress until it is signed and it will not be signed until after the 30-day notification waiting period has expired.

Mr. President, as far as I can tell from the information the Defense Department has provided, this is a typical coproduction arrangement, much like a dozen other programs the United States currently has under way. If that is the case, then it should go through with no problem, but I am not prepared to give a blanket go-ahead without all of the details. If the administration has nothing to hide then why are they so reluctant to give us the full picture?

Senator DIXON's amendment was intended to make sure that Congress has the opportunity to thoroughly evaluate the merits of this deal. I want to emphasize that I am not opposing the Korean fighter program. I simply want to know all the details. The provisions of this amendment would ensure that Congress has the opportunity to judge whether or not this is a good deal.

On a more fundamental level, this situation demonstrates the administration's continued insistence that these arrangements are purely defense transfers over which they have undisputed primacy. They have yet to fully recognize the economic security aspects of these deals. One of the central arguments of the FSX debate was over the constitutional role of the Congress in regulating foreign commerce. A $3 billion coproduction deal involving the U.S. aerospace industry is clearly foreign commerce. This amendment was intended to ensure that Congress would have a more active role in this extremely important agreement.

Mr. McCAIN. Mr. President, before I send an amendment to the desk, I also point out to my friend from Missouri the aircraft are built in different places, different parts of the country, which I think is an essential aspect of this very important transaction.

AMENDMENT NO. 2559

(Purpose: To establish the Counter-Narcotics Technology Assessment Center within the Office of National Drug Control Policy, and for other purposes)

Mr. McCAIN. Mr. President, on behalf of Senator COHEN and Senator BIDEN, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The Legislative clerk read as follows:

The Senator from Arizona [Mr. MCCAIN], for Mr. COHEN for himself and Mr. BIDEN), proposes an amendment numbered 2559.

Mr. McCAIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 255, insert between lines 15 and 16 the following new title:

TITLE XV—COUNTER-NARCOTICS TECHNOLOGY CENTER

SEC. 1501. SHORT TITLE.

This title may be cited as the "Counter-Narcotics Technology Act of 1990".

SEC. 1502. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER.

(a) ESTABLISHMENT.—Title I of the Anti-Drug Abuse Act of 1988 (21 U.S.C. 1501 et seq.) is amended by inserting after section 1003 the following new section:

"SEC. 1003a. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER.

"(a) ESTABLISHMENT.—There is established within the Office of National Drug Control Policy, the Counter-Narcotics Technology Assessment Center (hereafter in this section referred to as the 'Center'). The Center shall operate under the authority of the Director of National Drug Control Policy, and shall serve as the central counter-narcotics enforcement research and development organization of the United States Government.

"(b) DIRECTOR.—There shall be at the head of the Center, the Chief Scientist of Counter-Narcotics Technology who shall be appointed by the Director of National Drug Control Policy from individuals qualified and distinguished in areas of science, engineering or technology. The Chief Scientist shall be paid at the highest rate of basic pay set under the provisions of section 5382(b) of title 5, United States Code.

"(c) ADDITIONAL RESPONSIBILITIES OF THE DIRECTOR.—(1) The Director, acting through the Chief Scientist, shall—

"(A) identify and define the short, medium, and long-term scientific and technological needs of Federal, State, and local drug enforcement agencies, including—

"(i) surveillance, advanced tracking, and radar imaging;

"(ii) electronic support measures;

"(iii) communications;

"(iv) data fusion, advanced computer systems and artificial intelligence; and

"(v) chemical, biological, radiological (including neutron, electron, and gravitron) and other means of detection;

"(B) make a priority ranking of such needs according to fiscal and technological feasibility, as part of a National Counter-Narcotics Enforcement Research and Development Strategy;

"(C) oversee and coordinate counter-narcotics technology initiatives with related activities of other Federal civilian and military departments; and

"(D) under the general authority of the Director of National Drug Control Policy, submit reprogramming or transfer requests of funds appropriated for counter-narcotics enforcement research and development to Congress.

"(2) The authority granted to the Director under this section shall not extend to the award of contracts, management of individual projects, or other operational activities.

"(d) COUNTER-NARCOTICS BUDGET SUBMISSION.—Beginning with the fiscal year 1992 budget, the Director of National Drug Control Policy in his budget shall submit a separate and detailed request relating to all Federal agencies for counter-narcotics enforcement research and development programs.

"(e) PERSONNEL.—Subject to subsections (d) and (e) of section 1003 of this Act, the Chief Scientist shall select and appoint a staff of not more than 10 employees with specialized experience in scientific, engineering and technical affairs. The Chief Scientist may appoint and fix the compensation of such personnel without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and such personnel may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at a rate not to exceed the maximum rate authorized by the General Schedule.".

SEC. 1503. EFFORTS BY PRIVATE INDUSTRY.

It is the sense of Congress that providers of electronic communications services and manufacturers of electronic communications equipment should cooperate with law enforcement agencies to ensure that communications systems permit law enforcement agencies to obtain the plain text contents of voice, data, and other communications when appropriately authorized by law.

Mr. COHEN. Mr. President, at the present time, the Office of National Drug Control Policy is attempting to manage the research and development aspects of U.S. counternarcotics policy with a skeletal staff, minimally authority, and a residual lbudget derived from the sale of assets confiscated from drug dealers. In sum, Director Bennett's office does not currently have either the authority or the human and fiscal resources necessary to effectively bring advanced technology to bear against our adversaries in the war on drugs.

While I recognize that there is no substitute for reducing the demand for illegal narcotics, I also believe that it is important to minimize the temptation faced by millions of Americans in their neighborhoods and places of employment. In that regard, officials from the Customs Department, the FBI, Los Alamos National Laboratory, and the Defense Advanced Research Projects Agency, have indicated that there are a number of technologies that might be useful in our efforts to thwart narcotics traffickers. Examples include sensors that can remotely detect drug processing activities; computer software to detect money laundering schemes; intrusion detectors for

remote border locations; and electronic and chemical tags to trace the flow of illegal narcotics from their countries of origin into the United States. In short, there is a great deal more that can and should be done to make life difficult for the Colombian drug cartels and their counterparts in other countries.

As a first step toward developing a more robust and focused counternarcotics research and development effort for the United States this amendment would:

First, establish an office in ONDCP to manage the U.S. counternarcotics R&D effort;

Second, permit the drug czar to hire up to 10 individuals to staff this office;

Third, require the Director of the Office of National Drug Control Policy to prepare and submit to Congress a detailed accounting of the expenses related to counternarcotics R&D programs.

Fourth, this amendment expresses the sense of the Congress that the providers of electronic communications services and manufacturers of electronic equipment should cooperate with the law enforcement community to make it possible to monitor electronic communications when appropriately authorized by law.

We are all familiar with the rhetoric of the war on drugs, but I think most of us would agree that the rhetoric has often outpaced the reality when it comes to government action. In previous wars, our Government didn't hesitate to turn to the scientific community for solutions and to generously fund research and development projects when national security was at stake. Indeed, as a Nation, we have taken great pride in the discovery and development of such things as computers, lasers, hard plastics,0 and a wide variety of sophisticated electronics. These technologies have not only helped to protect the country, by keeping us one scientific step ahead of potential adversaries, but they have also produced substantial benefits for the civilian economy.

These technologies and many others were made possible, at least in part, because Congress has provided the funds necessary for Government labs to do basic research and because the Defense Department has been well-organized to evaluate and coordinate alternative research projects. While this combination of resources and organization has proven effective in support of our national defense needs, we have yet to undertake similar initiatives to support the civilian law enforcement community in the war on drugs. As I noted earlier, the only organization presently seeking to coordinate the U.S. counternarcotics R&D effort is a committee in the Office of National Drug Control Policy that has a skeletal staff, no budget, and minimal authority with regard to the different organizations involved in counternarcotics research and development.

In the Defense Department, and even among many corporations in the private sector, it is not uncommon for research and development costs to constitute 5 to 10 percent of the total operating budget. With regard to counternarcotics matters, however, we are only investing about two-thirds of 1 percent of the overall supply side budget on research and development activities.

In considering this measure, I believe it is important to point out that we can achieve the benefits of a more coherent and effective national counternarcotics research and development program without creating a vast new bureaucracy or establishing new laboratory facilities. With regard to personnel, this legislation authorizes Secretary Bennett to add not more than 10 individuals with scientific and technical backgrounds to his staff in order to form the Counternarcotics Technology Assessment Center. I believe that this staff will enable the drug czar to give impetus and direction to the fledgling efforts currently underway to pit an old and invaluable ally, namely technology, against the rapidly evolving threat of illegal narcotics. Let me also say that I recognize that we are going to need more funding for counternarcotics research and development activities in the future, but I think that rather than include additional funds at this time, this amendment appropriately puts the initial emphasis on developing a core staff with technical expertise to develop plans for the future. The provision of this amendment that requires the Director of the Office of National Drug Control to submit a separate and detailed request relating to counternarcotics R&D activities should help to clarify the range of projects and activities currently underway and the scope of the current Federal effort. Finally, the sense of the Congress provision relating to communications equipment is intended to make it more difficult for drug smuggling organizations to evade scrutiny when appropriate court orders have been obtained to monitor their communications.

It is my hope that by establishing an effective managerial mechanism for counternarcotics research and development activities, we will have taken the first step toward making drug smuggling a far more difficult and costly enterprise for the Colombian cartels and their counterparts in other countries.

Mr. BIDEN. Mr. President, the purpose of the Biden-Cohen amendment is very simple: To harness the expertise of America's leading scientists and engineers in the fight against the international drug trade.

The notion of harnessing high-technology weapons in our fight against drugs is not farfetched. In testimony before my committee, leading scientists previewed their work on advanced counterdrug technologies.

Scientists at Los Alamos National Laboratory are investigating how lasers can be used to detect remote cocaine processing sites in the Andean jungle.

Experts at the Defense Advanced Research Projects Agency [DARPA], the research arm of the Pentagon, are examining supersensors that can be used to detect the chemical smell of cocaine in cargo shipments; and officials at the Customs Service are exploring look-through radar imaging to detect false compartments in aircraft, boats, and containers.

The defense authorization bill is an appropriate vechicle for this amendment. Many of the most promising technologies have already been developed by the Pentagon for military purposes. U.S. taxpayers have already footed the bill for this research. Now it's time to adapt these innovations to our fight against drugs.

In conclusion, Mr. President, I want to say that new weapons to fight drug traffickers are no substitute for reducing the demand for drugs through prevention and treatment. But until demand can be reduced our battle against the traffickers must continue.

These technologies offer new promise that our undermanned, underarmed, and underfunded forces will soon have new weapons to control the drug flow into this country.

Finally, I want to thank Senator COHEN for his effort and leadership on this amendment.

Mr. McCAIN. Mr. President, this amendment has been accepted on both sides. I urge adoption of the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2559) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, I ask the Republican leader if his side is ready to propound this list? Understand, this is not a time agreement on these amendments, but we are just basically saying this is the end of the list.

Mr. McCAIN. Mr. President, I might advise my colleagues, while we are compiling this list, that if there are other amendments that have been accepted on both sides, this will be an excellent time to dispense with them.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DIXON. Mr. President, we have some other amendments that have been cleared. As soon as the staff can bring them to me, we are going to proceed and dispose of some of these amendments. Will my friend from Arizona manage on the other side with me.

AMENDMENT NO. 2560

(Purpose: To authorize the use of RDT&E funds of the Defense agencies to continue development of the special operations variant of the V-22 *Osprey* aircraft)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. GLENN (for himself, Mr. BENTSEN, Mr. COATS, Mr. HEINZ, Mr. SPECTER, Mr. SYMMS, Mr. D'AMATO, Mr. LAUTENBERG, Mr. GRAMM, Mr. PELL, and Mr. MCCAIN), proposes an amendment numbered 2560.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 18, insert "(1)" after "Funds.—".

On page 11, between lines 22 and 23, insert the following new paragraph:

(2) Of the amounts authorized to be appropriated pursuant to section 201(4) for the Defense Agencies, $8,000,000 shall be available for research, development, test, and evaluation in connection with the Special Operations variant of the V-22 Osprey aircraft.

Mr. GLENN. Mr. President, I understand this amendment has been accepted by both floor managers. It provides research and development [R&D] funds to continue further development of the unique components of the special operations forces [SOF] variant of the marine Corps and Navy version of the V-22 tiltrotor aircraft. The SOF variant is designated CV-22.

In the fiscal year 1991 Defense authorization bill now under consideration, the Armed Services Committee recommends authorization of $238 million to continue R&D of the joint service V-22 *Osprey* aircraft. The V-22 airframe is essentially common to the Marine Corps, Navy and SOF versions, but the SOF CV-22 has unique avionics components, including a sophisticated radar and communications suite that are not common to the other V-22 versions.

The development of the unique components of the CV-22 has been ongoing since 1986, but unless a minimum of $8 million is added in fiscal year 1991, that effort will have to be terminated. The $8 million in Defense agency R&D funds will allow the Air Force managed CV-22 program to continue. The offset for these R&D funds will be provided from other DOD managed SOF development funds.

Mr. President, because of the repeated attempts to label the V-22 a single service, Marine ship-to-shore aircraft, my colleagues may not be fully aware of the true joint nature of the ongoing V-22 development program. In May 1983, a memorandum of agreement was signed by the Assistant Secretaries of the Army, Navy, and Air Force to particiate in the development of the V-22.

When the full scale development [FSD] phase began in 1986, a joint program management office was established with representatives from the Marine Corps, Air Force, and Navy participating. The Marine Corps, as the executive service, has the largest organization, but the Air Force CV-22 management team has over 23 military and civilian personnel including test pilots, engineers, logistics experts, and plant representatives, actively involved in the program.

Mr. President, the sponsors of this amendment believe that this amendment is valid and urgently required. The former commander of the Special Operations Forces, General Lindsay, has repeatedly testifed before the Armed Services Committee that his No. 1 operational requirement is a long-range infiltration/exfiltration aircraft. The current SOF commander, General Steiner, reaffirmed this requirement during his recent confirmation process.

Mr. President, the Armed Service Committee has taken a significant step by choosing to continue overall R&D funding for the V-22. This action sends a clear message to DOD that the majority or our committee believes that the V-22 is the kind of versatile, joint service weapons system that will be required to implement a new military strategy.

My personal support for the V-22 program is certainly not new or a surprise to my colleagues, I, along with many others from both sides of the aisle, have spoken on this floor many times about the tremendous potential tiltrotor technology has for military and civilian applications. I flatly reject Secretary Cheney's past criticism that supporters of the V-22 are doing so solely for parochial reasons.

I firmly believe that after 10 years of solid congressional support, an investment of $2.5 billion and a recent revalidation of the operational and cost effectiveness of the V-22, the time has come to go forward with the V-22 program.

To state the obvious one more time, helicopters have myriad military and civilian uses. If all of these thousands of helicopter applications could be accomplished twice as far, twice as fast, and with one-third more payload, we would be rushing to get that capability.

That kind of major advance in vertical lift technology is available now in the V-22 Osprey tiltrotor aircraft, developed over a 10-year period with full congressional and administration support. The V-22 is a very carefully developed, new concept, vertical lift vehicle, that first was flown, and very successfully, in a two-third scale version designated the XV-15. During the last few days, the XV-15 has logged over 600 flight hours.

The V-22 has been supported all these years because it represents a major step forward in vertical lift capability for a wide range of military, as well as potential civilian, applications. In the Pentagon fiscal year 1990 budget, however, the V-22 program was zeroed-out because the only mission considered for it was the Marine ship-to-shore movement. Considering that narrow application alone, I would agree that it is an expensive program, yet it was on that basis alone that the Secretary of Defense decided to cancel the program.

As already mentioned, the V-22 mission capability has always been envisioned to encompass many and varied vertical lift requirements for all the services—and eventual civilian use—with marine ship-to-shore and shore based tactical uses only the first application.

As to the future potential of tiltrotor technology, we have been aware for some time of Japanese interest in the V-22, and of their preliminary discussions with V-22 project personnel concerning Japanese licensing arrangements. A recent article in the Defense Daily indicated the seriousness of that interest. If we once again see United States-generated technology developed and put on sale by the Japanese around the world in the form of the V-22, we will have no one to blame but ourselves.

Mr. President, in conclusion, I would like to summarize the major factors in the Armed Services Committee decision to fund the V-22 program in fiscal year 1991.

The joint service operational requirement [JSOR] for the V-22 remains valid. The Marine Corps, the Special Operations Command [SOC], and the Navy have once again reaffirmed their urgent need for the combat capabilities of the V-22. The Corps is in dire need of a replacement for its aging CH-46 medium lift helicopter, the SOC requires a long-range

infiltration/exfiltration tactical aircraft to accomplish its basic mission which is why the amendment before us is so important, and the Navy needs a long-range combat search and rescue aircraft.

The congressionally directed cost and operational effectiveness analysis [COEA] study supports the V-22 alternative. Study results show that the V-22 is significantly more operationally and cost effective than the DOD-proposed CH-60/CH-53 medium lift alternative for most joint service combat scenarios. The study also notes that the V-22 is the only aircraft that meets the joint service requirement; that it is the most survivable in a combat environment; and that it has the least development risk.

The V-22, with its unique tiltrotor technology, conforms to the armed service's philosophy for the fiscal year 1991 budget.

First, we need a revised military strategy: Earlier this year Senator NUNN, in a series of excellent strategy speeches, emphasized the need for "forces that are inherently mobile and rapidly deployable," the need for flexible readiness, and the need for systems with breakthrough or leapfrogging potential. The V-22 meets these criteria and more.

Second, the need to fly-before-buy: The V-22 flight test program is proceeding smoothly, with four of six R&D aircraft flying. Through July 31, 1990, the test aircraft have completed 185 flights and accumulated 190 flight test hours. As substantiated by the most recent flight test summary, which I will ask to have entered in the RECORD following my remarks, I believe that a solid argument can be made for adding advance procurement funds for the first production aircraft in fiscal year 1991. However, in keeping with the fly-before-buy principles, our committee chose to add only development funds for fiscal year 1991.

So Mr. President, I want to thank Senator KENNEDY, chairman of the Projection Forces and Regional Defense Subcommittee, whose amendment proposed adding the R&D funding for the V-22 in fiscal year 1991, and to Senator NUNN and Senator WARNER for their support in keeping this vital program moving forward, including this amendment to continue development of the V-22 SOF variant.

I am hopeful that when this bill goes to conference, procurement money can also be added to retain the V-22 manufacturing base and preserve a viable production option.

Mr. President, I ask that the summary be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

V-22 FLIGHT TEST SUMMARY

[Through July 31, 1990]

1. The V-22 Full Scale Development (FSD) flight test program consists of 6 test aircraft. First flight for aircraft 1 occurred March 19, 1989. Aircraft 5 and 6 are scheduled for first flight late Fall 1990.

2. Aircraft 1, 2, 3 and 4 have completed preliminary helicopter flight envelope and conversion to the fixed wing airplane mode.

3. Flight envelope to date:

Forward flight to 280 KTS (Knots) = 322 MPH (Miles per Hour).

Altitude 15,000 ft.

Takeoff and landing at 60 KIAS (Knots Indicated Air Speed).

Taxi at 50 KIAS.

Load factors of 0.5 to 2.3 Gs.

Angle of bank—60 degrees.

Gross weight 37,500 to 45,000 lbs.

Demonstrated single engine flight and aircraft stalls.

4. Aircraft 1 and 3 are conducting Development Test and Evaluation DT&E flights at Bell Helicopter Fort Worth, Texas. Aircraft 2 and 4 are assigned to the Boeing Test Facility in Wilmington, Delaware.

ACFT 1: Flights 79, hours 58.3.

ACFT 2: Flights 70, hours 95.1.

ACFT 3: Flights 10, hours 5.8.

ACFT 4: Flights 26, hours 30.7.

5. Total number of test flights/hours through July 31, 1990: Flight, 185. Flight Test Hours, 189.9.

Mr. President, I strongly support the V-22 program and this amendment to earmark funds for continued investigation of the utility of tilt-rotor aircraft to the vital missions of Special Operations Forces.

The V-22's revolutionary technology will speed Marines into battle twice as far and twice as fast as today. But the aircraft's ability to land like a helicopter also makes it ideal for a wide range of special operations—hostage rescue, counterterrorism, intelligence, and infiltration. This amendment by the distinguished Senator from Ohio [Mr. GLENN] permits the air force to test a variant of the V-22 for these important missions.

Although the administration still wants to cancel the V-22, the Congress is determined to keep it alive. The Senate Armed Services Committee approved $238 million for continued research and development and noted independent analyses which suggest that the V-22 is potentially more militarily useful than other alternatives under consideration

The House Armed Services Committee, while cutting defense spending more deeply, nevertheless agreed to add production funds to its authorization bill. That issue will be resolved in conference.And I hope that the Senate conferees will be attentive and sympathetic to the arguments for permitting us to move to production.

We have to build and fly these aircraft to prove without doubt that tiltrotor technology is safe, reliable, and cost effective. Paper studies won't convince airlines to commit to purchase such radically better aircraft.

But once that proof is in, I foresee a huge market for civil aviation and a welcome boost to American exports abroad. Europe and Japan already acknowledge that they face gridlock at their congested airports. Tilt-rotor Aircraft could solve their problems, as well as some of our own.

Mr. President, the V-22 represents a dramatic advance in aviation and a remarkable opportunity to strengthen our international competitiveness. We should take full advantage of it while we have the lead. For if we hestitate, if we stop with research and development, others will seize the opportunity and reap the benefits.

Mr. DIXON. Mr. President, this amendment by Senator GLENN and others provides research and development funds on the V-22. It has been agreed to on both sides.

The PRESIDING OFFICER. Is there further debate?

Mr. McCAIN. Mr. President, this side supports this amendment very strongly.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 2560) was agreed to.

Mr. GLENN. I move to reconsider the vote.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2561

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. JOHNSTON, (for himself, Mr. MCCLURE, and Mr. GLENN), proposes an amendment numbered 2561.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following:

SEC. . RESPONSIBILITIES OF THE SECRETARY OF THE DEPARTMENT OF ENERGY FOR MEDICAL AND ENVIRONMENTAL PROGRAMS IN THE REPUBLIC OF THE MARSHALL ISLANDS.

Effective on the date of enactment of this Act, all responsibilities of the Secretary of Energy for, and all activities currently underway at the Department of Energy with respect to, medical and environmental programs applicable in the Republic of the Marshall Islands shall be managed, controlled and conducted through the Office of Environment, Safety and Health of the Department of Energy.

Mr. JOHNSTON. Mr. President, this amendment is intended to transfer the Northern Marshall Islands program of

the Department of Energy's Defense Programs to the Office of Environment, Safety and Health [EH]. I am reluctant to support this transfer without a more complete review of its implications, and without the benefit of conclusions from the National Academy of Science's ongoing review of important program activities. However, my colleague from Ohio is commited to a decision on this issue at this time.

This amendment is not intended to suggest that any operational changes are needed in the existing program. It is merely a transfer to consolidate management responsibility for the health and epidemiologic related activities of the Department. It is also specifically not intended to cast any doubt on the scientific or medical findings of the current program.

The Marshall Islands program is a controversial program. It is responsible for monitoring the health and environment of the people and islands affected by United States' nuclear testing that occurred in the Northern Marshall Islands in the 1940's and 1950's.

Re-establishing trust between DOE and the People of the Marshall Islands has taken years of work by the personnel of this program. After these years of commitment, DOE's scientists and doctors have gained a significant measure of trust from many of the people of the Marshall Islands. In fact, it is fair to say that the DOE program personnel now have the confidence of the national government of the Republic of the Marshall Islands, and of the people of the nuclear affected atolls of Bikini and Enewetak. Thus, it is important that the transfer made by this amendment not disrupt the operations of this program nor damage the fragile goodwill that has been built. Significant shifts in policy direction of this program could not only threaten the effectiveness of this program, but could potentially threaten our relations with the Republic of the Marshall Islands.

I wrote to Secretary Watkins on May 23, 1990, seeking a delay in this transfer, which he initiated several weeks ago, to allow time to get his assurance that the personnel essential to the continuity of this program would not be replaced, nor would they have their activities disrupted. He wrote in reply that this was merely "management consolidation", and I appreciate his clarification.

I have followed this program and our relations with the Marshall Islands since coming to the Senate in 1972. For the past several years I have specifically guided the policy by langauge in the Energy and Water Appropriations legislation. I do not want to see those years of effort destroyed by a poorly considered transfer.

What my concern is, and why I think assurances regarding this transfer are needed, is that there are those who are seeking to disrupt our relations with the Marshall Islands, and are seeking to undermine the broad legal settlement reached between the Republic of the Marshall Islands and the United States on nuclear claims under the Compact of Free Association.

I was willing 5 years ago to question DOE's claims. Therefore, I supported a requirement in the Compact of Free Association Act that DOE's data be reviewed by an independent scientist. That scientist supported DOE's conclusions about the habitability of these islands. In fact, he has stated that, because of new methods and understanding, the best current estimate of the radiological dose is about half of what DOE calculated in 1982. This would be about 1.2 rem over 30 years, or less than one-quarter of the safety guideline of 5 rem.

Mr. President, I have become convinced that DOE is on the right track and believe that the people of the Marshall islands should thoughtfully consider these facts. These new findings also explain my interest in seeing that this amendment should not be interpreted as casting any doubt upon the DOE program, nor should it suggest that there is any need to alter any operational aspects of the program.

I wish to thank my colleague from Ohio, Senator GLENN, for his understanding of my concerns in this matter. I also want to thank my colleague on the Committee on Energy and Natural Resources, Senator MCCLURE, for contributing to this amendment.

I would like to engage my distinguished colleague from Ohio, Senator GLENN, in a colloquy.

Mr. GLENN. I would be happy to entertain such a colloquy.

Mr. JOHNSTON. Would the Senator from Ohio agree that the intent of this amendment respecting the Marshall Islands medical and environmental programs deals solely with the administrative process within the Department of Energy?

Mr. GLENN. I would agree. This amendment solely addresses the issue of management consolidation. What this means is that the management responsibility for the Marshall Islands medical and environmental programs will be exercised and managed through the Office of Environment, Safety and Health, which is what Secretary Watkins has already proposed.

Questions have been raised, and concerns expressed that Secretary Watkins' decision and this amendment, would lead to the substitution or replacement of the existing scientific and medical personnel, and support, provided by or through various DOE offices, and the national laboratories. This amendment is not intended to imply that the medical and environmental operation activities relating to the Marshall Islands should be altered, nor is it intended to be interpreted as an indication of any need for changes within the current program.

Mr. JOHNSTON. I thank the Senator from Ohio.

REPUBLIC OF THE MARSHALL ISLANDS

Mr. McCLURE. I would like to discuss the intent of the amendment we are proposing. Like the Senator, I believe that there is no reason to change in any way Department of Energy medical and environmental programs for the Marshall Islands. The present program management and the present program execution are sound. Notwithstanding this fact, the Secretary of Energy's overall reorganization of health and safety matters at the Department has swept the Marshall Islands programs along. There has been a change of management within DOE from the Office of Defense Programs to the Office of Environment, Safety and Health.

Mr. JOHNSTON. The Senator is correct. Our amendment will ensure that the activities currently underway with respect to the Marshall Islands will not be disrupted by this reoganization. Our amendment provides that the activities for the Marshall Islands formerly conducted through the Office of Defense programs will continue, with the only difference being that in the future these activities will be conducted through the Office of Environment, Safety and Health. The point of our amendment is to guarantee this continuity.

Mr. McCLURE. Exactly. The intent of this amendment is to preserve the credibility, expertise, and experience that has been acquired over years of work by DOE and its laboratory personnel with the Marshallese. It would be a tragedy if these hard-won assets were lost in a bureaucratic shuffle. I do not think this was the Secretary's intent in the reorganization, but this amendment eliminates the possibility of any bureaucratic mischief.

Mr. JOHNSTON. And it is important to retain this credibility and expertise and to use it in furtherance of these programs. There continues to be important work to do in these islands. There are complex scientific and social issues to resolve, and their resolution is well underway. Some would set up obstacles to resolving these issues, in some cases because they do not understand the science, and in others because they hope to profit from this misunderstanding. The Senator and I know that DOE's science is sound. This science has passed independent review and the test of the scientific marketplace.

Mr. McCLURE. Correct. That is no reason to doubt this science, which

39-059 O-91-21 (Pt. 16)

has passed the toughest peer review, that of the scientific community. Our amendment makes this quite clear. There is no dissatisfaction on my part with the conclusions DOE scientists have reached or with the way in which the Department has been carrying out its responsibilities to this time. There is no expectation of dissatisfaction for the future.

Mr. JOHNSTON. The Senator states my own views exactly.

Mr. DIXON. Mr. President, this is an amendment which has been cleared on both sides.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2561) was agreed to.

Mr. MCCAIN. I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2562

Mr. MCCAIN. Mr. President, I have an amendment at the desk. This amendment, on behalf of Senator GORE and Senator WARNER, has been accepted by both sides. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. MCCAIN], for Mr. GORE (for himself and Mr. WARNER), proposes an amendment numbered 2562.

Mr. MCCAIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26 strike lines 21 through 26, and on page 27 strike lines 1 through 3, and insert the following:

To the extent provided for in interagency agreements entered into between the Department of Defense and the Environmental Protection Agency, the Secretary of Defense shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Defense facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (42 U.S.C. 9620).

In addition, not withstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Defense facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Defense.

On page 380 strike lines 4-12 and insert the following:

To the extent provided for in interagency agreements entered into between the Department of Energy and the Environmental Protection Agency, the Secretary of Energy shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Energy facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (42 U.S.C. 9620).

In addition, not withstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Energy facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Energy.

Mr. LAUTENBERG. Mr. President, I rise in support of this amendment. The amendment addresses the need for the Departments of Defense and Energy to reimburse the Environmental Protection Agency [EPA] for its oversight costs at DOD and DOE National Priorities List [NPL] sites.

With 110 DOE and DOD NPL sites, the oversight task facing EPA is large. This task is in addition to EPA's duties at the 1101 non-Federal NPL sites. With limited funds in the Superfund trust fund, reimbursement by DOD and DOE will greatly aid EPA in implementing its Superfund mission.

This amendment requires such reimbursement and also requries that EPA have the reimbursable authority and staffing, the so-called FTE ceiling, to carry out these oversight activities.

Mr. President, the amendment provides for a fair sharing of the Superfund cleanup burden among the Federal agencies, and I urge its adoption.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2562) was agreed to.

Mr. MCCAIN. I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2563

(Purpose: to clarify the legislative intent of certain provisions of the National Defense Authorization Act for Fiscal Years 1990 and 1991)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. BINGAMAN (for himself and Mr. DOMENICI), proposes an amendment numbered 2563.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Immediately following section 804, insert the following new section:

SEC. 804a. OTHER TECHNOLOGY TRANSFER MATTERS.

Section 3133(d)(4) of Public Law 101-189 is hereby amended by adding a sentence at the conclusion thereof which shall read as follows:

"Such contract provisions or separate writing shall: (i) include only such provisions as are specifically required by paragraphs (1) and (2) of this subsection 3133(d), and such additional provisions as are deemed necessary by the head of the agency for the purpose of the implementation of this Act but which cannot be effected by the promulgation of regulations, the issuance of agency orders, or other similar administrative processes; (ii) not condition the entering into of cooperative research and development agreements upon the issuance of agency waivers to rights to inventions and intellectual property where such issuance is not required by section 12 of the Stevenson-Wydler Act of 1980; and (iii) not operate to discourage the exercise of rights pursuant to other statutes intended to foster technology transfer, such as the provisions of 35 U.S.C. 202 et seq.".

Mr. BINGAMAN. Mr. President, I rise tonight to offer an amendment critical to the implementation of extremely important provisions of last year's Defense bill—those sections which are now referred to as constituting the National Competitiveness Technology Transfer Act of 1989, the NCTTA.

The NCTTA was an attempt by the Congress to force agencies with Government-owned, contractor operated national defense laboratories to join, with some urgency, the rest of the Government in implementing an aggressive economic competitivness program involving technology transfer. In particular, the NCTTA was intended to end over a decade of Department of Energy resistance to technology transfer legislation and executive orders. In the 1980's, the Department relied liberally on the exceptional circumstances and weapons exceptions of the Bayh-Dole Act to prevent its laboratories from exercising rights in many circumstances under that act. The Department then apparently wrote itself an exemption for the President's Executive order of April 12, 1987, even though it is difficult to find any exemption or exception for the Department's activities. And throughout the decade of the 1980s, the Department resisted every effort of the Armed Services Committee to make technology transfer in our national defense laboratories.

But last year, hopes were high. In the NCTTA, the Armed Services Committee, together with the Energy Committee, representatives of the Department of Energy, and the relevant House committees, drafted what we thought was an end to the Department of Energy's finding excuses about why it could not get on with

technology transfer. Secretary Watkins was supportive of the legislation and was himself changing the mission of the Department in exactly the same direction.

The law was enacted in November 1989. The statute provided that the Department of Energy should draft what we thought would be a simple proposal for modifying the laboratories' operating contracts by April 1990, and then inform us in May 1990 as to the exact language of these modifications as finally negotiated with the labs. Surely, we thought, technology transfer work under cooperative research and development agreements would be well underway no later than June 1, 1990.

It is now after August 1. No laboratory contracts have been modified. The prospects for modifying the laboratories' contracts by September 1 are extremely dim. Laboratories have entered into preliminary discussions with industry about possible cooperative research and development agreements, but none can be submitted for Department review. Skepticism in industry about whether the Department of Energy will ever change its block, drag, and delay approach to technology transfer grows daily and will soon become hard-core cynicism.

What went wrong? First, in April, the Department of Energy produced a proposal for contract modifications which was nothing like the simple contract modification we contemplated. Their proposal turned out to be 11½ pages, single-spaced, of detailed, complex contract provisions, including issues not even mentioned in the NCTTA. The detail and the number of issues in the Department's proposal absolutely precluded a speedy conclusion to operating contract negotiations. Renegotiation of operating contracts only two or three times as long as DOE's proposal typically take 1 to 2 years to conclude.

Second, the Department apparently is trying to insist on consistency in negotiations of the contract modifications. That is, the Department demands that all of its labs agree to the same 11½ pages of changes to their very different contracts. This insistence only complicates and extends the negotiations exponentially.

Third, it seems that the field staff for the Department has little authority to negotiate. All substantial, significant proposals different from the DOE contract modification must be okayed at headquarters. Again, the inability of DOE's negotiators to negotiate only delays the day when these modifications can be agreed to.

Finally, many laboratories may be reluctant to sign the Department proposal because it conflicts directly with the language of the NCTTA and the conference report which accompanied passage of the act. On the one hand, the Department is conditioning the submitting of cooperative research and development agreements on the issuance of class waivers to department rights in inventions and intellectually property, whereas the NCTTA, pursuant to negotiations with Department representatives explicitly on this issue, clearly requires no such waivers. And on the other hand, the DOE proposal discourages the exercise of laboratory rights under Bayh-Dole by refusing to reimburse any costs associated with that exercise, even though the conference report made clear that the NCTTA was intended to encourage technology transfer using all existing legal mechanisms.

The proposed amendment is designed to make a mid-course correction to bring the Department's implemention effort back to the legislative intent of the NCTTA. It mandates a simple contract modification, but allows the Secretary to include provisions which address problems which cannot be solved through other available administrative procedures. It makes clear that no class waivers are required. Finally, it prohibits the creation of disincentives for laboratories to exercise rights under other statutes also intended to foster technology transfer.

It is my hope, Mr. President, that by the time we conclude our conference with the House on this bill, my amendment will be unnecessary. It is possible that between now and that time, the Secretary of Energy will take steps which will dramatically speed up the contract modification negotiations. But we have a responsibility to maintain a healthy skepticism at this point. And we must be ready to mandate the changes required, if the Department fails to do so on its own. For these reasons, I urge adoption of the amendment.

Mr. President, I yield the floor.

Mr. DIXON. Mr. President, this is an amendment by the distinguished Senator from New Mexico [Mr. BINGAMAN] to clarify DOE National Laboratory agreements with the Department of Energy. The jurisdictional subcommittee is the Armed Services Committee. It has been agreed to.

Mr. McCAIN. Mr. President this amendment is supported by this side.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 2563) was agreed to.

Mr. DIXON. I move to reconsider the vote.

Mr. McCAIN. I move to lay that motion on the table.

the motion to lay on the table was agreed to.

AMENDMENT NO. 2564

(Purpose: To enhance the use of the Department of Energy facilities so as to improve the Nation's competitive posture, and for other purposes)

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] proposes an amendment numbered 2564.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Insert at the appropriate place the following:

SEC. . DEPARTMENT OF ENERGY SCIENCE AND EDUCATION PROGRAMS.

(A) SHORT TITLE.

This section may be cited as the "Department of Energy Science and Education Enhancement Act".

(B) FINDINGS.

The Congress finds that—

(1) scientific, technical, and engineering competence is essential to the Nation's future well being;

(2) the scientific, technical, and engineering capability at the Federal laboratories is unmatched throughout the world;

(3) superb research, development, testing, and evaluation occurs in Department laboratories;

(4) Department laboratories will play an increasing role in assuring that America remains competitive in world markets;

(5) improvements in mathematics, science, and engineering education are needed desperately to provide the trained and educated citizenry essential to the future competitiveness of the United States;

(6) greater effort and funding must be devoted to technology transfer from Department laboratories;

(7) the ability of the Nation to fight disease and overcome human suffering can be greatly enhanced by fully utilizing the health research resources of the Department; and

(8) Department laboratories are in a unique position to take on increased responsibilities in the interest of improving our Nation's competitiveness and our quality of life.

(C) DEFINITIONS.

For the purposes of this Act—

(1) the term "Secretary" means the Secretary of Energy; and

(2) the term "Department" means the Department of Energy.

(D) MISSION.

Section 91(a) of the Atomic Energy Act of 1954 (42 U.S.C. 2121(a)) is amended by adding at the end the following new paragraph:

"(6) use the facilities, equipment, personnel, and other resources of the Department of Energy to the fullest extent possible to enhance educational opportunities in science, mathematics, and engineering for American students and educators so as to improve the scientific literacy and competitiveness of the Nation.".

(E) SCIENCE AND EDUCATION PROGRAMS.

(a) IN GENERAL.—(a) To the extent appropriate, the Secretary may establish programs, to be operated at or through the support of each Department facility, that will use fully the unique scientific resources of the Department to promote—

(1)(A) transfers of federally owned or originated technology to State and local governments, private industry, and universities or other nonprofit organizations so that the prospects for commercialization of such technology are enhanced;

(B) activities enhancing the quality of mathematics, science, and engineering education throughout the Nation, so as to improve the scientific and technical capability and literacy of the Nation and improve the Nation's overall educational capability; and

(C) research, development, and other activities intended to enhance the health and quality of life of the Nation, particularly in areas that pertain to environmental improvement and biomedical research.

(b)(1) The programs described in paragraph (a) shall supplement and be coordinated with current activities of the Department, but shall not supplant them.

(2)(A) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise made available to the Department of Energy for fiscal year 1991, an amount up to the amount described in subparagraph (B) may be made available to a Department of Energy laboratory for the purpose of paragraph (1).

(B) The amount referred to in subparagraph (A) is 10 percent of the amount made available to such laboratory by the Department of Energy in fiscal year 1990.

(F) TECHNOLOGY DEVELOPMENT PROGRAM.

(1) ESTABLISHMENT OF PROGRAM.—(a) The Secretary shall establish a program to develop Department-originated technologies, directed at the stage of technology development beyond the basic research stage.

(b) The program established pursuant to paragraph (a) shall develop technologies, determined by the Secretary to have significant promise for commercial and public benefit to the Nation, to a point where private industry will undertake further scientific and commercial development.

(c)(1) The program established pursuant to paragraph (a) may be conducted at any Department facility and shall enhance the commercial development and transfer to private industry of Department-originated technologies, consistent with the technology transfer mission of the Department.

(2) As a condition for supporting specific projects, the Secretary may require a private sector commitment to future, wholly non-Federal funding of commercial development of particular technologies.

(3) Establishment of the program described in paragraph (a) shall not preclude the Department or its facilities from continuing operation or support of other programs to advance technology development, but all of the technology development programs of the Department shall be coordinated.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(G) LABORATORY COOPERATIVE SCIENCE CENTERS.

(a) IN GENERAL.—The Secretary of Energy may establish Laboratory Cooperative Science Centers (referred to as the "Centers") as national laboratories operating under the authority of the Department of Energy.

(2) FUNCTION.—The Center shall coordinate both laboratory based and offsite programs designed to advance the purposes of this Act.

(3) ACTIVITIES.—The activities of the Center shall include—

(a) supporting semester-length research appointments for college and university science and engineering students, and faculty/students teams, at the Centers;

(b) supporting research appointments for high school science teachers at the Centers;

(c) supporting research apprenticeship appointments at the Centers for students uderrepresented in science and technology careers;

(d) supporting research experience programs at the Centers for nationally selected high school honor students;

(e) supporting cost-shared projects to encourage more students to pursue careers in precollege science and mathematics teaching;

(f) participating in collaborative projects with other Federal agencies and the private sector to further the objectives of this Act;

(g) operating precollege mathematics and science education programs at the national laboratories;

(h) establishing a museum-based science education program;

(i) establishing collaborative inner-city and rural partnership programs designed to meet the special mathematics and science education needs of students in inner-city and rural areas; and

(j) engaged in other activities to advance the purposes of this Act.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(H) UNIVERSITY-BASED PROGRAMS.

(1) IN GENERAL.—The Secretary may coordinate and sponsor university-based programs directed at encouraging more students to pursue energy-related scientific and technical careers, with a particular focus on the recruitment of women and minority students.

(2) PREFRESHMAN ENGINEERING PROGRAM.—The programs referred to in subsection (a) shall include a prefreshman engineering program in which middle school students attend summer workshops on mathematics, science, and engineering conducted by universities on their campuses.

(3) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

Mr. DOMENICI. Mr. President, I rise to offer an amendment to help enable DOE to use the full benefit of its tremendous resources to the benefit of the Nation.

I introduced this legislation a few weeks ago as S. 2856, the Department of Energy Science and Education Enhancement Act.

This bill takes modest steps to expand the mission and authorities of the Department, enabling it to respond to critical national needs in three areas: Math, science, and engineering education; technology transfers and economic competitiveness; and environment and health.

Our Nation has a critical need for a more scientifically literate citizenry, and high-quality stock of scientists and engineers—but we are getting neither.

The defense efforts of our DOE national labs has not only functioned to "keep the peace" for many years, but have also developed tremendous scientific capabilities that have applications in many areas.

We need to take advantage of tremendous existing resources—like those of the Department of Energy and its labs—and enable them to become highly constructive parts of our educational systems.

Secretary Watkins recognizes the importance of this issue to his department, as well as the resource his department could be for the Nation.

Secretary Watkins has put forth an excellent vision of how the DOE labs can provide assistance beyond its predominant defense and energy security missions.

Secretary Watkins worked on this legislation with me and supports this bill.

This amendment does five things. First, it expands upon the basic mission of DOE, directing DOE to use its resources to the fullest extent possible to improve American scientific education.

Second, it also directs DOE to establish specific programs to promote technology transfer, math and science education, and environment and health activities.

Third, it establishes a technology development program to move DOE technology beyond the basic research stage to a point of commercial viability.

Fourth, this amendment authorizes laboratory cooperative science centers at the DOE, which will enable the labs to operate creative, lab-based education programs for students.

Last, it authorizes university-based programs to encourage students to pursue energy-related science careers.

Mr. President, as our world changes and the need declines for the kind of defense research several DOE labs provide, we should not rush to dismantle the tremendous scientific resources at these labs that are vitally important to so many other national interests.

Which are in New Mexico we have Sandia and Los Alamos National Laboratories, both of world leaders in such non-defense areas as specialty metals, semiconductors, superconductivity, human gene mapping, and environmental improvement.

These labs are beginning to operate aggressive technology transfer and math, science and engineering education assistance programs.

The education programs include precollege, undergraduate, and graduate school programs for students, teachers, and researchers.

Among the more exciting are a rural teacher training program for predominantly Hispanic middle-school teachers, and a science consultant program for Native American schools.

My amendment will give the Department of Energy and its labs the proper authority, focus, and flexibility to make these efforts, and future programs, work and fit the capabilities of the labs.

With this amendment, we will be far better able to harness the full potential of the Department of Energy to enhance the scientific capability of the Nation.

Mr. President, this is an amendment that will enhance the educational potential of the national laboratories. It has been approved by the managers on both sides and subcommittee chairmen on both sides.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2564) was agreed to.

Mr. McCAIN. I move to reconsider the vote.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS NO. 2565

Mr. McCAIN. Mr. President, I have a block of amendments on military construction. I ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Arizona [Mr. McCAIN] proposes amendments en bloc numbered 2565.

Mr. McCAIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:0

On page 302, line 19, strike out "$175,947,000" and insert in lieu thereof "$177,323,000".

On page 302, line 19, add $3,417,000 to the number shown.

On page 302, line 25, add $2,480,000 to the number shown.

On page 302, line 19, add $11,900,000 to the number shown.

On page 256, line 6, strike $5,600,000 and insert in lieu thereof, $13,900,000.

On page 260, line 3, add $8,300,000 to the number shown.

On page 260, line 6, add $8,300,000 to the number shown.

On page 260, line 6, after the period, add: *"Provided*, That the expenditure of the construction funds for a school at Fort Wainwright, Alaska are hereby restricted contingent upon agreement from the local education agency to accept ownership for said facility constructed with said funds."

On page 302, line 19, add $5,400,000 to the number shown.

On page 332, beginning with line 21, strike out all down through line 2 on page 338 and insert in lieu thereof the following:

SEC. 2823. TRANSFER OF LANDS TO SECRETARY OF AGRICULTURE.

(a) TRANSFER.—Notwithstanding any other provision of law and subject to subsections (b) through (d), the Secretary of the Army shall transfer administrative jurisdiction of approximately 16,707 acres of land at the Pinon Canyon Maneuver Site, Colorado, consisting of all parcels of land identified by the Secretary of the Army as uneconomic remnant lands, to the Secretary of Agriculture for inclusion in the Comanche National Grassland. The Secretary of Agriculture shall administer the transferred lands in accordance with laws applicable to the National Forest system.

(b) DESCRIPTION OF THE PROPERTY.—(1) The exact acreage and legal description of the property to be transferred under this section shall be determined by surveys satisfactory to the Secretary of the Army and the Secretary of Agriculture.

(2) The Secretary of Agriculture, with the concurrence of the Secretary of the Army, shall prepare a map of the lands to be conveyed. These lands shall be known as the Picket Wire Canyonlands (hereafter in this section referred to as the "PWC").

(3) The legal description and map referred to in paragraphs (1) and (2) shall be kept on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION OF LANDS.—(1) The Secretary of Agriculture shall administer the transferred lands so as to conserve and protect the paleontological, archeological, wildlife, vegetative, aquatic, and other natural resources of the area.

(2) The management provisions of this section shall apply only to those parcels of the transferred lands comprising approximately 11,507 acres in the Purgatoire River Canyon.

(3) The Secretary of Agriculture may permit access to the PWC for the purpose of permiting scholarly research, interpretation to the public, and recreational activities to the extent that such access does not—

(A) impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the area is intended to be used by the Army; or

(B) impair the conservation and protection of paleontological, archeological, or natural resources of the area.

(4) The Secretary of Agriculture may permit livestock grazing in the PWC only to the extent that the Secretary determines necessary to benefit the natural resources of the area.

(5) Lands of the PWC are withdrawn from operation of the mining, mineral leasing, and other mineral entry laws of the United States.

(6) No activity shall be permitted in the PWC that would impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the site is intended to be used by the Army or the conservation and protection of the paleontological, archeological, and natural resources of the area, including production of or exploration for oil, gas, or minerals of any kind.

(7) Lands to be transferred may not be used for the storage or processing of nuclear waste, other hazardous waste, or any other waste.

(8) The Secretary of Agriculture, in consultation with the Director of the National Park Service, the Director of United States Fish and Wildlife Service, the Secretary of the Army, the head of the Colorado Department of Natural Resources, and the head of the Colorado State Historic Preservation Office, shall, after notice and opportunity for public comment, develop a management plan for the PWC that includes—

(A) a complete survey and an inventory of the paleontological and archeological resources of the area; and

(B) a strategy for protecting and conserving the dinosaur trackway in the Purgatoire River Canyon and other paleontological and archeological resources in the PWC.

(d) INTERAGENCY AGREEMENT.—(1) When the lands referred to in subsection (a) are transferred, the Secretary of the Army and the Secretary of Agriculture shall enter into an interagency agreement providing for—

(A) access to the PWC through the Pinon Canyon Maneuver Site for the Secretary of Agriculture (for the purpose of taking action to conserve and protect the area's resources) and the public (for educational purposes) in such manner, at such times, and to such an extent as will not interfere (as determined by the Secretary of the Army) with the Army's use of the site; and

(B) cooperation between the Army and the Forest Service in the protection and conservation of the paleontological, archeological, and natural resources in the PWC.

(2) In determining whether the manner, time, and extent of access through the Pinon Canyon Maneuver Site for a particular purpose will constitute interference with the Army's use of the site for the purpose of paragraph (1)(B), the Secretary of the Army shall—

(A) with respect to access by the Secretary of Agriculture for management purposes, take into consideration that the high importance of protecting and conserving the resources of the PWC may justify the imposition of some inconvenience to the Army, so long as the inconvenience does not prevent the Army from accomplishing its purposes on the Pinon Canyon Maneuver Site; and

(B) with respect to access by the public, take into consideration comments solicited from the public by the Secretary of Agriculture concerning the need for and the kind of access that should be provided.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Department of Agriculture such sums as are necessary to carry out this section, including such sums as are necessary to pay for—

(1) a study of the paleontological resources of the PWC and action to prevent erosion of the dinosaur track way;

(2) a complete cadastral survey of the PWC; and

(3) an archaeological, paleontological, and historical survey of the PWC.

RIEGLE/PELL DEFENSE ECONOMIC AJDUSTMENT AMENDMENT

Mr. RIEGLE. Mr. President, on May 3, 1990, Majority Leader MITCHELL announced the appointment of a Senate Democratic Task Force on the U.S. Economy in the 1990's: Defense adjustment and productivity growth. The task force has been instructed to review the effect of declining defense spending and increasing global compe-

tition on the U.S. economy and to recommend to the Democratic conference policies to expand and strengthen our economy as we begin the new decade.

On August 3, 1990, an initial report was transmitted to the majority leader containing the task force's recommendations on the topic of defense adjustment: Easing the economic and social adjustment to lower defense spending. This report reflects a consensus within the task force, which includes Senators PELL, ADAMS, BENTSEN, BINGAMAN, BOREN, CONRAD, EXON, HOLLINGS, KENNEDY, LEVIN, NUNN, SHELBY, and WIRTH as members.

The amendment we are now offering incorporates the recommendations of the task force.

The task force found that because defense spending is not distributed evenly across the economy, the magnitude of the adjustment problem caused by major defense cuts should not be gauged purely in national or macroeconomic terms. Certain regions and communities within such regions depend disproportionately on military activities for their livelihood and economic stability. They are likely to bear the brunt of any defense adjustment. For this reason, the task force believes it is important to address the regional and local economic dislocation caused by any significant program of defense cuts.

Almost every week there are reports of major layoffs due to defense cutbacks. To illustrate, the August 3 edition of Wall Street Journal reports that 4,000 jobs will be eliminated by United Technologies over the next 3 years. Last week, McDonnell Douglas announced plans to layoff 17,000 workers. The list goes on. These layoffs are not evenly distributed across the country, they are concentrated in certain communities in Connecticut, Missouri, and other States.

The task force found that providing for an orderly transition in these concentrated pockets of dislocation is not only humane and just social policy, but also sound economic policy. The smoother the transition of these communities, the more efficient is the deployment of our economy's most valuable resource—our people.

The major features of the amendment are as follows:

First. Adequate warning: Successful adjustment to economic dislocation requires sufficient advance warning. Accordingly, the amendment requires the administration to identify and notify communities likely to be affected by defense budget cuts either proposed in the President's budget or enacted into law by Congress. The criteria for determining which communities receive notification are already in the pending Armed Services Committee bill: Job loss of 2,500—urban communities, 1,000—rural communities—or 1 percent of the work force, whichever is less.

Second. Community planning assistance: The amendment provides financial assistance from the Office of Economic Adjustment in the Pentagon to communities to help them plan to diversify their economic bases away from dependence on military.

Third. Small business planning assistance: The amendment provides financial assistance from the Small Business Administration to small businesses which have high degree of reliance upon military business to help them diversify into commercial activities.

Fourth. Community adjustment assistance: The amendment provides Economic Development Administration [EDA] assistance to help communities implement plans to diversify their economic bases—public works improvement, customized retraining programs, loan guarantees, other incentives for business development.

Fifth. Worker adjustment assistance: The amendment provides retraining, job placement and relocation assistance through the Job Training Partnership Act Employment Services to workers dislocated by defense cuts.

Sixth. Increased funding: The amendment provides increased funding for these existing programs by the amount of claims related to the defense adjustments. The Congressional Budget Office is unable at this time to produce a cost estimate because that would depend on the shape of the defense budget legislation that is ultimately enacted into law—something that no one can predict with certainty at this point. Nonetheless, a credible, independent source, the Defense budget project, has recently estimated costs to be in the range of $200 million per year as follows:

[In millions of dollars]

JTPA (worker retraining, relocation)	160
Employment Services (job placement)	8
EDA (community adjustment assistance)	31
SBA (small business planning—no estimate)	x
Total (approximately)	200

In authorizing higher assistance for these programs, we strongly believe that funding in fiscal year 1991 and future years should increase by amounts in this range.

Seventh. Coordinated budget planning and delivery of assistance: The amendment directs the President through an existing interagency council—President's Economic Adjustment Council--to use Department of Defense projections of the number of impacted communities and associated job loss to adjust budget requests for JTPA, SBA, EDA etc. to the extent of anticipated increases in claims related to defense.

Eighth. Accountability: The amendment directs the President to include in the annual budget submission to Congress a report on the extent of adjustments made to the budgets of these agencies and a list of notified communities.

At this time, I ask unanimous consent to print in the RECORD a copy of the task force's report and summary of recommendations to the majority leader.

I urge my colleagues to support this important amendment.

There being no objection the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, August 3, 1990.

Hon. GEORGE J. MITCHELL,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR GEORGE: On May 3, 1990, you announced the appointment of a Senate Democratic Task Force on the U.S. Economy in the 1990s: Defense Adjustment and Productivity Growth. The Task Force has been instructed to review the effect of declining defense spending and increasing global competition on the U.S. economy and to recommend to the Democratic Conference policies to expand and strengthen our economy as we begin the new decade. We are pleased to transmit herewith an initial report containing the Task Force's recommendations on the topic of Defense Adjustment: easing the economic and social adjustment to lower defense spending.

During the past 40 years, Americans have invested more than their chief economic competitors in national security. This investment has paid a handsome return for U.S. foreign policy, but it has also contributed to the decline of our relative economic strength. Higher investment in defense has been accompanied by the devotion of fewer capital, technological and human resources to the performance of the civilian economy.

The United States now has a golden opportunity to consolidate its victory in the global political competition by tending to its eroding position in the global economic competition. Economic strength is increasingly the currency of global influence and leadership. Indeed, it is what propelled the United States into its leading role in the early years of this century. Whether there will be a second American Century is also likely to be determined by our relative economic performance.

For this reason, the thaw of the Cold War makes a strategic review of economic policy every bit as important as a strategic review of national security and foreign policy. The United States would benefit by having a coherent national strategy for managing the transition and capitalizing upon the economic opportunity represented by the prospect of significantly less defense spending. To this end, the Task Force on the U.S. Economy in the 1990s is engaged in a comprehensive review of U.S. economic policy and intends to issue policy recommendations designed to: 1) facilitate our economic and social adjustment to lower defense spending; and 2) raise our rate of productivity growth—the ultimate determinant of our standard of living and international competitiveness.

This initial report of the Task Force's recommendations in the area of Defense Ad-

justment represents the consensus view of the Task Force membership and reflects consultations with a broad range of experts and constituencies in meetings and public hearing testimony. The Task Force drew in particular upon the work of Senator Pell, whose legislation, S. 2097, served to focus the Task Force's work. It also benefited from consultations with Senator Lieberman, who recently introduced legislation in this area. Later this year, the Task Force plans to issue recommendations in four other areas related to the economy's productivity growth performance (Capital Formation, Technology, Human Infrastructure and Physical Infrastructure).

EXPLANATION OF DEFENSE ADJUSTMENT RECOMMENDATIONS

In its deliberations, the Task Force was mindful that the major pending defense budget proposals offered by the Administration, Senate Armed Services Committee and House Budget Committee indicate that real annual defense spending reductions will range from 2% to 5% over the next several years. Based on this range of estimates, defense spending as a share of GNP is likely to fall to between 4.2% and 3.5% of GNP by 1995. It has already fallen from a high of 6.5% in FY 1986 to approximately 5.5% in FY 1990, suggesting that, by one measure, over a third of the defense adjustment may have already taken place.

A defense adjustment of this magnitude would be smaller than the three others the U.S. has experienced since World War II. The Defense Budget Project estimates that cuts of 5% per year in real terms would represent only a 0.27% drop in national employment from 1989 levels. Few believe that, by itself, a program of defense cuts in this range would have a significant direct effect upon macroeconomic stability and growth. Nevertheless, the defense adjustment has important implications for economic policy for two reasons.

First, the defense adjustment's impact on macroeconomic growth and stability ought not to be considered in isolation from other factors affecting economic stability, including developments in fiscal and monetary policy as well as changes in domestic and world economic conditions. Specifically, major fiscal deficit reduction (beyond anticipated defense cuts) and a slowing economy could serve to magnify the influence of major defense spending cuts in the direction of the economy. While careful management of the resources freed by the defense adjustment has the potential to help reduce these threats to economic growth and stability, capitalizing upon this potential will require, first, a fresh inventory of the economic challenges facing the nation and the policy responses now at its disposal; and second, a deliberate effort to set policy priorities for the use of all available economic resources. The Task Force is currently conducting this exercise and plans to issue its recommendations in a later report.

Second, because defense spending is not distributed evenly across the economy, the magnitude of the adjustment problem caused by major defense cuts should not be gauged purely in national or macroeconomic terms. Certain regions and communities within such regions depend disproportionately on military activities for their livelihood and economic stability. They are likely to bear the brunt of any defense adjustment. For this reason, the Task Force believes it is important to address the regional and local economic dislocation caused by any significant program of defense cuts. Accordingly, this initial report focusses on the federal government's responsibility and role in facilitating an orderly transition to lower defense spending especially within such regions and communities.

During this century, the federal government has assumed growing responsibility for helping to moderate the hardships of economic dislocation. Such involvement is particularly appropriate when the government itself is the cause of dislocation. Individuals, families and communities responsible for supporting the nation's security over the years deserve their government's cooperation and assistance in securing an orderly transition. The Task Force believes that providing for an orderly transition is not only humane and just social policy; it is also sound economic policy. The smoother the transition, the more productive is the deployment of our economy's most precious resource—our people.

Specifically, the Task Force recommends that the federal government assume five primary responsibilities. In fulfilling these responsibilities, existing programs and administrative mechanisms should be used whenever possible in order to avoid duplication and bureaucratic waste. There should be sufficient flexibility to permit assistance to be tailored to suit local conditions. However, abuse of such flexibility to ignore the legitimate needs of eligible communities, workers and small businesses must not be permitted.

(1) ADEQUATE WARNING

Adequate warning of impending dislocation is essential to successful economic adjustment strategies. Since the government is the source of defense-related dislocation, it should be in a position to identify and notify communities likely to be disproportionately affected by defense cuts. But while the Office of Economic Adjustment (OEA) in the Department of Defense presently is capable of providing this information on base closures, it often lacks adequate information to anticipate the accumulated impact of production cutbacks on communities. The Task Force believes that the development of a database to provide information on the prime and subcontractor production base for major weapon systems is a prerequisite to an adequate system of advance warning. For this reason, the Task Force endorses and urges adequate funding for the systematic and continuous database on the nation's defense industrial base mandated by the Defense Production Act Amendments of 1990, as reported by the Senate Banking Committee on May 24, 1990.

The Task Force recommends that the responsibility for identifying and notifying communities be exercised by the Office of Economic Adjustment of the Department of Defense, based on the job loss criteria included in the Department of Defense FY 1991 Authorization bill reported by the Senate Armed Services Committee on July 20, 1990. These criteria would require notification of communities likely to experience defense-related job losses of 2,500 for urban areas, 1,000 for rural areas or 1% of the local workforce, whichever is less. Using its database on the defense industrial base, OEA should identify communities likely to experience this degree of defense-related dislocation based on (1) the president's annual budget proposal to Congress; and (2) enactment of major defense budget legislation.

(2) Planning assistance for communities and small businesses

Careful planning before the onset of dislocation can moderate and even obviate the costs of dislocation. For this reason, the Task Force recommends that planning assistance be provided by OEA to all eligible notified communities (as well as others which may apply to OEA and appear likely to receive notification) and by the Small Business Administration (SBA) to all eligible defense-related small businesses. Communities should be encouraged to develop plans to diversify their economic bases as early as possible in order to limit the impact of defense-related dislocation in their area. Small businesses should be eligible for planning assistance if they offer a bona fide diversification proposal indicating how they would use such assistance and if they derive a significant proportion of their total revenues from the direct or indirect sale of goods or services to the military.

(3) ADJUSTMENT ASSISTANCE FOR COMMUNITIES AND WORKERS

In the absence of careful planning and follow-up action to diversify their economic bases, communities experiencing dislocation as a result of defense cuts may face the prospect of disintegration. Without alternative job opportunities, many workers and their families will have little choice but tu uproot themselves. People are not as mobile as and should not be treated like financial assets; there are real human, social and economic costs to the disintegration of communities. While a certain amount of relocation is to be expected in defense-related communities, the Task Force recommends that the federal government provide adjustment assistance to communities which help themselves by taking advantage of advance notification and planning assistance to develop concrete plans to diversify their economic bases.

The Economic Development Administration (EDA), which presently possesses the necessary tools, but not sufficient resources, should be responsible for providing adequate assistance to such communities. EDA assistance authorized by Title IX of the Public Works and Development Act of 1965 includes grants and loan guarantees for technical assistance, relocation of businesses and individuals, infrastructure improvements, business development, customized training programs, etc.

Similarly, the Department of Labor, through Title III of the Job Training Partnership Act (JTPA) and the Employment Services (ES) program, has the necessary programmatic tools, but not sufficient resources, to assist workers dislocated from defense-related occupations. Eligible dislocated workers should be provided with adequate retraining, placement and relocation assistance, and unemployment compensation through these existing programs.

(4) Funding

Although the Task Force finds that the federal government possesses the necessary program authority to provide community, worker and small business planning and adjustment assistance, these programs are not funded adequately to accomodate defense adjustment needs without compromising assistance for dislocation unrelated to the defense adjustment. The Task Force's recommendation to utilize existing programs is not intended to displace federal support for non-defense adjustment. The Task Force recommends that funding for OEA, EDA,

JTPA, ES, and SBA be increased to the full extent of defense-related claims on such programs and that such increased funding be considered a cost element in reducing the nation's defense activities. Substantial defense cuts should therefore be accompanied by increases in funding for these programs to the extent of increases in defense-related claims. The Task Force notes that the Defense Budget Project has recently estimated that such increases could be in the neighborhood of $200 million for FY 1991.

For this reason, the Task Force recommends that the President's Economic Adjustment Committee be directed to coordinate increases to Administration budget requests for OEA, EDA, JTPA, ES, and SBA in response to projections of dislocation made by OEA as a result of its analysis of the president's annual defense budget and relevant Acts of Congress. The Committee is chaired by the Secretary of Defense and consists, among others, of the heads of each of these agencies as well as the Director of the Office of Management and Budget.

(5) Accountability

The federal government has important responsibilities in connection with helping our defense workforce to secure an orderly transition to significantly lower levels of defense spending. The seriousness of these responsibilities requires that government be fully accountable to the public for its activities. Such accountability is made more critical by the placement of defense adjustment assistance functions in existing programs having numerous other activities and responsibilities.

For this reason, the Task Force recommends that the President be directed to report on the activities of his Economic Adjustment Committee in his annual budget proposal to Congress. Such report should include a list of communities identified as qualifying or likely to qualify for notification as well as the amount of corresponding increases made to budget requests for OEA, EDA, JTPA, ES, and SBA.

In addition, the Task Force wishes to acknowledge and endorse relevant and complementary elements of two pending bills. The FY 1991 Department of Defense Authorization bill reported on July 20, 1990 by the Senate Armed Services Committee provides adjustment assistance for military personnel, continued support for strong defense R & D with increased support for development of commercial technology, and an expanded scope and funding level for community planning assistance. Further, the Defense Production Act Amendments of 1990, reported by the Senate Banking Committee on May 24, 1990, include provisions to improve information on the defense industrial base and boost support for the development of critical technologies under certain circumstances.

Finally, the Task Force wishes to identify certain areas not addressed in this initial report which are important to a smooth transition for the defense-related workforce. First, the Task Force believes that the present system of health insurance coverage hinders smooth adjustment to economic dislocation, whether caused by defense cuts or otherwise. Expanding access to health care should be a national priority. The Task Force wishes to acknowledge the efforts of the Senate Working Group on Universal Access to Health Care, which is an attempt to develop a consensus approach to the problem of access to care by the uninsured. Second, the nation's worker training and employment services programs are in need of better coordination and greater resources. The Task Force is reviewing policy options and hopes to make recommendations in this area in the context of its report on Human Infrastructure policy at a later date. Third, in order to maintain its industrial prowess and standard of living while substantially reducing military production, the Task Force believes the United States must improve its performance in the area of commercial technology development and innovation. Again, the Task Force plans to issue comprehensive recommendations on this topic at a later date.

It is our hope that the foregoing initial report and attached summary of recommendations will be of benefit to the Democratic Conference. We thank you for your support and look forward to continuing to work with you on issues vital to our Nation's economic well-being and world standing.

Sincerely,

Don Riegle, Chairman; Edward M. Kennedy, Jim Wirth, Richard Shelby, James Exon, Jeff Bingaman, Sam Nunn, Claiborne Pell, Kent Conrad, Carl Levin, Lloyd Bentsen, Brock Adams, David L. Boren.

TASK FORCE ON THE U.S. ECONOMY IN THE 1990'S: DEFENSE ADJUSTMENT—SUMMARY OF RECOMMENDATIONS

I. EXECUTIVE BRANCH COORDINATION

A. The Task Force recommends that the existing President's Economic Adjustment Committee be directed to do the following:

(1) Notification: Through the Office of Economic Adjustment (OEA) in Department of Defense, identify and notify communities (and corresponding states) likely to be affected by defense spending cuts either proposed in the president's annual budget submission to Congress or enacted into law by Act of Congress. In determining which communities are to be notified, OEA should apply eligibility criteria proposed in the pending Senate Armed Services Defense Authorization bill, namely job loss of 2500 (urban), 1000 (rural) or 1% of total workforce, whichever is less;

(2) Coordination of Funding: Coordinate budget planning for adjustment assistance to communities and workers and businesses through the Economic Development Administration (EDA), Department of Labor (DOL) and Small Business Administration (SBA), respectively. Specifically, OEA projections of the impact of the President's defense budget proposal on communities and small businesses should be integrated into the process of developing the Administration's annual budget proposals for EDA, the Job Training Partnership Act (JTPA) and Employment Services (ES) programs and SBA; and

(3) Coordination of Assistance: Coordinate delivery of adjustment assistance to communities, businesses and workers through OEA, EDA, the Department of Labor and SBA.

B. The Task Force recommends that the President be directed to discuss such activities of the Economic Adjustment Committee in his annual budget proposal to Congress. Such discussion should include a list of communities identified as qualifying or likely to qualify for notification as well as the amount of corresponding adjusments made to budget requests for EDA, JTPA, ES and SBA.

II. COMMUNITY PLANNING ASSISTANCE

The Task Force recommends that the Office of Economic Adjustment in the Department of Defense be directed to provide grants to communities for the purpose of planning the diversification of their economic bases. Communities notified by OEA would be eligible for such grants. Alternatively, they should be eligible to apply for such grants before receiving formal notification. Both OEA's notification of affected communities and the delivery of planning and adjustment assistance should be coordinated with the affected state agencies.

III. COMMUNITY ADJUSTMENT ASSISTANCE

The Task Force recommends that the full range of adjustment assistance available under Title IX of the Public Works and Economic Development Act of 1965 be made available to communities notified by OEA. Assistance authorized by Title IX includes grants and loan guarantees for technical assistance, relocation of businesses and individuals, infrastructure improvement, business development, customized retraining programs, etc. Title IX is administered by the Economic Development Administration.

IV. WORKER ADJUSTMENT ASSISTANCE

The Task Force recommends that dislocated worker assistance benefits under the Job Training Partnership Act and Employment Services programs be made fully available to dislocated defense workers. Funding for these programs should be increased to reflect the extent of such defense-related dislocation.

IV. SMALL BUSINESS ASSISTANCE

The Task Force recommends that assistance be made available defense-related small businesses (including subcontractors) to help them develop business plans for diverisfication into commercial activities. To be eligible for assistance a company should be required to include in its application a preliminary diversification proposal. Assistance would be administered by the Small Business Administration. Small businesses for whom the sale of goods or services directly or indirectly to the military constituted a significant proportion of total revenues should be eligible for assistance.

V. FUNDING

Funding for all planning and adjustment assistance should be considered as a cost element in reducing defense activities. Defense spending reductions should be reflected by the Administration in adjustments to the budgets of OEA, EDA, JTPA, ES and SBA to the extent necessary to fund defense-related community, worker and small business planning and adjustment assistance and to prevent the displacement of funding for non-defense-related dislocaton. The Task Force notes that the Defense Budget Project has recently estimated that such adjustments could require increased funding in the neighborhood of $200 million in FY 1991.

VI. Other

A Related Legislation

(1) DOD Authorization Bill—The Task Force endorses those elements of the DOD Authorization bill (adjustment benefits for military personnel; continued support for strong defense R&D with increased support for development of commercial technology; and an expanded scope and funding level for community planning assistance) which help to facilitate the nation's defense adjustment.

(2) Defense Production Act Admendments—The Task Force erndorses those elements of the Defense Production Act amendments of 1990 (increased information

on defense industrial base, increased support for crittical defense and dual-use technologies) which help to facilitate the nation's defense adjustment.

B. Need for longer-term initiatives

The Task Force wishes to underscore the need for longer-term initiatives in three areas relating to the nation's capacity to undergo a smooth transition to significantly less defense spending.

(1) Health insurance coverage;

(2) Dislocated worker assistance programs; and

(3) Employment services

The Task Force intends to issue recommendations on dislocated worker assistance and employment services at a later date.

Mr. MITCHELL. Mr. President, on May 3, 1990, I appointed a Task Force on the U.S. Economy in the 1990's consisting of Democratic Senators, Chaired by Senato DON RIEGLE of Michigan.

I asked the task force to review of the effect of changes in the international strategic environment, increased global economic competition, and decreased defense spending on the U.S. economy. Earlier today the task force tansmitted to me an initial report, with legislative recommendations, on the issue of defense adjustment that is easing the economic and social adjustment of businesses, workers, and communities to lower levels of defense spending.

The task force is taking a wide-ranging look at the problems confronting the United States as we enter the 1990's and the new era of reduced defense spending and increased international economic competition. These longer-term issues will greatly affect the quality of life of future generations of Americans.

In its initial report to me today, the task force is focusing on the short-term adjustment problems faced by communities and workers around the country as the levels of expenditure on defense in this country decline. In essence, the task force recommends that we act now to ensure that existing Government programs are provided the resources, personnel, and authority to act to assist effectively communitues undergoing defense readjustment.

The legislative recommendations of the task force toady are offered as an amendment to the Defense bill sponsored by Senators RIEGLE and PELL. I greatly appreciate—and commend—the leadership of Senator RIEGLE in developing this initiative. I also appreciate the commitment and contributions of other Senators participating in the task force.

The amendment provides for greater executive branch coordination and advance warning to impacted communities, along with increased levels of community planning and adjustment assistance, small business assistance, and worker adjustment assistance. Its basic thrust is to reinforce leadership at the State and local level in meeting challenges of economic diversification and adjustment that result from Federal actions affecting defense industries.

This amendment is important throughout the United States. It is also important to the State of Maine. On May 4, 1990, I submitted testimony to the Senate Armed Services Subcommittee on defense industry and technology, which outlined many of the State's concerns for defense adjustment and economic diversification issues.

Maine is proud of its contribution to our Nation's defense needs. The State's defense installations and industries include Loring Air Force Base; Bangor's Air National Guard; Brunswick Naval Air Station; Portsmouth Naval Shipyard [PNSY]; the Cutler Naval Installation; Bath Iron Works; Saco Defense, Inc., Pratt & Whitney; and Fiber Materials, Inc. They all play an important role in our national defense and in the life of Maine workers and communities.

Maine's interests have fared relatively well in this year's Defense authorization bill. The Senate's fiscal year 1991 legislation includes 5 Aegis destroyers for Navy shipbuilding programs; funding of the Army's MK-19 program; and additional investment and improvements for Maine defense installations, including PNSY's Drydock No. 2 modernization. Under the Senate bill, PNSY also be given the opportunity to bid competitively for additional categories of defense work.

Nonetheless, Maine cannot help but be affected by broader trends and changes in the Defense budget. For shipyards especially, there is concern that bidding competition will be tougher and overall workload levels leaner in the years ahead.

Senator RIEGLE's task force amendment is intended to help businesses and communities—like those in Maine—plan for adjustments that inevitably will occur as a result of changes in the defense budget. On April 30, 1990, the Bangor Daily News stated in an editorial:

The Congress has a responsibility to help all States ease the pain of transition from military to peacetime use of land and resources, but Maine, like every other State, has an obligation to its people to prepare them for the worst economically, even while they hope for the best in harmonious international relations.

Federal support of State and local leadership is essential to meeting the economic challenges of defense adjustment in the 1990's. Those challenges do not necessarily have to be a case of "preparing for the worst," but can be used as opportunities to build new foundations for the future. That is the kind of assistance that this amendment is intended to provide. I thank Senator RIEGLE and the task force for their recommendations and urge adoption of the amendment.

Mr. WIRTH. Mr. President, I am pleased to cosponsor the pending amendment along with Senator RIEGLE and others. Continued reductions in defense spending are certain to impose real hardship on workers and communities now engaged in defense production and services. This amendment seeks to address the need to assist dislocated workers and devastated communities in making the transition from defense work to other economic opportunities.

The amendment identifies existing Federal programs which can and should be strengthened to deal with the effects of anticipated defense cuts. The amendment stresses the need for effective coordination and long-lead notice and planning for workers and communities. This represents a first effort at a defense adjustment package, and I am certain that we will monitor carefully the impact of defense curts and the adequacy of this package to deal with it.

Given the lateness of the hour, I will not speak at length on this issue. I would, however, ask unanimous consent that a statement prepared by the "Task Force on Defense Spending, the Economy and the Nation's Security" be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. WIRTH. This task force, cochaired by Senator HEINZ and myself, consists of representatives from government, labor, and industry and is a joint effort of the Henry Stimson Center and the Defense budget project.

EXHIBIT 1

[Task Force on Defense Spending, The Economy & The Nation's Security, July 30, 1990]

STATEMENT: ADJUSTING TO LOWER DEFENSE BUDGETS

The likelihood of major reductions in defense spending over the next five years has raised concerns about possible adverse effects on the nations economy, the defense industrial and technology base, and on specific communities, groups of workers, and private firms.

When viewed from a national economic perspective, concerns about the aggregate economic impact of lower defense budgets may be overstated. Even a five-year, twenty-five percent cut in defense spending, which in total accounts for only about 5.5 percent of the nation's annual gross product of goods and services, is not large enough to have first order effects, one way or the other, on the country's overall rate of economic growth, on the rate of inflation, or on employment levels.

When viewed from a local perspective, however, the effects of reduced budgets on the defense industrial and technology base and on communities, workers, and firms could be significant. Specific communities, or even whole regions of certain states, certain kinds of workers, and many individual companies could be hard hit by the cuts now contemplated in defense spending.

In our view, it is in the national interest for the federal government, together with

state and municipal governments, to assist communities, workers, and companies to make a smooth and rapid transition to lower levels of defense spending.

A number of legislative initiatives toward this end are pending in the House of Representatives and in the Senate. We believe that any legislation in this area should serve the following objectives:

(1) Seek to preserve vital elements of the nation's defense industrial and technological base by encouraging greater interaction between the defense and commercial sectors;

(2) Address the immediate needs of federal military and civilian employees and of dislocated defense workers in industry, emphasizing retraining and assistance in the search for new employment;

(3) Assist impacted communities in adjusting to economic dislocations by identifying means of diversifying and strengthening local economies;

(4) Focus existing federal assistance on small businesses as they diversify into new commercial markets and new technologies;

(5) Ensure that industry can tailor appropriate responses to the transition, avoiding unnecessary federal expenditures and unwarranted intrusion into the private sector.

(6) Reduce the institutional barriers that now exist between the defense and commercial sectors, such as unnecessarily narrow standards for military products, as one way to help preserve a mobilizable defense industrial base.

Federal policies should complement state and local efforts rather than replace them. State and local public officials understand local economic strengths and weaknesses and generally have in place economic development and retaining programs tailored to those realities. Federal programs can only catalyze community responses to adjustment problems, and facilitate smooth access to federal programs.

Federal adjustment policy should integrate defense adjustment into other economic adjustment efforts. It should be based on existing federal programs for community planning and economic development, worker retraining, job search employment assistance, and small business development.

A key responsibility of the federal government during this transition is to maintain a health U.S. economy; the transition to lower defense spending will be facilitated by a climate of economic growth and job creation.

The critical aspect of federal policy is coordination. Given the wide variety of existing programs that can be used to help communities and workers adjust to lower defense spending, a coordinating body should be established and work to combine the following elements into a coherent strategy.

DEFENSE INDUSTRIAL AND TECHNOLOGY BASE PROGRAMS

The federal government should encourage innovation and technology development in both the civil and defense sectors in the interest of the overall economic competitiveness of the nation. Such programs also would help preserve the defense industrial base, allowing the United States to maintain its lead in many critical defense technologies. Federal programs should include support for critical defense technologies, steady or growing levels of funding for technology development and independent R&D, encouragement for defense manufacturers to explore the commercial applications of defense technologies, and the consolidation of military and industrial specifications to reduce barriers between defense and commercial sectors.

Loans and loan guarantees should be provided through existing Small Business Administration programs to qualified small businesses as gap-financing to fund expansion, new ventures, or research and development efforts. Defense-related firms should not be singled out for unique treatment in such programs.

A data base on defense contracts, prime contractors, and subcontractors should be developed in the Department of Defense. At present, such data is limited to prime contracts. In order to design effective adjustment policies and track the effects of contract cancellations, especially on small business and subcontractors, federal and local policy makers require more information than is currently available.

COMMUNITY ASSISTANCE

Federal adjustment policies for communities should be flexible, allowing communities to design their own responses in the framework of their individual economic and political needs.

Provision of information will be key. In particular, early notification to state and local officials of prospective changes in defense programs is vital to the success of economic adjustment at the community level.

Community adjustment assistance should be provided by the federal government through grants from DoD's Office of Economic Adjustment, and the Economic Development Administration Title IX planning grant program. Eligibility for community assistance should be based on the magnitude of the prospective dislocations in the context of the local economy. Communities facing major dislocations in an environment of high unemployment and regional recession are more likely to need adjustment assistance than communities with low unemployment and healthy regional economies.

WORKFORCE ASSISTANCE

Workers likely to be affected by defense cut-backs should be notified as early as possible, allowing them to anticipate a dislocation and to explore alternative employment opportunities in a timely manner. Training and retraining assistance should be provided through current federal programs such as the Job Training Partnership Act. In addition, the Department of Labor can play an active role in encouraging labor-management cooperation in the adjustment effort through its Bureau of Labor-Management Relations and Cooperative Programs.

Extended unemployment insurance should be provided to allow workers to enter and complete training and retraining programs while unemployed. Such extended coverage should be provided for a limited time only and should be made contingent upon enrollment in certified retraining programs. Job search assistance also should be provided to dislocated workers in order to assist them in locating new employment as soon as possible.

Change from well established patterns always raises apprehensions and can be painful. Experience has demonstrated, however, that communities, companies, and workers can adjust to cut-backs in defense spending and emerge with a more stable and prosperous economic future, if given time to respond and reasonable support. Effective federal programs can help to ensure such favorable outcomes.

The members of the Task Force who endose this statement are listed below. While each signatory supports the broad thrust and overall recommendations contained in the statement, he or she may not necessarily agree with every specific phase.

Senator John Heinz, Pennsylvania, Co-chair.

Senator Tim Wirth, Colorado, Cochair.

Dr. Gordon Adams, Defense Budget Project.

Mr. Norman Augustine, Chairman, Martin Marietta Corporation.

Dr. Barry Blechman, Henry L. Stimson Center.

Representative Tom Campbell, California.

Governor John Carlin, former Governor, State of Kansas.

Governor Richard Celeste, State of Ohio.

Senator William Cohen, Maine.

Dr. Robert Costello, Hudson Institute.

Mr. Gerald Ebker, President, Federal Sector Division, IBM Corporation.

Mayor Wilson Goode, Philadelphia, Pennsylvania.

Representative Nick Mavroules, Massachusetts.

Mr. Sandy McDonnell, Chairman Emeritus, McDonnell Douglas Corporation.

Dr. William Perry, Chairman, Technology Strategies and Alliances.

Dr. Charles Schultze, Brooking Institution.

Mr. Harold Palmer Smith.

Mr. Alexander Trowbridge, President, Trowbridge Partners.

Mr. J. Fred Weintz, Jr., Limited Partner, Goldman Sachs and Co.

Mr. Earle Williams, President, BDM International Corporation.

Mr. Charles Zraket, The MITRE Corporation.

Mr. PELL. Mr. President, I am very pleased indeed to join my distinguished colleagues from Michigan, Senator RIEGLE, in urging approval of our amendment providing adjustment assistance for workers and communities adversely effected by the decline in defense spending.

This amendment has been carefully crafted to deal promptly and effectively with disclocations resulting from reduced defense spending, and to do so with an absolute minimum of new bureaucratic overhead. I am very pleased that it echoes many of the provisions of the bill I introduced last February 7, S. 2097, the Defense Diversification and Adjustment Act.

The amendment addresses a problem which is bound to impact every State in the Union, to a greater or lesser degree, as we face defense cuts aggregating 25 percent or more over the next 5 years, by which time defense spending may have fallen to its lowest share of GNP since the late 1940's. I refer in particular to the plight of the some 3.4 million civilians who work at defense-related jobs—for the most part employees of defense contractors—as distinct from uniformed military personnel or civilian employees of the Department of Defense.

The amendment addresses the impact of this adjustment on communities and local economies as well as on the people involved. And I would note that one of my basic objectives in

S. 2097 was to preserve wherever possible the elements of the defense industrial base which might otherwise be lost to future needs.

I would note as well that the underlying rationale of my original bill, which I believe is carried forward in this amendment, is simply that the Federal Government has a compelling obligation to mitigate economic distress which results from massive shifts in Government spending caused by factors far beyond the control of those who are most affected.

While the problem we address is national in scope, the New England region is particularly vulnerable and my own small State of Rhode Island is perhaps a useful microcosm of the nationwide dilemma facing civilian defense workers.

The Federal Reserve Bank of Boston published a very useful study entitled "Defense Cutbacks and the New England Economy" which notes that defense spending as a percentage of GNP is about twice the national rate in New England and that its decline can be expected to be more precipitous as a result. While reductions in defense employment overall are not expected to have devastating effects, they are expected to have more concentrated, burdensome effect in localized areas of special vulnerability.

Rhode Island is one such area. Some 14,000 Rhode Islanders work for defense contractors, and over half of them work for one company, the Electic Boat Division of General Dynamics, manufacturer of nuclear submarines. Electric Boat is the largest single private sector employer of Rhode Island workers.

Workers at Electric Boat and at other defense industries in the State are in general well educated, high-skilled engineers, craftsmen, and technicians. They constitute an important core of the State economy in terms of their buying power and their status as homeowners, taxpayers, and savers. But most of all they represent an irreplaceable asset in terms of skill and talent. Their absence would constitute a serious brain drain as well as a significant drain on the economy.

The amendment we offer today is designed to cushion the effect of decreased defense spending on such workers and on the local economy. It provides for advance warning to communities, and planning assistance for communities and for small businesses. And it provides adjustment assistance in terms of retraining, public works and economic development.

I would note especially that we achieve these objectives entirely through existing programs and agencies. No new bureaucratic entities are required. We utilize in particular the existing Office of Economic Adjustment of the Department of Defense and an existing interagency committee known as the President's Economic Adjustment Committee.

I also note that the amendment as offered addresses, I believe, the most urgent aspects of the defense adjustment problem. As such it provides a timely legislative response to existing circumstances. Other provisions of my bill S. 2097 dealing with the long-range question of conversion and diversification of defense industries still remain to be addressed in another legislative setting.

For the present, I am very pleased indeed that we have been able to move swiftly to address the most pressing issues. I am most appreciative of the support of the distinguished majority leader, Senator MITCHELL, and of the outstanding leadership of Senator RIEGLE in his capacity as chairman of the Senate Democratic Task Force on the U.S. Economy in the 1990's. Only through their leadership and the efforts of the task force staff are we able to offer this amendment today.

I believe the amendment is a necessary companion piece to the reduction in defense spending contemplated by the bill. I urge its adoption.

Mr. LIEBERMAN. Mr. President, I rise in strong support of the amendment offered by Senator RIEGLE. This amendment is a useful first step in assisting our defense sector and work force with what may prove to be a difficult transition. I was pleased to be able to assist with the development of the amendment. I am also pleased that a number of the provisions in the amendment are similar to those in my bill on this subject, S. 2893.

The problems facing defense workers were driven home to me by the trials of one of the defense companies in Connecticut, the United Nuclear Corp. [UNC]. For more than 30 years, UNC has made nuclear reactor cores for the Navy. They competed for the Government business with another company. Then suddenly earlier this year, they were told that all future business would be given to the other company. Earlier today, we heard much talk about the greater warning time that U.S. troops now have in Europe, 12 to 24 months. Unfortunately, UNC was not so lucky.

The only Government agency in a position to respond to UNC's needs was the Office of Economic Adjustment [OEA] the Pentagon. Their response was inadequate because of serious understaffing. Now, UNC and its 1,200 employees face an uncertain future at best. In short, no warning and little help adds up to an economic disaster.

This amendment would begin to remedy some of these problems. It would direct the OEA to identify and notify communities that would likely be affected by future defense cuts. This would reduce the possibility of defense companies being blind-sided. Defense workers would not wake up someday to be told that they would be out on the street within several months. They would have time to look for other jobs or convert their defense plants into commercial production.

Second, this amendment would allow increased funding for the Office of Economic Adjustment. As I mentioned previously, the OEA is vastly underfunded. Its response to the UNC tragedy was extreme; this situation must change. My own bill authorizes greater spending for the OEA, but I believe that this is a useful first step.

Third, the amendment allows title IX community adjustment assistance and other OEA programs to be made available to communities affected by defense cuts.

Fourth, the Small Business Administration is directed to furnish assistance to small defense businesses to enable them to develop plans for diversifying into nondefense commercial business.

Fifth, the amendment calls on the Labor Secretary to furnish retraining, job placement, and relocation assistance under the Job Training Partnership Act programs for displaced defense workers.

Sixth, the amendment to create accountability calls on the President to annually report, in conjunction with budget submissions, on the activities of OEA and review whether OEA is adequately funded to meet its obligation.

Finally, the amendment requests the President to institute an analysis of our industrial base to ensure that we retain the capacity, in the face of future defense cutbacks, to meet our national security needs. This process would include identification of the industrial capacity of prime defense contractors and the first two layers of subcontractors. Development of this data base will be crucial to evaluating the effects of defense cutbacks. As of now, we are operating in the dark. We don't even know the extent of the damage that has been inflicted on the defense industrial base, let alone what will happen in the future.

Mr. President, this amendment is the beginning of a long road toward economic fairness and adjustment. The veterans of the cold war, who include our defense workers, don't want ticker tape parades as victory is declared. They just want jobs and economic security for their families. This amendment begins to remedy the gaping holes in the current support system. While it is only a first step, it is a step in the right direction.

Mr. BINGAMAN. Mr. President, I rise today in support of the amendment offered by Senator RIEGLE on economic adjustment to lower levels of defense spending.

Mr. President, as a member of the task force which developed this amendment, I would like to comment briefly on the issues it addresses. I would also like to commend Senator RIEGEL for his leadership on the task force.

I believe that the defense spending declines we are likely to see over the next 5 years represent an opportunity for the United States to begin focusing on pressing domestic issues that have been neglected in recent years. The disintegrating threat from the Soviet Union should allow us to turn our attention to critical issues here at home such as the health of our citizens, the education of our children, and the ability of our companies to compete in the global market.

Like my colleagues, I realize that what is an opportunity for us as a nation could become a disaster for some communities. There is no doubt that lower defense budgets will severely impact some local areas. We should do what we can to assist those communities in adjusting to the new situation. However, I do not believe that we should provide an entitlement to defense workers that is not available to other workers dislocated by either foreign trade or nondefense related government actions. My position, and the position of the task force, has been to support those existing programs which support workers dislocated for any reason, and assist communities impacted by any plant closings.

Mr. President, this amendment would lay the groundwork for a coordinated approach to helping communities adjust to lower defense spending. It would utilize existing programs in the Department of Defense, Department of Commerce, and Department of Labor to address problems associated with worker dislocation and to assist impacted communities. It provides us with a means to address and alleviate impacts caused by lower defense spending, and focuses on issues such as worker training and community conversion which will allow us to move ahead, rather than fall behind.

Defense adjustment is a 5-year proposition, and I believe that more needs to be done to help integrate the military and civilian production sectors and aid the defense industry in making the transition to other markets. Several provisions in the bill before us are designed to do just that. One would foster high-technology development, particularly in dual-use technologies, an area that is of critical importance to our future competitiveness. Another would allow defense contractors to use independent research and development funds to do R&D into waste cleanup technology, with the Strategic Environmental Research Program providing funding for those technologies. There is a provision relating to manufacturing extension which would aid the transition of advanced manufacturing technology into defense contractors, and in particular to small subcontractors, making it easier for them to diversify into nondefense markets.

Mr. President, this amendment complements the provisions we have included in this bill. It was developed over the last few months with input from Senators from many different committees, and is a step forward in both aiding communities and workers and in addressing domestic issues that have been neglected for too long. I urge adoption of this amendment.

Mr. GRASSLEY. Mr. President, I rise to offer an amendment which will provide an additional $3,417,000 for Army National Guard facility requirements and $2,480,000 for Air National Guard facility requirements in Iowa.

Mr. President, I understand that these increases to the Army and Air National Guard military construction accounts will be accepted. I further understand that offsets to the amounts added have been offered to the committee. These offsets are based on the House-passed and Senate-reported military construction appropriations bills. The offsets represent amounts appropriated which are in agreement in the appropriations bill; thus, they would not be considered in the appropriations conference committee meeting and the higher authorization in this bill is therefore not necessary. The offsets are in the various family housing accounts and there is no impact on any individual project.

Mr. President, the projects I am seeking to add are as follows:

Army Guard: Des Moines, STARC armory vehicle storage facility, $575,000; Council Bluffs, organizational maintenance shop [OMS], $528,000; Corning, armory, $1,008,000 and Oskaloosa, armory, $1,306,000.

Air National Guard: Des Moines International Airport, upgrade aircraft hangar, $1,800,000; and Sioux City Gateway Airport, alter composite support facility, $680,000.

Mr. President, all of the projects mentioned above can be put under contract during fiscal year 1991. Two projects—Des Moines STARC armory and vehicle storage and Council Bluffs armory and OMS—have been partially authorized in this bill, but unfortunately the numbers allowed were based on incorrect information. The others are self-explanatory and involve replacement and/or improved facilities for the Army and Air National Guard and units of Iowa.

Mr. President, the Guard and Reserve units of our total force continue to be the best investment in the Department of Defense. However, they continue to do a first-rate job in facilities that just are not adequate.

The Subcommittee on Military Construction appropriations, of which I am the ranking member, has again this year recommended substantial increases for Guard and Reserve facilities—as has the bill before us today. Funding for the projects I am seeking is available in the appropriation bill. None of the units involved with the new facilities will be impacted by base closures or substantial strength reductions.

I want to thank the distinguished chairman and ranking member of the Senate Armed Services Committee, Senators NUNN and WARNER, as well as the chairman and ranking member of the Readiness Subcommittee, Senators DIXON and GORTON, for their support of this amendment and their support of the Iowa military construction program, Iowa is one of the few States without any active military installation. The Guard and Reserve are a vital and visible part of the State; and the units in Iowa are award winning and almost all above their strength levels with waiting lists. These personnel deserve decent facilities in which to work.

Mr. President, I urge the adoption of the amendment.

Mr. GARN. Mr. President, I rise today to offer an amendment to authorize the Army aviation support facility in West Jordan, UT. I appreciate the support it has received so far and can assure you that it would benefit the Army National Guard operations in Utah.

I am very interested in the expansion and reorganization under way with the Army aviation units in Utah. The units presently use a facility that was constructed in 1976 for a light helicopter company with 150 personnel. Since that time, the Utah National Guard has undergone two major reorganizations resulting in the present designation of the 211th Aviation Group. The Utah Guard is currently receiving 18 of the Army's AH-64 Apache helicopters, 3 of the UH-60 Blackhawk helicopters, and 13 of the OH-58 Scout helicopters. In addition, on September 1, 1990, an AERO medical evacuation company will be assigned to this facility, which will result in six additional UH-60 Blackhawk helicopters assigned to the unit.

Many of the Apaches that the State of Utah has received in this reorganization came from Fort Hood. These helicopters were seriously damaged during a hurricane last year because of inadequate storage space in the hangar. Ironically, these same helicopters are being stored outside, while the Utah Army National Guard awaits construction of the Army aviation support facility. These same helicopters again run the risk of damage from the elements. I believe it is shortsighted to further delay initiation of this project.

Last year, the project received support in the House and the Senate.

Language was included in the military construction appropriations bill for 1990 to direct the Army National Guard to initiate planning and design of the armory, the Army aviation support facility, the organizational maintenance ship and associated ramp facility, and to include these projects in the fiscal year 1991 budget request. Unfortunately, this project has slipped to the fiscal year 1993 budget. I believe that it would be prudent to support this project and avoid further unnecessary delays.

This project has been included in the military construction appropriations bill for 1991. I would appreciate support for the inclusion of this project in the Department of Defense Authorization Act for 1991.

Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague from Texas in proposing this amendment to add $5.4 million for a project at the Addicks armory in Houston.

I have been advised by Maj. Gen. Charles Wilson, the adjutant general of Texas, that this is one of his top priorities.

Right now, Guard units are in leased facilities and the lease will not be extended beyond June of 1992. This new facility is for 6 units comprising 543 personnel.

These funds will also permit construction of an organizational maintenance shop which is now in an overcrowded leased facility that has proven inadequate and counterproductive.

I deeply appreciate the committee's willingness to accept this amendment in order to expedite the construction of this much-needed project.

Mr. McCAIN. Mr. President, these Milcon amendments have been accepted by both sides. I urge their immediate consideration.

IOWA MILITARY CONSTRUCTION PROJECTS

Mr. HARKIN. Mr. President, the amendment being offered provides for authorization of a number of important National Guard facility projects in Iowa. The National Guard not only provides for a military reserve, it is also available to provide assistance in times of disaster.

The amendment includes funding for the Corning Armory and the Oskaloosa Armory. The existing Corning facility was built as a vehicle maintenance facility in 1950. The Oskaloosa Armory that is to be replaced was built in 1923 and was designed for a horse cavalry unit. The amendment also authorizes a vehicle storage facility and a maintenance shop in Council Bluffs.

Under the amendment, $1.8 million is included for the Air National Guard at Des Moines for the modification of an administrative facility and $680,000 for the alteration of Air National Guard composite support facility at the Sioux City Airport.

I urge that the amendment be accepted.

The PRESIDING OFFICER. Is there further debate? If not the question is on agreeing to the amendment.

The amendment (No. 2565) was agreed to.

Mr. kMcCAIN. I move to reconsider the vote.

The PRESIDING OFFICER. Without objection, the motion will be considered to be laid on the table.

AMENDMENT NO. 2566

(Purpose: To provide for the economic adjustment of communities, small businesses, and workers adversely affected by reductions in the programs, projects, and activities of the Department of Defense)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follow:

The Senator from Illinois [Mr. DIXON], for Mr. RIEGLE (for himself, Mr. PELL, Mr. LIEBERMAN, Mr. KENNEDY, Mr. BINGAMAN, Mr. WIRTH, and Mr. CONRAD), proposes an amendment numbered 2566.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, below line 24, insert the following:

SEC. 1216. NATIONAL DEFENSE ECONOMIC ADJUSTMENT

(a) FINDINGS.—Congress makes the following findings:

(1) There are likely to be significant reductions in the programs, projects, and activities of the Department of Defense during the first several fiscal years following fiscal year 1990.

(2) Such reductions will adversely affect the economies of many communities in the United States and small businesses and civilian workers throughout the United States.

(b) POLICY.—In view of the findings expressed in subsection (a), it is the policy of the United States that—

(1) assistance be provided under existing planning assistance programs and economic adjustment assistance programs of the Federal Government to communities, small businesses, and workers referred to in subsection (a)(2) to the extent necessary to facilitate an orderly transition for such communities, small businesses, and workers from economic reliance on Department of Defense spending to economic reliance on other sources of business, employment, and revenue; and

(2) funding for such programs be increased by amounts necessary to meet the needs of such communities, small businesses, and workers without reducing the funding that would otherwise be available under those programs by reason of causes unrelated to the reductions referred to in subsection (a)(1).

(c) ACTIONS OF THE SECRETARY OF DEFENSE.—(1) The Secretary of Defense, through the Office of Economic Adjustment of the Department of Defense shall—

(A) identify each community in the United States likely to experience significant economic dislocation as a result of the reductions referred to in subsection (a)(1), including a loss of at least 2,500 civilian jobs (in the case of an urban community), 1,000 civilian jobs (in the case of a rural community), or a number of civilian jobs equal to at least one percent of the total number of civilian jobs in the community;

(B) transmit to the governments of each such community (and to the Governor of the State in which such community is located) advance notification of the planned reductions referred to in subsection (a)(1) that are likely to affect such community adversely, including an estimate of the number of jobs that will be lost in the community as the result of the planned reductions;

(C) transmit to the President a list of all such communities;

(D) make community planning assistance grants to such communities in order to assist such communities in planning for economic diversification likely to minimize the adverse economic effects referred to in subsection (a)(2) and to facilitate economic recovery from any such adverse effects.

(2) For fiscal year 1992 and each fiscal year thereafter, the Secretary of Defense—

(A) shall—

(i) in the budget proposals of the Department of Defense prepared for submission to the President for such fiscal year, identify those communities that are likely to experience significant economic dislocation described in paragraph (1)(A) in the event that such budget proposals are enacted into law; and

(ii) upon the submission of the budget for such fiscal year to Congress pursuant to section 1105(c) of title 31, United States Code, provide the notifications required by paragraph (1)(B); and

(B) upon the enactment of an appropriations Act providing funds for programs, projects, and activities of the Department of Defense for such fiscal year, shall identify the communities likely to experience significant economic dislocation described in clause (A) of paragraph (1) as a result of the funding levels contained in such Act and take the actions required by clauses (B) and (C) of such paragraph.

(d) ACTIONS OF THE SECRETARY OF COMMERCE.—The Secretary of Commerce shall furnish community adjustment assistance under title IX of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3241 et seq.), and such other assistance as may be provided under programs administered by the Economic Development Administration of the Department of Commerce, to communities receiving a notification pursuant to subsection (c)(1)(B) in order to carry out the policy set out in subsection (b)(1).

(e) ACTIONS OF THE ADMINISTRATOR OF THE SMALL BUSINESS ADMINISTRATION.—(1) The Administrator of the Small Business Administration shall furnish assistance to small businesses described in paragraph (2) for the purpose of facilitating the development of business plans for diversifying into commercial activities other than the furnishing of products or services for the Department of Defense.

(2) A small business referred to in paragraph (1) is a small business that derives a significant portion of its gross receipts from

the direct and indirect furnishing of goods or services for the Department of Defense.

(3) To be eligible for the assistance referred to in paragraph (1), a small business shall be required to submit to the Administrator an application for assistance containing a preliminary business diversification proposal applicable to such small business.

(f) ACTIONS OF THE SECRETARY OF LABOR.—The Secretary of Labor shall furnish retraining, job placement, and relocation assistance pursuant to the Job Training Partnership Act (29 U.S.C. 1501 et seq.) and other employment services to workers referred to in subsection (a)(2) in order to carry out the policy set out in subsection (b)(1).

(g) ACTIONS OF THE PRESIDENT.—(1) In the preparation of the budget for a fiscal year for submission to Congress pursuant to section 1105(a) of title 31, United States Code, the President shall—

(A) take into consideration the needs of the communities identified by the Secretary of Defense pursuant to subsection (c)(1) and the small businesses and workers referred to in subsection (a)(2) and include in such budget proposed funding levels for the assistance and services referred to in subsections (c) through (f) sufficient to carry out the policy set out in subsection (b)(2); and

(B) include in the justifications and supporting information transmitted to Congress in connection with such budget—

(i) a discussion of the extent to which the proposed funding for such programs is sufficient to carry out such policy; and

(ii) a list of the communities that are to receive a notification from the Secretary of Defense pursuant to subsection (c)(1) in connection with such budget.

(2) It is the sense of Congress that, in order to ensure that paragraph (1) and subsections (c) through (f) are carried out effectively—

(A) the President should direct the interagency committee known as the President's Economic Adjustment Committee to carry out coordinating and oversight activities with respect to the development of budget requests for and the furnishing of assistance under the programs referred to in such paragraph and subsections and to keep the President currently informed regarding the effectiveness of the programs; and

(B) the President should implement a systematic, continuous procedure to collect and analyze information necessary to evaluate the adequacy and identify the sources of industrial capacity and capability in items and technologies essential to the execution of the national security strategy of the United States, including the industrial capacity and capabilities of Department of Defense prime contractors and at least the first two tiers of subcontractors.

(h) AUTHORIZATIONS OF APPROPRIATIONS.—(1) There is authorized to be appropriated for the fiscal year beginning October 1, 1990 such sums as may be necessary for carrying out subsections (c)(1)(D), (d), (e), and (f).

(2) Amounts authorized to be appropriated under paragraph (1) are in addition to any amounts authorized to be appropriated for activities and programs referred to in such subsections for such fiscal year under any other provision of law.

Mr. McCAIN. Mr. President, this side reluctantly supports this amendment.

Mr. KENNEDY. Mr. President, I rise in support of the Defense adjustment amendment offered by the distinguished Senator from Michigan [Mr. RIEGLE]. I have worked closely with Senator RIEGLE and the other members of the Task Force on the U.S. Economy in the 1990's in developing this amendment and believe it not only makes good economic sense, but is essential for equity reasons as well.

Throughout the cold war, our military forces, the civilian employees of the Defense Department, and many thousands of employees of defense contractors and subcontractors have labored long and hard to sustain the Nation's defense effort. Now that we are able to cut back on defense programs, it is only fair that we provide essential transitional assistance to those on whom the Nation relied for so many years.

Moreover, these individuals possess a wealth of talent and knowhow that can be put to highly productive uses in other sectors of the economy. So offering a helping hand in their transition is a wise investment in economic stability and strength, as well as the humane, decent thing to do.

None of us knows the precise magnitude and timing of defense cutbacks over the coming decade, but all of us know that these cutbacks will be substantial and will continue throughout the 1990's. However, economic analysts point out that defense spending in fiscal year 1990 amounted to only about 5.5 percent of the GNP. This represented a decrease from the high of 6.5 in fiscal year 1986. By the mid-1990's, this share will probably fall to between 4 and 3 percent of GNP.

But as significant as these amounts will be in channeling resources to our unmet social, economic, and human needs, they are not large enough relative to the overall economy to have major macroeconomic effects. Nevertheless, impacts centered on particular communities and regions can have devastating effects on individuals, small businesses, and communities.

In New England, which is in a state of virtual recession, such cutbacks could have devastating effects unless we take prompt measures to aid in an effective transition to civilian activities. For example, in 1989 Massachusetts had $17.7 billion in defense business or 7.2 percent of the gross State product. Massachusetts is fifth in the Nation in defense prime contractors, sixth in the number of defense-related jobs, and ninth in defense jobs as a percentage of overall State employment.

So further cutbacks in Massachusetts could have a major impact on the State's economy. But the Massachusetts work force and small business community are noted for their talent and innovative abilities. If they are given advance notification, the wherewithal to plan, and necessary adjustment assistance, they will surely be able to make an effective transition to productive civilian activities.

In short, human compassion and a sense of fairness—along with good economic sense—dictate that the Federal Government has an obligation to provide defense adjustment assistance to impacted regions, communities, small companies, and affected individuals.

Rather than create new Federal bureaucracies, however, the aid should be channeled through existing institutions and programs, and should be structured in such a way that it does not create any unfair privileges for displaced defense workers over displaced workers in other sectors.

The proposed amendment is designed to accomplish those goals. It provides three basic kinds of aid: First, it ensures advance warning to communities and companies of impending base closures and contract terminations. Second, it offers planning grants to communities and small businesses to plan for diversification and economic adjustment. Third, it provides a package of adjustment assistance measures to aid individuals in making the transition to civilian activities.

The Defense Department's Office of Economic Adjustment [OEA] will be given necessary resources to provide the advance warning to communities and companies and to offer communities planning grants to promote diversification.

Additional adjustment assistance to communities would come from the Department of Commerce's Economic Development Administration [EDA]. And adjustment assistance to small business firms would be channeled through the Small Business Administration [SBA].

Adjustment assistance to individuals would come from the Department of Labor's JTPA Program and Employment Services Program and would include: job retraining; job placement and relocation; and extension of unemployment benefits.

All of these programs would be coordinated through the existing President's Economic Adjustment Committee.

These programs are essential to ensure an equitable and effective transition for the communities, companies, and individuals impacted by defense cutbacks. But defense adjustment assistance is just one part of a national strategy for economic conversion.

Defense cutbacks must be viewed not just as posing problems, but rather as opportunities to shift national priorities to our unmet social needs, revitalize the civilian economy, and enhance U.S. international competitiveness.

However, the real challenge of economic conversion occurs at the local level, where—if given adequate warning and assistance—communities can

create a variety of new opportunities that stimulate economic growth and development.

Thus, in the 1970's during the Vietnam cutbacks, a number of Massachusetts communities showed how to turn the challenge of conversion into opportunities for economic revitalization. For example, after the Springfield Armory was closed some of its land was utilized to create the Springfield Armory Museum, and other portions were utilized for high school playgrounds. Furthermore, nine industries now occupy former armory property and employ about a thousand persons. And the Smith & Wesson Co., successfully converted its gun range and testing laboratory into a police academy.

Similar community efforts helped Chicopee and Ludlow to adjust to the cutbacks at Westover Air Force Base. And in the Taunton area, when Raytheon shut down its North Dighton plant in 1972, the community used that land to develop the Myles Standish Industrial Park which has enhanced the economic development of the entire region.

The individuals and resources which have been committed to defense programs have enormous potential for conversion to civilian activities. Once they make the transition, they will be able to hold their own and make substantial contributions to the civilian economy and society at large.

This amendment is designed to provide them with advance warning, the opportunity to plan for diversification, and necessary adjustment assistance to make the transition in an equitable and effective fashion. As a nation, we owe them no less; and as an economy, there are few investments from which we can gain so much. I urge the Senate to agree to the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2566) was agreed to.

Mr. McCAIN. I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

Mr. President, I ask unanimous consent to amend the bill, to amend language previously amended.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 2567

(Purpose: To reduce funding for secondary items in Defense Department inventories)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. LEVIN, proposes an amendment numbered 2567.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, line 23 strike "$22,068,345,000" and insert in lieu thereof "$22,008,345,000".

On page 16, line 24, strike "$23,343,784,000" and insert in lieu thereof "$123,283,784,000".

On page 17, line 1, strike "$20,845,714,000" and insert in lieu thereof "$20,785,714,000".

On page 27, between lines 11 and 12, insert the following new section:

REDUCTION IN STOCK FUND OBLIGATIONS

SEC. . The Secretary of Defense may not incur obligations against the Department of Defense stock funds during fiscal year 1991, except for obligations for fuel and subsistence items, in excess of 80 percent of the sales from such stock funds during that fiscal year, except for sales for fuel and subsistence items.

ON WASTEFUL INVENTORY PURCHASING BY THE PENTAGON

Mr. LEVIN. Mr. President, earlier this year the GAO issued a series of highly actual reports on the status of the DOD inventory of supplies and spare parts. Waste and excess, the GAO found, are everywhere. We have literally billions of dollars of items we don't need, and the worst part is we continue to buy items of which we already have an oversupply. Our warehouses are bulging at the seams with things we don't need and things it will take us decades to use.

As a result of an incredible spending spree during the 1980's, DOD's unused inventory has more than doubled over the last decade, from $43 billion in 1980 to $103 billion in 1988. DOD says that more than $30 billion of this inventory is inapplicable—meaning that it will probably never be used. Another $11 billion is potential excess—meaning that DOD doesn't need it now, but might be able to find a use for it somehow, someday.

According to GAO, the wasteful spending practices that led to this immense stockpile of unneeded inventory continue unabated today. GAO found that the Pentagon routinely overestimates its inventory needs; maintains duplicative stocks at different inventory levels; buys inventory before it is needed; and fails to cancel the purchases when it finds they are not needed.

For example, the GAO found that the Air Force Logistics Command [AFLC], has standing instructions to make sure that all money available for inventory purchases get spent. As recently as January 1988, an AFLC memorandum warned inventory managers that unspent inventory funds cannot be tolerated.

The result is hardly surprising—billions of Federal tax dollars wasted on inventory that will never be used. In one case reviewed by GAO, the Air Force purchased $8 million of spare parts in excess of requirements in an effort to obligate funds before they were returned to the Treasury. GAO found that it was unlikely that the parts would ever be used. In several other cases, inventory managers declined to terminate orders for unneeded items because of spending goals set to encourage the use of appropriated funds.

A second GAO report found similar problems in the Navy inventory system. According to the GAO, the Navy does not have any formal system at all to notify buyers when items are being replaced or phased out. As a result, the Navy keeps on buying inventory, even when the items are no longer needed and will not be used. In one case reviewed by GAO, the Navy already had nine power transformers for a sonar system in stock, when it only needed one. In April 1985, the power transformers were declared obsolete. Seven months later, the buyer—who had not been informed that the transformers were obsolete—ordered three more.

When some Navy inventory levels are compared to projected requirements, the results are extraordinary. For example, the Navy has projected an annual demand of 82 housing seals for the Mark 46 torpedo. It has 2,526 housing seals on hand—an estimated items on 30-year supply.

How did the Navy end up with so many housing seals? Faulty math seems to be part of the problem. Here's how the Navy calculated it's requirements for 2 years: 84 items, a 1-year supply, for the first 6 months; 170 items, about a 2-year supply, for the next 12 months; and 167 items, about a 2-year supply, for the following year. That's a total of 421 housing seals—a 5-year supply, to cover the Navy's requirements for 2 years.

For good measure, the Navy said that it needed an additional 154 items for a safety level; 58 items to meet additional needs estimated by users; and 274 items to cover procurement lead times. That's another 5 year's supply. And here's the icing on the cake: on top of all of these so-called required items, it turns out that the Navy has 1,619 unrequired housing seals—about 20 more years of supplies—that even they admit they don't need.

And the Army? In case after case, GAO found, the Army overestimated its requirements, ordered items it did not need, and failed to terminate orders for items that would not be used. Here are just a few examples, from the GAO report:

In 1987, the Army decided that it would need 88 centrifugal diffusers for the AH-64 helicopter, based on an estimated need for 35 diffusers per 100 engines. Six months before contract award, the Army discovered that only 10 diffusers were needed per 100 engines, but the buyers were never told, and

did not reduce the order quantity. As a result, the Army is stuck with 95 centrifugal diffusers—at a cost of almost $700,000—that it doesn't need.

In a second case, the Army computed a war reserve requirement of 55 tailboom assemblies for the AH-1F helicopter when only 4 were needed to meet its needs, according to GAO. On the basis of this requirement, the Army bought 32 assemblies in September 1985. The error was discovered in 1986; however, no action was taken to cancel or reduce the procurement. As a result, the Army now has 102 tailboom assemblies, worth more than $7 million, that are not needed, even in case of war.

These are not isolated examples. Even in the case of common supplies like clothing and medical and dental supplies, DOD has managed to purchase far more inventory than it can possibly use. To take just one example, DOD stocks 118 different sizes of women's long sleeve dress shirts. According to GAO, DOD has an estimated 33-year supply of one size alone.

Mr. President, I worked in the committee with Chairman NUNN and Senator DIXON, the chairman of the Armed Services Subcommittee on Readiness to address the problem of wasteful inventory practices. The committee agreed to an amendment, which I offered, to require DOD to institute new guidelines on inventory levels and personnel evaluations for inventory item managers based on their cost-cutting success.

With my amendment, the committee bill would require a single, uniform inventory policy, which should limit ordering and acceptance of inventory items to only those levels that are actually needed. The committee report clearly states that inventory levels should be limited in all but the most exceptional cases to no more than 2 years of operating stocks on hand and often substantially less.

The bill would also require DOD to establish procedures to evaluate personnel who participate in the acquisition and management of inventory on the basis of their cost-cutting success. At present, the GAO has reported, inventory managers are judged primarily on the basis of their success in making parts available when needed, regardless of cost.

Mr. President, these are important measures, but the one step that will make a real difference is a limitation on DOD's inventory funding. As long as DOD has excessive money for inventory purchases, it will continue to waste money. If we are going to instill real discipline in the system, what we really need is an immediate reduction in the amount of money DOD has available for such purchases.

GAO has testified that "there is potential to reduce the DOD's proposed 1991 funding levels of secondary inventory items by at least 10 to 20 percent or about $2 to $4 billion." This estimate, according to GAO, is based on DOD's propensity to overstate requirements, the impending force reductions, and the excesses that exist in the system today.

The GAO recommendation would require real change in DOD's inventory management systems. It would require the Army, Navy, and Air Force to start using up some of the $100 billion inventory stockpile they have built up over the last decade. It would require the services to prioritize their requirements and stop ordering items they don't need. One of the major problems identified by GAO is that DOD fails to terminate supply contracts, even when the items on order are no longer needed. That practice would have to change.

Mr. President, I had hoped to persuade the committee to accept GAO's recommendation and make realistic cuts in inventory spending. Unfortunately, the committee declined to do so, and agreed to only a nominal, $380 million cut in DOD's funding request for the purchase of secondary inventory items. That's less than a tenth of what GAO says we could cut.

This cut is intended to be a 5-percent cut in DOD's spending on inventory from one source—the operation and maintenance accounts. The committee report estimates DOD's O&M spending on secondary inventory items at $7.7 billion. As the report explains:

> The amended budget request includes approximately $7.7 billion in operation and maintenance funds for operating units of the military services to purchase secondary items from the DoD stock funds during fiscal year 1991. To reduce excessive orders of secondary items from the stock funds by operating units, and in light of the reductions in the size of the military services, the committee recommends a reduction of $380 million, or 5 percent, in operations and maintenance funds requested to purchase inventory items from DoD's stock funds in fiscal year 1991.

However, but it appears that the cut in the committee bill isn't even a full 5 percent. According to figures provided by the DOD comptroller's office, direct O&M expenditures on secondary inventory items other than fuel amount to $8,182,900,000—or almost $500 million more than the committee estimate.

In addition, a substantial amount of O&M money is spent indirectly on inventory purchases, through the so-called industrial funds. The DOD comptroller's office states that the industrial funds will make $4.4 billion of inventory purchases next year. At least half of this sum—or $2.2 billion—will come out of the O&M accounts. Another $900 million is spent every year on purchases of clothing and similar items from the stock funds.

In other words, DOD's actual spending on secondary inventory items—as estimated by the DOD comptroller's office—is $3.6 billion higher than the committee initially estimated. Thus, even accepting the committee's premise of a 5-percent cut in DOD's request, the cut should be increased by $180 million.

Mr. President, the taxpayers are fed up with wasteful defense spending. At a time when the President is asking for increased taxes and major cuts in important Federal programs, this waste is offensive. If the most we can do is to cut DOD's request by 5 percent, we should at least follow through and do that right.

Moreover, even if we accept the premise that we cannot cut any more than 5 percent this year, we must take steps to ensure that we will not be in the same bind next year. If we do not want DOD to lock us into a higher budget than we want next year, we have to limit the stock funds' authority to enter new obligations that would tie our hands as they have been tied now.

By limiting the stock funds' obligation authority to 80 percent of the sales made out of the fund, we would reduce the funds' authority to make purchase commitments and incur bills that we will have to pay next year. This measure should set the stage for a 20-percent reduction in DOD's funding for inventory expenditures—a cut of at least $2 billion—in the budget for fiscal years 1992 and 1993.

The DOD comptroller's office has indicated that an 80-percent cap on obligation authority for stock fund purchases is doable. I say that it is the least we can do.

This amendment will cut an additional $180 million from the O&M budget and to limit the stock funds' obligation authority for purchases of items other than fuel and subsistence to 80 percent of sales. This amendment would apply the 5-percent cut in the committee bill to all O&M expenditures other than fuel for stock fund inventory, instead of just some of those expenditures, and it would ensure that we are not locked into unreasonably high inventory expenditures in the future.

Over the past 10 years, DOD's inventory levels have gone from $43 billion to $103 billion. During that time, we have spent billions of dollars on unneeded items. DOD has refused to terminate contracts, even when its own figures indicated that it already had 10, 20, even 30 years of supplies on hand. DOD memos have insisted on continued spending, regardless of whether the inventory was needed. This misuse of taxpayer dollars must end.

Last year, DOD spent an estimated $12 to $14 billion on these supplies; this year, despite report after report unveiling wasteful spending practices, and despite a sea change in global politics, DOD wants to spend the same. That is a formula for continued waste, and it is just not good enough.

Mr. DIXON. Mr. President, this amendment has to do with further reduction in the inventory account of the jurisdictional subcommittee I Chair. It has been agreed to on both sides.

Mr. McCAIN. Mr. President, we support this amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Michigan.

The amendment (No. 2567) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2568

(Purpose: To amend title 31 of the United States Code to more effectively control the availability of appropriations accounts)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN], for himself, Mr. ROTH, Mr. GRASSLEY, Mr. PRYOR, and Mr. KOHL, proposes an amendment numbered 2568.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

SEC. . CONTROLS ON THE AVAILABILITY OF APPROPRIATION ACCOUNTS.

(a) AMENDMENTS TO TITLE 31.—

(1) IN GENERAL.—Subchapter IV of chapter 15 of subtitle 2 of title 31, United States Code, is amended by striking sections 1552 through 1556 and inserting the following:

"§ 552. Procedure for appropriation accounts available for definite periods

"(a) On September 30th of the 5th fiscal year after the period of availability of an appropriation account available for obligation for a definite period ends, the account is closed and any remaining obligated and unobligated balance is canceled and thereafter shall not be available for obligation or expenditure for any purpose.

"(b) Collections authorized to be credited to an appropriation, but not received before closing of the account under subsection (a) or section 1555 of this title shall be deposited in the Treasury as miscellaneous receipts.

"§ 1553. Availability of appropriation accounts to pay obligations

"(a) After the end of the period of availability of an appropriation account available for a definite period and prior to closing of that account under section 1552(a) of this title, the account shall remain available for recording, adjusting, and liquidating obligations properly chargeable to that account. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

"(b)(1) Subject to the provisions of paragraph (2), after closing of an account under section 1552(a) or section 1555 of this title, obligations and adjustments to obligations that would have been chargeable to that account prior to closing and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose.

"(2) The total of charges to any current account under paragraph (1) shall not exceed—

"(A) An amount equal to one percent of the total appropriations for that current account; or

"(B) the amount of the original appropriation, whichever amount is less.

"(c)(1) Obligations under this section may be paid without prior action of the Comptroller General.

"(2) This subchapter does not—

"(A) relieve the Comptroller General of the duty to make decisions requested under law; or

"(B) affect the authority of the Comptroller General to settle claims and accounts.

"(d)(1) If an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount of such obligations during a fiscal year for contract changes for that program, project, or activity to exceed $4,000,000, the obligation may only be made if the obligation is approved by the head of the agency (or an officer of the agency within the Office of the head of the agency to whom the head of the agency has delegated the authority to approve such an obligation).

"(2) In a case in which an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount so obligated during a fiscal year for that program, project, or activity to exceed $25,000,000, the obligation may not be made until—

"(A) the head of the agency submits to the appropriate authorizing committees of Congress and the Committees on Appropriations of the Senate and the House of Representatives a notice in writing of the intent to obligate such funds, together with a description of the legal basis for the proposed obligation and the policy reasons for the proposed obligation; and

"(B) a period of 30 days has elapsed after the notice is submitted.

"(3) As used in this subsection, the term 'contract change' means a change to a contract under which the contractor is required to perform additional work. Such term does not include adjustments to pay claims or increases under an escalation clause.

"§ 1554. Audit, control, and reporting

"(a) Any audit requirement, limitation on obligations, or reporting requirement that is applicable to an appropriation account shall remain applicable to that account after the end of the period of availability of that account.

"(b)(1) The head of each Federal agency shall provide an annual report to the President and the Department of the Treasury regarding the unliquidated obligations, unobligated balances, and adjustments made to such accounts during the completed fiscal year. The report shall be provided no later than 15 days after the President's budget submission.

"(2) The report required by this subsection shall—

"(A) provide a description, with reference to the fiscal year of appropriations, of the amount in each account, its source, and an itemization of the appropriations accounts;

"(B) describe all current and expired appropriations accounts;

"(C) describe any payments made under section 1553 of this title;

"(D) describe any adjustment of obligations during that fiscal year pursuant to section 1553 of this title;

"(E) contain a certification by the head of the agency that the obligated balances in each appropriation account of the agency reflect proper existing obligations and that expenditures from the account since the preceding review were supported by a proper obligation of funds and otherwise were proper;

"(F) describe all balances canceled under sections 1552 and 1555 of this title; and

"(G) be provided to the Appropriations Committees of the Senate and the House of Representatives, to the House of Representatives Committee on Government Operations and the Senate Committee on Governmental Affairs, and other appropriate oversight and authorizing committees of the House and Senate.

"(c) The Congressional Budget Office shall—

"(1) annually estimate the outlay impact on the Federal deficit on an agency-by-agency basis, of payments and adjustments with respect to sections 1552 and 1553 of this title; and

"(2) include estimates required by paragraph (1) in the annual report of the Congressional Budget Office to Congress entitled 'The Economic and Budget Outlook', and its report entitled 'The Economic Budget Outlook: An Update'.

"(d) Each agency head shall establish internal controls to assure that an adequate review of obligated balances has been performed to support the certification required by section 1108(c) of this title.

"§ 1555. Closing of appropriation accounts available for indefinite periods.

"An appropriation account available for an indefinite period shall be closed and any remaining obligated or unobligated balance shall be canceled and thereafter shall not be available for obligation of expenditure for any purpose—

"(1) when the head of the agency concerned or the President decides that the purposes for which the appropriation was made have been carried out; and

"(2) when no disbursement is made against the appropriation for 2 consecutive fiscal years.

"§ 1556. Comptroller General reports on appropriation accounts.

"(a) In carrying out audit responsibilities, the Comptroller General shall report on operations under this subchapter to—

"(1) the head of the agency concerned;

"(2) the Secretary of the Treasury; and

"(3) the President.

"(b) A report under this section shall include an appraisal of unpaid obligations under appropriation accounts the period of availability of which has ended.".

(2) EXTENSION OF AVAILABILITY.—Section 1551 of title 31, United States Code, is amended by adding at the end the following new subsection:

"(c) The limitations on availability for expenditure prescribed in this subchapter shall apply to all other appropriations unless otherwise authorized by subsequent law that specifically—

"(1) identifies the appropriate account to be extended;

"(2) provide that such account shall be available for recording, adjusting, and liquidating obligations properly chargeable to that account; and

"(3) extends the availability for expenditure of the obligated balances.".

(b) EFFECTIVE DATE.—

(1) APPLICATION OF AMENDMENTS.—The amendments made by subsection (a) shall apply to any appropriation account the obligated balance of which, on the date of enactment of this section, has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section.

(2) RESTORATION OF CERTAIN UNOBLIGATED AMOUNTS.—On the date of enactment of this section, the balance of any unobligated amount withdrawn under section 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section, from an account the obligated balance of which has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, is hereby restored to that account.

(3) CANCELLATION OF UNOBLIGATED BALANCES.—Thirty days after enactment of this section, all balances of unobligated funds withdrawn from any account under subsection 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section, (other than funds restored under paragraph (2)) are canceled.

(4) CANCELLATION OF OBLIGATED BALANCES.—On the 3rd September 30th after enactment of this section, all obligated balances transferred under subsection 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, are canceled.

(5) OBLIGATIONS AND ADJUSTMENT OF OBLIGATIONS.—(A) After cancellation of unobligated balances under paragraph (3) or cancellation of obligated balances under paragraph (4) and subject to the provisions of subparagraph (B), obligations and adjustments to obligations that would have been chargeable to those balances prior to such cancellations and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

(B) Any charge made pursuant to subparagraph (A) shall be subject to the maximum amount chargeable subsection (b) under section 1553 of title 31, United States Code, as amended by this section, and shall be included in the calculation of the total amount charged to any account under that section.

(c) ANTI-DEFICIENCY ACT.—Section 1341(a)(1)(A) of title 31, United States Code, is amended by inserting before the semicolon the following: ", including an obligation exceeding the original obligation and the use of such obligation for new obligations".

Mr. GLENN. Mr. President, the Glenn-Roth amendment on expired appropriation accounts has been cleared on both sides of the aisle. I ask for its immediate consideration.

Mr. President, I suspect that most Senators have always assumed that if budget authority expires without being used, the funds revert back to the Treasury and U.S. taxpayers benefit. Alas, once appropriated, authority to spend money never goes away.

At this late hour, I hope my colleagues do not mind if I paraphrase Douglas MacArthur, who, if he were alive today, might say: "Old appropriations never die * * * nor do they fade away. They retire in the merged accounts to be used for a rainy day."

Senator ROTH and I are offering this amendment to put an end once and for all to perhaps the most incredible government accounting practice in history. This amendment is similar to the bill I introduced on Wednesday of this week, S. 2951. We are also offering this amendment on behalf of Senators GRASSLEY, PRYOR, and KOHL.

At the outset, let me thank my good friend, Senator BILL ROTH. A lot of the credit for this amendment belongs to Bill. He got the ball rolling on the committee with the Roth-Grassley bill, S. 2699. He played an important part in our hearing yesterday on this subject. I am glad to have his support on this Glenn-Roth amendment.

I also want to thank Senator GRASSLEY and Senator PRYOR for their support on this amendment. Senator GRASSLEY's concern over the impact of these accounts on outlay projections led to a key addition to this proposal. Finally, I want to thank Senator KOHL for his interest in this subject and his efforts to draft a critical reporting requirement in the amendment.

The thrust of our proposal is that it will eventually abolish these accounts that contain over $50 billion Governmentwide in unused and old spending authority.

We need reform immediately. I would like to take a few moments to tell you why.

First, these accounts have become enormous. The balances in them are well above what the agencies could reasonably expect to use. The Defense Department has $18 billion in its M accounts, and $30 billion in its merged surplus accounts. The other agencies have billions in these accounts as well.

Second, Congress has inadequate control over the use of these funds. Specifically, an agency like DOD can issue a change to an existing contract that increases the cost of a program above what Congress originally authorized and pay for it out of these merged accounts—all without ever coming back to Congress for approval. The most notorious case involved the B-1 bomber. The Air Force took $500 million out of the merged surplus account to pay for extra work on the B-1's electronic countermeasure systems.

Third, the maintenance of large balances of unobligated funds in the merged surplus accounts seems clearly unnecessary. These accounts are as large as they are now because the agency long ago found it didn't have to use these funds for a particular program. Why let unused spending authority sit around in this account forever—available to pay for extra work on this or another program?

Fourth, the M account contains left over obligated funds from all the programs within the same appropriations account going back many years. The same is true of the merged surplus account's unobligated balances.

That means that DOD can use funds from one program to pay for work on another program. This is exactly what happened on the B-1 bomber. In an Armed Services hearing last spring, I discovered this use of funds and thought then, as I do now, that this just isn't right.

Fifth, the public can't help but think that these accounts are slush funds. Calling them this might be an overstatement. Or maybe it is even erroneous. But how do you begin to explain to constituents that $50 billion worth of expired spending authority that can be tapped to pay for cost overruns is not a slush fund?

Finally, these accounts need attention because their financial management is terribly inadequate. This is particularly so with the unpaid obligations in the M accounts.

Far too many items languish in the accounts for too many years without any real management attention. Records are often lost, misplaced or sent to storage. This makes it even harder to tell if the obligations are still needed. And annual reviews, if done at all, are often done very poorly.

Several recent reports, including one by the DOD inspector general, demonstrated very serious shortcomings in the financial management of the M accounts. Systemic problems in the areas of reconciliation and validation, oversight and policy were found, and weak internal controls and poor record maintenance produced suspect accounting data.

What does all this mean?

I believe that the lack of good financial controls on these account presents a serious risk of misuse of funds and even fraud. One AID employee embezzled over $1.3 million out of the M accounts after warning his superiors about the weak controls in the accounts.

Even worse, the laxity with which these accounts are reviewed and their general availability to the agencies must create an environment conductive to sloppy or wasteful program management practices.

This amendment would do the following:

First, it would eliminate the M account, containing obligated balances, in 3 years. The unobligated balances in the merged surplus account would be abolished immediately.

This amendment also accommodates the agencies' need to satisfy valid obligations of the U.S. Government by keeping the appropriation accounts open for 5 years. These accounts, because they would be kept by fiscal year and line item, would have a greater degree of control and financial integrity than the merged accounts. At the end of 5 years, the balances are rescinded. Any remaining bills could be paid out of current appropriations under certain conditions.

The amendment would also require the agencies to report to Congress annually on the condition and use of these new 5-year accounts. It would require the agency to review the obligations and clean out what is not needed and justify what is in them. Congress will get the information it needs to satisfy itself that the financial integrity of the expired accounts is sound.

Before I close, I want to make an important point. Our bill does not abolish the M accounts right away. That makes us all a little nervous. Consequently, I view these reporting provisions as especially important during the next 3 years when agencies can continue to make payments out of the M accounts. We fully expect DOD and other agencies will use the next 3 years to clean up the M accounts and rid these accounts of the many invalid, unneeded obligations they now contain. What I and the other cosponsors of this amendment do not anticipate—I repeat do not anticipate—is that the cleaning up of these accounts through canceling old obligations will free budget authority to be used improperly. The agency inspectors general will be asked to monitor the cleanup of these accounts and report any financial high jinks that occur. We do not want a raid on these accounts.

The Governmental Affairs Committee held a hearing on August 2 on the management of these expired accounts. All the witnesses, including representatives of the Office of Management and Budget, General Accounting Office, DOD inspector general and the Department of Defense, strongly endorsed the approaches embodied in this proposal.

I urge my colleagues to support this amendment.

EXPIRED APPROPRIATIONS ACCOUNTS

Mr. KOHL. Mr. President, the importance of immediate reforms to prevent continuing abuses of expired appropriations accounts cannot be ignored. When I was a member of the business community, I have often heard it said, that "if the Government were only run like a business we wouldn't have these problems." Government and business are very different, and I know that the private sector is not always a model of good management. However a common bond in the management of any organization, public or private, is sound financial management, accurate accounting, reliable information, and of course, rational spending practices.

From what we know about expired appropriations accounts, it is clear that we have has failed to meet these fundamental management standards. Today's amendment is a product of a bipartisan effort to restore some sanity and accountability to this process. Senators GLENN, ROTH, PRYOR, GRASSLEY, and I recognized that Congress must act to protect the integrity of appropriations and stem the potential growth of the Federal deficit. This amendment does so while preserving the flexibility of agencies to find emergencies, meet unanticipated justified costs, and make necessary adjustments. I have been pleased to work with my colleagues to address issues of such importance to the Nation.

This amendment dismantles a "financial formula for failure" in agencies ranging from the Department of Defense where the expired accounts funds are over $18 billion, to the Department of Agriculture where it is an estimated $183 million. The General Accounting Office has determined that a total of $28 billion is sitting in these accounts at 20 Federal offices—plus the Executive Office of the President and independent agencies.

The amendment improves the integrity of the appropriations process, sets controls on the use of Federal funds, restricts access by agencies so that funds cannot be applied to unauthorized or invalid obligations, and perhaps most important requires agencies to report annually to the Congress and the President as to the existence and use of all appropriations accounts.

As chairman of the Subcommittee on Government Information and Regulation, I am bothered by the fact that we do not know how many expired accounts exists; we do not know how much in unliquidated obligations exists; we do not know how much in unobligated balances exists. If we are serious about controlling Federal spending, then we must have a map to navigate. Our objective is to lead the public out of a financial swamp, not deeper into one.

IMPROVING CONTROL OF EXPIRED APPROPRIATIONS ACCOUNTS

Mr. ROTH. Mr. President, for several decades, I have been working to improve government accounting and financial practices. Over the last year, I have focused on a range of initiatives including a chief financial officer for the Federal Government and improved management of expired appropriations accounts. Today, Senators GLENN, GRASSLEY, PRYOR, KOHL, and I are proposing an amendment that makes great strides in clarifying the Government accounting code. The amendment that we are proposing improves the ability of the Department of Defense as well as the agencies to efficiently execute programs that we are authorizing in this bill. It has the added benefit of preventing a potentially uncontrollable multibillion dollar increase in the Federal deficit.

Yesterday, the Governmental Affairs Committee held hearings on the issue of government accounting practices. It is difficult to shed light on the bureaucratic games in this arcane area. Witnesses from the Office of Management and Budget, the General Accounting Office, the Department of Defense deputy inspector general, and the Department of Defense Comptroller testified about their efforts to control long expired spending authority held in the merged surplus and M accounts. The DOD inspector general described the nightmare they discovered in auditing these accounts. All presented suggestions for resolving problems. They also commented on the bill submitted by Senator GLENN—S. 2951—and the bill I submitted with Senators GRASSLEY and SYMMS—S. 2699. The amendment we are presenting integrates the two bills with recommendations from the hearing and the version of the ROTH, GRASSLEY, SYMMS bill approved by the Senate Budget Committee on a 19 to 1 vote.

In conjunction with the chairman, and Senators GRASSLEY, PRYOR, and SASSER, I have been engaged in a broad range of activities to understand and resolve problems associated with these accounts. I congratulate my colleagues on their expeditious efforts in this esoteric area.

OVERVIEW OF M AND MERGED SURPLUS ACCOUNTS

A lot of people believe that after an appropriation expires, any unused spending authority is returned to the Treasury. However, under the current law, United States Code, title 31, sections 1552 and 1553, "expired" only means that for 2 years following the period for which Congress authorized spending, no new contracts can be written.

Even then the unused spending authority does not go back to the Treasury; it gets transferred into two accounts that have been accumulating since 1956. One account, called the M account, contains spending authority that has been set aside to pay bills on existing contracts. The other account, often called a merged surplus, contains old spending authority that has not been obligated. The merged surplus accounts can only be used to supplement the M account.

At the working level, budget analysts do not differentiate between the M and merged surplus accounts. The practice is to spend the M account

funds as needed and if they run low they can be supplemented by restoring old spending authority contained in the merged surplus accounts. Under the current United States Code, this old spending authority can legally be used to extend current contracts, thereby increasing the deficit. Since these two accounts contain spending authority that has been building up since 1956, it is as if each Federal agency has a large contingency fund. Billions of dollars are legally available for spending, even though not specifically authorized by Congress.

AGENCY USE OF M AND MERGED SURPLUS ACCOUNTS

Federal agencies can use these accounts to write more contracts than Congress intends for a given year's appropriation, to hide cost overruns, to circumvent the contracting process, and to keep programs alive despite budget cuts. The practice is to use the M account funds as needed and if the M account runs low, it is supplemented by restoring old spending authority contained in merged surplus accounts.

One reason that these sums have grown into billions of dollars appears to be that program managers set aside reserve spending authority in case of a cost overrun. No one really knows how much is in reserve. In addition, the M account includes spending authority set-aside for contracts which have become inactive. So the M account appears to be comprised of billions of dollars of obligations, when indeed much of it may only be unused spending authority.

One practice, which is completely within the law, is to use the spending authority in the M account to increase the value of a contract. For example, if there is a cost overrun on a contract, an agency may use M accounts to pay the bill, rather than going to Congress to get the funds. The best example of how this cost overrun justification is used to get around Congress appeared in the Air Force's attempt to fix the avionics on the B-1B bomber by adding more than $1 billion of M account funds to old contracts. We only found out about it when DOD answered a question from Senator GLENN during an Armed Services Committee hearing. Not only can the M account be used to fund cost overruns, it can also be used to keep old efforts alive.

In addition, agencies can leverage funds in the M account to maximize the amount of contracts; a kind of bureaucrats version of the old con game called pyramiding. In these situations, the agencies understate the amount of spending authority that will actually be needed.

An example of how this works was highlighted in the DOD inspectors general's discovery of such practices at the Army Depot Systems Command. The report on M accounts noted that an existing contract was only paritally completed when a new contract was awarded. The IG found that, "* * * the funding agency's unliquidated obligation increased, but the contractor's production did not." [1]

If an agency runs low on M account funding authority, there is no danger of being in violation of the Anti-Deficiency Act because authority can be refilled from the merged surplus account. All agencies possess merged surplus accounts comprised of unused spending authority.

FINANCIAL MANAGEMENT PROBLEMS

I have been particularly distressed by several recent inspectors general reports that state that neither the Treasury nor the inspectors general can verify or dispute the levels of accounts containing old obligations. These reports say that while some problems appear to be due to the difficulty associated with maintaining an audit trail of obligations and expenditures stretching more than 5 years, a large portion of the problem is due to perverse budget games. Given the lack of an audit trail at some agencies, the disposition of M accounts occurs without appropriate checks and balances. These accounts can be as flexible as the agency wants—it is a program manager's dream, a financial manager's headache, and a taxpayer's nightmare.

On the basis of the inspectors general reports, there are five problems that cut across agencies:

Validation of M account balances: The inability to reconcile balances against actual obligations;

Internal controls: The inability to certify bills charged to M accounts and the lack of internal review;

Financial management systems: The inability to track accurately M account balances and poor records maintenance;

Policy and procedures: Policy is incomplete, inconsistently interpreted and implemented, and inadequately enforced, not in compliance with GAO standards;

Quality assurance: The above lack of management indicates that there is a lack of routine quality assurance, and points to the necessity of a chief financial officer for the Federal Government.

INABILITY TO ESTIMATE OUTLAYS

A Joint Economic Committee staff analysis, released 2 weeks ago, found that even though M account balances have risen exponentially at DOD, outlays have remained relatively constant. The results are based on a statistical analysis that quantifies the fact that only 4 to 25 percent of the amount of M account outlays, from fiscal year 1980 through midyear 1990, can be explained by actual preexisting obligations. In other words, either agencies have great discretion in using the M account or there is a multi-billion-dollar backlog of outlays just around the corner. Given the tens of billions of dollars in these accounts across the Federal Government, the current deficit estimate may be significantly understated. While the White House and Congress are engaged in a budget summit to reduce the Federal deficit, their efforts may be largely ineffective since agencies can access tens of billions of dollars in spending authority and appear willing to do so.

MAGNITUDE OF THE ACCOUNTS

We may never know the exact magnitude of the problem. The Treasury Department does not maintain data by agency on the M account and does not even track the merged surplus balance. No one really knows the actual amount, and for some agencies there are different numbers depending on whether you talk to the agency comptroller, the agency inspector general, the Treasury Department, or the General Accounting Office.

The documents I have gathered, with Senators PRYOR and GRASSLEY, say that DOD has over $50 billion; the Agency for International Development, has anywhere from $3 to $11 billion; the Department of Energy may have over $325 million; and last year, the International Monetary Fund, not even a U.S. Government agency, received funds from the merged surplus account totaling $1.6 billion. We have found some discrepancies between the numbers that the GAO has reported and the agency figures. For example, the GAO says the Office of Personnel Management has an M account of over $13 billion, but OPM says they have less than half that amount—$6.3 billion; the GAO's number for the Department of Labor is more than $1.2 billion, but Labor says it only has $220 million; and according to GAO the State Department has $120 million, but the Department told us that they have over $230 million. There are other examples, however, such as the Department of Defense, where the numbers match.

It would take an army of auditors looking through thousands of documents to determine facts, and while the amendment does not specifically require the inspectors general to validate these obligations, it is a requirement called out elsewhere in the title 31 of the United States Code. I firmly expect the DOD inspector general to conduct such an audit as we transition the proposed amendment into effect.

SUMMARY OF THE AMENDMENT

The amendment that we are introducing clarifies the accounting techniques that Federal agencies use in managing funds. It allows for clear traceability between the amount of appropriations and the disposition of

[1] Inspector general, Department of Defense, merged accounts, 90-INS-05, March 22, 1990, p. 26.

funds throughout the life cycle of a given agency's spending authorization. Rather than unused spending authority flowing into a multi-billion-dollar contingency fund, the proposed amendment makes unavailable any spending authority that is not used in the time frame allowed by the appropriations committees plus a 5-year period to execute those contracts. It also precludes obligations in excess of the amounts Congress authorizes and appropriates for a given account. It thereby prevents the practices of pyramiding and extending contracts.

The amendment prohibits the use of M account funds for increasing the value of contracts, which removes an agency's ability to circumvent either the contracting process or congressional efforts to kill programs. Instead, it requires the agencies to explicitly account and budget for the executing an authorized program in a reasonable time frame. In addition, the bill removes an agency head's access to the merged surplus account.

Finally, perhaps most importantly, the bill removes the need for extensive government accounting, which accounting to several inspectors general reports, the agencies are unable to accomplish because of the difficult nature of trucking multiple years of appropriation that have been merged together as in the M account. Under the provisions in the amendment, there are only two types of accounts—obligated and unobligated—rather than the six in the present government accounting framework. Unused funds will not be merged together in two different contingency funds. Instead, they will be explicitly quantified and canceled, or made unavailable.

CONCLUSION

In conclusion, it is important keep in mind the potential magnitude of the problem. A recent letter from Air Force Secretary Donald Rice to the Armed Services Committee chairmen explained how the Air Force considered tapping the M account to pay for a $1.4 billion shortfall in funding for the B-2 Stealth bomber, but decided instead to use a less controversial source of funding. If the problem might have resulted such a large expenditure for just one program, we need to consider how big of an impact such practices may have across the Federal Government. And, we must act to prevent agencies from making similar dips into the M and merged surplus account.

Mr. GRASSLEY. Mr. President, I am pleased to join my colleagues in supporting this significant legislation to reform the laws governing the use of no-year funds by Federal agencies. The extent of cooperation and leadership on this issue, Mr. President, particularly by the Governmental Affairs Committee, has been truly remarkable.

I wish to thank the managers of the bill for accepting this amendment. I commend the distinguished chairman of the Governmental Affairs Committee, Mr. GLENN, for moving the bill forward and in a timely way. I would also commend the distinguished ranking member, Senator ROTH, for his leadership, for his sponsorship of the original M account bill in the Senate, which I joined, and for the analysis he supplied that provided needed insight into the poor management practices associated with these M accounts. And I would acknowlege the effort and interest of our chief cosponsors, Senators PRYOR, SASSER, and KOHL who helped improve the final product.

Mostly, Mr. President, I think credit for our ability to accomplish this bill and move it so quickly should go to the administration. The Department of Defense and the Office of Management and Budget recognized the problems—both potential and real—acknowledged that they should be fixed, and moved quickly to cooperate with Congress on this language.

What the language does, Mr. President, is it eliminates the merged surplus accounts of Federal agencies and restricts use of the current M account funds. This action will save the taxpayers tens of billions of dollars over the coming years. In essence, it will prevent a potential hemorrhage of outlays that would have dramatically increased future deficits.

This is a problem, Mr. President, that I first touched upon back on May 6, 1987. In a speech right here, before this body, I presented analysis to show we were providing DOD with more money than it could obligate—as much as 4 percent of the Defense budget—and that tens of billions of dollars in unobligated balances were building up. In point of fact, that money was later obligated and ended up in the M account. That account began to swell beginning in 1985 or 1986, as the JEC data shows, which is about the time Congress plateaued the Defense budget. The JEC data released by Senator ROTH last month seems to confirm my contention of 3 years ago that DOD was socking away money for later to cushion against future cuts, or to at least provide much more flexibility for DOD program managers when those funds would roll over into the M account and become no-year money. The problem is that increased flexibility led to contract pyramiding and systematic funding of cost overruns. This bill is designed to stop those two practices.

Mr. President, for the purposes of historical context in understanding the evolution of this M account problem, I ask unanimous consent to have printed in the RECORD my floor speech on unobligated balances from May 6, 1987, when I first raised this issue.

Again, Mr. President, I wish to commend all those who worked diligently and quickly on this language on behalf of the taxpayers of this country.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Congressional Record, May 6, 1987]

Mr. GRASSLEY. Mr. President, and Members of this body, before the adoption of the substitute by the distinguished chairman of the committee, Senator CHILES, as things were evolving, we would have probably under another procedure had an amendment offered by somebody who thinks we ought to spend more on defense to increase the numbers in the resolution that came out of the Budget Committee. But since this grand compromise has been put together, that means basically we are going to go through this debate on this important budget resolution without the proper consideration of whether the numbers suggested here or in the Senate Budget Committee resolution are the appropriate figures.

It seems to me when we are spending one-third of our budget or 30 percent of our budget on defense, we cannot be casual about whether we are spending $289 billion, $295 billion or $301 billion.

My amendment reduces expenditures for each of the next 3 fiscal years by $2 billion a year, and that would reduce budget authorization in this resolution from the $301.5 billion. This does not just deal with reducing defense expenditures. But this amendment of mine also reduces the revenue side of this compromise by a corresponding $2 billion a year for fiscal years 1988, 1989, and 1990.

In other words, Mr. President, this amendment would limit the increase in defense spending to halfway between the original committee number and the numbers amended here on the floor. It would reduce the revenues in this contingency fund for defense by $2 billion in each of the next 3 years.

I suppose I am a little surprised that just 2 years from this week in 1985, we were considering on the floor of this body a dramatic increase in the defense numbers beyond that recommended by the Budget Committee. Except for 1986, this body has gone along with the recommendations of the Budget Committee.

In 1985, we came out with a higher number, and on a vote of 51 to 48 on this floor, this body agreed to taking the real growth out of the budget resolution for defense, saving the taxpayers $17 billion, and loosened up money to save a lot of domestic programs that the President either cut or eliminated.

In that 51 votes, there were 39 Democrats, as I recall, and 12 Republicans. It was a fairly historic vote at that particular time because there had been real growth in the previous years of this administration for the budget defense. We decided enough was enough, and we decided it a clear-cut enough manner that both in this 1986 debate in the Budget Committee and in the 1987 debate in the Budget Committee we adopted resolutions that did not have real growth in the defense budget.

I have to ask, what has happened in the last 2 years that has so concerned a majority of the Members on the other side? I have always had to talk to a minority, the Mem-

bers in this side of the aisle, about the necessity for reducing defense budgets because we have always had more Republicans for increasing defense. But on the other side of the aisle there has always been a vast majority for reducing.

It seems somehow, without any debate, without any indication from anybody that the Defense Department is spending our money more wisely than before, that we are getting more for the defense dollar, that there is a greater need. But I would suggest there has been no demonstration of that on any of those points.

I do not know whether it is because people do not want to be accused of being soft on defense, or what the reason might be. But what has happened in this body in the last 2 years since we cut $17 billion out of the budget resolution on a very narrow 51-to-48 vote that has changed the reasoning in the terms of expenditure for defense. The only thing I know is that the majority has changed from the Republicans to the Democrats. But I would think that should have strengthened the position that somehow we were going to have a more fair division between defense and the domestic programs than what the President would suggest.

I would also suggest that there has not been demonstrated that we are getting more for that defense dollar than we have had before. If there is one way to send a clear signal from this branch of Government to the other branch of Government it is to hit them where it hurts the most. And the best way to do that, Mr. President, is to send a signal that you do not like the way they are spending their money.

But more important, whether it is at the level that I suggest or the level suggested in this compromise, I want to say that we are appropriating money faster than the best of the big spenders across the river in the Pentagon can spend it. You ought to think in terms of a certain amount of money being needed and justified. But beyond that, can it be spent? And if it can be spent? And if it can be spent, can it be spent wisely?

Based upon actual data so far this year, DOD's budget will end up with $16 billion in authority that will not be able to obligate before the end of the year. To demonstrate this is my colleagues on the floor, and I hope those back in their office will observe this when they come to their desks on the floor of the Senate, I have passed out a chart that demonstrates that we are appropriating money way beyond the ability not only to not spend it wisely but to spend it at all.

Last year's analysis showed the same size number, and the result was that last year we rescinded $5.3 billion.

The point I am making, Mr. President, is that we do not need to raise this defense number to $301 billion. I think the real question is not whether or not you are going to be pushed for being too soft on defense, but the real question is, how strong are we going to be on making sure that our defense dollars are being spent effectively?

It is not the size of the defense budget that is important; it is what we are getting for it that ought to be important. I, for one, do not believe that we should be raising taxes to pay for defense dollars that will only end up in the mattress across the river. That has happened year after year after year. We have seen, even beyond the estimates of the Department of Defense officials themselves, the category of unobligated, unspent funds growing more than what even the Defense Department thinks they would have.

How do you justify to your constituents back home, even those who say we ought to spend more on defense, giving more money to the Defense Department than they can spend? Why should they have the right to take that money that we give them that they cannot spend and put it away in a fund that grows even beyond their expectations?

I urge my colleagues to support a more prudent defense number, and I think that this number that I suggest brings back a little more balance to this package.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Ohio.

The amendment (No. 2568) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2569

Mr. McCAIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. McCAIN], for Mr. GARN, proposes an amendment numbered 2569.

Mr. McCAIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 21, strike out "$354,400,000" and insert in lieu thereof "$365,700,000".

On page 9, line 12, strike out "$5,746,723,000" and insert in lieu thereof $5,741,723,000".

On page 3, line 18, strike out "$6,749,657,000" and insert in lieu thereof "$6,743,357,000".

CHEMICAL DEMILITARIZATION

Mr. GARM. Mr. President, I have been greatly concerned about the safe and efficient destruction of this country's unitary chemical weapons for many years. Most of these munitions are located in Utah. However, many munitions are also located throughout the United States, so this is not simply a local matter.

The amendment that I have proposed authorizes $11.3 million for the design and final testing of the cryofracture alternative for chemical demilitarization. This funding will meet the Army's shortfall for fiscal year 1991. I would also request that report language reflect the desire of the Senate for the Army to seek reprogramming funds for the site preparation and planning, once the testing is successfully completed.

The amendment reduces the Air Force procurement line for the DMPS Program by $6.3 million. The amendment also reduces the Army research and development line for electronics and electronic devices by $5 million. The Senate Armed Service Committee has identified these programs as available funds for these reductions.

I strongly believe that the Army needs to continue to develop alternative technologies to the "baseline technology." As background, the Department of Defense has been developing the baseline technology at Tooele, UT, for nearly 20 years. The first full scale plant has been constructed at Johnston Island in the Pacific. However, the progress on this plant has not been encouraging. Therefore, I believe that the continued testing of alternatives will ensure that the Nation's stockpile of chemical weapoins will be destroyed in the safest and most cost-effective manner.

I thank Senator NUNN and Senator WARNER for their support of this program adn their efforts to encourage the Army to continue the development of this program.

Mr. McCAIN. Mr. President, this is a Garn amendment. It has been accepted by both sides.

Mr. EXON. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. EXON. I am very fearful that someday there is going to be a videotape taken and shown in a court on a very important matter that is going to pass the U.S. Senate, and I would not be suprised if the courts would maybe rule the matter unconstitutional.

I am sitting back here trying to at least get some sembalance of what is going on. I know that the hour is late. I know tempers are short. I know everybody is hustling to get things done so we can get out of here. I concur. I just wish we could slow down just enough. The last two amendments, I have been trying to hear what they are about. I have no idea what they are about. I am sure the managers do. I very much trust in them. I just wish we could have enough order so that at least we could hear when the motion is made to reconsider so we can basically understand what is going on.

The PRESIDING OFFICER. The Senator's point of order is well taken. The Senate is not in order. The Chair has tried to achieve order. The Senator from Illinois.

Mr. McCAIN. Mr. President, I ask for the consideration of the GArm amendment that I have at the desk.

Mr. EXON. Question: What is the amendment about?

Mr. McCAIN. Mr. President, the Garn amendment adds $11.3 million to the chemical demilitarization line, section 107, to meet an unfunded fiscal

year 1991 requirement identified by the Army for the fracture incineration program.

The amendment uses an offset cleared by the majority and minority staffs; 5.0 from an Army R&D line, electronics and electronics devices and $6.3 million from an Air Force missile procurement line, advanced procurement for the defense meterological satellite program.

The Army has indicated that funds for this purpose are needed in fiscal year 1991. The fracture program has been supported by Congress and offers a useful alternate approach, which may be needed if the Army's incineration process' does not work out.

Mr. EXON. I thank my friend. Was this matter considered in committee?

Mr. McCAIN. Staff informs me, I say to my friend from Nebraska, that this issue was not specifically addressed. The issue in general was.

Mr. EXON. It was not specifically addressed in the committee, but it has been cleared on both sides and is fully supported. I thank the Senator. At least I understand it. I appreciate that.

Mr. McCAIN. I thank my friend from Nebraska. I sympathize with his concern about the rapidity in which the legislation seems to be passing by.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Utah.

The amendment (No. 2569) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO 2570

(Purpose: To provide funds for research in connection with the inertial confinement fusion program at the University of Rochester, Rochester, NY)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. MOYNIHAN (for himself and Mr. D'AMATO), proposes an amendment numbered 2570.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 359, line 4, change to "$1,042,775,000".

On page 378 between lines 14 and 15, insert the following new section:

SEC. 3131. INERTIAL CONFINEMENT FUSION PROGRAM

Of the funds authorized to be appropriated pursuant to section 3101(1)(A) $167,900,000 shall be made available for the purpose of Inertial Confinement Fusion.

Mr. DIXON. Mr. President, in explanation to my colleagues this amendment by the Senators from New York, agreed to on both sides, provides additional funds for research in inertial confinement fusion at the University of Rochester in Rochester, NY.

It provides an additional $10 million for that program over and above the amount originally allowed for. It has been agreed to on both sides.

I now see the distinguished Senator from New York is here. He may want to elaborate further.

Mr. MOYNIHAN. Mr. President, if I may simply say that the most important fusion work being done in our Nation today is at Rochester. We look forward to the time when we may not need the Persian Gulf and the work at Rochester could well enable us to turn nuclear waste into usable energy. This is the way to go. I very much thank the distinguished manager for his cooperation.

Mr. McCAIN. Mr. President, may I ask my friend from New York if he clearly understands that these funds are not earmarked specifically for the University of Rochester, since it is the custom and tradition of the committee not to do so?

Mr. MOYNIHAN. Yes, of course.

Mr. EXON. Mr. President, I ask again was this matter covered in the Armed Services Committee?

Mr. DIXON. May I say to my distinguished colleague, my understanding is that the bulk of this had already been authorized. This was an additional modest amount that was negotiated on both sides by both distinguished Senators from New York State, and was acquiesced in by managers on both sides after substantial negotiations.

Mr. EXON. Well, in other words, we approved a certain amount, and now it is being increased.

Mr. DIXON. A modest amount of increase, incrementally.

Mr. EXON. I was somewhat confused. This is not earmarked funds, but going to the university?

Mr. DIXON. Rochester, for research.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment (No. 2570) was agreed to.

Mr. MOYNIHAN. I move to reconsider the vote.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2571

(Purpose: To reduce funds provided for certain projects in the Energy title of the bill and to increase funds provided for environmental restoration in title III of the bill)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON], for Mr. WIRTH, (for himself, and Mr. WILSON), proposes an amendment numbered 2571.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 16, strike out "$1,017,000,000" and insert in lieu thereof "$1,062,527,000".

On page 359, line 17; strike out "$302,043,000" and insert in lieu thereof "$292,043,000".

On page 361, strike out lines 20 through 22.

On page 362, line 7, strike out "$19,600,000" and insert in lieu thereof "$9,600,000".

On page 362, line 25, strike out "$128,587,000" and insert in lieu thereof "$106,806,000".

On page 364, strike out lines 4 through 6.

Mr. DIXON. This amendment by the distinguished Senator from Colorado [Mr. WIRTH], which is agreed to on both sides, transfers money in the bill reported by the Senate Armed Services Committee to the Defense Department environmental cleanup cause, and it has been agreed to on both sides.

Mr. McCAIN. Mr. President, I have to ask, even though it has been cleared, how much are we talking about that is being transferred?

Mr. DIXON. I think it transfers $45 million in budget authority in the bill reported by the Senate Armed Services Committee to the Defense Department environmental cleanup. This is budget authority not appropriated to the House or Senate energy appropriations bills.

The PRESIDING OFFICER. Is there further debate? If not, the question is on the amendment of the Senator from Illinois.

The amendment (No. 2571) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote.

Mr. WIRTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCAIN. Mr. President, I ask unanimous consent that Senator WILSON be added as a cosponsor to the last amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Nr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Georgia [Mr. NUNN].

AMENDMENT NO. 2572

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for himself and Mr. WARNER, proposes an amendment numbered 2572.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. . HONORING GENERAL MATTHEW B. RIDGWAY.

(a) FINDINGS.—The Congress finds that—

(1) General Matthew Bunker Ridgway, United States Army (Retired) served his country with great honor and distinction for more than 40 years;

(2) during World War II, General Ridgway commanded the 82nd Airborne Division and later the XVIII Airborne Corps, leading his soldiers in some of the toughest fighting of the European theater to achieve Allied victories in North Africa, Sicily, Italy, the Normandy invasion, the Battle of the Bulge, and the crossing of the Rhine and Elbe Rivers.

(3) in Korea, during the depths of the bitter winter of 1950, General Ridgway took command of the seriously demoralized Eighth Army, motivated and inspired it to "Stand and Fight," and led it on the offensive again;

(4) under his leadership, the military forces of the United Nations Command in Korea recaptured territory that had been lost earlier to overwhelming enemy forces and forced the onset of armistice negotiations; and

(5) after his commands in the Korean War, General Ridgway continued his outstanding service to his country by serving in the positions of Supreme Commander of Allied Powers in Europe and Chief of Staff of the United States Army.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of Congress that—

(1) General Ridgway deserves the highest honor and utmost respect of the United States and its citizens for his extraordinary service and dedication to their security; and

(2) a Congressional Gold Medal should be struck in honor of his lifetime of superior achievements.

Mr. NUNN. Mr. President, this amendment is an amendment on behalf of myself and Mr. WARNER. The amendment is one that a number of our colleagues may want to cosponsor. This is an amendment that honors retired Army General Matthew Ridgway. In particular, it would express the sense of the Congress that a congressonal gold medal should be struck in recognition of his outstanding service to our country.

Many Members of the Senate are familiar with General Ridgway's inspiring service during World War II and the Korean war. He commanded the 82d Airborne Division and the 18th Airborne Corps in many of the most significant campaigns in World War II. In Korea, he revitalized the Eighth U.S. Army and the entire United Nations command to push the enemy force back out of the Republic of Korea.

I urge my colleagues to join Senator WARNER and myself in honoring this great American military leader.

Mr. WARNER. Mr. President, I respectfully yield my place to the distinguished Senator from South Carolina, who served in Europe with the man we are honoring tonight.

Mr. THURMOND. Mr. President, I rise in support of the amendment honoring Gen. Matthew Ridgway, a great patriot and soldier.

General Ridgway's military career spanned more than 40 years of distinguished and honorable service. His career led him from Camp Eagle Pass, TX, where he served as a company commander in 1917 and culminated at the banks of the Potomac, as chief of staff, U.S. Army.

During World War II, General Ridgway served as the commander of the 82d Airborne Division. He parachuted with leading elements of the division into Normandy, where the division played a key role in securing a beachhead. I landed with the division that same day with General Ridgway and can personally speak to the general's leadership and bravery.

In 1951, President Truman appointed General Ridgway to succeed General MacArthur as commander in chief of the United Nations Command in Korea. One year later, he succeeded General Eisenhower as the Supreme Commander Allied Powers Europe.

Mr. President, the amendment proposed by Senator NUNN and Senator WARNER is a lasting tribute to this American hero and distinguished soldier. I urge my colleagues to give their unanimous support.

Mr. WARNER. Mr. President, I wonder if I might ask the distinguished Senator from New Hampshire to add some remarks, he served with him in Korea.

Mr. RUDMAN. Mr. President, I add the comments of the distinguished Senator from Georgia, the distinguished Senator from South Carolina.

I just want to say that General Ridgway was much admired even by those of us who served as mere first lieutenants in a rifle company. He was a great commander of the 8th Army. He was an inspiring commander. We saw him in the lines and he was one of the great generals of our time.

I commend my friend from Georgia, my friend from Virginia in offering this resolution to this great American.

Mr. WARNER. Mr. President, I am extremely proud to have the opportunity to honor Gen. (ret.) Matthew B. Ridgway, U.S. Army, whose record of service and dedication to the Nation is truly deserving of our recognition.

General Ridgway, I am proud to report, is a native Virginian—born at Fort Monroe on March 3, 1895. His career in the military began at West Point, where he was graduated as a lieutenant of infantry in the class of 1917.

General Ridgway distinguished himself in combat in World War II as the commander of the famed 82d Airborne Division, and later as corps commander of XVIII Airborne Corps.

General Ridgway led his soldiers through some of the toughest battles in the European theater. He was a brilliant tactician and a strong commander, who possessed all the best military virtues—courage, intelligence, leadership, and decisiveness.

He has been regarded not only by his fellow countrymen, but by our allies as well, as one of the most outstanding soldiers of World War II. As a veteran myself of both World War II and Korea, I can affirm that he was truly one of the great heroes of both those wars.

In Korea, it is widely recognized that he literally made possible the achievement of a tolerable outcome of that war. The Army that he found when he took command during the deeply cold and bitter winter of 1950 was bewildered and demoralized.

The transformation of the 8th Army, as a direct result of General Ridgway's demanding leadership, was astonishing and profoundly impressed all who witnessed it. The fighting spirit he installed in his troops reflected his own aggressive sense of battle.

One officer, then in the 27th Infantry described the situation as, "Magic, the way Ridgway took that defeated Army and turned it around. He was a breath of fresh air, a showman, what the Army desperately needed".

General Ridgway truly inspired his troops—the two grenades he wore on the shoulder straps of his uniform became his own trademark. His revitalized Army, though greatly outnumbered, wrested the initiative from the enemy and battled them to a standstill.

General Ridgway was subsequently appointed Supreme Commander for the Allied Powers, Commander in Chief of the U.N. Command in the Far East, and Commander in Chief of the Far East Command in Japan, succeeding General MacArthur.

A year later in May 1952, General Ridgway was named Supreme Commander, Allied Powers Europe, with headquarters in Paris, succeeding General Eisenhower.

In the summer of 1953, he departed Europe to become Chief of Staff of the Army.

General Ridgway has been awarded the Distinguished Service Cross with Oak Leaf Cluster, the Silver Star with Oak Leaf Cluster, and the Purple Heart, to name just a few.

I know that all my colleagues are proud to join in honoring this brave and distinguished soldier.

General Ridgway, we thank you again for the noble service you have rendered to the Nation, and we wish you many more long and happy years.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment of the Senator from South Carolina.

The amendment (No. 2572) was agreed to.

Mr. WARNER. Mr. President, I ask that the previous amendment reflect the Senator from South Carolina to be cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2573

(Purpose: To authorize the President to initiate multilateral efforts to establish an international force to restore peace in any region where the national security interests of the United States are directly threatened by an armed aggressor.)

Mr. SPECTER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 2573.

Mr. SPECTER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

In the event Iraqi hostilities continue, and action is not initiated under article 42 of the U.N. Charter to force cessation of such hostilities, and the President determines the national security interests of the United States may be directly threatened, the President of the United States should initiate negotiations to create a multilateral air, sea and land force outside the United Nations to furnish such assistance as may be necessary to restore international peace and security in Kuwait.

Mr. SPECTER. Mr. President, this amendment provides that in the event that Iraq continues hostilities, and action is not initiated under article 42 of the U.N. Charter of force the cessation of such hostilities, and the President determines that the national security interests of the United States may be directly threatened, the President shall initiate negotiations to create a multinational air, sea, and land force outside the United Nations to furnish such assistance as may be necessary to restore international security and peace in Kuwait.

Mr. President, this is a companion to the resolution which was adopted last night, 97 to nothing, which provided for multinational action under article 42 of the U.N. Charter. It is our hope that such action will be forthcoming. But in the event that is not successful by virtue of a veto or otherwise, the purpose of this amendment is to provide authority and encouragement for the President to proceed outside the purview of the United Nations to establish a multinational force so that the United States may have assistance from others in restoring peace in the Mideast and in Kuwait.

The PRESIDING OFFICER. Is there further debate?

The Senator from Virginia.

Mr. WARNER. Mr. President, I commend the distinguished Senator from Pennsylvania. I think it is a very valuable addition to the legislation, thus far.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I tried to hear. I think I heard what I heard. Here we are at 5 minutes after 1 with everybody rushing for adjournment, and if I understood what the Senator is proposing, it is not just another resolution, it is not just another salute to someone. If you listen to what he said, we are taking a suggestion or at least authorizing, at least making some suggestions to the Commander in Chief as to what he might or might not do or should or should not do in a very, very serious international situation.

I do not believe that the Commander in Chief needs the encouragement to do things of the nature just outlined by the proposal made by the Senator from Pennsylvania. This is an extremely serious matter. I would hope we would not want anything passing the U.S. Senate at this late hour in the day or early hour in the morning that could later be described as a Gulf of Tonkin resolution.

I am not going to insist for a rollcall vote on this but if we go to a vote, I will want to be recorded in the negative.

The PRESIDING OFFICER. Is there further debate?

The Senator from Alaska.

Mr. STEVENS. Might I ask the Senator from Pennsylvania what his intention is with regard to the War Powers Act in connection with this amendment?

Mr. SPECTER. Mr. President, I do not believe that this would have any impact on the War Powers Act and I would reiterate that this really tracks the action taken by the Senate last night unanimously, 97 to nothing, when this identical language was used to provide for action within the United Nations. And that action could be thwarted by a veto or it might not occur, and in the debate last night, this Senator was the only one to make reference to the Gulf of Tonkin resolution and saying the resolution which was put forward yesterday under the sponsorship of the chairman of the Foreign Relations Committee and the ranking member and about many other Senators I had read the Gulf of Tonkin resolution and pointed out that factor.

But it seems to this Senator that I do agree with the Senator from Nebraska, that this is a serious matter. There is no doubt about it. And it was a serious matter which was passed last night. But I do believe that if the processes under the U.N. Charter article 42 are not satisfactory, that this is an expression that should be made by this body.

The PRESIDING OFFICER. The Senator from Alaska retains the floor.

Mr. STEVENS. Mr. President, I think I am one of the few people here who voted against the War Powers Act, and I still maintain that it gives the President power to put the United States into situations which will lead to war beyond the power he previously had.

That happens to be the law now, and I thought it very clearly stated the extent to which the Congress had authorized the President under such circumstances.

I would like to ask the Senator from Pennsylvania another question.

What authority does this give the President that he does not have under the War Powers Act and under existing law?

I fully well understand I might say to my friend from Pennsylvania that the resolution last night authorized, requested us to take action pursuant to the U.N. Charter and our treaties pursuant to that charter. I supported that action. But I take it it is a little different than telling the President of the United States to organize a war party and take Kuwait back.

Mr. SPECTER. I am delighted to respond. I do not believe there is any treaty that is relevant here. But this is a sense-of-the-Senate resolution, so that it is precisely what occurred yesterday, except it covers the contingency if the action is not possible under article 42 of the U.N. Charter.

It may be that the President has approximately the same authority, if not identical authority. If so, it would not be the first sense-of-the-Senate resolution or action taken by the Senate or Congress which restated what the

President already had the authority to do.

Mr. STEVENS. Mr. President, this Senator has no problem with the President of the United States as Commander in Chief and particularly pursuant to the authority he would have to work through the United Nations to try and bring about resolution of the Kuwaiti problem and restore Kuwaiti's sovereignty.

This Senator would have extreme difficulty right now in taking the position to urge the President to actively go out and organize what amounts to a task force, to do just that without regard to the provisions of the War Powers Act as I think give him tremendous powers. It would seem to me that this is the kind of thing that even as a sense of the Senate that ought to be more deliberate than this.

I say that as one who firmly believes the President should show the power and might of this Nation in the most effective way possible. But I question seriously whether we should go further than we have already gone with regard to the U.N. resolution until the United Nations acts. I wonder if the Senator would not want to see what happens in the United Nations before we ask the President to do this.

Mr. NUNN. Mr. President I share the sentiment of the Senator from Alaska. I just saw this amendment. I know it had been given to us and I know the staff had been working it. I think at this hour of the night, with the seriousness of this amendment and what it conveys on behalf of the United States, that we have to make sure every Senator understands it and have to make sure the Foreign Relations Committee had completed focusing on it. So there would be no way we could agree on this amendment at this hour of the night on behalf of anyone.

For one thing, most of what is happening right now in terms of talking about the use of force or the deployment of force is to prevent further aggression. Basically this is saying we are going to organize a force and go in and have a direct confrontation with 1 million people under arms that are already there. I do not know that anyone is contemplating that at the moment.

I believe there are all sorts of embargoes that are hopefully underway. I think we could consider the possibility of cutting pipelines. I think we could consider the possibility of blockades. There are four or five things that I think are more appropriate in terms of getting the Iraqis out of Kuwait than organizing an international force and going in and invading at the moment. I may change my mind later.

But I would be able to agree with this tonight. I think we ought to make our position very clear that we think there has been aggression, that we want the Iraqis out of Kuwait, that we ought to make our position clear that we are going to join with others if requested by Saudi Arabia to help deter any further aggression.

But there are other steps that may be preferable to this as far as taking steps to get the Iraqis out of Kuwait. I just do not believe we ought to pass this tonight.

Mr. STEVENS. Will the Senator yield just one moment?

Mr. NUNN. I am happy to yield.

Mr. STEVENS. Mr. President, we received word earlier this evening that the Iraqi tanks are now on the border of Saudi Arabia. The President of the United States has a most touchy circumstance to deal with. I think this is the time when the Senate ought to keep its powder dry in terms of what we must do to help our Commander in Chief, rather than giving him instructions on what we think he should do that might well add to the problem.

This, I think, is probably the tinderbox of the world right now, and I am not ready to assist to light the match.

Mr. SPECTER. Mr. President, I am a little surprised to hear the argument advanced by the distinguished Senator from Alaska because all of those were equally applicable to the resolution which he supported last night. When you talk about the tinderbox of the world and you talk about giving direction to the President, of course, the sense-of-the-Senate resolution does not give direction to the President; it makes a suggestion. But all of those considerations were equally applicable to the resolution which was passed 97 to nothing last night.

When I hear the comments of the distinguished chairman of the Armed Services Committee, the alternatives were spelled out in the resolution last night with respect to the suggestion of a blockade and with respect to the suggestion of economic sanctions, so that there is no need in this resolution to repeat those alternatives. This sense-of-the-Senate resolution is limited to a gap which was present in the one last night.

Mr. President, I am well aware of the 1:14 hour of the night. If this matter is not be cleared, if it is to result in considerable discussion, it would be satisfactory to this Senator if there were commitments by the distinguished chairman of the Armed Services Committee and/or the distinguished chairman of the Foreign Relations Committee to have prompt hearings on this issue.

Mr. NUNN. Mr. President, I would say to the Senator that I think we ought to have some hearings on this. It is a question of how prompt they would be. It would be a question of how many people are going to be here next week. My impression is people are trying to leave. So I do not know that I would be able to give an absolute timeframe.

But I would say the Armed Services Committee is going to stay in very close touch with this situation. We will be arranging briefings. I am sure the Intelligence Committee is going to have briefings. I am sure all of us are going to be having a dialog with the administration from time to time. I am sure the Foreign Relations Committee is already involved in it. I see the Senator from North Carolina here on the floor.

So I would not be in a position of guaranteeing a meeting next week or anything of that nature in a formal sense. But I certainly would be in a position to say we are going to stay in close touch, as I am sure the Senator from Pennsylvania will, in this situation. I will be, personally, discussing this matter with the people at the White House and the Pentagon over the next 2 or 3 days.

Mr. PELL. Mr. President, I must say I just came into the Chamber and heard some of the argument. But I would concur with Senator NUNN, the Senator from Georgia, that it would not seem to me wise to go ahead with this proposal at this time. Actually, we have asked for a briefing tomorrow—or I guess that is today now—on the Iraqi situation to which all Members are invited, in room S-116. I am not yet sure of the time. I think it would be best not to vote on this at this time.

Mr. SPECTER. Mr. President, I had already commented, and perhaps the distinguished chairman of the Foreign Relations Committee did not hear the comment, that I would not press for a vote tonight in view of the lateness of the hour and the expressions which had been made.

When I had requested the hearings, I did not request them for next week. I am not expecting that Senators will remain to proceed with hearings on this matter. I did not set any timeframe, nor would I insist on one. It would be satisfactory to this Senator if the assurances are received in terms of what is practical to be conducted by the relevant committee.

Mr. NUNN. I say to my friend from Pennsylvania, if he would yield for a brief response, I would certainly do that.

I will consult with the chairman of the Foreign Relations Committee and ranking member and Senator WARNER and I will see what perhaps can be arranged even tomorrow while we are here. We are going to be here 8 hours tomorrow and if we can have somebody come over and brief us—and I believe that is going to be in the Foreign Relations Committee now and the Senator from Rhode Island already said other Members would be invited. So that would be the right time and right place for us to go in and focus on that. I would hope to be a part of that.

Mr. SPECTER. Mr. President, if I may direct an additional question of the distinguished chairman of the Armed Services Committee. Would the chairman be willing to undertake hearings of a more formal nature when we return in session after the recess?

Mr. NUNN. Absolutely.

Mr. SPECTER. That is satisfactory, Mr. President.

I must say that in proposing this sense-of-the-Senate resolution which covered a gap in what we did yesterday, and in receiving the clearance on both sides of the aisle, that the response is a little surprising in light of the resolution which passed last night. I think it really underscores perhaps the seriousness of the resolution which passed last night. But I do think it was an important resolution last night and we ought to follow through.

But if the United Nations does not act, this Senator believes that it is very important for the United States to secure assistance from our friends and allies and that we do maintain a very positive and very forceful response to the Iraqi aggression.

But, as I say, in view of this lateness, I am not going to pursue the matter any further at this time, with the assurances which have been received so far.

Accordingly, Mr. President, I do formally withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right. The amendment is withdrawn.

The amendment (No. 2573) was withdrawn.

Mr. NUNN. Mr. President, I know that all Members are anxious to go home and get a little sleep before tomorrow. We have two amendments that I believe will require some debate and probably a rollcall. That would be the Reid amendment on radiation victims and the Stevens amendment on the National Guard. And I also understand that there is a Daschle amendment on Air Force health study. I did not think that study amendment was controversial. I hope it is not, but it may be.

Mr. REID. It is my understanding, having conferred with the assistant majority leader, Senator SIMPSON, and Senator DOMENICI, that the Reid amendment will not require a vote.

Mr. DOMENICI. Mr. President, let me say to the distinguished manager, the Senator from New Mexico did not agree to that. As a matter of fact, the junior Senator, Senator BINGAMAN, is going to be here. He certainly wanted a vote.

Mr. REID. I am sorry; I thought Senator SIMPSON had conferred with the Senator. I am sorry.

Mr. DOMENICI. He may have indicated that, but that is not the case; and I apologize.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. I would say to my friend from Nevada, indeed I thought originally this would not be a rollcall vote. I did not want to mislead there, but the two Senators from New Mexico have an even more vital interest than I in it, and requested that.

I might say Senator DASCHLE's amendment is not one without controversy.

Mr. LEAHY. Will the Senator yield for a question?

Mr. NUNN. I will be glad to.

Mr. LEAHY. I wonder, if we do have two matters that would require rollcall votes—I commend the managers for moving things forward—I wonder if it might be possible to have the debate, and have the rollcall votes back to back at a time certain later this morning in daylight hours. These are not Dracula amendments; they are not the type that just come out at night. They have been on the list.

I wonder if we might do that? Even if SDI was up during the morning, it could be set aside for two back-to-back votes, the second one being a 10-minute vote.

Under those circumstances, some of us could probably listen to it on the car radio or watch at home.

Mr. NUNN. Mr. President, I think the Senator makes a good suggestion. What I propose to do is to list the amendments here that we have on our list on both sides, and then lock out all further amendments. Because if we do not do that, when we get back here in the morning we could have another 100 amendments.

That would be what I would propose if we are going to do that. Then we could have the debate on all the amendments tonight, and then have a period of time during the SDI where we decide by unanimous consent the time and vote on those amendments.

That would be the sensible way to do it, but I say I would first like to propound a list of amendments.

Mr. STEVENS. Mr. President, if the Senator will yield, I can save you breath. I have no desire, having waited and tried to negotiate all day long, to stay here and debate this amendment for 2 hours and leave at 4 o'clock, then come back at 8 o'clock to vote, and listen to someone else.

If the Senator wants to postpone the debate on the amendments that are controversial and have a reasonable limitation tomorrow, that is fine with me. But I am prepared to have the debate tonight, if people are here. But I am not prepared to talk to an empty hall on a policy issue like the guard issue.

Mr. NUNN. Perhaps we should just move along, then. I think the unanimous consent is not going to make any progress, and we should just proceed.

The PRESIDING OFFICER. The majority leader.

Mr. MITCHELL. Mr. President, I commend the managers for the diligence with which they have moved this bill forward and made enormous progress. I am confident that we will be able to complete action on the measure tomorrow.

As Senators know, it is essential that we all enact legislation extending the debt limit. I have had, over the past 2 days, extensive discussions with the distinguished Republican leader and several interested Senators, and I believe we have come up with a process for handling this that will be the most convenient for the largest number of Senators.

I am about to propound a request that will enable us to dispose of this in a relatively short period of time.

This agreement is, as I indicated, the result of extensive consultations with the distinguished Republican leader. I invite his comment as soon as I complete propounding it.

UNANIMOUS-CONSENT REQUEST

Mr. MITCHELL. Mr. President, I ask unanimous consent that the majority leader, after consultation with the Republican leader, may turn at any time, notwithstanding the provisions of rule XXII, to the consideration of H.R. 5355, a bill to provide for a permanent increase in the public debt limit, and that it be considered under the following time agreement:

That immediately after the bill has been reported by the Clerk, Senator HOLLINGS be recognized to offer an amendment on behalf of himself, Senator HEINZ, and Senator MOYNIHAN, to remove the Social Security trust fund from the budget; that no amendments to that amendment be in order; that there be 30 minutes of debate on the amendment, equally divided and controlled in the usual form, at the conclusion of which, without any intervening action or debate, there be a vote on, or in relation to the amendment; that no motion to commit the bill be in order prior to the commencement of the August recess; that following the disposition of the Hollings-Heinz-Moynihan amendment, the bill be laid aside; and that the bill not recur except by a call for the regular order made by the majority leader, after consultation with the Republican leader.

I further ask unanimous consent that after H.R. 5355 is laid aside, the Senate immediately proceed to the consideration of H.R. 5350, a bill to provide for a temporary increase in the public debt limit, and that it be considered under the following time limitation:

That there be 10 minutes on the bill with no amendments or motion to

commit in order; and that at the conclusion or yielding back of time on the bill, the Senate proceed to vote, without any intervening action or debate, on, or in relation to final passage of the bill.

Mr. President, that concludes the request. Let me provide a brief explanation of it before Senators are asked to agree on it.

The short-term debt limit goes to October 2. That is the second measure to which I referred, which I would hope we could pass by voice vote after 10 minutes of presentation of that measure.

On or prior to October 2, of course, Congress will have to act on a long-term debt limit. That is the first measure to which I referred. It is my hope that Senators would agree to this.

That measure would be set aside after the Hollings-Heinz-Moynihan amendment taking Social Security off budget is adopted, but would have to come back prior to October 2. So any Senator who wishes to offer an amendment, and there are many who have indicated their intention to do so, at least 14 at the last count, would have the opportunity to do so when that vehicle is brought back. No Senator would be prejudiced or lose any right to offer an amendment at that time.

The only reason for permitting the one amendment to it, the Hollings-Heinz-Moynihan amendment dealing with Social Security off budget, is that the bill itself, that is the permament debt limit extension as it comes from the House, has such a provision in it already which takes Social Security off budget, effective the fiscal year 1993.

The Hollings-Heinz-Moynihan amendment would move that date up to fiscal year 1991. Therefore, it is directly relevant to a provision in the bill.

None of the other proposed amendments are in the same category. Therefore, if we follow this process, we could complete action on the debt limit within 40 minutes, the only vote being on the Hollings-Heinz-Moynihan amendment to move Social Security off budget in fiscal year 1991 as opposed to fiscal year 1993, which is the bill.

The long-term debt limit would remain alive, required to be acted on prior to October 2, when the short-term would expire, and every Senator—the 14 who previously expressed their intention to offer amendments, and others if they so chose—could offer their amendments at that time.

We have spent a great deal of time on this, dozens and dozens of hours. I am particularly grateful to the distinguished Republican leader. He has probably spent more time than anyone, myself included, on it. I hope very much we can adopt this, which it is my intention it will be adopted, and it will be seen as a fair and appropriate manner to deal with this, enabling us to complete action shortly, and yet offering all Senators a full opportunity to offer their amendments on the long-term debt limit.

I yield to the distinguished Republican leader for his comments before asking the Chair for a final action.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. Mr. President, first of all, I had discussed this at length with the majority leader; in fact, numerous times with a number of my colleagues. I know there are some who have concerns about their particular amendments.

Let me indicate there are 14 amendments that we know of to the long-term debt ceiling. First, the Social Security amendment has been mentioned; then there is a second-degree amendment by Gramm, with reference to compliance with the Gramm-Rudman-Hollings; there is a Coats waste disposal amendment; a Kasten-Mack capital gains amendment; a Dole S&L amendment; McConnell, part-time farmers; Moynihan, Social Security payroll tax deduction; Coats or Exon, budget process reform; Metzenbaum, check cashing; Hollings, enhanced rescission; Sanford, budget reform; Exon, include debt ceiling increase in reconciliation; Boschwitz, honest baseline which excludes inflation; and Symms, remove highway trust fund.

That is just the first cut. I am certain there will be, as soon as other staff hear, behind these Members' 80 others.

So as the majority leader has pointed out, no one is disenfranchised; they will not lose any rights because, when the long-term debt ceiling comes up, it will be the responsibility of the chairman of the Finance Committee and Senator PACKWOOD, the ranking Republican, to deal with all these amendments, many of which are not even in the jurisdiction of the Finance Committee.

I believe it is a fair proposal. I also indicate I have had calls from my counterpart on the House side, Congressman MICHEL, the Republican leader. They want to go home. They do not want to stay all evening just because we want to stay all evening. They are waiting for the short-term debt limit extension and the adjournment resolution. Both of those can be done if we can get agreement on this. I know the record should show that there are a number of my colleagues on this side who are particularly interested in a capital gains amendment. I think there is some feeling of frustration that they cannot offer it and have a vote this morning or later this morning. But, on the other hand, if that is the case, I think there are others who would like to also offer their amendments and have votes on their amendments.

So it seems to me that since the Heinz-Hollings-Moynihan amendment is germane to the long-term debt ceiling with the amendment sent over from the House side, and since the majority leader has indicated to those three of our colleagues that they might have this opportunity, and that he is keeping his word in that respect, I think it is a fair unanimous-consent request, and I hope none of my colleagues on this side and the other side will object.

If there is objection, then the majority leader has no other recourse than to call up the short-term debt ceiling, see if that can be taken care of without amendment, pass the adjournment resolution, and then we can complete our work in the Senate tomorrow. The House can complete their work this evening.

I have no objection, but I leave it to my colleagues.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KASTEN. Reserving the right to object, and I will object, I do not understand why the House Rules Committee, in effect, ends up deciding what our rules will be. I ask the majority leader if we could have the same treatment given to the Kasten-Mack-Shelby amendment with regard to capital gains that he has given to the Hollings-Heinz-Moynihan amendment with regard to Social Security?

Mr. MITCHELL. I regret that will not be possible because, if we agree to that, then all of the other Senators who have potential amendments and who have agreed to withhold, and have done so, on the condition that there be no other amendments, other than the Hollings-Heinz-Moynihan amendment. That means that we would have, at a minimum, 14 amendments and, if the past is my guide, I expect that we would have many more than 14 amendments with respect to this measure, which means almost certainly that we will be in session continuously for the next several days in an effort to complete action on the debt limit.

Mr. KASTEN. If the majority leader will yield, why can the House Rules Committee pick the one amendment that would be in order in the Senate?

Mr. MITCHELL. I understand and appreciate the Senator's concern. There is, of course, a long history with respect to the Social Security off-budget provision. The Senator from Pennsylvania is not on the floor at this time. I apologize; I did not see him behind the Senator. My view was obscured.

He and the Senator from South Carolina and the Senator from New York have attempted to bring this for-

ward for over a year. I made a commitment to them that I will make every effort to do so. I believe that the provision has broad bipartisan support in the Senate, and for reasons which I am not privy to, the House did choose to put it in.

I think there is validity to the Senator's point that this amendment is being treated in a manner different from others, but I think there is also validity to the point that there is a rational basis for doing so, given the circumstances which have led us to this point and the makeup of the legislation as it comes from the House.

Mr. HEINZ. Will the Senator yield? Mr. President, the Senator from Wisconsin has asked why is the Senate, in his words, agreeing to a procedure by the House Rules Committee? I think if we were to examine the record that the Senate made prior to the July 4 recess, what we would find is the Senate went on record by a vote of 96 to 2, I say to my friend from Wisconsin, that we would not pass a debt ceiling bill unless Social Security was taken out of the budget deficit calculation. The Senator from Wisconsin voted for that, along with 95 of his colleagues.

I have no doubt in my mind that the reason the House and the Rules Committee acted the way they did is that we had, as a body, overwhelmingly gone on record stating what we would and would not do.

So I think, to the contrary, it would not be accurate, in this Senator's view, to say that the Senate is dancing to the Rules Committee. They really should have made that argument against it because we forced their hand. I would hope, therefore, the Senator from Wisconsin will reconsider both the premise of his argument, as well as his conclusion, and not object to this request.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. Mr. President, might I indicate, and I know the Senator from Wisconsin is aware of this, whether there is a vote or not on the other amendments, nothing is going to happen until September, in any event. It is going to go to conference, or it is going to be laid aside. I do not know of anybody else, I have not heard of any others who have amendments who would object. They indicate a willingness to agree with the unanimous-consent request. If I thought the Senator from Wisconsin was being prejudiced in any way, I would not suggest the request be made. No one's rights are diminished, as I understand it.

We will have to bring up the long-term debt ceiling; there is no doubt about it. The other one is going to expire October 2. Sometimes you need some lead time for all these amendments. So it surely will not be as late as October 2. There are at least 2 or 3 days work here, and by the time word gets around, it will be much longer.

So I say there is probably a good chance we will be on the long-term debt ceiling mid- or third week of September, if that is any consolation to the Senator from Wisconsin. Does the Senator object?

Mr. KASTEN. I object to the unanimous-consent request.

The PRESIDING OFFICER. Objection is heard.

Mr. MITCHELL. Mr. President, I deeply regret that.

I will now make a request that I will renew the latter part of my request and limit it only to the short-term debt limit and see if we can get agreement to pass that tonight after a short presentation and without amendment.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

MR. MITCHELL. I ask unanimous consent that the Senate immediately proceed to the consideration of H.R. 5350, a bill to provide for a temporary increase in the public debt limit and that it be considered under the following time limitation: That there be 10 minutes on the bill with no amendments or motions to commit be in order; that at the conclusion or yielding back of time on the bill, the Senate proceed to vote without any intervening action or debate on or in relation to final passage of the bill.

The PRESIDING OFFICER. Is there an objection?

The Chair hears noe, and it is so ordered.

MR. MITCHELL. I thank my colleagues.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5350) to provide for a temporary increase in the public debt limit.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The time is controlled by the two leaders or their designees.

MR. MITCHELL. Mr. President, I designate Senator BENTSEN.

Mr. BENTSEN. Mr. President, due to the lateness of the hour, it will be a short presentation.

Let me state that last Friday I received a letter from Secretary of the Treasury Brady, stating that on August 15 the Federal Government would run out of cash reserves, run out of funds, and had a bill of some $21 billion in interest coming due that obviously had to be met.

So what we have proposed here is an extension of the debt limit until October 2, to raise the debt limit to $3.195 trillion. That is an increase of approximately $72 billion.

Now, this is something that we have to pass. Obviously for us not to honor our commitments, not to meet our obligations would be disastrous. It has to be increased so the Government can accomplish those objectives. Failure to pass this increase would result in the financial markets being in extremely difficult condition, and not meeting the obligations of the U.S. Government would be unprecedented.

We will have to deal with the need for an increase in the long-term debt limit at a later time. I am hopeful that we will be able to do so in the context of reaching a substantial budget agreement between the Congress and the administration. In a summit agreement we must make serious and credible headway in bringing the Federal budget deficit down.

So, I strongly urge my colleagues to pass the extension, the temporary extension of the debt limit, and then that will be further followed by a permanent debt limit extension. I look forward to the consideration of some of the amendments that might be offered at that time.

Mr. President, I relinquish the floor.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. I represent Senator PACKWOOD and I have nothing to say. I yield back our time.

Mr. BENTSEN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 5350) was ordered to a third reading, was read the third time, and passed.

Mr. MITCHELL. I move to reconsider the vote.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I wish the record to show I voted in the negative on the temporary increase in the debt limit.

The PRESIDING OFFICER. Without objection, the Senator from Nebraska is so recorded.

Mr. SANFORD. Mr. President, I had pledged that I would not vote for another debt ceiling increase until the President and Congress had established a serious plan to reduce the the real deficits and the debt. That has not been done, I am sorry to say.

I will offer an amendment this fall to debt ceiling legislation. It will provide a definition of deficit that is honest. It will require the President to prepare a schedule for the reduction of this debt.

In the meantime, consistent with my pledge to the people of North Carolina, I am voting against this short-term increase being decided tonight. I wish the record to reflect that had this been a rollcall vote, I would have voted no, and hereby express my opposition to this increase in the debt ceiling.

HOUSE CONCURRENT RESOLUTION 360—PROVIDING FOR AN ADJOURNMENT OF THE HOUSE FROM THE LEGISLATIVE DAY OF AUGUST 3 TO SEPTEMBER 5, 1990, AND A RECESS OR ADJOURNMENT OF THE SENATE FROM ANY DAY BETWEEN AUGUST 3 AND AUGUST 10 TO SEPTEMBER 10, 1990

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Concurrent Resolution 360, just received from the House.

The PRESIDING OFFICER. The clerk will report the concurrent resolution.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 360) providing for an adjournment of the House from the legislative day of August 3 to September 5, 1990, and a recess or adjournment of the Senate from any day between August 3 and August 10 to September 10, 1990.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 360) was agreed to; as follows:

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on the legislative day of Friday, August 3, 1990, it stand adjourned until 12 o'clock meridian on Wednesday, September 5, 1990, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate recess or adjourns on any day from Friday, August 3, 1990, to Friday, August 10, 1990, pursuant to a motion made by the majority leader, or his designee, it stand in recess or stand adjourned until 10 o'clock ante meridian on Monday, September 10, 1990, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the majority leader of the Senate, acting jointly after consultation with the minority leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

Mr. MITCHELL. I move to reconsider the vote.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The Senate continued with the consideration of the bill.

Mr. NUNN. Mr. President, I would like to propound a unanimous-consent request, but I am going to list the amendments that we have on both sides that we know about, and I am going to ask unanimous consent that this be all the amendments permitted on this bill with the exception, of course, of the amendments that have already been set by unanimous consent for tomorrow.

Mr. President, I am going to read the amendments and then I will propound the unanimous-consent request and make reference to these amendments.

The amendments that we have are a Bryan amendment on NATO training in the United States; a Bingaman amendment on tobacco; a Daschle amendment on Air Force health study; a Dixon amendment on Federal prison industries; a Heflin amendment on warfare; a Metzenbaum amendment on Iraqi blockade; two Nunn technical amendments; one Nunn-Warner amendment, which is on additional authorization which will, I believe, be accepted; a Nunn technical modification to the strategic environment program; a Reid amendment on radiation victims; a Stevens National Guard amendment; a Domenici, strategic environmental program amendment—I have already called out the Stevens National Guard amendment—a Warner amendment on Milstar; a Warner amendment on ATBM, but that is covered under the SDI, so strike that one; a Rudman amendment on environmental provisions for closing military installations. I think it still has to be done. It should remain on.

We can strike the Rudman amendment on environmental provisions; an Armstrong amendment on Lithuania.

Those are the amendments that I have.

Mr. WARNER. Mr. President, there is one further amendment of the Senator from Virginia on the environment subject to being accepted on both sides.

Mr. NUNN. An amendment by the Senator from Virginia on the environment.

Mr. President, we are not asking for a time agreement on the amendments at this time. What we are asking for is that this be all the amendments in order on this bill with the exception of the SDI amendments, which are subject to the unanimous consent. So, Mr. President, I propose that as a unanimous-consent agreement.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. NUNN. I thank the Chair. I thank all Senators.

Mr. President, we do not have many amendments that are going to be contested. I know that there is a Daschle amendment on Air Force health study; there is a Reid amendment on radiation victims; there is a Metzenbaum amendment on the Iraqi blockade.

Perhaps we could proceed with one or two of those if we have the authors here, and then the other amendments, most others, can be accepted. So I would suggest that any amendment that the author would like to bring up now would be in order, but I would particularly like to have those that are most controversial so we can let Senators go home at a certain point, where we get to a point where we think there will be no more rollcalls.

Mr. REID. Will the Senator yield?

Mr. NUNN. I will be glad to.

Mr. REID. I have been waiting for several days. I am ready to proceed.

Could we proceed now?

Mr. NUNN. I defer to the Senator from New Mexico.

Mr. DOMENICI. I am expecting my colleague to arrive. I have not heard to the contrary. He is supposed to be here. I think he very much wants to be heard on their amendment. I do not want to delay the Senate. I would like to hear a brief argument on this amendment.

Mr. REID. Maybe I could at least get mine started. It will take maybe 6 to 7 minutes. Could we perhaps have a time agreement?

Mr. DOMENICI. Why don't we go ahead?

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia retains the floor.

Mr. NUNN. I yield to the Senator from Virginia.

Mr. WARNER. Mr. President, I would like to make the additional request that a second-degree amendment be reserved by the Senator from Virginia to one of the amendments enumerated.

Mr. NUNN. Which one?

Mr. WARNER. The tobacco amendment.

Mr. NUNN. Is there objection to that? I propound the unanimous-consent agreement that if there is a tobacco amendment by Senator BINGAMAN that Senator WARNER have a second-degree amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. You moved fast on the gavel there. I reserve the right to object. I probably will not object. I would like to ask the Chair or the Par-

liamentarian through the Chair whether the unanimous consent agreed to was not solid as to such a second-degree amendment?

The PRESIDING OFFICER. There was no reference in the unanimous-consent agreement as to second-degree amendments. However, the Parliamentarian would note that the amendments that were listed in the unanimous-consent agreement could be either first-degree amendments or second-degree amendments.

Mr. HELMS. I think we ought to leave the dog lie.

Mr. WARNER. Mr. President, to clarify, the Senator from Virginia now has the right to offer an amendment in the second degree to the amendment from the Senator from New Mexico relating to tobacco.

The PRESIDING OFFICER. The Senator is inquiring of the Chair whether or not he has the right to offer a second-degree amendment.

Mr. WARNER. That is correct.

The PRESIDING OFFICER. The Chair would hold that the Senator from North Carolina has at least registered the right to object. He has not raised objection.

Mr. HELMS. I do not object.

The PRESIDING OFFICER. He does not object. Therefore, the Senator from Virginia has the right to raise a second-degree amendment. Hearing no other objection, without objection, the Senator from Virginia does have that right.

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. NUNN. Would the Senator yield?

Mr. REID. Of course.

Mr. NUNN. I would like to propose that all the amendments that have been listed, with the exception of the Senator from Virginia's amendment that he has gotten the permission in the second degree, be first-degree amendments.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 2574

(Purpose: To repeal a provision of Federal tort claim law relating to contractor liability for injury or loss of property arising out of atomic weapons testing programs)

Mr. REID. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for himself, and Mr. BRYAN, proposes an amendment numbered 2574.

Mr. REID. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, below line 24, insert the following:

SEC. 1216. REPEAL RELATING TO CONTRACTOR LIABILITY FOR INJURY OR LOSS OF PROPERTY ARISING OUT OF ATOMIC WEAPONS TESTING PROGRAMS.

(a) REPEAL.—Section 1631 of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2646; 42 U.S.C. 2212) is repealed.

(b) RELATIONSHIP TO STATUTES OF LIMITATIONS.—(1) The period during which section 1631 of the Department of Defense Authorization Act, 1985 was in effect shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to any civil action for an injury, loss of property, personal injury, or death described in subsection (a)(1) of such section.

(2) In the case of any civil action referred to in paragraph (1) which was filed before October 19, 1984, and was subsequently dismissed pursuant to the provisions of section 1631 of the National Defense Authorization Act, 1985, the period beginning on the date of the initial filing of such action and ending on the date of the enactment of this Act shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to such civil action.

(3) If the period provided in any Federal or State statute of limitations applicable to a civil action referred to in paragraph (1) expires within the one-year period beginning on the date of the enactment of this Act, the action shall not be barred by such statute, but shall be forever barred if not commenced within one year after such date.

Mr. REID. Mr. President, I rise today to offer an amendment—namely the Radiation Victims Fair Treatment Act. This amendment is the same as my bill, S. 982, which I introduced last year, and which now has 38 cosponsors.

Mr. President, I ask unanimous consent that a list of cosponsors of S. 982 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LIST OF COSPONSORS

Bryan; Warner; Simon; Cranston; DeConcini; Mitchell; Metzenbaum; Thurmond; Hatch; Daschle; Bradley; Hollings; McCain; Rockefeller; Wirth; Shelby; Pell; Graham; Chafee; Sanford; Matsunaga.

Moynihan; Riegle; Sasser; Harkin; Burdick; Kohl; Kerry; Mikulski; Garn; Adams; Gore; Robb; Levin; Kennedy; Burns; Glenn; Cohen; Akaka; D'Amato.

Total Cosponsors: 40.

Mr. REID. Mr. President, late Wednesday evening—actually, very early Thursday morning—Senator HATCH's bill, the National Atmospheric Nuclear Testing Compensation Act, passed the Senate. I applaud the efforts of Senator HATCH, who is a cosponsor of my bill, to seek justice for the victims of ionizing radiation—victims of our own Government's negligence and the negligence of nuclear weapons contractors.

Senator HATCH's bill is a great step forward, but it is just the first step. We all recognize that a grave injustice has been done to the many victims of radiation exposure, and they have been effectively denied their day in court.

Between 1946 and 1962, approximately 235 atomic tests were conducted by the United States. Until 1985, those who incurred injuries as a result of exposure to radiation caused by these tests could file suit against contractors who participated in the testing programs. The contractors were indemnified by the Government for the cost of litigators, judgments, and settlement.

The 1985 Defense Authorization Act, however, included a provision, section 1631, offered by Senator WARNER—who, I am happy to say is now a cosponsor of this bill—which drastically altered the legal rights of these individuals by establishing the United States as the defendant in such suits and providing that these cases fall under the Federal Tort Claims Act [FTCA]. This amendment was adopted in conference without ever being considered by the House or Senate Judiciary Committees, and without being debated on the floor of either House.

Limiting radiation victims, both civilian and veteran, to suit under FTCA deprives potential plaintiffs of a variety of previously held rights, including the fundamental right to a jury trial.

In addition, because the United States is provided with certain sovereign immunity defenses not available to contractors, judgments on behalf of veteran and civilian claimants against the Government are effectively barred. This leaves the vast majority of those exposed to radiation in the Atomic Weapons Testing Program with no legal remedy.

In fact, this provision has resulted in the abrupt dismissal of approximately 50 lawsuits that had been filed by radiation victims against various nuclear weapons contractors, including the University of California, Los Alamos and Lawrence Livermore Laboratories, and AT&T. In addition, section 1631 has adversely affected the rights of approximately 220 civilians, former employees at the Nevada Nuclear Test Site, who had filed suit against their former employer, Reynolds Electric & Engineering.

The Radiation Victims Fair Treatment Act would repeal section 1631, restoring to individuals the right to seek redress in court for acts or omissions by atomic weapons contractors which, in many cases, have resulted in premature death or painful disability.

The sad part about all this is that the Government and the contractors knew there were dangers involved with radiation exposure, and they failed to tell the people in Nevada and Utah who were downwind from the tests. And they failed to tell their own employees.

A Federal judge in Nevada outlined the Government's and the contractors' gross negligence. A few specific examples are worth listing here:

First, failure to establish or supervise the establishment of adequate procedures to monitor and determine the amount of radiation in a given geographic area or the amount of radiation to which an individual had been exposed.

Second, failure to instruct and advise workmen at the Nevada Test Site as to the possible detrimental health effects of radiation exposure.

Third, failure to provide protective clothing or other apparatus to eliminate, reduce, or minimize the radiation exposure and consequent adverse health effects.

Fourth, conducting drilling and other test related operations in areas of known radiation contamination.

Fifth, continuing to expose or to allow the exposure of workmen to radiation contamination well knowing or having reason to believe that said continued exposures were actually or potentially unsafe.

Sixth, failure to advise workers that because of their exposure to radiation they should have medical checkups and followup medical observations in order to diagnose as early as possible any cancers which might develop.

In the lawsuit of Alice P. Broudy versus United States of America, et al., the U.S. district court judge notes in ruling in favor of the defendent's motion for summary judgment that, "The Government has been aware of the hazards of radiation since the inception of the nuclear weapons program" and cites a number of different documents indicating that the Government knew exposure to radiation could cause cancer, genetic defects, decreased fertility, cataracts, and leukemia. This also means that the university and corporate contractors also knew this from the beginning.

The horror stories of the victims are endless. When leaving her employment at the Nevada test site after a year and a half, Bonnie McDaniel was told she had had too much radiation and she should not have dental or lung X rays. Her son Shaun, who is now 20 was born with cleft lip, no stomach muscles and elephant man disease. He had the first of many operations when he was 3 days old. Nobody told her it was dangerous.

In another of many cases, Bennie F. Levy, who worked at the Nevada test site for 27 years, began to notice, in 1956, that all his friends were dying. After researching the death certificates of 330 fellow workers, he found that 202 had died of colon cancer. Mr. Levy is now the president of the Nevada Test Site Radiation Victims Association. He is also very ill.

When I was growing up in Searchlight, NV, we could watch the nuclear explosions light up the dark mornings. But we were lucky; the wind was blowing the other way. Some, though, were not so lucky.

Kent Carroll was tending sheep downwind when a bomb was set off in 1953. He was 17. After 9 years of acute suffering, he died of pancreatic cancer.

Veterans involved with the tests, employees of the test sites, and innocent downwinders have sacrificed for their country in extraordinary ways. These patriotic citizens deserve better treatment than they have received from the Government they have served. They deserve fair treatment. They deserve their day in court to seek redress from the parties responsible for the radiation.

In a judicial impact statement prepared by the Administrative Office of the U.S. Courts, Director Ralph Mecham states that "If section 1631 were repealed, there could be additional litigation in the Federal courts, but it does not appear that a significant number of new claims would be filed. * * * The nature of the claims indicates that cases could be consolidated and many could be settled or otherwise disposed of without going to trial." He goes on to state that, "This type of case should not be beyond the ability of the courts to handle, as the courts have had experience in dealing with complex product liability and disaster cases."

The repeal of the Warner amendment will not create a burden for the courts. Only 51 cases subject to the Warner amendment had been filed as of June 1, 1986. A large number of these were veterans, and the enactment of the Radiation-Exposed Veterans Compensation Act of 1988 has made it easier for veterans to receive benefits if they are suffering from 1 of 13 identified cancers and they had participated in a radiation-risk activity.

At present, there is one consolidated case of 220 claims still active in the U.S. District Court of Nevada. The plaintiffs are test site workers who experienced radiation exposure. Repeal of the Warner amendment would not bring additional claimants because the statute of limitations in Nevada is 2 years, and any claimants became aware of their claims in 1979. In addition, it is doubtful that new claimants would appear based on recent discovery of ill effects from exposure, since most of these took place in the 1950's and 1960's, and the diseases are generally past their expected latency periods. This is the analysis of the Administrative Office of the U.S. Courts.

Besides passage of the radiation-exposed veterans bill, the Senate has just passed Senator HATCH's downwinders bill. Senator HATCH's bill will eliminate many other possible claims by compensating innocent civilians who lived downwind from the test site.

In fact, the Warner amendment has served to lengthen radiation cases. In 1985, the defense lawyers in the test site workers case in Nevada were preparing to go to trial when the Warner amendment was enacted. Five years later, the Government was still seeking dismissal of the case.

Make no mistake, there will not be an outpouring of citizens suing Government contractors. Many of these victims will be compensated by either the veterans or downwinders compensation bills. Though the $50,000 they will receive from the downwinders bill will not pay for much, given current health care costs, it is a sign to them that their Government is sorry for what it did. This is all most of these patriotic victims want: an apology, a gesture.

Only those most desperate will take the chance of seeking redress in the courts. For if they accept compensation from the downwinders bill, their case will be considered settled. They will have to make a choice. But the right to a day in court is every American's right, and these victims should not be treated any differently.

It is unconscionable that we drag our heels on this any further. Some of the radiation victims with unheard claims have died, and many are dying. Let those who are dying know that we understand their suffering.

This bill does not guarantee compensation, but, rather, reiterates a basic American right: the right to a day in court. There is no other way to honorably address this issue.

Mr. GRASSLEY. Mr. President, it is ironic that exactly 1 year ago today, the subcommittee on courts, of which I am ranking member, held a hearing on the Senator from Nevada's proposal. That bill, S. 982, was favorably reported by the subcommittee, and is now pending before the full Senate Judiciary Committee.

Tonight, we again pause to consider the tragic case of the hundreds of thousands of servicemen, civilian Government workers, employees of private contractors, and downwind civilians affected by exposure to radiation as part of our Government's Atomic Weapons Testing Program. More than 200,000 people are estimated to be affected.

The proposed solution, again, is to permit these private parties to bring lawsuits against various Government contractors. This solution is tempting; it is billed as a return to the status quo before passage of the Warner amendment on the 1985 authorization bill. It is simple, straightforward, and appeals to our sense of justice by giving people "their day in court."

The attractiveness of the proposal to repeal the Warner amendment is demonstrated by the impressive array of cosponsors to S. 982. It is a tribute to the dedicated efforts of those who sin-

cerely believe that they have been deprived of their only legal remedy.

Mr. President, I am not a lawyer, but I am a keen observer of our civil justice system. I frankly believe that litigation is almost never a solution to people's problems. This is particularly true in this case, where these victims simply can't afford to wait through years of discovery, trial, and appeal. They need to have their physical and medical needs cared for now—not based on the false hope of some large, but speculative, recovery in court years from now.

Moreover, our federal courts are already choked beyond recognition with pending cases, civil and criminal. Far too often, Congress creates dramatic new causes of action, without so much as a nod to what it might mean to the overall administration of justice in America.

Haven't we learned that merely providing a new cause of action is a disastrous approach? The litigation solution works as a cruel hoax on the intended beneficiaries; it holds out the prospect for recovery, but frustrates the victims by delay and expense. The Justice Department testified that radiation cases take much longer to prepare and try than do most other types of litigation; a typical case would take more than 5 years to resolve. Worse, simply repealing the Warner amendment will do nothing to solve the enormous proof problems that plaintiffs will face, attempting to link their exposure to current disease.

A straight repeal of the Warner amendment may give some a warm feeling, and it will surely bring a smile to a lawyer's face, but it will mean scant little for those who need help the most.

Mr. President, these people don't need lawyers, they need money to pay their medical bills, to care for their sick or terminally ill.

If the Government is responsible, and the evidence strongly suggests that it is, then let's create a compensation system outside of the courts to provide relief—faster, without litigation expenses, without having to prove fault, and without lengthy appeals.

In recent years, we have shown a preference for compensation over ltigation, with enactment of the child vaccine compensation legislation, the Radiation-Exposed Veterans Compensation Act of 1988, and the Veterans Dioxin and Radiation Exposure Act (Public Law 98-542) among others.

I wish that we had before us something other than a straight repeal of the Warner amendment; a nonlitigation compensation system, where claimants could represent their claims and be compensated in a timely fashion. Unfortunately, that's not the option before us.

Mr. DOMENICI. I was going to say, I am not going to ask for a rollcall vote.

Mr. WARNER. I thank the Senator very much.

Mr. DOMENICI. Senator BINGAMAN does not desire a rollcall vote.

Mr. BINGAMAN. I do not.

Mr. WARNER. Mr. President, I yield.

Mr. NUNN. If the Senator will yield, I believe I am able to announce to all Senators—and I can assure Senators this is the first time I have been able to announce it, and I have consciously been waiting—we do not foresee any other rollcall votes tonight. There may be two or three, and they will be stacked until after the last vote on SDI tomorrow afternoon.

Mr. President, I think all Senators who do not have amendments involved here could, therefore, either stay and listen to the debate, or if they have other things to do, they could take care of other things. So I make that announcement.

Mr. McCLURE. What time would we be coming in the morning.

Mr. NUNN. Nine o'clock on this bill. I do not know what time we will be coming in.

The PRESIDING OFFICER. The Senator from Virginia retains the floor.

Mr. WARNER. I yield the floor.

Mr. MITCHELL. Mr. President, as I understand the unanimous-consent agreement with respect to the SDI votes, there is first scheduled one-half hour on the Warner amendment and then 4 hours on the Bingaman amendment, at which time there will occur a vote on the Bingaman amendment; am I correct?

Mr. WARNER. Mr. President, the leader is correct, if not before the expiration of 4 hours.

Mr. MITCHELL. So the Senate will be in at 9. There is scheduled a maximum of 4½ hours of debate on SDI before the first vote occurs. Senators should be aware that the vote could occur prior to the expiration of 4½ hours, if all of the time is not used.

But in any event, there will then ensue under the order additional debate and vote on SDI, following which any votes ordered this evening will be stacked to occur.

Mr. NUNN. The majority leader is correct.

Mr. MITCHELL. I thank my colleague.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I simply wish to commend my distinguished colleague from Nevada for bringing this legislation of which I am a cosponsor. I wish to add one bit of history.

During the period when the Republicans were in the majority, the Senator from Virginia was the chairman of the Subcommittee on the Armed Services Committee for Strategic and Theater Nuclear Forces. It was at that time the administration forwarded to the Senate a package of legislation of which this particular legislation, which the Senator mentioned, having been sponsored by the Senator from Virginia, was a part of a large package of pieces of legislation, and it was handled by the Senator from Virginia in a routine way without hearings. To his knowledge no one at that time objected, and it was incorporated into the armed services authorization bill of that year and eventually became law. That is the corporate history of this particular problem.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I say to the distinguished Senator from Virginia, knowingly or unknowing, he did a great thing for the country and it is deplorable that tonight we are probably going to undo that. Frankly, I cannot think of worse legislation than that which is before the Senate right now. And I truly hope that one way or another it does not become law.

Let me briefly tell the Senate why. The United States of America as a government has been involved in atomic and nuclear activity in defense of this Nation and for nuclear deterrent activities for many, many years. There is longstanding policy that says that the United States of America is solely responsible for the nuclear and atomic activity of the type that certain veterans are complaining about because they may have been exposed to radiation as part of the military of the United States as we attempted to develop our nuclear weapons and our atomic weapon.

So there is a long-established doctrine called the Ferris doctrine that says the United States of America cannot be sued for negligence with reference to alleged injury by those serving in the military who might have been exposed. Whether one likes that doctrine or not, it is the doctrine.

If you want to permit veterans to file lawsuits over the facts which I just described, then I submit you should face up forthrightly and change that law and say to the American veterans you can sue the United States of America, and I believe that is what anyone who wants to let litigation ensue ought to do. But we are not doing that.

Just listen to what we are going to do. Because, in fact, litigation is not permitted against the United States of America directly—although shortly I will tell you even that is evolving and perhaps that will be the remedy—because that has not been the case, lawyers have clamored to sue the national laboratories, contractors, universities who worked for the U.S. Government

in nuclear and atomic defense work. They are kind of itching, just salivating, not necessarily to get remedies and relief for the veterans, but to get their hands on the documents that are in the national laboratories so they can expose to the American people what went on the past 50 years. And if a mistake has been made we are going to read it all over the headlines as America prepared itself over the past 40 years, all in the name of trying to help the veteran.

Because we cannot sue the Federal Government, the adoption of the Reid amendment tonight is going to say you cannot sue Uncle Sam and even through the national laboratories, contractors, universities, and other institutions are totally subjected to the Federal Government's domination in this activity and indeed, Mr. President, are going to be ultimately indemnified by the Federal Government, this amendment says you can now start suing them in the name of giving relief to the atomic veterans.

Frankly, I cannot conceive of worse American policy than that. First, you are kidding the veteran. These lawyers who are running around trying to do this are not necessarily interested in the veterans. These are going to be in court forever while subpoenas are issued, while scientists are called in for depositions across this land; in fact we have one of the Presidents of the national laboratory, Sandia Laboratory, which was asked in 1949 by President Harry Truman, and the letter is here. I will later make it a part of the RECORD.

He asked AT&T to establish this lab on a nonprofit basis to do this kind of work and they have been doing it ever since. The current President says pandemonium will be the result of this. The lawyers will be in those laboratories where the scientists worked 20 and 30 years ago. They will be demanding the records all in the name of helping the veteran.

Now, I believe there is another way to do it. First, I think the Senate, the Congress, and the President, if they want to permit more lawsuits, ought to be more forthright and say sue the United States of America. But we will not do that. We are going to go around to the back door and attempt at compensation and say sue the labs, the universities, and the contractors, and the Federal Government will ultimately indemnify.

That is unfair to responsible scientists, the laboratories and the contractors, but we are going to do it anyway. I believe it is unfair to the injured persons because they really are not going to get the kind of compensation they expect. They are going to be part of untold litigation just so we can say they had a chance to go to court.

I believe that better way is to pass specific legislation granting relief, and within the past couple of days the Senate passed a bill granting downwinders relief—the distinguished Senator from Wyoming was part of that—wherein we established they are entitled to $50,000 compensation if they were at a certain place for a certain time suffering from a certain illness. We did the same for uranium miners, and 18 months ago we did the same when we passed the atomic veterans relief bill, which added to the veterans compensation 13 different ailments for veterans who might have received those injuries and illnesses from their service occuring in this nuclear age and atomic age. I think that is the way to resolve the issue.

But there are lawyers around who continue to tell our veterans the only way you can really get any kind of satisfaction and the American way is to go to court, and tonight we are saying even though you cannot sue the Federal Government we are going to go around by the back door and let you sue people who worked exclusively for the Federal Government who are not personally liable, who are not liable as institutions, but we are going to let the suits flow.

I wish we would have had more time on this amendment. I wish we would have had an opportunity to tell each and every Senator what is going to ensure if this becomes law. But I will conclude that we are not going to have that chance and that with 41 or 42 cosponsors this legislation is going to pass. My hope is that it will not become law. I think it is serious enough to jeopardize this bill.

I am hopeful one way or another that it will not find its way to the President's desk.

I also want to indicate that the Department of Justice, which is in charge of litigating for the Federal Government, has a very detailed letter sent to the Republican leader indicating that they think the law as it is is fair, and to change it as proposed is unfair. They recommend that we not change it.

Mr. President, I strongly oppose this amendment to repeal the Warner amendment.

The effect of this amendment would be to permit individuals who were exposed to radiation as a result of Federal Government's nuclear weapons testing program, and who have subsequently become afflicted with illnesses that can be traced to that exposure, to sue, not the Federal Government, but the contractors who served the Federal Government—including the National Laboratories—for these injuries.

Clearly, Mr. President, the Federal Government has an obligation to compensate individuals who suffered injuries as a result of their participation in the nuclear testing program. I am sure that every Member of this body agrees with me on that point.

Therefore, Mr. President, what we are really talking about here is what is the best way—the most compassionate way—to compensate individuals for radiation exposure.

This amendment would provide relief in the wrong way.

Mr. President, between 1945 and 1963, the U.S. Government conducted approximately 235 atmospheric tests of nuclear weapons. The estimated 220,000 military personnel and 150,000 civilians took part in this testing and the approximately 170,000 citizens who lived downwind of the test sites may have been exposed to ionizing radiation as a result of these tests. These individuals contracted a variety of illnesses, mostly various forms of cancer, that were in all probability caused by their exposure to radiation.

There were significant legal obstacles to these individuals recovering damages for their injuries from the Federal Government. In the early 1980's, therefore, they filed a multitude of lawsuits against the Government contractors who assisted the Federal Government in carrying out the Government's nuclear weapons testing program in order to gain the compensation from the contractors that they could not legally get from the Government.

In order to prevent this backdoor attempt to recovery, Congress enacted the Warner amendment, section 1631 of the Omnibus Defense Authorization Act of 1985.

The Warner amendment substitutes the United States as the proper defendant in the place of Government contractors in lawsuits for injuries allegedly caused by the U.S. nuclear testing program. It also establishes the Federal Tort Claims Act as the exclusive remedy for such claims. The Warner amendment states that the employees of the Government contractors, which primarily are the National Laboratories, are considered employees of the Federal Government for the purposes of such lawsuits. It also subjects such actions to the defenses which are traditionally available to the United States.

The adoption of the Warner amendment was not a departure from past policy. Rather, the Warner amendment simply codified the relationship between the Federal Government and the National Laboratories. Since the advent of the nuclear weapons testing program, all parties have understood that the National Laboratories were acting on behalf of and in the place of the Federal Government in the conduct of the nuclear weapons testing program and that the responsibility for the program rested solely with the Federal Government. In response to the number of lawsuits against the National Laboratories that challenged that understanding, Congress codified

the relationship in the Warner amendment.

The underlying policy rationale for the Government's relationship with the National Laboratories as reflected in the Warner amendment is abundantly clear from the committee report that accompanied the Omnibus Defense Authorization Act of 1984.

In that report, Congress acknowledged that the contractors operating nuclear weapons research facilities for the Federal Government are unique. These Government contractors are basically the National Laboratories: Los Alamos National Laboratory and Lawrence Livermore National Laboratory, which are operated by the University of California, and Sandia National Laboratories, which are operated by AT&T. They conduct research, development, and testing on nuclear weapons for the Federal Government as a public service and are operated on a nonprofit basis. The National Laboratories were and are still operated by non-Federal organizations, but these laboratories are owned, directed, and controlled by the Federal Government.

The National Laboratories do not set policy or make the decisions which implement those decisions. As the committee report stated, "[o]nly the [Federal] Government sets the policy, makes the decisions, and controls activities and circumstances regarding atomic weapon research, development, and testing. Consequently, these contractors were utilized by the United States as instruments of national policy to assist in this entirely governmental task [i.e., nuclear weapons research, development, and testing]."

The committee report noted that Congress has established a comprehensive scheme of Federal control of the nuclear weapons program and concluded:

> Each nuclear test that has been made since 1946 has been made under the statutory direction of Congress. Each nuclear test has been approved, before the fact, by the President of the United States. Each nuclear test has been under the direct supervision of government officials. Each nuclear test has been participated in by hundreds, and in some cases thousands, of government officials and military and civilian personnel.
>
> The committee recognizes, as has the Congress, that the military applications of atomic energy could not proceed either technically or economically without the participation of organizations that posses both scientific management skills and a high degree of scientific and technical expertise. Several such organizations were placed under contract almost at the inception of the nuclear weapons program in 1942 and have performed in an outstanding manner in the national interest for more than three decades. These organizations have provided scientific, engineering and technical support for nuclear tests carried out by the government and for the government in the exercise of a governmental function, i.e., providing for the national defense. These organizations did not order the tests to be performed; they did not set the times or places for the tests; nor did they direct military or civilian government personnel to participate in them. It should appear, without question, that these contractors were acting as the de facto instruments of the United States Government in carrying out a governmental purpose.
>
> * * * * *
>
> [T]he Committee does not believe that any contractor should be used as an instrumentality of the government and then abandoned when inundated by a flood of litigation arising from that same government activity.

Similar rationales were expressed in the House report which accompanied the Department of Energy National Security and Military Applications of Nuclear Authorizations Act of 1984, which contained a similar provision.

It has been asserted that the Warner amendment deprives some individuals of their right to sue for their radiation-related injuries. The courts which have examined this issue, however, have found the Warner amendment to be a proper and constitutional exercise of congressional power. As one court noted, prior to the Warner amendment "[p]laintiffs had the best of both possible worlds, a right to sue free of any [Federal Tort Claims Act] limitations with the government guaranteeing payment of the judgment."

Furthermore, legislation similar to the Warner amendment is not unique in our legislative annals. In a number of other laws, specifically in regard to Public Health Service medical personnel, Veterans' Affairs medical personnel, Armed Forces medical personnel, and the Federal Drivers Act, Congress substituted the Federal Tort Claims Act remedy against the Government for remedies available against private parties. These acts have been uniformly upheld.

This amendment would repeal the Warner amendment outright and return to the procedure that was in place prior to 1984. Under that procedure, suits could be brought against Government contractors who participated in the nuclear testing program for injuries related to that program. The Government contractors were indemnified by the Federal Government for all costs of litigation, judgments, and settlements.

Some believe that this procedure adequately protects the interests of the Government contractors. This argument, however, overlooks the fact that these lawsuits divert human and financial resources away from the National Laboratories' mission and into litigation. This disrupts the vital national security work which is conducted at the National Laboratories. In addition, much of the evidence relevant to the issues in these suits are classified and not available for the National Laboratories to use in defending themselves.

Most importantly, however, the debate over whether the interests of the Government contractors would be adequately protected in the event of the repeal of the Warner amendment ignores the essential point—that is, that the U.S. Government was exclusively responsible for the nuclear weapons testing program. It is simply unfair and unconscionable for the U.S. Government to allow the National Laboratories which assisted it in carrying out this program to be held responsible for the consequences of the Government's policies, decisions, and actions.

If it is the belief of the proponents of this amendment that the measure would not hold the National Laboratories responsible for the nuclear testing program, since the National Laboratories are indemnified, then the amendment is exposed as a mere ploy for recovering judgments from the Federal Government in an area where injured parties cannot otherwise recover from the Government.

Under existing law, some persons injured as a result of their participation in the nuclear weapons testing program have been unable to recover directly from the Federal Government because of the Feres doctrine, the discretionary function exception, the foreign country exception, and/or the combatant activities exception. This amendment would allow persons injured by the nuclear weapons testing program to sue the Federal Government for injuries arising out of those tests by fostering the illusion that the National Laboratories were responsible for the nuclear weapons testing program.

Mr. President, the effect of this amendment is to subject the National Laboratories to a multitude of lawsuits regarding injuries for which the Federal Government, and not the National Laboratories, is solely responsible. Alternatively, the effect of the amendment is to permit litigants to use the legal status of the National Laboratories in order to circumvent the obstacles that prohibit direct recovery from the Federal Government.

In either case, the Congress should not enact a measure that has such an effect.

It is argued that the Warner amendment should be repealed because it effectively bars deserving individuals from recovering damages for their injuries due to the statutory defenses available to the United States under the Federal Tort Claims Act. However, two recent decisions from the U.S. District Court in Nevada—Prescott versus U.S. and Roberts versus U.S.—found that the discretionary function exception does not bar suits by Nevada test site workers for Government negligence in the carrying out of the nuclear weapons tests. Thus, the Warner

amendment does not prevent individuals who were injured by the nuclear weapons tests from recovering for their injuries.

Mr. President, the Department of Justice opposes this amendment. DOJ has noted that it would be unfair to the Government contractors to subject them to liability for the nuclear weapons testing program.

Even if Congress were to enact this amendment, it is doubtful that injured parties would ever be able to obtain a judgment based on a radiation-related claim. The Government contractor defense and other obstacles would most likely prevent a recovery against the National Laboratories.

Even if a successful suit were a realistic possibility, it is unfair to subject deserving claimants to the time-consuming, expensive, and unpredictable legal system in order to recover for their injuries.

The Congress must now decide whether it is fairer to these individuals to allow them to sue the Government contractors who participated in the nuclear weapons testing program in the hope, however remote, costly, and time consuming, that they may be able to recover a judgment against them, or whether it is better to provide a predictable, efficient, systematic program for evaluating claims and providing compensation.

The best way to assure compensation is to establish an administrative mechanism to provide relief to those injured as a result of the nuclear weapons testing program. For many of the individuals injured as a result of the weapon testing program, there already exists or will soon exist an effective program to provide compensation.

The Atomic Veterans Compensation Act of 1988, Public Law 100-321, provides disability payments through the VA to atomic veterans and survivors' benefits to their families by creating a presumption of service connection for 13 diseases. This means an atomic veteran need only prove that he is, in fact, an atomic veteran and he is at least 10 percent disabled as a result of one of the 13 diseases in order to obtain disability compensation from the VA for his illness. The VA may deny the claim only if it can prove that the disease is not service connected.

A bill that the Senate passed this week, the Radiation Exposure Compensation Act, will establish a $100 million trust fund to provide compensation to downwinders and individuals who worked in the uranium mines.

Individuals who lived downwind of the atmospheric atomic testing sites, or their survivors, would receive $50,000 if they: First, lived at least 2 years in a downwind area during the times of the atmospheric testing program or were present in the downwind area in July 1962; and second, developed one of 13 specified diseases.

Miners, or their survivors, would be entitled to $100,000 in compensation if they: First, worked in the uranimum mines in New Mexico, Arizona, Colorado, Utah, or Wyoming between 1947 and 1971; second, were exposed to a certain level of radiation; and third, contracted lung cancer or a nonmalignant respiratory disease.

I expect this bill will become law this year.

Mr. President, these compensation systems are adequate to address the Federal Government's responsibility to these individuals. There are others, most notably civilians who worked at the Nevada test site, who participated in the nuclear testing program but who are not currently entitled to compensation.

Rather than repealing the Warner amendment and forcing these individuals to sue, we should establish a compensation system for them. We need to compensate them through administrative system like the Atomic Veterans Compensation Act and the Radiation Exposure Compensation Act, and not by sending them into court.

In addition, repealing the Warner amendment would allow some individuals already entitled to compensation under the Atomic Veterans Compensation Act and the Radiation Exposure Compensation Act to receive double compensation.

Finally, let me point out that the Judiciary Committee currently has before it a bill to repeal the Warner amendment. Hearings have been held on this measure, S. 982, and the committee will act on it soon.

We should allow the Judiciary Committee to complete its work on this proposal and make its recommendation to the Senate.

In sum, Mr. President, the Warner amendment was a codification of the longstanding policy of the Federal Government toward the National Laboratories. This policy is eminently reasonable and is based on a recognition of the unique situation of the National Laboratories who were enlisted to assist the Federal Government in its nuclear weapons testing program. Congress should not abandon the National Laboratories by repealing the Warner amendment.

This amendment would abandon the sound policy toward Government contractors that Congress affirmed in 1984. It would not achieve the goal of assuring that persons subjected to radiation as a result of their participation in the nuclear weapons testing program receive the compensation that they deserve. The way to guarantee that these individuals receive the compensation to which they are entitled is to assure that a fair, predictable, efficient, and systematic program for compensation exists. To the extent that deserving individuals are not being compensated, Congress should establish administrative mechanisms to give them the compensation to which they are entitled.

Mr. President, I have received a letter from the President of Sandia National Laboratories, Al Narath, describing the devastating impact the repeal of the Warner amendment would have on Sandia and their ability to serve our Nation.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SANDIA NATIONAL LABORATORIES
Albuquerque, NM, August 3, 1990.

Re S. 982 (Repeal of the Warner Amendment—Sec. 1631 of Public Law 98-525).

Hon. PETE V. DOMENICI,
Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR DOMENICI: Thank you for asking me to convey the views of Sandia and AT&T concerning repeal of Section 1631 ("the Warner Amendment").

We have a deep concern over repeal legislation which, if enacted, would once again encourage lawsuits against the National Laboratories for injuries attributed to the United States' atmospheric nuclear testing program. Congress took much needed action in October 1984 when it enacted Section 1631, which substitutes the United States for the National Laboratories as the proper defendant in such lawsuits and also brings such litigation within the coverage of the Federal Torts Claim Act.

Congress' action six years ago was both wise and correct. The Warner Amendment, in our view, serves the overall interests of all Americans and it should not be repealed. It is our conviction that repeal would cause grave injury to this country's national security efforts, and for that reason we believe that the Congress should be fully informed of such potential consequences prior to any precipitous consideration of this bill.

The continued long-term participation in our nation's nuclear weapons program by AT&T and other national laboratory contractors is, in my opinion, critical to the continued success of the programs. Section 1631 did much to ensure that continued participation in that it clarified beyond any question that the Government, and the Government alone, sets the policies, makes the decisions, and controls the activities and circumstances regarding nuclear weapons testing.

Since 1949, AT&T has managed Sandia National Laboratories on a no-fee, no-profit, no-loss basis solely because the nation's nuclear weapons program in which the laboratories participate is considered to be so vitally important. The record shows that we have been conscientious about our management and oversight responsibility, and that we have acted safely, effectively, and reliably.

Nevertheless, some stockholders and customers have regularly questioned AT&T's continued participation in the nuclear weapon program. In opposing those dissenters, we have been buttressed by the strong and unwavering support for Sandia programs manifested by the Congress, the President of the United States, and the Department of Energy and its predecessor

agencies. The Warner Amendment demonstrates that participation in the nuclear weapons program at Sandia is in the national interest, and consequently it reinforces AT&T's position.

Although Sandia and AT&T will continue to be fully indemnified and held harmless even if the Warner Amendment is repealed, such repeal would have significant and harmful effects on both the National Laboratories and on the contractors which manage them. At Sandia, repeal and the litigation which will result would cause a diversion of resources and high-level attention from its primary mission—nuclear weapons safety and security. At AT&T, repeal followed by litigation in which it is implicated in radiation-caused injuries will harm a valued, well-deserved, an irreplaceable reputation which has been established through more than a century of hard work and public service.

These severe and harmful effects are simply not necessary to provide adequate remedies for citizens who attribute various illnesses to the testing programs.

For example, in 1988 Congress enacted Public Law 100-321, the Radiation-Exposed Veterans Compensation Act of 1988, to provide a readily available administrative remedy for military participants in our nation's nuclear weapons tests. Just this week, similarly, the Senate passed S. 2466, the National Atmospheric Nuclear Testing Compensation Act of 1990, a bill little different from H.R. 2372, the Radiation Exposure Compensation Act, passed by the House of Reprsentatives earlier this session. Both bills provide readily available administrative remedies for "downwinders" and uranium miners, and their families, who contracted diseases attributed to their connection to the nuclear weapons testing programs. Enactment of those bills and the new assistance program which they would establish is virtually assured. Sandia and AT&T wholeheartedly support such federally-provided administrative remedies.

On the other hand, the severe negative effects that would accrue to Sandia and the other National Laboratories and the laboratory contractors should Section 1631 be repealed is simply unnecessary. The interests and concerns of our veterans and other citizens are already being served by administrative mechanisms which, unlike litigation, actually work, and which treat their claims expeditiously, fairly, and equitably.

In fact, although it is accepted as gospel that the effect of the Warner Amendment is to leave radiation claimants with no judicial recourse whatsoever, in two recent decisions of the United States District Court in Nevada, it was held that civilians who claim to have contracted radiation-caused illnesses as a result of the weapons tests could successfully sue the Government directly under the Federal Tort Claims Act. (The two cases are Prescott versus United States and Roberts versus United States, both of which were decided October 27, 1989.) That development alone should be more than enough to dispel the notion that repeal of the Warner Amendment seves a beneficial public purpose.

I want to thank you once again for giving us an opportunity to express our views. Please feel free to again call upon me or any of Sandia's other key personnel should you desire any elaboration.

Very truly yours,

A. NARATH.

Mr. DOMENICI. Mr. President, I have a copy of the letter that President Truman sent to the President of AT&T asking them to help the Federal Government by operating Sandia National Laboratories. The President referred to this as "an opportunity to render an exceptional service in the national interest." I ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, May 13, 1949.

Mr. LEROY A. WILSON,
President, American Telephone & Telegraph Co., New York, NY.

DEAR MR. WILSON: I am informed that the Atomic Energy Commission intends to ask that the Bell Telephone Laboratories accept under contract the direction of the Sandia Laboratory at Albuquerque, New Mexico.

This operation, which is a vital segment of the atomic weapons program, is of extreme importance and urgency in the national defense, and should have the best possible technical direction.

I hope that after you have heard more in detail from the Atomic Energy Commission, your organization will find it possible to undertake this task. In my opinion you have here an opportunity to render an exceptional service in the national interest.

I am writing a similar note direct to Dr. O.E. Buckley.

Very sincerely yours,

HARRY TRUMAN.

Mr. DOMENICI. Mr. President, I have a letter from Deputy Assistant Attorney General Bruce Navarro opposing this amendment. I will ask that it be included in the RECORD. The Justice Department notes that it would be unfair to the Government contractors to subject them to liability for atomic weapons testing program, for which the Government was solely responsible.

Mr. President, I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AFFAIRS,
Washington, DC, August 2, 1990.

Hon. ROBERT DOLE,
Republican Leader, U.S. Senate, Washington, DC.

DEAR MR. LEADER: This is to furnish the views of the Department of Justice on an amendment that may be offered to the Department of Defense Authorization bill that is under consideration in the Senate. We object strongly to this amendment, which would repeal Section 1631 of Public Law 98-525, sometimes referenced as the "Warner Amendment." S. 982, a bill to repeal the Warner Amendment, remains pending in the Senate Judiciary Committee.

Section 1631 creates an exclusive remedy—a cause of action solely against the United States—for injuries "due to exposure to radiation based on acts or omissions by a contractor in carrying out an atomic weapons testing program under a contract with the United States." Any suit arising from specified activities of these contractors is to be brought under the Federal Tort Claims Act, subject to the specific exceptions in that Act. A savings provision enables plaintiffs to file administrative claims pursuant to the Federal Tort Claims Act even if their claims might otherwise be time barred.

We believe that Section 1631 is sound and should not be repealed. It is appropriate for the Government to assume liability for the activities of federal contractors engaged in the federal atomic weapons testing program. The government alone establishes the policies, makes the decisions and controls the activities relating to atomic weapons research, development and testing. In that respect, the contractors were essentially instruments of national policy. Under these circumstances, it would be unfair to leave them as parties to suits arising out of the Atomic Weapons Testing Program.

The liability of the United States is governed by the Federal Tort Claims Act (FTCA). Section 1631 substitutes the United States for contractor defendants in both pending and future suits alleging radiation injuries arising from this national defense program. The United States generally cannot be sued for such activities of the contractors arising out of their operations under the contracts. Plaintiffs in these special cases have the same rights against the United States as other FTCA litigants. This Statutory scheme presents a fair and reasonable resolution of the problems presented by the unprecedented litigation against the atomic weapons contractors arising from the vital assistance they provided to our national defense effort.

Section 1631 reflects the equitable balance between the interests of the alleged victims of the atomic weapons testing program and the United States. It precludes that visitation of expensive, time-consuming litigation upon the contractors who conducted that program pursuant to the government's guidance and in order to further the national defense. We urge the Congress to preserve Section 1631 intact and to reject any amendments to the pending DOD Authorization bill that would repeal it.

The Office of Management and Budget has advised that there is no objection to this report from the standpoint of the Administration's program.

Sincerely,

BRUCE C. NAVARRO,
Deputy Assistant Attorney General.

Mr. McCLURE. Mr. President, I rise today to oppose this amendment repealing the Warner amendment. Supporters of this repealer view it as the proper mechanism for ensuring that persons who may have been injured as a result of the Federal Government's atomic weapons testing program have an avenue for compensation. Certainly, no one in good conscience can deny that the Government has an obligation to individuals injured by the testing program. However, this vehicle which would open the doors of the courts and, consequently the Federal purse strings, is simply not the fair or prudent way to deal with this issue.

The amendment is unfair to both the Government contractors and to potential claimants. Government contractors for the testing programs, principally the national laboratories, should not be held accountable for consequences of activities that were

conceived, directed and funded by the Federal Government. With a potential pool of 133,000 claimants, even if only 10 percent file a court claim, there would be 13,000 cases clogging the courts and tying up the national laboratories in defending claims instead of proceeding with their important national missions.

Equally important is the fact that potential claimants will be required to spend years litigating cases that, because of the passage of time, may result in little or no recovery. Statutory remedies have been provided for some classes of claimants in the Atomic Veterans Compensation Act of 1988 and in the Radiation Exposure Compensation Act passed by the Senate this week. Similar remedies should be crafted for others injured during the testing program.

Lastly, this amendment cuts against the grain of the conventional wisdom of the Congress in limiting suits against the Federal Government. It essentially would accomplish indirectly what we have never allowed directly—unlimited recovery payable out of the Federal Treasury through suits against contractors who are indemnified by the Federal Government. This measure could add between $5 and $10 billion to the Federal deficit, depending on the amount of awards granted to the claimants.

It is clear that passage of this amendment would not only be senselessly damaging to the ongoing activities of the important national laboratories with potentially grievous effects on the Treasury, but would also operate unfairly against those entitled to assistance.

MORNING BUSINESS

FARM BILL PRIORITIES IN CONFERENCE

Mr. DOLE. Mr. President, I appreciate the timely manner in which the Senate considered the Food, Agriculture, Conservation, and Trade Act of 1990.

I also fully realize that this would not have been possible had I or other Members more aggressively pursued amendments pertaining to the policy or the cost of the bill. That cost can be seen in the attached summary outlining projected CCC outlays associated with the final Senate package. Looking at CCC outlays alone, the bill is approximately $1 billion over budget.

Taking into account such items as shifts in FmHA lending from direct to guaranteed loans, as well as APHIS user fees, the cost of the bill is reduced relatively close to the baseline. However, one thing that stands out is the level of new authorization included in the bill. Based on current estimates, the amount of newly authorized spending may exceed $5 billion.

I had hoped to provide this information last Friday, but the budgetary analysis of the final bill had not been completed.

This Senate stated on last Friday that what we have ended up with is more or less an extension of some of the policies adopted in 1985. But nonetheless, there are serious problems with the bill passed by the Senate. We have placed a support floor in the dairy program which will create an over-budget cost of $2.3 billion over the 5-year life of the bill. There is a high-price bonus plan which would provide a handout to producers each time the USDA incorrectly projects season-average prices 1 year in advance. Aside from a lack of sound reasoning for this program, it is estimated that this provision could add up to $1.5 billion over 5 years. We have effectively raised the target prices on oats and barley, and allowed the programs with hidden consumer costs such as sugar and peanuts to come through unscathed. The loan rate package consists of two plans; one which would undermine our export competitiveness and another which would cause administrative difficulties in implementing the policy, and most likely result in excessive advance deficiency payments.

There are still many problems with this bill, problems which represent a reversal of the market-oriented policies adopted in 1985.

I assume we will go to conference upon completion of the budget summit talks, or face the implications of a 38 percent sequester if the conference does not act responsibly. It is and will continue to be irresponsible to assume that agriculture will be exempt from budget reckoning.

I hope the conferees will be able to work in conference with these realities in mind so that we may wrap up with a bill that keeps the budget, the consumer, the taxpayer, and the long-term interests of producers in mind.

I ask that the summary be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

OUTLAYS FOR FISCAL YEAR 1991–95—CHANGE FROM MID-SESSION REVIEW BASELINE—COMMODITY BY COMMODITY

[In millions of dollars]

Commodity	Committee bill	Senate passed	Change
Dairy	2,317	2,317	
Honey	116	−183	−299
Wool/Mohair	−26	−69	−43
Wheat	1,167	28	−1,139
Corn	208	−2,240	−2,448
Sorghum	9	−190	−199
Barley	126	38	−88
Oats	94	87	−7
Net Oilseeds	488	488	0
Cotton	564	534	−30
Rice	71	26	−45
Sugar	0	0	0

OUTLAYS FOR FISCAL YEAR 1991–95—CHANGE FROM MID-SESSION REVIEW BASELINE—COMMODITY BY COMMODITY—Continued

[In millions of dollars]

Commodity	Committee bill	Senate passed	Change
Tobacco	0	0	0
Peanuts	0	0	0
Conservation [1]	100	100	0
CCC commodity subtotal	5,234	936	−4,298

[1] Increased deficiency payments due to water quality incentives provision. Not included elsewhere.

THE COHEN B-2 AMENDMENT

Mr. HEINZ. I want to comment on Senator COHEN's amendment, which I support. This is an extremely far-reaching issue, and I fully recognize the implications of the Cohen amendment—no less than others here—and, like our colleagues, I am determined that our deterrent remain firm and reliable. However, the time has come to reassess this program honestly and realistically.

The issue, Mr. President, is larger than the B-2 itself. The more important question is whether there is still a realistic case to be made for bombers at all—and in particular, a penetrating bomber. The triad—that is, missiles, submarines, and bombers—apparently served us well during the cold war, when we needed to make clear to the Soviet leadership that the United States was willing and able to fight a nuclear war, that we would engage in all-out conflict rather than surrender and accept Soviet domination.

At the time, our maintenance of a bomber force was yet one more signal of our resolve, particularly when we were faced with the possibility that the Soviets might be tempted, as their doctrine then dictated, to destroy the United States land-based deterrent force by surprise during a crisis. In retrospect, this may sound outdated and irrational, but the Soviet leadership of the time itself was somewhat outdated and hardly rational when it came to such matters.

Even, then, however, it was unclear what our bombers were going to do in wartime except exact revenge, a task they shared with the strategic submarine fleet. The Air Force disagrees, of course; we are told now, as we were then, that American bombers are needed to strike at mobile targets within the Soviet Union, from missiles to Army divisions, during a protracted nuclear conflict.

This scenario is sheer science fiction, especially today. If a major Soviet-American conflict took place today, bombers would find nothing of value left to destroy in the U.S.S.R. Soviet strategy does not envision waiting around for American bombers to find and destroy precious targets; the first

exchanges of intercontinental missiles will leave little for the bombers to do once they arrive—I should say if they arrive—at their destinations within the U.S.S.R.

Let us reflect on this for a moment: We are forced to envision a situation in which, through some terrible sequence of events, the United States and the Soviet Union have actually begun to engage each other in nuclear combat. Each side will strike at the other's nuclear forces and communication structures, immediately destroying the cores of our respective societies. The majorities of both our populations will be killed, and both of our economies will collapse.

Yet, we are asked to believe that the outcome may yet be decided by 75 pilots scouring the remnants of the Soviet Union for targets that are not yet destroyed. This strikes me as irrational. It's not that I reject the goal of seeking to prevail under such horrible circumstances, Mr. President; rather, I question that our survival or defeat will rest on a group of airplanes roaming the Soviet Union hours after that country has effectively ceased to exist.

Leave aside the question of war for the moment; central nuclear war between the United States and the U.S.S.R. was never likely and it is becoming less so. We have also been told that the B-2 will enhance deterrence, even if its missions are unclear or secondary to the missions to be performed by land and sea based components of our deterrent.

But how? Are the Soviets somehow less likely to attack us because we can threaten to bomb secondary targets in the U.S.S.R. long after the missiles on both sides have flown? Remember, Mr. President, that the Soviets granted significant concessions to the B-2 on the START Treaty. Why do you suppose this is? Could it be because the B-2 is one of the least useful components of our strategic deterrent, one on which they felt they could afford to compromise? While we sought to secure the future of the B-2 during START, the Soviets were quite prudently exacting concessions of their own, forcing us to allow them to modernize the SS-18 missile, a much more threatening weapon than the B-2.

Mr. President, the fact of the matter is that we Americans have had a longstanding attachment to bombers because we believe that they allow us to play to our strenght, namely, air power. Since the end of World War II, we have placed more faith in the strategic bomber than any of our allies or the Soviet Union itself.

This faith in a penetrating bomber is misplaced. Furthermore, what kept the peace, and what continues to keep the peace, is American resolve coupled with American nuclear and conventional might. While I can certainly accept that there are some useful missions that such bomber forces can undertake, I would argue that the existence of these forces does not constitute the cornerstone of deterrence.

This brings me to the B-2 specifically. Let us even assume that the bomber mission is crucial to deterrence, unproven though that assumption may be. We will then hear over and over that our B-1 bombers will not be able to penetrate improved Soviet air defenses in the next century and carry out those missions, due to putative improvements in Soviet defense due to take place soon. This supposedly leaves the B-2 as the only weapon available for those missions.

Mr. President, this is nonsense. Soviet air defenses are competent, but they are not superhuman. Since 1980, the Soviets themselves have reorganized their air defense no less than three times, each time finding that they were dissatisfied with the results. It is ironic that we apparently have more faith in their defenses than they do. You see the rationale here: We need to maintain a bomber threat, and the B-2 is the only credible instrument of that threat. Both are dubious assumptions.

So what are we left with? Occasionally, the Air Force tries to tell us that the B-2 can be used for conventional missions in Third World hot spots. But if the whole point of developing the B-2 was to overcome Soviet air defenses, then why do we need 75 to overcome Third World air defenses? And one might wonder, too, if the Air Force is willing to risk an $860 million bomber for a mission that could just as easily be performed by an F-111 or B-1B? Mr. President, I'm afraid that this argument only shows how desperate we have become to find some rationale, any rationale, for a bomber whose time has gone.

Let me conclude, Mr. President, by saying that I am neither naive or complacent about the continuing threats to our security. The situation is the Soviet Union has yet to stabilize, and there is always a small but finite risk of conflict with the Soviets or others. But I am more than confident that our deterrent is a stable and convincing one, even without the B-2. It is time we recognize that our years of solid dedication and attention to our military requirements have finally begun to bear fruit, and we should not jeopardize that achievement by chasing down yet another weapons system that will serve only to drain our Treasury while adding little to our security.

COMMENDING THE STAFF OF THE COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. LEAHY. Mr. President, I would like to take this opportunity to praise the staff of the Committee on Agriculture, Nutrition, and Forestry.

On Friday, July 27, the Senate passed the 1990 farm bill, the Food, Agriculture, Conservation, and Trade Act of 1990. This important legislation represents a major bipartisan effort that will guide the Nation's agricultural policy for the next 5 years. In addition to the traditional farm bill titles the 1990 farm bill contains the most significant revision in food aid and trade laws in 25 years; a research title which will refocus agricultural research for the 21st century; the first forestry title, which implements the most important revision of national forestry laws in 14 years; the first fruit and vegetable title; breaking of the "Circle of Poison" by banning the export of pesticides prohibited from U.S. farm use; and a conservation title that protects our Nation's wetlands and farmers.

The 1990 farm bill passed the Senate in a sweeping 70 to 21 vote. The passage of the bill in this body would not have been possible without the professionalism and dedication of the Agriculture Committee staff. Their efforts were a model of competence and diligence for the entire Senate.

Senior counsel, Bill Gillon, deserves special recognition for his outstanding professional effort, which included drafting the thousands of pages of the farm bill as well as 82 amendments. His resolute efforts were instrumental in translating ideas into effective legislation. Often working throughout the night into the mornings and on many weekends, Bill's dedication exemplifies the true spirit of the Agriculture Committee staff.

Chief economist, Bob Young, spent countless hours crunching numbers for the committee to ensure that the bill's cost fell within budgetary constraints. During markup negotiations, Bob's impressive knowledge of commodities provided the guidance necessary to reach successful agreements within the committee.

Janet Breslin, deputy staff director, did a tremendous job shaping the dairy and trade titles of the farm bill. Her strong conviction and determination guaranteed successful negotiations. Janet and legislative fellows, Jim Phippard and Lisa Witt, combined their extensive knowledge of foreign food aid to create landmark revisions in the Food for Peace Program.

Deputy chief counsel, Ed Barron, spent endless hours on a number of issues critical to the committee's success including nutrition, fish inspection, rural development, and farm credit. His assiduous attention to detail in the drafting of legislation and his extraordinary ability to forge compromises on the most difficult issues have greatly aided the committee's work.

Professional staffer, Tom Hebert, was instrumental in shaping the complicated conservation title. His perseverance and knowledge of environmental issues and farming practices contributed immeasurably to the effectiveness of the legislation. Professional staffer, Tom Tuchman's extensive background in forestry management made it possible for him to develop the first forestry title ever included in a farm bill.

Professional staffer Kathleen Merrigan's tireless efforts and patience led to comprehensive legislation that creates a first-ever national organic certification program and revamps important agricultural research programs. Her uncanny ability to pull together diverse interests contributed greatly to the success of the committee's efforts.

Professional staffer, Margaret Huessy, worked diligently on some of the farm bill's most difficult issues. Her knowledge of complex commodity programs and farm credit greatly facilitated committee negotiations.

Senior counsel, Carolyn Brickey, and communications director, Jon Haber, spent endless hours developing consensus on difficult policy issues of the fruit and vegetable title. Together they worked to end the circle of poison which allows dangerous pesticides to reenter the United States on the surface of imported produce.

Jon Haber and deputy press secretary, Julie Bernstein, did a superb job keeping the press informed of the bill's progress as it made its way through the committee and the Senate. Their ability to translate complex agricultural issues for the press, and operate under severe time constraints ensured that the public was well informed.

Special counsel, Ken Ackerman, and legislative fellow, Lisa Witt, worked diligently to negotiate crop insurance provisions. Ken's legal expertise and knowledge of commodity futures trading have been invaluable to the committee. Professional staffer, Lynette Wagner, only with the committee for 6 months, made significant contributions to the commodity titles. She has impressed the committee with her endless energy and dedication.

Legislative staff assistance Andy Fish and Laura Madden provided essential research information and writing efforts that added immeasurably to many titles of the farm bill. Andy's work on nutrition and Laura's work on rural development made a real difference in this legislation.

Bob Sturm, administrative clerk of the committee, orchestrated the work of support staff. His diligence and loyalty to the committee has kept the office running smoothly throughout the farm bill process. Staff assistances Valerie Callands, Alan Surchin, Mary Kinzer, Annalisa Milas, and Sylvia Gaudette worked long hours cheerfully and diligently. Without the tremendous efforts of Bob and the support staff, the committee would have had difficulty proceeding with the hectic agenda.

Chief clerk, Chris Sarcone, along with Cynthia Neuwalder and Mary Byrne, coordinated the more than 22 markups and 80 hearings held in preparation for the 1990 farm bill. Their proficiency and attention to detail ensured that committee markups proceeded efficiently and that the voluminous committee records were in order.

Jasper Womack from the Congressional Research Service and legislative fellow, Keith Bulatto, provided invaluable assistance to the committee throughout the process. Jasper's hours of research on grain quality provided a solid underpinning for the committee's legislation. Don Finch, the committee printer and Tim Young, his assistant, ensured that the committee paperwork was in order.

I am especially pleased that the Rural Partnerships Act of 1990 was included as an amendment to the 1990 farm bill. I would particularly like to thank Jim Cubie, Ed Barron, Carolyn Brickey, and Laura Madden for their dedicated perseverance on this issue. Their strong belief in this important issue during the past year has made possible the inclusion of this amendment in the bill.

The committee as a whole is particularly indebted to Gary Endicott and Bill Baird from the Legislative Counsel's Office. They were always ready, willing, and able to respond to the committee's requests and lend their valuable expertise to the development of the bill. Gary and Bill took their responsibilities seriously and have always gone the extra mile to provide the committee with excellent work. We cannot thank Gary and Bill enough for their dedication and effort.

I would like to thank minority staff director Chuck Conner. As I mentioned before, the 1990 farm bill is a result of an impressive bipartisan effort. With the help and dedicated professionalism of Chuck and the minority staff, the committee was able to come to agreement on many contentious issues. The Agriculture Committee continues to operate in a bipartisan manner in large part because of the professionalism and cooperation of the minority staff.

I would especially like to commend staff director, Chuck Riemenschneider, and chief counsel, Jim Cubie, for their temendous contribution to the committee. Chuck is a good friend and his leadership of the committee staff and broad expertise in agricultural policy provided the committee with sound guidance on key issues. He has truly molded a superb staff. With his skill in Senate procedure and his familiarity with complex legal language, Jim navigated a steady course during drafting and passage of this legislation as he has for many years with me on this committee and previously on the Appropriations Committee.

Mr. President, the success of the 1990 farm bill is attributable to the concerted efforts of the Agriculture Committee staff. During the 7 days that this bill was debated on the Senate floor and in the months prior to floor debate, the committee staff demonstrated their loyalty and commitment to mission of the committee. I am proud to recognize their efforts and enter into the RECORD the names of those who served the Committee on Agriculture, Nutrition, and Forestry and the Senate so well.

The public rarely sees the work of Senate staff but they give so much to our country and its Government. Their sacrafice and long hours are shared by their families and I applaud them.

DEFENSE PRODUCTION ACT AMENDMENTS OF 1990

Mr. SANFORD. Mr. President, I rise today in support of S. 1379, the Defense Production Amendments Act of 1990. I want to commend the bill's sponsor, Senator DIXON, for drafting this legislation and for his efforts and those of Senator RIEGLE, in illustrating for the committee the effects the declining defense industrial base has had on our entire national economy and our national security.

As the hearings began on the DPA in the Banking Committee last summer, the members of the committee were brought face to face with the inadequacies of the defense industrial base and the declining state of our national competitiveness posture in world markets. We heard testimony from industry representatives stressing the need for the United States to develop policies which would encourage them to undertake joint efforts in developing emerging technologies. And we have heard from Government representatives citing numerous studies which show the erosion of U.S. leadership in high-technology industries which have become vital to our national defense.

The Defense Production Act was originally adopted in 1950, in the early part of the cold war, and provided the President with an array of authorities to mobilize defense production, especially in times of national emergency. The legislation before us today expands the reach of the DPA and adapts it to reflect the changes that have occurred in the industry due to the reliance upon critical technologies that form the basis of defense industries as well as domestic industries.

At issue with this legislation is the sentiment that the defense industrial base and the civilian industrial base

have became indistinguishable and that the United States no longer maintains its leadership in producing such dual use technologies. As industry representatives have testified before the Senate Banking Committee, our industries today have come to rely increasingly upon foreign sources to supply key industrial products and we have "lost the indigenous capacity to produce key components of weapons systems essential to national defense." Provisions within S. 1379 offer support for American industries to foster new technologies and expand production capabilities.

The competitiveness problems our Nation faces with respect to both defense and civilian industries are critical to the stability of our national economy. The Office of Technology Assessment examined the issue and laid bare the steps we need to take before we see improvements. Those steps include getting our Federal deficit under control; investing in human resources—improving education, training the modern work force, stimulating research at universities; and changing the focus away from short-term investments to long-term investments. Most of us recognize the need to improve in these areas, but we must not allow ourselves to be satisfied with the small accomplishments we may make in legislation today. We can no longer continue to mask the Federal deficit and get by with the appearances of improving the debt problem. We can no longer continue to make small contributions in the education of our children, offering them our support in name only. We can no longer continue our shortsighted investment practices.

Although S. 1379 does little to remedy our overall competitiveness situation, it has served to highlight the problem and establishes such issues as a priority for future legislation.

I support S. 1379 and the purposes for which it was drafted. I hope that we may build upon it as we work to improve our overall competitiveness position in the world market.

TRIBUTE TO JUNE M. COLLIER

Mr. HEFLIN. Mr. President, recently, the Automotive Hall of Fame honored seven individuals who have made an indelible mark on the automotive industry. I am proud to say that one of the recipients of the Hall of Fame's Distinguished Service Citation for 1990 is my constituent, June M. Collier, president and chief executive officer of National Industries, Inc. The hall of fame recognized June for her "lifelong, sustained superior performance" to the automotive industry.

Mr. President, I would like to include in the RECORD an excerpt from the Automotive Hall of Fame News citing June's accomplishments.

June M. Collier personifies today's successful businesswoman: she rose from modest beginnings, without the benefit of advanced educational degrees, and built National Industries, Inc., one of the industry's leading suppliers of automotive wiring, from a back-room job shop to a $130-million-a-year corporation.

Today, her business opinion is valued not only in automotive circles, but also among key government officials, who frequently call on Mrs. Collier for advice regarding pending legislation and regulations. Frequently, she is a guest on national radio and TV talk shows.

As president of National Industries, Mrs. Collier is responsible for a variety of commercial interests, including the manufacture of wiring harnesses for automotive, applicance, and aerospace needs; injection mold design and construction; machine tooling; manual and electric automotive antennae; and a variety of other products.

She is an active supporter of the presentation of the American industrial base and speaks frequently around the country on the issue of international economics. Mrs. Collier previously represented the Secretary of Commerce and the U.S. Special Trade Representative as a member of the President's Industrial Policy Advisory Committee.

She has been honored by inclusion in the Committee of 200, an organization limited to the top women business leaders in the country. She has testified before the U.S. Congress, dined at the White House, and appeared on numerous radio and television shows, including those of Larry King and Phil Donahue.

Mrs. Collier has written articles for a number of major publications, including the New York Times and USA Today. Articles about her have appeared in the Washington Post, Fortune, Savvy Woman, and the Journal of Commerce.

REMEMBRANCE OF DR. JOHN GRONVALL, FORMER CHIEF MEDICAL DIRECTOR OF THE DEPARTMENT OF VETERANS AFFAIRS

Mr. AKAKA. Mr. President, earlier today I was informed that Dr. John Gronvall, who only recently stepped down as Chief Medical Director of the Department of Veterans Affairs, suffered a fatal heart attack while on vacation in the Outer Banks of North Carolina. I was deeply saddened to hear about this good man's untimely death—he was only 59.

Dr. Gronvall was a pathologist who had a long and distinguished academic career, reaching the position of dean of the University of Michigan Medical School, before coming to the Department of Veterans Affairs. At the VA, he worked his way up from Deputy Assistant Chief Medical Director for Academic Affairs to Deputy CMD and finally to Chief Medical Director in January 1987. In his 3-year tenure as head of the Nation's largest healthcare system, during the VA's worst budget crisis, he worked closely with Congress to help preserve the integrity of the VA's health care system.

Being new to the Senate Veterans' Affairs Committee, I knew Dr. Gronvall more from reputation than from personal experience. However, I know that my predecessor, the late Sparky Matsunaga, thought the world of him. I ask, Mr. President, that the text of a letter that Senator Matsunaga sent Dr. Gronvall, shortly before Sparky's own untimely demise last Easter, honoring the former CMD's contributions to the Nation's and Hawaii's veterans, be inserted in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 3, 1990.

JOHN A. GRONVALL, M.D.,
Chief Medical Director, Department of Veterans Affairs, Washington, DC.

DEAR JOHN: As you step down as head of the Veterans Health Services and Research Administration (VHS&RA), please accept my sincere gratitude and appreciation for your outstanding accomplishments in behalf of the Nation's veterans. Your distinguished career in the Department of Veterans Affairs (VA), after coming from the University of Michigan Medical School, has been marked by deep compassion for veterans and an abiding concern that they receive the highest quality health care their government can provide.

In your capacity as Chief Medical Director, and as Assistant, Deputy, and Acting CMD prior to that, you administered a medical system employing more than two hundred thousand health care personnel in 172 hospitals, 228 outpatient clinics, 116 nursing homes, and 16 domiciliaries. The magnitude of that task is not lost on those of us who have oversight responsibilities for veterans issues. But you did far more than manage employees and ensure the smooth operation of hundreds of health care facilities—you helped guide the organization through some of its most difficult years, when budget cuts threatened to undermine the system and the Legislative and Executive branches skirmished over fiscal priorities. On many occasions, your calm demeanor and forthright answers at Senate Veterans Affairs Committee hearings helped forestall serious misunderstandings between the Administration and Congress. Finally, you led VHS&RA into the 1990s, helping prepare the service for a veterans population significantly different in character from that which existed in previous years, as the VA made the difficult transition from an independent agency to a cabinet-level department.

John, I am particularly grateful to you for your responsiveness in addressing the concerns of the veterans of my state. At the Committee's oversight hearing in Honolulu, in April 1987, you displayed a rare sympathy for the unique health care requirements of Hawaii veterans, who had long been neglected by the mainland-oriented VA. By expeditiously organizing the Special Task Force on Hawaii Veterans Health Care and subsequently endorsing the group's recommendations, including the establishment of a medical center in Oahu and satellite health care facilities in the neighbor islands, you helped restore confidence in the promises made by our government to care for those who have worn the uniform. In

large measure due to you, Hawaii veterans are at last beginning to receive the attention they earned in sevice to their country, in peace as well as in war.

Thank you again for your outstanding contributions to the care of the Nation's veterans. I am pleased that we will continue to benefit from your wisdom and experience in your new capacity as a Distinguished VA Physician. Please accept my best wishes for continued success in the future.

Aloha and best wishes.

Sincerely,

SPARK MATSUNAGA,
U.S. Senator.

Mr. President, I think that Sparky's letter hints at the many contributions Dr. Gronvall made to veterans. By all accounts, he was a gifted man who had a flair for quietly doing the things that needed to be done to care for the collective health of the Nation's 27 million veterans. I am deeply saddened that, even as the VA is engaged in a far-reaching review of the entire VA health care system, we will no longer have the benefit of his sage advice and vast experience. We are all the poorer for his death.

In closing, Mr. President, let me express my sincere condolences to Dr. Gronvall's family, including his wife, Cynthia, and his two sons and daughter. As they have lost a fine husband and father, we have lost an outstanding public servant whose contributions we are only just beginning to measure.

RISK REDUCTION INITIATIVE AND TRIBUTE TO GENERAL ELLIS

Mr. NUNN. Mr. President, at the June summit Presidents Bush and Gorbachev signed an important declaration committing the two nations to pursue additional nuclear confidence-building measures. The United States-Soviet "Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability" includes a section which reads as follows:

> The sides will pursue additional measures to build confidence and ensure predictability of the military activities of the United States of America and the Union of Soviet Socialist Republics that would reduce the possibility of an outbreak of nuclear war as a result of accident, miscalculation, terrorism, or unexpected technological breakthrough, and would prevent possible incidents between them.

The fiscal year 1991 defense authorization bill reported by the Armed Services Committee includes an amendment sponsored by myself and Senators WARNER and WIRTH that commends President Bush and President Gorbachev for committing our two countries to this undertaking. The amendment urges President Bush to pursue two initiatives with the Soviets pursuant to this commitment. First, the provision urges the President to invite the Soviets to join with us in conducting separate but parallel, comprehensive reviews of each nation's respective nuclear control procedures and failsafe mechanisms. Second, it urges him to propose to the Soviets that the two sides explore possible expanded roles and functions which could be performed by the existing United States-Soviet nuclear risk reduction centers.

The provision also requires a Presidential report assessing various nuclear risk reduction measures which could be considered pursuant to the summit agreement. These include:

First, a list of options for expanded roles for the nuclear risk reduction centers;

Second, putting PAL's on all our nuclear weapons, including those deployed at sea; and

Third, installing post-launch autodestruct mechanisms on our ICBM's and SLBM's.

Mr. President, I would emphasize that the amendment does not direct the installation of these failsafe devices; rather, it asks the executive branch to assess each option and report its conclusions to Congress.

As many of my colleagues are aware, I have been engaged in discussions this year with Secretary Cheney with regard to my interest in persuading him to order a top-to-bottom, A-to-Z review of our failsafe procedures. I wish I could report that the Secreatry's response has been completely positive, but I cannot. However, we are continuing to discuss the matter.

It has been 4 years since the Defense Department conducted a comprehensive review of its nuclear safeguard and control procedures. Much has changed since then. In my opinion, the need has increased both for absolute guarantees against an accidental or unauthorized use of a U.S. nuclear weapon and for the U.S. Congress to gain a greater awareness of existing failsafe procedures. Having won the cold war, it would be truly tragic if a nuclear war now broke out inadvertently.

I am sure that we all agree that the ethnic, national, economic, and political turmoil in the Soviet Union has given rise to some very valid concerns on our part about the safekeeping and control of their nuclear weapons. According to Aleksandr Katusev, the Soviet Union's chief military prosecutor, a quarter of a million weapons are now missing from Soviet storage centers, and the stolen weapons are not just firearms but also artillery, land mines, and surface-to-air missiles. If we are to persuade the Soviets to review their controls over nuclear weapons and their failsafe procedures, it would obviously help if we volunteered to review our own procedures in parallel with their review.

Mr. President, as I mentioned, this provision also recommends expanded roles for the United States-Soviet nuclear risk reduction centers. Senator WARNER and I were very involved in their creation, and we certainly think they have made a useful contribution since their operations began in 1988. Nonetheless, the actual functioning of the centers is a far cry from what Senator WARNER and I originally envisioned—or, for that matter, from what we agreed with Robert McFarlane when he was serving as President Reagan's National Security Adviser in 1985.

The unfortunate reality is that over 97 percent of the centers' operations involve passing messages and arms control notifications. This is an appropriate and useful function for the centers to perform, but we saw an equally important role for the centers in such critical areas as discussion centers for joint efforts to anticipate and plan for possible nuclear terrorist contingencies. As the centers take on notification responsibilities for the nuclear testing treaties, START, and other arms control agreements, their concentration on communications functions will become even greater.

When Senator WARNER and I reached agreement with the Reagan administration in 1985, on a modest set of initial responsibilities for the centers, we made it clear that we reserved the right to revisit this issue once the centers got a few years of practical experience under their belt. I believe the time is now right to take this up again—especially in light of the Bush-Gorbachev summit agreement on pursuing additional nuclear confidence-building measures.

Our amendment identifies a list of possible additional roles for the centers and asks the administration to evaluate them. With this report in hand next year, we can be better informed in deciding whether to mandate changes in the operations and orientation of the centers.

Mr. President, with these important nuclear risk reduction initiatives in mind, it is particularly appropriate that we pause to remember and pay tribute to one of the earliest and most farsighted advocates of finding ways to prevent inadvertent crises between the United States and the Soviet Union, Gen. Richard H. Ellis.

General Ellis died last year on March 29, after a courageous battle with cancer, and was buried with full military honor at Arlington National Cemetery. General Ellis was a true military professional and an accomplished diplomat who served his country with distinction in time of war and peace.

Born in Laurel, DE, where he completed elementary and high school, General Ellis received his bachelor of arts degree in history from Dickinson College, Carlisle, PA, in 1941, and a law degree from Dickinson School of

Law in 1949. During World War II, he served with the 3d Bombardment Group in Australia, New Guinea, and the Philippines, and flew more than 200 combat missions in the western Pacific area. Later in his Air Force career, he held such important positions as Vice Chief of Staff, Commander, Allied Air Forces Central Europe, and Commander in Chief of U.S. Forces in Europe.

As Commander in Chief of the Strategic Air Command, Dick Ellis understood that our Nation's security is underpinned by a strong nuclear deterent. As Ambassador in Geneva heading our delegation to the United States-Soviet Standing Consultative Commission, he understood the significant contribution which arms control can make to our security. And as an informal adviser to Democratic and Republican Senators on a host of important defense and arms control issues, including the critical area of nuclear risk reduction, General Ellis understood that our Nation's security is best served when the Congress and the executive branch work together.

The origins of the Nuclear Risk Reduction Center initiative date back to an Armed Services Committee hearing in 1981, when I talked to General Ellis who was the commander of SAC, about U.S. capabilities to identify the origin of a nuclear blast were a single weapon to be detonated over one of our major cities. General Ellis suggested I formally request that SAC conduct a study of this and other possible nuclear scenarios which had the potential to drag the United States and the Soviet Union into an accidental nuclear war. The SAC analysis which General Ellis directed showed that both the United States and the Soviet Union needed to improve dramatically their warning and attack characterization capabilities to deal with the use of a nuclear device by a terrorist or other third party is either peacetime or a crisis situation.

During that first conversation, General Ellis recounted to me his experiences as an Air Force commander in Europe, when use of constant communications channels available through the four nation air traffic control command post in Berlin prevented a number of instances where aircraft inadvertently strayed outside the designated corridors from provoking unnecessary hostilities. In his view, a similar communications network was needed between the superpowers to prevent inadvertent nuclear crises. This conversation planted the seed which 6 years later bore fruit in the form of the 1987 United States-Soviet agreement establishing the centers.

Dick Ellis was a friend and a valued counselor. He was a man of vision who never forgot his substantial operational experience and his time in combat. He was also a diplomat who urged that the United States and the Soviet Union work together for peace and stability. As the United States and the Soviet Union pursue the additional nuclear risk reduction measures called for in the June 1 joint statement, his expertise and wise counsel will be greatly missed. I know he would be pleased with this and other recent developments that hold such encouragement for a more peaceful and stable world. Our Nation must never forget men like Dick Ellis.

AIDS UPDATE

Mr. CRANSTON. Mr. President, according to the Centers for Disease Control, as of June 31, 139,765 Americans have been diagnosed with AIDS; 84,164 Americans have died from AIDS; and 55,601 Americans are currently living with AIDS.

Some 3,496 more Americans have developed AIDS and 2,256 Americans have died from this horrible disease during the month of May.

FUNDING FOR AIDS

Mr. President, the House has passed its fiscal year 1991 appropriations bill containing funding for Federal AIDS programs. The Senate will act after the upcoming August recess. In the meantime, both Houses will have likely passed the conference report to accompany the comprehensive AIDS care bill, to provide emergency relief to areas hardest hit by the AIDS epidemic. In addition to support for hospitals, clinics, community health centers, and other facilities, the bill provides for early intervention services and for HIV health services research. This legislation is the most important single Federal contribution to the war on AIDS we have yet enacted, and I will be joining Senators on both sides of the aisle in urging full and expeditious funding for its critically important provisions.

Health care in America is increasingly expensive, and so is our battle against AIDS. To do the research that needs to be done and to care for the people who now have AIDS requires an aggressive effort, both in terms of programs and funds.

The epidemiology of AIDS is so unique as to require a virtual assault of adequately funded programs to keep it from spreading through America and, indeed, the world. It is new: The appearance of AIDS, the spread of AIDS, and all our research and treatment programs have occurred within the last 10 years. The disease is preventable: Our need for a national education campaign has been intense and immediate. AIDS hits hard among inner-city, low-income groups with little or no ability to pay for needed care, and the resulting impact on hospitals and other parts of our health care system has been devastating. Hospitalization costs for people with AIDS are astronomical, and the number of people with AIDS who have no insurance is increasing. Drugs that slow the progress of the disease are extremely expensive, beyond the ability of many people with AIDS to pay for them, in whole or in part.

The twin goals of our Federal anti-AIDS effort have been to find a cure for the disease and to alleviate the suffering of those who are infected. We have made clear progress on both fronts. And there have been other, hopeful results. In the Los Angeles Times, Michael Schrage writes of the global aspects of AIDS research through which fundamental insights into the HIV virus and the immune system will likely provide insights into other diseases. Schrage quotes Dr. Anthony Fauci, director of the National Institute for Allergy and Infectious Diseases, as arguing that AIDS research cannot help but offer insights into degenerative diseases such as multiple sclerosis and autoimmune diseases such as lupus, and Schrage argues that "AIDS has become the engine for critical biomedical research in this country."

S&L WINDFALL PROFITS RECAPTURE

Mr. SASSER. Mr. President, I rise today to address the issue of fraud and windfall profits associated with the savings and loan debacle.

As this sad chapter in our financial history continues to unfold, it's increasingly clear that fraud has played a major role in the failure of numerous institutions. Indeed, the Resolution Trust Corporation suspects that fraud contributed to the collapse of 40 percent of the savings and loans it has investigated.

In too many cases, Mr. President, those who committed this fraud made a great deal of money. It is now the obligation of the bank regulators and the Justice Department to pursue these people to the fullest extent of the law.

However, in looking to the future, there is still enormous potential for fraudulent operators to profit at the taxpayers' expense.

Over the next several years the RTC, on behalf of the taxpayers, will be selling tens of billions of dollars worth of assets. There are 14,700 properties in Texas alone. Independent contractors—private parties—will sell all of these assets.

Mr. President, I cosponsored the Senate S&L crime package; I obviously think it's a very good bill. But I am concerned that financial fraud, by its very complex nature, will continue to be difficult to detect, investigate, and prosecute.

In fact, Mr. President, I think it may be beyond the ability of the RTC to

effectively monitor every transaction. And given what we know about the character and scope of the problem, there is a great probability that collusion, speculation, land flips, and other fraud could take place.

There is evidence that a wave of profiteering is indeed surging toward the RTC. We read in the newspapers about the "great S&L firesale". Mailings are going out from hungry consultants with the slogan "You too can profit on the savings and loan bailout" printed right on the envelope.

Mr. President, the taxpayers have already been swindled once in this process, we should not let them be swindled again.

Therefore, Mr. President, I am proposing the Congress enact legislation to permit the Treasury to recapture windfall profits that result from the sale of RTC property. If you purchase and then resell RTC assets, and you have an extraordinary profit, under my bill, you will have to share it with the taxpayers.

The savings and loan bailout is now projected to cost several thousand dollars for every American family. Under the bailout plan as it now stands, the taxpayers only share in the downside. Under my bill, they will have a chance to share in the upside.

My proposal is fairly simple: If you buy property from the RTC and you double your money in less than 3 months—in other words, if you sell it for more than twice what you paid for it—you pay a hefty tax on the excess gain.

My proposal would only affect properties purchased for over $250,000, so I am targeting sophisticated investors. This extra tax would be reduced, the longer the asset was held. After 2 years, there would be no extra tax. And the tax would only apply to the excess gain over doubling your money or over 100%.

I think this is a reasonable proposal. I do not think it will deter serious, long-term investors from bidding on RTC property. I do not think it will affect the prices that the RTC receives.

But I do think it will discourage speculation. It will help prevent manipulative and collusive activities. It will protect the taxpayers from being ripped off for a second time. And it will bring in some revenue to the Treasury that is sorely needed.

I think that the Justice Department and the bank regulators are doing a much better job in pursuing savings and loan fraud. But it is an extremely difficult task. And it will only get worse.

The asset sale that the RTC has planned over the next few years is unprecedented in size, scope, and monetary value. You can almost guarantee that fraud will be present—we must prepare now to stop it. The taxpayers need extra protection. And I think one of the easiest and most efficient ways to provide that protection is by bringing in the tax collector.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,966th day that Terry Anderson has been held in captivity in Beirut.

CHEMICAL DEMILITARIZATION ON JOHNSTON ISLAND

Mr. INOUYE. Mr. President, today I rise to speak on a matter of compelling urgency to the people of Hawaii and to the people of the Pacific.

At this moment, United States owned chemical weapons, which have been stored in Germany for nearly 25 years, are being packaged in secure containers, which are then placed in larger, secure containers, called milvans, for shipment by truck to Miesau, Germany. At the United States army depot in Miesau, these secure containers will be placed on railcars for shipment by train to the German Port of Nordenham. Once there, they will be placed onboard specially configured ships of the U.S. Ready Reserve force for transshipment to Johnston Island in the Pacific.

In recent weeks, as these plans, which earlier had been publicized, began to be implemented, they drew more attention and the weapons themselves came to be regarded as a more present danger by the people of Hawaii and the Pacific. As attention sharpened, suddenly, weapons which were stored in remote places, and largely out of mind, became a matter of urgent concern. In Yap, in Tuvalu, in Kiribati, and in other island nations of the Pacific, political leaders became alarmed. Many passed resolutions in opposition to the proposed shipment. In Hawaii, the state legislature and many city councils took the matter under urgent consideration. The Governor of Hawaii wrote to the United States Secretary of Defense imploring him to stop the shipment of chemical agents to the Pacific.

Mr. President, my constituents fear these chemical weapons, as well they should. Of all the horrible weapons produced by man, perhaps none instills fear as readily as chemical agents—the nerve gas which silently strikes the central nervous system and incapacitates and kills those who come into contact with it. These agents, these weapons, are to be feared, for they are extraordinarily dangerous. I do not deny or disparage the fears of my constituents, Mr. President. Indeed, I share them.

I will say that many of the fears expressed by my constitutents are not grounded in fact and arise because they have not been provided adequate or timely information on the program of chemical demilitarization on Johnston Island. U.S. military officers and Defense Department officials responsible for the safe and secure movement and destruction of these weapons have not been as forthcoming as they should have been in responding to the swell of public unease. Their concern over the safe and secure transport is commendable; their failure to grasp the significance of public concern is inexcusable. My constitutents unnecessarily have been subjected to unfounded rumors and speculation which have fed natural anxieties and increased opposition to the planned destruction of chemical weapons on Johnston Island. Fear is often accentuated by uncertainty, and uncertainty is compounded by a lack of knowledge. Today, I hope to provide information which will help to dispel that uncertainty and reduce those fears. Let me state from the outset that I support the plan to incinerate these chemicals—at very high temperatures which destroy the agents and break down their chemical makeup—as the best available means of ridding the world of these horrible weapons. Let me state a simple truth—if we are to rid the world of chemical weapons, they must be destroyed.

Mr. President, when the Senate begins the August recess, I, along with senior staff on my Defense Appropriations Subcommittee, will travel to Johnston Island for an onsite inspection and review of the safety of procedures for the destruction of chemical weapons at the Johnston Atoll chemical agent disposal system. To provide further assurances to my constituents and the people of the Pacific region, I have received approval from the Secretary of Defense to invite members of the news media to travel with me. Arrangements for a media pool are presently being made by the public affairs office of the commander-in-chief of U.S. Forces in the Pacific.

Mr. President, today, recognizing that the concerns of my constituents cannot await my inspection of the facilities on Johnston Island, I hope to respond to the questions which have so troubled my constituents and others in the Pacific. Let me assure everyone concerned that I am not holding back any information. The only classified information which I know and which I am unable to release is the actual date on which the shipments will begin and the exact route of the voyage.

Mr. President, I will now address the principal questions which have been raised.

First, is Johnston Island, in the Pacific, to become a dumping ground for U.S. chemical weapons or the U.S. chemical weapons stockpile?

No! By percent of agent tonnage, no more than 6.6 percent of the U.S. chemical weapons stockpile will be destroyed on Johnston Island. The Secretary of Defense, in a letter to Gov. John Waihee, has unequivocally stated, and I quote, the total percentage that will be destroyed on Johnston Island is 6.6 percent. The rest will be destroyed within the continental United States at the locations where they are currently stored.

Second, where are chemical weapons stored and where will the stockpiles be destroyed?

In accordance with the letter of Secretary Cheney to Governor Waihee, dated 20 July 1990, the following is the distribution by percent of agent tonnage of the United States chemical weapons stockpile. Within the continental United States, these chemicals will be destroyed at the locations where they are stored.

	Percent
Tooele, UT	42.3
Pine Bluff, AR	12.0
Umatilla, OR	11.6
Pueblo, CO	9.9
Anniston, AL	7.1
Aberdeen, MD	5.0
Newport, IN	3.9
Lexington, KY	1.6
Johnston Island	5.2
Europe (Germany)	1.4

Third, apart from Johnston Island, are any chemical weapons stored in the Hawaiian Islands.

No!

Fourth, will Soviet chemical weapons or those of other nations be destroyed at Johnston Island?

No! While I hope that the lessons learned and the technologies developed at Johnston Island will be broadly shared in order that we may hasten the day when the world is free of chemical weapons, no additional chemical weapons will be destroyed at Johnston Atoll.

Fifth, is the destruction of chemical weapons proceeding without adequate testing of the facilities?

No! Construction and testing of the Johnston Atoll chemical agent disposal system began in 1985. In the 5 years which have since passed, numerous and increasingly stringent tests have been conducted to ensure the integrity of construction, the adequacy of safeguards, and the safety of processes employed.

As part of an ongoing 16-month operational verification test chemical agents will be incinerated. Frequent, periodic reports will be made to assure compliance with the provisions of the Toxic Substances Control Act and the Resource Conservation and Recovery Act.

Sixth, why are these weapons being transported to Johnston Island instead of being destroyed where they are located in Germany?

These are United States owned chemical weapons which were stockpiled in Germany for use by United States Forces in time of war. The introduction of chemical weapons into Germany by the United States was covered by the terms of the underlying status of forces agreement between the United States and the Federal Republic of Germany. Under that agreement it is our responsibility to remove these weapons. The decision on the timing of withdrawal was made by the Secretary of State in consultation with our German allies. Frankly, I believe the decision on timing was made because the removal of chemical weapons was believed to be a positive step which would encourage counterpart measures by the Soviet Union.

Seventh, will the ships transporting the chemical agents from Germany pass within the State territorial waters of Hawaii?

No. While the exact route of the vessels must remain secret to guard against any possible acts of terrorism, the ships will not pass within Hawaiian waters. Although the initial plans indicated that the ships might call at Honolulu after all chemicals had been offloaded at Johnston Atoll, I have insisted that they remain outside Hawaiian waters at all times and I have been assured that they will not enter our waters at any time.

I should also note that the crew and officers of these ships will be highly trained members of the U.S. merchant marine. Moreover, the ships will be escorted by U.S. naval vessels while in transit.

Eight, will the U.S. chemical weapons in Germany be transported to Johnston Island before it is determined that the facility is operational and completely safe?

No. My amendment to the fiscal year 1990 Department of Defense Appropriations Act signed into law by the president on November 21, 1989, required that the Secretary of Defense certify to the Congress that the Johnston Atoll chemical agent disposal system had safely destroyed live agent chemical munitions prior to the transport of any chemical munitions or hazardous materials to the JCADS site. The Secretary of Defense made this certification to the Congress on July 23, 1990.

Moreover, I can assure all concerned that no transhipment will occur until after I have visited Johnston Atoll and have determined that satisfactory safeguards are in place.

Ninth, do the chemical weapons stockpile already on Johnston Island pose any danger to the Pacific region?

No. Adequate storage facilities have been constructed and the chemical agents are continuously monitored. However, prolonged storage therein poses risks to the entire Pacific. In time, the structure of the weapons themselves can degrade making them more volatile. For this reason, early destruction of the chemical agents in the best approach to avoiding such dangers in the future.

A NATIONAL AGENDA FOR HEALTH CARE REFORM

Mr. COHEN. Mr. President, the American health care system provides the finest, most innovative and technologically advanced care in the world. The latest in diagnostic and therapeutic hardware is available to Americans in virtually every region of the country. Advances and innovations in technology and surgical technique have dramatically improved the practice of medicine and have improved the quality of life for millions of Americans. However, while America's system is capable of providing the finest health care in the world, it is critically flawed. For all of its sophistication and technological expertise, our current health care insurance has failed to fulfill its primary mission to provide access to affordable quality health care for all Americans.

As many as 37 million people—at least one in every eight Americans—are without health insurance and are therefore denied access to even basic health care. In my home State of Maine, there are approximately 130,000 individuals who have no health insurance at all. They are not old enough for Medicare, not poor enough for Medicaid, and have limited or no access to health insurance provided through their employers. Working Americans and their families make up the great majority—80 percent—of the uninsured. Many have been denied coverage because of preexisting medical conditions. Most have simply been priced out of the market. Rising health costs and government-mandated comprehensive benefit packages have sent health insurance premiums skyrocketing, virtually precluding small businesses from providing adequate coverage for their workers and individuals and families of modest means from purchasing coverage on their own.

For the most part, the remaining uninsured are unemployed persons and their families who are near or below the federally established poverty level, but who are not covered under Medicaid. In actuality, Medicaid only covers about 40 percent of Americans who live below the poverty line.

The problem of access to affordable health care services is not limited to the uninsured. The problem of access is shared by the one-fourth of our Nation's population who live in rural areas.

Last year, I presided at a joint hearing of the Senate and House Aging Committees in my hometown of Bangor, ME. Together with my colleague from Maine, Representative

OLYMPIA SNOWE, I heard testimony which only confirmed what we already knew too well—that many rural Americans do not have adequate access to the health professionals and facilities necessary to basic health care. Our rural population tends to be older, poorer, and less likely to be insured than their urban counterparts. Rural residents also have higher rates of chronic health conditions than do urban residents. Rural Americans not only have a greater need for health care, but also a greater difficulty obtaining it.

The access problem is also shared by the growing numbers of elderly and disabled Americans in need of long-term care. The primary problem restricting access to long-term care for most Americans is cost. A nursing home patient in Maine today can expect to pay an average of $25,000 a year for care. Since less than 2 percent of America's elderly have long-term care insurance, the cost for such care is borne almost entirely by individuals, their families, and finally, only after personal resources have been spent down to the poverty level, Medicaid.

In the near future I will be introducing legislation setting a national agenda for health care reform. The legislation addresses the three major problems plaguing our current health care system: quality, affordability, and accessibility. It is comprised of five major components which are designed to: First, make health insurance more accessible and affordable for individuals and small businesses; second, make health care services more available for rural Americans; third, reduce health care costs; fourth, provide for medical liability reform and the development of national standards of care; and fifth, increase access to coverage for long-term care.

PROVISIONS TO MAKE HEALTH INSURANCE COVERAGE MORE ACCESSIBLE AND AFFORDABLE FOR INDIVIDUALS AND SMALL BUSINESSES

As much as possible, individuals must assume the responsibility for the cost of their health care, allowing government to concentrate its resources on those Americans most in need. My proposal will call for the elimination of existing barriers to coverage and will provide special tax incentives for individuals and small businesses wishing to purchase health insurance.

A major impediment to expanding private coverage is the proliferation of Government-mandated health benefits that must be included in all policies offered for sale. A recent study estimated that as many as one-quarter of the uninsured lacked coverage because they had been priced out of the market by increases in State-mandated benefit laws. More than 640 specific State mandates now require insurers to include particular benefits in health plans such as mental health, podiatry services, chiropractic care, and alcohol and drug-abuse treatment. While such services are important, these requirements price insurance coverage out of reach for many individuals and small businesses. I will propose calling for the preemption of State-mandated benefits and for the development of a uniform, low-cost, minimum benefit package that would be available for purchase by individuals and businesses nationwide. Individuals choosing to pay more for comprehensive coverage could certainly continue to do so. However, the availability of a no-frills package would help ensure universal access to affordable basic coverage for hospital, physician, primary, and preventive care services. The legislation will also call for the development of a plan for standardizing and simplifying public and private insurance forms and procedures to facilitate comparisons between policies and to expand consumer choice.

The bill will also provide for the development of State-run risk pools for the medically uninsurable. Individuals who are uninsurable because of a preexisting medical condition would have the option of purchasing—or having their employer purchase—health insurance from a State pool. The legislation authorizes a block grant program for States to develop programs for individuals who are uninsurable. Twenty-four States, including my home State of Maine, have already provided for the creation of such pools.

This section also would provide parity for self-employed persons and unincorporated businesses by granting them the same 100-percent deduction for health benefit costs granted to incorporated businesses. Currently, 2 million of the estimated 37 million uninsured are self-employed. In addition, unincorporated small businesses are about half as likely to provide health care coverage to owners and workers as incorporated businesses of a comparable size. Enactment of the full 100-percent deduction for health benefit costs should encourage greatly expanded coverage for these individuals.

This section also incorporates legislation I introduced earlier in the session to provide a refundable tax credit to help the cost of the insurance premiums for low- and moderate-income individuals and families not covered by employer-provided plans. A credit of 60 percent would apply to premiums of up to $1,200 for individuals and $2,400 for families. Individuals with adjusted gross incomes of less than $18,000 and families with adjusted gross incomes of less than $28,000 would be eligible for the full 60-percent credit. The credit would be phased out for individuals with incomes between $18,000 and $23,000 and families with incomes between $28,000 and $33,000.

Finally, the proposal would provide for expanded medicaid coverage to enable poor and near-poor individuals, not currently eligible for benefits, to buy in to the program, with premiums set on a sliding scale based upon income.

PROVISIONS TO MAKE HEALTH CARE SERVICES MORE AVAILABLE IN RURAL AMERICA

One of the most critical problems facing Americans in rural areas is the scarcity of doctors and other health professionals. My proposal will incorporate elements of legislation I introduced last year, the Rural Physician Shortage Act, which includes provisions to revitalize the National Health Service Corps and to increase scholarship and loan repayment opportunities to help relieve the critical shortage of health care practitioners in rural areas.

In addition, the bill will include provision of a special tax credit for health care providers serving in rural areas. It also includes provisions of a bill introduced by my distinguished colleague from Maine, the majority leader, which would provide Federal matching funds for communities wishing to finance medical education costs for local residents in return for commitments for community service. The legislation draws upon the experience of one of my constituents, Dr. Roger Pelli, who testified at the Senate Aging Committee hearing I chaired in Bangor last year about the innovative arrangement he has with six central Aroostook County towns. These communities levied a tax on each resident, then pooled their resources to finance Dr. Pelli's medical school education. In return, Dr. Pelli committed to 8 years of service to these communities upon his graduation. Federal encouragement of such creative and innovative arrangements in essential if we are to overcome the critical health manpower shortages plaguing rural areas.

PROVISIONS TO REDUCE COSTS

Health insurance alone will not ensure good health. It won't protect the smoker from the ravages of lung cancer or the heavy drinker from cirrhosis of the liver. Americans must be encouraged to engage in healthy behavior and to accept more responsibility for their physical well-being. My proposal would reduce health care costs by encouraging health promotion and prevention programs. It provides clarification that work-based prevention and promotion efforts are considered health benefits for tax treatment and provides incentives for the development of such programs in the workplace.

The legislation will also reduce costs by encouraging neighboring hospitals to band together to share costly high-tech equipment or services for which there is limited demand to eliminate duplication of services.

MEDICAL LIABILITY REFORM PROVISIONS AND THE DEVELOPMENT OF NATIONAL STANDARDS OF CARE

Medical malpractice costs have reached an estimated $5 billion annually nationwide. When legal costs are added, the estimated annual costs climb to $20 billion. The medical malpractice crisis has also had a serious negative impact on the availability of care, particularly in rural areas. Many family physicians have given up the high-risk practice of obstetrics because they simply do not deliver enough babies annually to justify the added cost to their malpractice premiums.

My proposal will require States to institute prelitigation screening panels which are charged with determining whether an injury has occurred and whether that injury has resulted from negligence. My home State of Maine has had great success in reducing medical malpractice costs enough through the use of these panels. As a result, malpractice premiums for both physicians and hospitals have declined.

The proposal will also direct the newly created Agency for Health Care Policy and Research to expedite the development of national practice guidelines and standards of care in order to ensure appropriate and effective care. Development of such guidelines and standards will also help to reduce the practice of defensive medicine, which is costing the American public as much as $121 billion a year. The legislation will also allow health care providers to use the practice guidelines as the standard of care in medical liability cases.

PROVISIONS TO INCREASE ACCESS TO COVERAGE FOR LONG-TERM CARE

Only 2 percent of our Nation's elderly have long-term care insurance. In order to increase access to coverage for long-term care, my proposal would reclassify long-term care insurance as health insurance rather than disability insurance for tax purposes. This would enable individuals to deduct long-term care expenses and would ensure that long-term care benefits would not be subject to income tax.

The proposal will also provide for the inclusion of long-term health care coverage in cafeteria benefit plans, and will allow individuals to roll over funding held in individual retirement account to long-term care insurance without penalty.

Mr. President, it is true that our health care system is plagued by serious problems primarily related to cost and access to care. However, there is much that is good about the American system, and, while these problems are critical, they are not terminal. I intend to propose an agenda for reform which builds upon the existing public-private health care partnership to preserve what is best about the American system. At the same time, it takes important steps toward resolving the problems plaguing the system and toward ensuring the availability and accessibility of quality health care for all Americans at a price they can afford.

TRIBUTE TO ROBERT W. PAGE, ASSISTANT SECRETARY OF THE ARMY FOR CIVIL WORKS

Mr. THURMOND. Mr. President, I rise today to pay tribute to Mr. Robert W. Page, Assistant Secretary of the Army (Civil Works). Mr. Page has announced his intentions to step down from this post on September 1, 1990.

Mr. Page has served the Army Corps of Engineers for over 2½ years. He was originally appointed to the position of Assistant Secretary of the Army (Civil Works) by President Reagan in December 1987 and President Bush reappointed him in June 1989. Prior to his service with the Department of the Army, Mr. Page had a very distinguished career in the private sector as the chairman and chief executive officer of the largest engineering and construction firm in the world, Kellogg Rust, Inc. Mr. Page is also a veteran of World War II.

Mr. Page has provided able and dedicated leadership to the Department of the Army and the Corps of Engineers. During his tenure as Assistant Secretary, Mr. Page's work on the National Wetlands Policy Council helped to establish a sound wetlands permitting process—one that preserves this valuable resource, but also allows a sense of reasonableness to the process. In addition, he was instrumental in assisting many parts of our Nation recover from natural disasters by directing corps resources to these stricken areas. Moreover, Mr. Page very ably directed the recovery of Panama following Operation Just Cause. The manner in which Assistant Secretary Page handled the recovery of Panama provided stability to a potentially volatile situation.

The State of South Carolina is particularly appreciative of the invaluable assistance he has offered as the head of the Corps of Engineers. Mr. Page visited South Carolina with me during the drought of 1986 and following Hurricane Hugo in 1989. The two natural disasters were both, times of great need for South Carolina, and his leadership and assistance helped the State recover from those difficult times. It just so happened that it started raining the day we visited in 1986 and the drought was soon over. I knew that Mr. Page was a man of action, but I did not think he could solve problems so quickly. Mr. Page also played a very important role in the development of the Savannah Lakes Village in rural McCormick County, SC. This development provided an economic boon to McCormick County, and the project served as a model for the limited development of Federal lands.

It is largely through Assistant Secretary Page's efforts that the corps has become a more environmentally sensitive organization and is diversifying its mission to become a better partner in rebuilding the Nation's infrastructure. Mr. Page has developed and maintained a good working relationship with Members of Congress, and through his leadership and direction, the Army Corps of Engineers is now in a position to better serve the needs of the American people.

Mr. President, Bob Page is an outstanding man and patriotic citizen, and I consider him to be one of the finest assistant secretaries of the Army (Civil Works) with whom I have had the pleasure of working. I am sure that my colleagues would join me in thanking Bob Page for his dedicated service to our great Nation, as well as wishing him well in all his future endeavors.

RHODE ISLAND BIDS FOND FAREWELL TO SUPERINTENDENT JOSEPH ALMAGNO

Mr. PELL. Mr. President, we in Rhode Island must regrettably say a fond farewell to a prominent figure in education, Providence Superintendent, Joseph A. Almagno. Mr. Almagno has just retired from a long and distingushed career of nearly 30 years in education.

Beginning as a fourth grade teacher in Providence in 1965, Joseph Almagno launched a career which has, ultimately, placed Providence on the map as an example of a city which truly has developed extraordinary methods to deal with tragic problems plaguing our schools and society, most notably the school dropout situation. In 1970, Almagno went on to become an elementary school principal, and then, in 1973, began to hold a series of administrative posts in the Providence school system. In 1987, Almagno became the superintendent of schools.

The trademark of Joseph Almagno's tenure as the Providence superintendent of schools is also his legacy: the Providence School Partnership Program, a unique assortment of coalitions of educators, parents, community leaders, and members of the business and labor fields. These collaborative efforts have resulted in hundreds of thousands of Federal dollars for Providence schools in such critical areas as magnet schools and dropout prevention programs.

As a result of Joseph Almagno's efforts, the Providence School department is a member of at least 15 separate partnerships. With organized labor, Providence schools work with the Providence Teachers' Union in a teacher education initiative concern-

ing effective teaching and critical thinking skills.

A particularly successful series of partnerships have teamed the Providence schools with four postsecondary institutions in Rhode Island. Brown University and the Providence schools have joined together on three initiatives, including the coalition of essential schools, secondary teaching institutes, and drug-free schools program. The University of Rhode Island/Providence partnership has gained recognition for several initiatives, including the Providence dropout collaborative, a magnet schools program and the guaranteed admissions program. The Community College of Rhode Island and the Providence schools together run a highly successful tech-prep program. And finally, Providence schools and Rhode Island College collaborate to run an early childhood program at the West Broadway Elementary School.

Providence schools and the Rhode Island business community are also partners in several collaborative efforts. As but two examples, Providence schools work with the greater Providence Chamber of Commerce, a coalition which has yielded an adopt-a-school program for jobs for youth program, among other vital activities. Providence schools and the private industry council collaborate in operating the junior achievement and vocational exploration programs.

Perhaps the words of Joseph Almagno, himself, can best sum up his accomplishments: "We need a public policy where focus is placed on children and their families * * * no one discipline has the answer, but we must collaborate to find the answers * * * our initiatives must involve multiple agencies, parents, teachers, and students and address multiple problems." His words have truly taken root, not only changing the face of education in Rhode Island, but also across the country. Other cities are attempting to duplicate the efforts which Providence has implemented with the sterling leadership of Joseph Almagno, particularly in the area of school dropout prevention. To my mind the work of Joseph Almagno has dramatically improved the way schools will face a whole series of the social problems they face. We in Rhode Island have been extremely fortunate to have had such an innovative and dedicated leader at the helm in Providence, and I wish him the very happiest of retirements.

PARENTS AS TEACHERS

Mr. PELL. Mr. President, I am pleased to cosponsor S. 2366, the Parents as Teachers: The Family Involvement in Education Act of 1990. I offer my wholehearted support to this bill, and in doing so wish to highlight a successful program in East Providence, RI, which has been in operation since 1988. The East Providence plan was modeled after a program that began 9 years ago in Missouri and has produced exciting results.

Parental involvement in educating children is not a new concept. Rather, it has been of proven success in raising the achievement of children and facilitating the best possible education and future for young people. It is my sincere hope that this concept will be implemented throughout Rhode Island and the rest of the Nation as well.

In addition, PAT programs have also raised the level of literacy among participating parents, while providing parenting skills and a much needed support network, especially for new parents. Specifically, the parents as teachers program assists parents in dealing with child development and providing instruction in how to handle behavioral changes in their children as they grow, thus helping to alleviate a common source of tension and frustration for new parents. Of particular importance is that these programs provide the opportunity for meetings among these parents, allowing them to share experiences and offering a great source of moral support for parents of young children. Additionally, this crucial program can detect early signs of audio, visual, and cognitive delays or disabilities, which can often be cured if they are checked before a child enters kindergarten.

It is my belief that both children and parents would flourish given this great opportunity to develop to their fullest potential. With enhanced support from informed parents, children will live in homes which are truly the educational environment they should be. They will be in a better position to make smarter, healthier choices for themselves. And to my mind, this program should be encouraged and replicated nationwide, for it will be of significant benefit in addressing the school dropout and drug and alcohol abuse problems currently plaguing our schools.

Mr. President, this program is important for children, parents, and our entire Nation. It will help to launch a new generation of young people who will be provided with a goundwork for later successes. This program cuts across lines of age, occupation, income, race, and family size, giving all participants an equal chance to excel. I hope all of my colleagues will join me in supporting this important legislation.

ENERGY AND WATER MEASURE WOULD SAVE RHODE ISLAND LANDMARK

Mr. PELL. Mr. President, I am pleased to note that the Senate energy and water appropriations bill, which we have just passed, contains a provision to fund an important Army Corps action in Rhode Island that would save one of our most beautiful and evocative landmarks.

The Southeast Lighthouse sits as a proud beacon at the top of Mohgan Bluffs on Blocks Island, but this historical and architectural treasure is in imminent danger of falling into the ocean. It is a symbol of both Rhode Island and our New England maritime history.

The Southeast Light, built in 1873, is a truly remarkable structure and unique among all lighthouses. A massive red brick structure in the Victorian Gothic Revival style, it consists of a double cottage attached to an octagonal light tower.

This month the U.S. Coast Guard retired the light, which has been considered one of the primary beacons along the east coast, and activated a steel tower aid to navigation as a replacement.

A group of Rhode Islanders has been working since 1983 to save the original lighthouse. They formed the Southeast Lighthouse Foundation in 1987 and are working to raise the necessary funds to share 50 percent of the total expense of moving the landmark from the edge of the cliff.

The bluff upon which the light sits has been eroding for more than 100 years. The structure now is about 60 feet from the nearly vertical cliff. The situation is particularly alarming because more than 40 feet of land would be required to support the relocation.

Upon completion of the move, the Southeast Lighthouse Foundation envisions the establishment of permanent maritime and natural history exhibits on display and open to the general public at the light.

I joined with my colleague, the junior Senator from Rhode Island [Mr. CHAFEE], in offering an amendment to provide $970,000 to the U.S. Army Corps of Engineers in fiscal year 1991 to contract and oversee the lighthouse move.

I commend Senator CHAFEE for his work to save the Southeast Light and I thank the senior Senator from Louisiana [Mr. JOHNSTON] and the senior Senator form Oregon [Mr. HATFIELD] for accepting our amendment.

Although our amendment has been accepted and approved by the Senate, the lighthouse's future remains in doubt. The Senate has authorized and appropriated funds to move the lighthouse, but no similar action has occurred in the House.

I hope that the conferences on both the appropriations and authorization measures will agree to the Senate language, because the Southeast Lighthouse is the only light in the Nation facing immediate destruction.

GASOLINE PUMP PRICE GOUGERS

Mr. LEVIN. Mr. President, I want to direct the attention of the Senate very briefly to some very important news that is being reported across the country. It has to do with prices for gasoline that have reportedly risen as much as 12 cents per gallon in the last 24 hours in this country.

The reports are largely anecdotal at this point, but consumers in many States have been telling the media this afternoon that the price at the pump is rising fast. The Automobile Association of America-Michigan chapter put out a press release today saying that the Middle East crisis is already affecting pump prices. AAA-Michigan's survey of retail outlets shows jumps of 5 to 10 cents per gallon over a period of 3 days, some of those increases occurring overnight as news of the Iraqi invasion spread.

Some of my colleagues may have received calls in their offices as I have from Michigan.

Mr. President, it sounds an awful lot like the tremendous increase in home heating oil prices that occurred in the Northeast and Midwest during the bitter-cold winter of 1989.

In some cases, these increases doubled the heating bills of Michigan residents. The price rise caused serious, temporary, economic damage to many parts of the Upper Peninsula of Michigan.

We are moving very strongly to prevent this from happening again and I do not want this to happen with gasoline prices.

Mr. President, I want to warn those in our country who control gasoline prices and may consider taking advantage of consumers at this time. You may get away with price gouging for a short time, but we are coming after you. We will not let you get away with it. We are not going to let anyone hide behind the bitterness of war and the potential of energy disruption as an excuse to fleece the driving public.

That is why Senator LIEBERMAN and I have introduced legislation to make it a criminal offense for anyone to create a fuel shortage or probable shortage of fuel with the intent of manipulating prices. I urge my colleagues to cosponsor this legislation so every time that the Persian Gulf balance of power tilts, American consumers are not filling the coffers of greedy opportunists.

My warning is not just to profiteers, Mr. President. It is also to the administration and the Energy Department. I urge the Department to monitor this situation closely, to prosecute the price gougers, and to cushion the economic blow to consumers. This is an essential role for the Federal Government and I will be paying close attention to its progress as chairman of the Governmental Affairs Oversight Subcommittee.

NO REASON ON EARTH FOR PRICE INCREASE AT THE GAS PUMP

Mr. PELL. Mr. President, I wish to deplore today's panic driven price increases at gas pumps across America. I am told that at many gas stations in my home State of Rhode Island, prices were increased by 5 to 7 cents a gallon. It has also been reported that similar increases have taken place all across the country. There is no reason on Earth to increase prices so rapidly. Consumers deserve better treatment than this.

We learned some hard lessons from the Arab oil embargo of the early 1970's. We learned that the United States needed a strategic petroleum reserve and now we have a reserve of almost 600 million gallons. The Department of Energy has also stated that other domestic petroleum reserves are at a healthy level right now.

The Department of Energy has also said that there is currently no threat to oil availability in the United States and no supply-and-demand reason for price increases based on current information.

Iraq provides the United States with 8 percent of its imported oil and Kuwait currently provides us with about 1 percent of our imported oil needs. These figures do not warrant the panic pricing that consumers are now facing at the gas pumps.

I ask those who are involved in wholesale and retail sales of gasoline to move with caution and clear thinking in the pricing of gasoline.

TRIBUTE TO DR. JOHN GRONVALL

Mr. CRANSTON. Mr. President, I am deeply saddened to advise my colleagues of the sudden death yesterday of Dr. John A. Gronvall, the former Chief Medical Director of the Department of Veterans Affairs. Dr. Gronvall was on vacation in North Carolina at the time of his death.

This is terribly shocking news to all who knew John. I offer my sincere condolences to his wife Cindy, and to their children, Brad, Paul, and Jennifer.

There was not the slightest prior indication that John was not in the best of health. This tragedy came as a complete shock to all who knew John. We will all miss him very much.

John first joined the VA in 1983 after a highly distinguished career in academic medicine which concluded with the deanship of the School of Medicine of the University of Michigan.

His first appointment in VA was as the Deputy Assistant Chief Medical Director Academic Affairs. In September 1983, he became VA's Deputy Chief Medical Director, the No. 2 medical position. He served in that role or as Acting Chief Medical Director until January 1987 when he was named Chief Medical Director, the position he held until April 1990. After he left the CMD's position, he continued to serve the Department as a VA distinguished physician, his position at the time of his death.

John was an outstanding leader and manager in the VA system. He cared deeply about each individual as well as the health and well-being of all of our Nation's veterans. He provided the vision and leadership necessary for the Department to make great strides in developing programs to assure that veterans receive high quality care and to make increasingly efficient and productive use of available resources through innovative methods of budgetary allocation.

Mr. President, John was always forthright and direct in providing members of our committee and other Members of the Senate with assistance and information that reflected his great personal integrity.

John Gronvall was a good, wise, compassionate, and decent man. He was a fine leader. He was a first-rate public health official. He was someone I enjoyed very much knowing and working with. I know that I speak for all the members of the Committee on Veterans' Affairs in saying that we are all the less for his death.

BRUTALITY IN EL SALVADOR

Mr. McCAIN. Mr. President, I have heard reports today from El Salvador that in the northeastern province of Morazan, 11 Salvadorans were dragged from their homes and brutally murdered. Among those reported to have been killed were four children.

We do not yet know if these reports are correct in every detail. If they are true, we do not yet know who the killers are. Both the left and the right extremes of El Salvador's violent political culture are quite capable of committing such atrocities.

Mr. President, if these reports are true, if innocent men, women, and children have been slaughtered with guns and machetes to satisfy yet again the bloodthirsty madness of one terrorist or another in El Salvador, there is little I can say to adequately express my disgust and my grave, grave disappointment with the painfully slow process of establishing justice in El Salvador.

It is hard sometimes to keep hope. The merciless opponents of peace, freedom, and justice in El Salvador are too frequently successful in disrupting progress toward those conditions. It is

hard sometimes to keep hope. But we must, Mr. President.

We cannot, and El Salvador cannot, succumb to the determined ruthlessness of these criminals. This latest incident, if it has indeed occurred, must not serve as the pretext for either an FMLN offensive or a resurgence of right wing violence.

We in the United States must endure this setback, as we have endured others. We must not abandon El Salvador. We must not let El Salvador become the sole property of killers. I know that this is a formidable task. But we must find the courage to keep our faith in the ultimate triumph of freedom and to continue working toward that moment.

We will soon discover the details of this crime. I imagine we will soon have a good idea who is responsible. I will be among the first to condemn what has happened, and who has caused it to happen, and my condemnation will not be conditioned on who the guilty parties are. I long for the day when El Salvador will finally be free of the avarice, the powerlust, the tortured politics, and depraved philosophy of every type of Salvadoran killer. I wish them all an early encounter with God's justice.

Until that moment, let us not flag in our dedication to another, better El Salvador, at peace with itself and devoted to the rights of man.

TRIBUTE TO REPUBLICAN SUMMER PAGES

Mr. DURENBERGER. Mr. President, as we draw near to the summer recess, I wish to acknowledge and express appreciation for all of the Republican summer pages who have contributed so much to the U.S. Senate during the summer of 1990.

These young people came to us highly recommended by their communities for their intelligence and interest in Government and community affairs. They also demonstrated their energy, maturity, and commitment to the work of the Senate. They did their families, friends, schools, and their generation proud every day they served on the floor.

Mr. President, following are the names of the 32 Republican summer pages. Thanks and best wishes.

Jared Spahn, Warren Bloom, Megan McCray, Hayley Cashen, Heather Tucker, Christian Templeton, James Sparber, Kelly Walker, Sean Evans, Frances Lumpkin, Kristin Barkett, Amy Jackson, Heather Conner, Greer Blackwell, Amanda Bergner, Edouard Gershel, Andrew Ammerman, Rindi Savitt, Dax Dorough, Heather Ensign, Tom Danforth, Amanda Johnson, Jason Glaser, Will Bishop, Mary Long, John Liebengood, Darian Unger, Kirsten Palmer, Lori Benjamin, Damon Watkins, Kelsey Haddow, and Kelly Walker.

AMENDMENT TO ESTABLISH A NATIONAL COMMISSION ON SAVINGS AND LOANS

Mr. CONRAD. Mr. President, when the Senate considered a long-term debt extension, I intended to offer an amendment which would create a National Commission on Savings and Loans. However, because of the agreement on debt extension that has been reached, I will not offer that amendment. However, I come to the floor today to let my colleagues know that I will offer this amendment to the next appropriate vehicle that comes before this body.

As my colleagues know, there is a great deal of support for this concept. On July 31, the House passed a bill which included a provision to establish a commission to investigate the collapse of the savings and loan industry.

My amendment would create an eight-member commission to investigate the savings and loan scandal. It would have two duties: First, examine the structure that is in place to clean up the thrift industry to make certain that it will do the job—in a financially sound manner and one that will minimize the costs to the American taxpayers.

Second, the commission will investigate the reasons for the collapse of the thrift industry. They will report on their findings and recommend ways to prevent another financial collapse like the thrift crisis.

Mr. President, it is time for a full accounting of the S&L scandal. The American people have the right to know what caused this crisis and to demand that it does not ever happen again.

The first task must be to make certain that the regulatory framework that is in place is absolutely the best way to clean up the S&L mess. Every single aspect of the bailout has been bungled: the bureaucratic structure results in policy paralysis; the costs are multiplying; the authority lines are confused; politics prevents honesty on the resources necessary for the cleanup; S&L crooks are getting away with their loot; and there is a leadership vacuum within the cleanup apparatus.

We must not ignore these problems of the ongoing cleanup. Mr. President, the costs are growing—they have multiplied in just a few months. The administration itself admitted in May that the costs may be as high as $300 billion. The GAO puts its own estimate at anywhere from $325 to $500 billion. With these staggering costs—costs that our grandchildren will be bearing—we must act now. We must address the problems of the cleanup squarely and as quickly as possible. Making certain that our cleanup operation is efficient and effective will dramatically reduce the costs to the taxpayers.

Second, Mr. President, this commission will get to the bottom of the what caused the S&L collapse. The burden of cleaning up will be borne for years to come. The American people have the right to know exactly what caused the biggest financial scandal in this Nation's history. It is these American people who will make good on the commitment of the Government to insure deposits. They are demanding to know what caused the crisis and they want a guarantee that another crisis of this nature will not happen. A high-level, independent body can provide them with that accounting and, hopefully, that guarantee.

This is not the first time I have called for such a commission, Mr. President. On March 1 of this year I came to the floor of the Senate to express my concern about the ongoing cleanup operation. At that time, Mr. President, I called for a special investigatory panel to examine the operation of the S&L cleanup. Two weeks earlier, I had met with some of the most knowledgeable people in the financial services industry. They predicted that the estimated costs of the bailout would steadily increase. And that happened. We are now faced with aggregate costs of anywhere from $200 to $500 billion.

Mr. President, we have no other choice but to appoint an independent commission to first look into the short-term matter of what changes, if any, should be made in FIRREA to make the cleanup operation more effective and, second, to examine the longer term matter of the causes of the thrift industry collapse and recommend legislative or regulatory changes to prevent a similar disaster of this nature.

It is my hope that the Senate will adopt this amendment in the near future. After reconciling differences with the House, I hope a commission will soon be appointed.

CONFERENCE REPORT ON THE VOCATIONAL EDUCATION ACT

Mr. LAUTENBERG. Mr. President, yesterday the Senate approved the conference report on the Carl D. Perkins Vocational Education Act. I supported the conference agreement on this legislation, which authorizes critical dollars for vocational education programs nationwide.

I commend the chairman of the Education Subcommittee, Senator PELL, for the leadership he has demonstrated throughout consideration of this important legislation. His efforts in crafting this legislation and moving it through Congress demonstrate once again his commitment to improving

vocational education in this Nation. The chairman has been a good friend to the education community and has been tireless in his efforts to defend education programs.

I am particularly pleased that the Carl D. Perkins Vocational Education Act includes a $7.5 million authorization for a demonstration program I authored that is designed to address the significant barriers to education that confront so many of our Nation's low-income youth. The Senate version of the bill authorized $16 million for this demonstration program. The House bill did not include any funds. While I would have preferred to have this program authorized at $16 million, I am pleased that the House and Senate conferees agreed to provide $7.5 million to test this model program aimed at helping the poorest of the poor of America's youth.

Mr. President, under the demonstration program authorized in this act, the Secretary of Education would provide grants to establish a limited number of model educational centers throughout the Nation. The centers would be established in areas with especially high concentrations of children from low income families. Operated by the local school district or area vocational school district in which they are located, the schools would provide expanded services for these children in great need. While originally designed to address the needs of city youth, rural areas would also be eligible for funding.

I offered an amendment during Senate consideration of the bill to authorize $16 million to establish 10 center schools nationwide. My amendment was based on a bill I introduced along with Senators BRADLEY, MOYNIHAN, and SPECTER in August, S 1477, the Community Education Employment Center Act of 1989. The amendment had the support of Senators KOHL and HEFLIN as well. I testified before the Education Subcommittee of the Labor and Human Resources Committee on that bill.

I was pleased that Representative PAYNE agreed to introduce a companion to the bill in the House of Representatives and served as a conferee on the vocational education bill.

This demonstration program has support of vocational educators: the American Vocational Association, the National Association of State Directors of Vocational Education.

It has the support of professional educators: the American Federation of Teachers.

It has the support of people in the counseling profession—people who realize that we need to give our disadvantaged kids confidence and direction, if they are going to make the most of their education. The American Association for Counseling and Development supports the legislation.

It has the support of those who are on the front lines of urban poverty, trying to cope. It has the support of the National Urban League and the U.S. Conference of Mayors.

It has the support of business. In my State, businesses are facing labor shortages. While they have jobs that go begging for workers, there are workers that go begging for jobs. But they don't have the education. They don't have the skills. That's why the Business and Industry Association supports the legislation.

It has enjoyed the support of the State of New Jersey under both the past Republican administration and the current Democratic administration of Gov. Jim Florio.

Mr. President, the centers that would be created under this demonstration project are specifically designed to address the barriers to education for our Nation's poor children. The concept for the centers was developed after extensive consultation with numerous individuals who have been actively involved in education and education policy for many years. It responds to their specific concerns and recommendations.

The need to establish and test these model schools couldn't be greater. Although the Nation as a whole enjoyed economic growth, not everyone shared in the prosperity. Minority and youth unemployment is topping 30 percent. And while many suburban areas grew, many once great cities were overwhelmed by unrelenting poverty, homelessness, and joblessness.

If young kids from poor families are to be integrated into America's economic mainstream, they must meet the education and skills requirements of tomorrow's jobs. But not if they drop out of school. Not if they can't read and write.

Students in schools in poverty stricken areas are confronted with considerable barriers to graduation. Too many lack good role models. Too many have parents on welfare struggling to make ends meet.

America's poor teens are more than three times as likely to drop out of school to help support themselves and their families. Dropout rates in many urban schools are 50 percent or more. Dropout rates in rural schools average almost 16 percent, which greatly exceeds the average for suburban schools. Employment prospects for these kids are dismal at best. Too many lack the basic skills necessary to find jobs.

Traditional inner-city schools have been unable to surmount the formidable barriers to urban education. Urban school expenditures fall far below national averages. While our inner cities pay a higher than average proportion of their income to support schools, a shrinking tax base and poverty deny them the resources needed to launch the kind of effort required.

Rural schools in poor areas suffer as well. Those students who do graduate from many rural schools in poor areas are less prepared to deal with the demands of working life than many from more affluent areas. Many rural students from poor areas consistently perform more poorly in reading and writing.

We cannot let there become a permanent urban and rural underclass. We must assume a greater responsibility for the education of low-income youth.

Mr. President, the centers that would receive funding through this demonstration program would have the resources to address and help combat these problems.

They would test a comprehensive program that gives disadvantaged students not just what they need in the classroom, but also the services and support they need to make the most of what they learn in the classroom. It would pull together a variety of educational programs and social services programs. It would try to link these kids up with employment.

To do all this the centers would operate on an extended year and extended day basis. They could operate from 6 o'clock in the morning until 7 o'clock in the evening. That would help keep young people off the streets and provide them with maximum opportunities to learn and become productive members of society.

The centers would maintain small class sizes. Too many young people in our inner-city schools are expected to learn in classes with 30 and 40 other kids. But that's just not possible. Research shows that class sizes of 15 students can make an important difference in student learning. Centers would have small classes, ideally on average of 15.

Center students would be offered both academic and vocational education training, regardless of their career objectives.

A strong emphasis on guidance and counseling services is a key component of the model program. The centers would establish comprehensive guidance counseling services for students and their parents. These kids lack role models frequently. In many cases, both parents have been unemployed—on welfare. They need guidance and they need motivation to break out of the kind of life their parents have led. Center students would be referred to appropriate social services. And young mothers would have access to day care services for their children. How can a teenage mother learn, get the skills to make a decent life for herself, without care for her child?

The centers would also operate a job service office to offer students career

guidance, development, and employment opportunities and information about a broad range of occupations and career paths. The job service office would provide labor market information, job development, career testing. The office would assist students in arranging parttime, summer, and employment upon graduation.

The centers would encourage community involvement. They would have a parent community coordinator to keep parents involved in the activities of the center. A council of advisers would be created to seek active participation and input from local teacher organizations, guidance counselors, students, parents, community-based organizations, business, and labor representatives.

If the community takes an interest in the students, the chances are greater that the students will take more of an interest in learning and becoming productive members of society. If the community takes an interest, the chances are better that these kids will find jobs in the community. Because the community will have a stake in their success they'll be willing to give these kids a chance.

Mr. President, the money we spend on these centers is a wise investment that could lead to savings down the road. Each year 1 million kids drop out of school. America's drop outs lose $240 billion in earnings and foregone taxes over their lifetimes. Lost productivity and the remedial programs cost business $25 billion a year.

Our economy needs these kids trained. It needs them educated. Business leaders are concerned because they can't find skilled, educated workers. By the year 2005, most 18- to 24-year-old entry level workers will come from the public schools of distressed urban districts. When it comes to education the disadvantaged in our society, we are not just talking about a social obligation, we're talking about an economic imperative.

If we make bold investments in the education of young people in low-income areas, they will pay us back many times with increased productivity and employment, and reduced need for safety net and law enforcement expenditures.

Mr. President, I am pleased that this act authorizes funds to test this program. If we fund just 5 or 6 of these centers, we can see if this model works, and if there are ways we could better invest our education dollars.

I am pleased that the Senate has approved the conference report and I urge the House of Representatives to act swiftly as well.

SEED II AND THE INTERNATIONAL AFFAIRS AUTHORIZATION ACT OF 1990

Mr. PELL. Mr. President, I wish to provide a summary of a major piece of legislation, the International Affairs Authorization Act—S. 2944—which was recently reported by the Foreign Relations Committee and which may well be before the Senate in the near future.

This legislation consist of four titles:

Title I is the SEED II Act, a comprehensive revision of the Support for East European Democracy Act of 1989 [SEED I] enacted last November;

Title II is the Peace Crops authorization for fiscal years 1991 and 1992;

Title III creates a legislative basis for a major foreign aid instrumentality, the Development Fund for Africa; and

Title IV provides the necessary authorization for continued United States participation in the International Development Association.

TITLE I—SEED II

Title I of this legislation is among the most important pieces of foreign policy legislation to be reported by the Foreign Relations Committee during my three decades in the Senate.

My colleagues will recall that last fall, having received a rather modest administration request for aid to Poland and Hungary, the Foreign Relations Committee began from scratch and drafted comprehensive SEED legislation to set the stage for a new American initiative in Eastern Europe. The SEED Program created by that legislation is directed toward an unprecedented goal: that of helping new or evolving governments in Eastern Europe build successful free-market democracies on the rubble of failed communism.

In November, the SEED bill initially generated some controversy—the vote in committee was 10 to 9, on party lines. But eventually, in virtually identical form, SEED I passed the Senate overwhelmingly and with administration support. My impression is that we may now be facing a similar uphill sequence. On July 19, the Foreign Relations Committee, in the face of a total absence of minority members at a scheduled committee markup, ordered reported an original SEED II legislation by a vote of 10 to nothing.

I regret the partisan aspect of that proceeding, because I had hoped—and still hope—for bipartisan support of this bill. For the SEED II Act is based upon and embodies the most fundamental aims of American foreign policy: to assist in the building of free-market democracy. Nowhere could this aim be more important and pertinent to American security interests than in the nations of Europe now emerging from the tyranny and legacy of Communist rule.

SEED II is designed to provide the legislative basis, and the budgetary means, for expanded American participation in a cost-effective effort to help transform Eastern Europe—not through a monetary giveaway, but predominantly through targeted technical assistance aimed at building institutions for democracy and institutions for free-market economies.

This is an original bill, on which Senator BIDEN played a major drafting role, and which is cosponsored by myself, and Senators BIDEN, CRANSTON, DODD, KERRY, SIMON, MOYNIHAN, and ROBB.

Two points about the SEED II legislation bear emphasis:

First, this bill is totally congruent with administration policy as regards the kind of aid it envisages. It permits technical economic assistance and democracy building assistance in all European countries that have been Communist. But aside from authority to act in multilateral efforts to provide stabilization back-up loans for countries such as Poland, all of the focus is on advisory how-to-do-it aid—not on financial loans to governments. Indeed, such financial assistance is explicitly prohibited in the case of the Soviet Union.

Second, while providing a sound framework for action, the bill contains no provisions that require the President to take any particular action he does not regard as advancing the cause of building free-market democracies in Eastern Europe. The bill does mandate the President to implement two new programs, but ones administration officials have agreed are sound in the context of this legislation's purpose. These programs are:

The Books for Eastern Europe Program, which will assist in the publication of a whole new political and economic textbook literature; and

American Business Centers, two of which will be built as models to provide support, on a user fee basis, for the startup activities of U.S. firms. These activities would eventually, like the entire SEED Program, be phased out as the free market, based on free political institutions, gained strength.

A third program mandated in the bill—the Parliamentary Partnership—is congressionally run and will simply formalize, and expand to other countries, the already existing Gift-of-Democracy Program that now provides material aid to the new parliament in Poland.

My view, which I share with Senator BIDEN, is that this bill does what good legislation should do. It sets out:

Broad goals and authorities,

A number of actions recommended for Presidential consideration,

Certain actions required,

An adequate amount of money to do the job,

The Executive flexibility to allocate that money under changing circumstances, and

Reporting requirements adequate to facilitate congressional oversight.

I would emphasize that, at my instruction, the majority staff of the Foreign Relations Committee went to great pains to keep committee members apprised of this bill's development.

In essentially its current form, the bill was distributed 2 weeks before the markup, and there were several full-scale staff meetings to discuss the bill's contents. As a result, the bill underwent numerous minor modifications, as the suggestions of various committee members, other committees, and the administration were taken into account.

But let me emphasize that even these were minor changes. The SEED II legislation has, for several weeks, been available in essentially its current form for all concerned to review.

In this regard, I should make reference to what has been described by some as "a 29-page list of serious administration criticisms" of the committee's SEED II bill. That description is hyperbole of the first order. What the committee received, after its markup, was a stapled stack of papers representing individual agency comments on the SEED II bill.

Much of the commentary was repetitive, and some of it reflected no more than interagency competition for jurisdiction over various aspects of the SEED Program. But some of this commentary contained points well taken, and accordingly numerous suggestions were incorporated in the bill after markup because they were so minor in nature as to fall under the heading of technical adjustments, which commonly occur in the legislative process between the time a bill is ordered reported and the time of filing.

I hope these changes were helpful in smoothing the way toward enactment of SEED II. But I would emphasize that they were technical in nature. No changes were made in any essential aspects of the bill—its authorities, funding levels, or required programs. The SEED II legislation before the Senate is, in all pertinent respects, the measure ordered reported by the committee on July 19.

As regards the administration's position, I ask that there be printed at the end of my remarks an exchange of correspondence between Senator BIDEN and Deputy Secretary of State Eagleburger, which occurred earlier in the process but which I believe reasonably captures where we stand with regard to the administration's views.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PELL. In essence, the committee and the administration have agreed to disagree on the funding level: the adminstration has requested $300 million for fiscal year 1991; the committee bill authorizes $535 million, which is quite similar to the level already approved for appropriation by the full House of Representatives.

Apart from that, however, and recognizing that the bill has been altered to address the residual concerns expressed in the Eagleburger letter, I understand that the adminstration's position is that it does not endorse—but does not oppose—the bill. That, I think, is about as strong a formulation as we are ever likely to get on a politically sensitive subject like this.

At this point I ask unanimous consent that there be printed in the RECORD a table showing the funding levels in the SEED II bill, in comparison with funding levels contained in SEED I and in the SEED II appropriation recently passed by the House; and also a section-by-section summary of the SEED II legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEED FUNDING LEVELS

	Seed I Auth. 3 year [1]	Seed I App.	Seed II H. App [2]	Seed II SFRC
Large scale loans/grants and food aid:				
Food aid	125	125		
Multilateral action	200	200		
Enterprise funds	300	50	214	225
AID/E.F.-type activities				
Private sector development:				
Labor transition	5	1.5		
Technical training	10	3		
Scholarships	10	2	80	100
Trade/develop. program	6	2		
Peace Corps	6	2		
(American business centers)				
Dem. institutions/exchanges:				
Dem. Institutions/exchanges	12	4	20	40
Exchanges/ed. and Cul	12	3		
Science/technology	8	3		
(Parliamentary partnership)				([3])
(Books-for-Eastern-Europe				([4])
Environment/housing/health:				
Environment	40	13.5		
Housing			105	100
Medical	4	2		
EBRD			70	70
Total	738	411	489	535
Supp. for missions/personnel				50

[1] Seed I authorizations unused during FY 90 will be repealed by Seed II, and the process shifted onto an annual basis.

[2] The House Appropriations bill has already passed the House.

[3] $12 million to be transferred to support the Parliamentary Partnership program of material and advisory assistance to new parliaments, overseen by the Joint Task Force on East European Parliamentary Development.

[4] Activity is mandatory, but with no specific amount earmarked.

SECTION-BY-SECTION SUMMARY—THE SUPPORT FOR EAST EUROPEAN DEMOCRACY ACT (AS AMENDED BY SEED II)

Sec. 1. Title and Table of Contents.

Sec. 2. United States Policy Regarding Eastern Europe.—This section provides an overall statement of United States policy, which is to promote the transition of communist countries of Europe to free-market democracy and full membership in the family of democratic nations.

Sec. 3. Legislative Authority for Presidential Action.—This key section describes the essence of the SEED legislation, which is to provide technical assistance for environmentally-sound development of private sector economic institutions and democratic political institutions.

The definition of an "eligible" country is set forth such that the President is authorized to use any particular authority in the SEED Act if he determines that the use of the authority would assist a particular European country in the emergence or transition from communist rule "though the development or strengthening of democratic institutions and the practices of a free-market economy."

While this authority would enable the President to extend technical assistance (primarily in the nature of instruction and advice) into the Soviet Union or any of its republics for purposes of strengthening the private sector or building institutions needed for democracy, loans or grants to the Soviet Government, or any instrumentality thereof, are explicitly prohibited in Title XII.

Sec. 4. Support for East European Democracy (SEED) Program.—This existing, but now expanded section, identifies all of the activities of the U.S. Government—some authorized in this bill, some authorized and funded elsewhere—that comprise the overall SEED effort.

TITLE I—STRUCTURAL ADJUSTMENT AND U.S. SUPPORT FOR MULTILATERAL ACTION

Sec. 101. Policy and Authority on Structural Adjustment.—This section encourages and authorizes the President to join in a multilateral debt write-down in Eastern Europe. This section would be highly cost-effective inasmuch as the U.S. would sacrifice an almost worthless "asset" (debt unlikely to be repaid) for the enormous financial improvement in the condition of countries such as Poland that would result from an across-the-board lifting of debt by all Paris Club lenders.

Sec. 102. Agricultural Assistance.—This section encourages appropriate P.L. 480 assistance as part of a multilateral program of agricultural aid for Poland and other eligible countries.

Sec. 103. Debt-for-Equity Swaps and Other Special Techniques.—This section advocates innovative techniques for accomplishing multiple goals, such as debt reduction combined with environmental improvement.

Sec. 104. IMF Membership.—This section urges U.S. efforts to promote International Monetary Fund membership for East European countries at the appropriate time.

Sec. 105. OECD East-West Center.—This section urges United States participation in this new institution.

Sec. 106. European Bank for Reconstruction and Development.—This section sets forth relevant findings, followed by authorization of U.S. participation in the EBRD.

TITLE II—PRIVATE SECTOR DEVELOPMENT

Sec. 201. Enterprise Funds for Poland and Hungary.—This section, enacted in SEED I, provides basic authority for the Polish-American and Hungarian-American Enterprise Funds.

Sec. 202. A.I.D. Authority to Support Private Sector Development.—This section provides broad authority to AID to conduct Enterprise-Fund type activities.

Sec. 203. Labor Market Transition.—This section, enacted in SEED I, provides basic Dept. of Labor authority for SEED activities.

Sec. 204. Technical Training for Private Sector Development.—This section authorizes a variety of AID programmatic goals in many fields. The activities described in 208-

216 would be specific ways to accomplish a number of these goals.

Sec. 205. Free Enterprise Corps.—This section defines the concept of a Free Enterprise Corps to promote private sector development and encourages AID to aggregate a number of programs under this heading.

Sec. 206. Peace Corps Programs.—This section encourages Peace Corps activities supportive of the SEED Program and consistent with the Peace Corps Act.

Sec. 207. Use of Local Currency Generated by Agricultural Assistance.—This section authorizes certain uses for local East European currency produced by the sale of U.S. agricultural aid.

Sec. 208. International Executive Service Corps (IESC).—This section encourages effective utilization of the IESC.

Sec. 209. Practical Business Training Program.—This section describes and encourages estalishment of a program to support practical business training for East European business managers and executives.

Sec. 210. Worker Retraining Assistance.—This section encourages U.S. support for worker retraining and job placement in eligible East European countries and use of the AFL-CIO Free Trade Union Institute as a key agency for such assistance.

Sec. 211. Travel/Tourism Training for Early Hard-Currency Earnings.—This section encourages U.S. assistance for training in the skills needed to realize the hard-currency earnings potential of the travel/tourism industry in East European countries.

Sec. 212. SEED Foundation.—This section authorizes and encourages the establishment of a new foundation, modeled on the highly successful Inter-American Foundation, to operate at the grass roots level to assist the start-up of small businesses in Eastern Europe. (Sec. 101 encourages arrangements whereby East European governmental debt not forgiven is repaid in local currencies which are then channeled into SEED Foundation activities.)

Sec. 213. Business and Management Education Initiative.—This section encourages the President to provide financial support for a comprehensive program under which American universities with strong business schools would assist East European institutions of higher education in developing curricula in business and management skills.

Sec. 214. Support for Family Farm and Agribusiness Development.—This section sets forth policy goals for U.S. assistance for family farm and agribusiness development in eligible East European countries.

Sec. 215. United States Policy of Private Financial Support for Credit Unions.—This section sets forth a policy regarding U.S. encouragement of the development of credit unions in Eastern Europe.

Sec. 216. Small Business Administration Programs.—This section encourages SBA programs in Easten Europe where those activities would augment and not duplicate other U.S. private sector development initiatives.

TITLE III—TRADE AND INVESTMENT

Sec. 301. Use of Generalized System of Preference.—This section notes that Poland was granted eligibility for GSP trade treatment by SEED I, and encourages the President to use such authority as appropriate to promote private sector development in that country.

Sec. 302. Overseas Private Investment Corporation Programs.—This section (in conjunction with amendments elsewhere in the SEED II bill) urges and authorizes the President to expand OPIC programs in Eastern Europe in accord with the eligibility criteria set forth in section 3.

Sec. 303. Export-Import Bank Programs.—This section urges and authorizes the President to expand EXIM Bank activities in Eastern Europe in accord with the eligibility criteria set forth in section 3 (while noting that EXIM Bank activities in any country can begin only after trade normalization has occurred under the criteria and procedures of the Jackson-Vanik amendment).

Sec. 304. Trade Credit Insurance Program for Poland.—This section notes that SEED I authorizes the President to provide back-up guarantee to the EXIM Bank for the short-term financing of exports to Poland; notes further that elsewhere in SEED II the President is authorized to guarantee medium-term financing as well; and encourages the President to use such authorities as appropriate to promote Polish private sector development.

Sec. 305. Trade and Development Program Activities.—This section authorizes Trade and Development Program activities in eligible East European countries.

Sec. 306. Bilateral Investment Treaties.—This section urges the President to seek bilateral investment treaties with eligible East European countries.

Sec. 307. Reduction of Cocom Restrictions.—This section encourages further reduction in Cocom export controls consistent with the need to protect militarily sensitive technology.

Sec. 308. Conference on Expanded Technological Cooperation.—This section "urges the President to act, in cooperation with its allies and eligible East European countries, to support the convening of a non-governmental international conference, involving key leaders in science and industry, that would yield analysis and recommendations of means by which valuable advanced technologies might be incorporated safely with rigid and effective safeguards against diversion and military use, in expanded East-West economic activity."

Sec. 309. Port Access.—This section promotes a policy of granting greater access to U.S. ports for the vessel of eligible East European countries by mandating that access of such vessels shall not be denied except for reasons of "safety, protection of the national security, and the need to rectify unfair foreign trade and shipping practices."

TITLE IV—EDUCATIONAL, CULTURAL, AND SCIENTIFIC ACTIVITIES

Sec. 401. Educational and Cultural Exchanges and Sister Institutions Programs.—This section urges the expansion of various government-funded and privately-funded exchange activities, and governmental support for the establishment of "sister institution" relationships between American and East European cities, universities, and other organizations.

Sec. 402. Scholarship Partnership.—This section authorizes AID to establish and administer a program of scholarship aid to enable East European students to study in the United States, with an emphasis on business and economics.

Sec. 403. Science and Technology Exchange.—This section authorizes funding for implementation of existing science and technology exchange agreements with Hungary and Poland, and urges negotiation of similar agreements with other eligible East European countries.

Sec. 404. Clearinghouse to Promote Cooperation in Higher Education—This section urges USIA and the Department of Education to cooperate in providing a clearinghouse to facilitate creation of "sister institution" relationships between American and East European colleges and universities.

Sec. 405. Soviet Debt Repayment and United States-Soviet Exchange.—This section expresses congressional approval of the concept of Soviet repayment of outstanding Lend-Lease debts in the context of a bilateral agreement under which the United States would agree to use proceeds from such repayment to support educational exchange and SEED Foundation activities that would strengthen free-market democracy in the Soviet Union.

Sec. 406. Books-for-Eastern-Europe Program.—This section requires implementation of a Books-for-Eastern-European program designed to enhance the printing and publication capabilities of eligible East European countries in order to meet their urgent need for new political, historical, and economic literature.

Sec. 407. Library Exchange.—This section urges financial support for efforts by U.S. libraries with relevant resources to assist East European libraries in reconstituting themselves as repositories of national culture and heritage.

Sec. 408. Andrei Sakharov Education Exchanges.—This section, in combination with another, authorizes and urges implementation of an Andrei Sakharov exchange program to facilitate study by graduate students in the United States and eligible East European countries in the fields of environmental protection and the health sciences.

TITLE V—DEMOCRATIC INSTITUTION-BUILDING

Sec. 501. Sustained Support for Transition to Democracy.—This section authorizes the President to use AID, USIA, the National Endowment for Democracy, and other agencies in a "comprehensive and sustained effort to facilitate the transition in Eastern Europe from totalitarian communist rule to a system of political democracy" through assistance in the building of judicial, economic, journalistic, trade union, and political institutions.

Sec. 502. Association of Former Members of Congress.—This section urges appropriate utilization of the Association of Former Members of Congress in "a constructive role in advising government and organizations in Eastern Europe of electoral and legislative procedures of constitutional democracy."

Sec. 503. Civic Education Exchanges.—This section urges implementation of a USIA program to familiarize educators in East European countries with American curricula concerning the principles and practice of constitutional democracy.

Sec. 504. Institutionalizing Civilian Control of Security Forces.—This section urges U.S. leadership in a multilateral effort to promote instruction designed to assist East European nations in establishing civilian oversight and management of defense and internal security forces.

Sec. 505. Strengthening Institutions of Free Broadcasting.—This section urges U.S. leadership in a multilateral effort to assist eligible East European governments in establishing institutions of governance and operation for editorially independent radio and television broadcasting.

Sec. 506. Rule-of-Law Initiative.—This section urges utilization of the American Bar Association in a program that would mobilize the Association's resources to provide technical assistance and training in the areas of constitutional law, criminal justice,

judicial reform, and other legal areas of interest to eligible East European countries.

TITLE VI—FOSTERING PARTNERSHIP

Sec. 601. Parliamentary Partnership Program.—This section establishes a Parliamentary Partnership program, funded at $12 million, to provide material assistance and advisory support to newly established East European parliaments. This effort, to be overseen by a joint congressional task force, will be supplemented by exchange activities administered by USIA.

Sec. 602. Multilateral Interparliamentary Cooperation.—This section expresses congressional support for the establishment of a 35-nation (CSCE member) interparliamentary assembly modeled (and perhaps built on the North Atlantic Assembly, in which Congress has participated actively since 1955. The provision mandates appointment of a small congressional delegation to explore and participate in current European efforts to form such an institution.

Sec. 603. Joint Commission on Economic Conversion and Constructive Partnership.—This section urges U.S. participation in a joint U.S.-Soviet commission mandated to identify potential joint economic ventures of mutual benefit; means by which defense resources could simultaneously be reallocated to non-military purposes; and ways in which the two powers could exercise joint leadership in improving the global environment, world health care, and human welfare.

Sec. 604. Role of the States.—This section encourages participation by governors and state agencies in SEED Program-related activities, and mandates the Executive branch to provide necessary information to assist governors in preparing proposals for SEED Program participation.

TITLE VII—SUPPORT FOR AMERICAN BUSINESS INITIATIVE

Sec. 701. Director for American Business Initiative in Eastern Europe.—This section mandates the President to designate a Director for American business initiative in Eastern Europe to be responsible for operations of the East European Business Information Center system (and related job bank and market research activities); to asssist in establishment and operation of American Business Centers in Eastern Europe; and to coordinate the White House Conference and Presidential Advisory Board mandated by this Title.

Sec. 702. East European Business Information Center System.—This section mandates the President to establish an information system to serve as a clearinghouse for information needed by Americans engaged in business and voluntary activities in Eastern Europe.

Sec. 703. Creation of American Business Center to Promote Technical Assistance and Trade Opportunity.—This section urges the creation of a network of American Business Centers to support, on a user-fee basis, the start-up business activities of U.S. firms in Eastern Europe. The provision mandates creation of two such Centers at locations to be determined by the President.

Sec. 704. Market Research and Job Banks.—This section mandates the Director of American business initiative in Eastern Europe to undertake an intensified program of market research in that region to identify the full range of business opportunities for American firms, and urges the establishment of a job bank system to catalog the names and skills of American and East European applicants.

Sec. 705. White House Conference and Presidential Advisory Board to Promote American Business Initiative in Eastern Europe.—This section urges the President to convene a White House conference and assemble a Presidential Advisory Board in order to develop effective means of supporting American business activity in Eastern Europe.

TITLE VIII—ENVIRONMENTAL PROGRAMS

Sec. 801. Environmental Initiatives.—This section authorizes a range of assistance activities in Eastern Europe to be conducted by the Environmental Protection Agency and the Department of Energy, to include U.S. support for the establishment of a Regional Environmental Center in Budapest.

Sec. 802. Technical Assistance to Prepare for Environmentally Sound Infrastructure Modernization.—This section urges emphasis on technical assistance that serves to assist eligible East European countries in planning for environmentally-sound infrastructure modernization and, in the process, orients decision-makers in such countries to the merits of American-produced environmental technologies.

Sec. 803. Conference on the Environment.—This section urges U.S. support for an international environmental conference under the auspices of the Regional Environmental Center in Budapest.

Sec. 804. Energy and Environmental Institutes.—This section urges U.S. support for the creation of national energy and environmental institutes in eligible East European countries to promote sound national decision-making and the successful functioning of the Regional Environmental Center.

Sec. 805. Cooperation on Conservation.—This section urges U.S. support for the development of sound conservation policies in Eastern Europe, with emphasis on protection of water resources, fish, and wildlife, and authorizes participation by the U.S. Fish and Wildlife Service.

Sec. 806. Agenda for Regional Environmental Center.—This section urges the President to advocate certain goals in the context of negotiations aimed at creating an agenda for the Regional Environmental Center in Budapest.

Sec. 807. Safer Nuclear Power.—This section urges the President to promote the attainment of a multilaterally-supported, independent and objective examination of nuclear facilities in Eastern Europe, leading to recommendations regarding the future of such facilities.

TITLE IX—HEALTH, HOUSING, AND HUMANITARIAN PROGRAMS

Sec. 901. Medical Assistance.—This section authorizes assistance to eligible East European countries for medical training and health care planning.

Sec. 902. Assistance for Housing.—This section authorizes technical assistance to eligible East European countries to improve housing and associated infrastructure, and authorizes guaranties under the housing guarantee provisions of the Foreign Assistance Act of 1961.

Sec. 903. Aid for Victims of Communist Regimes.—This section urges the Administration to act, with allies and multilateral humanitarian agencies, to assist persons traumatized by brutal treatment under the old order in Eastern Europe, and specifically calls for the President to act to ameliorate the plight of Romanian orphans.

TITLE X—SEED PROGRAM MANAGEMENT

Sec. 1001. Policy Coordination of Seed Program.—This section, enacted in SEED I, directs the President to designate a SEED Program Coordinator within the Department of State.

Sec. 1002. Encouragement and Support of Volunteerism.—This section urges the Director of American business initiative in Eastern Europe, under the direction of the President, to use the East European Business Information System, the job banks under section 704, periodic mailings to American civic organizations, and other means to encourage and support voluntary assistance to eligible countries.

Sec. 1003. Adequate Staffing at United States Embassies and Missions.—This section directs the Secretary of State to study the personnel needs of U.S. mission and trade centers in Eastern Europe, and directs that the $50 million in additional funds authorized to be appropriated by section 1201(a)(3) be used so as to meet increased personnel needs in Eastern Europe while sustaining U.S. representation levels in Western Europe during a time of sweeping economic change throughout Europe.

Sec. 1004. Soviet-Eastern European Research and Training Act Program.—This section urges allocation of some of the funds authorized by section 1201(a)(3) to this program that supports training of U.S. experts on Eastern Europe.

Sec. 1005. Cost-Effective Use of Surplus Equipment.—This section mandates the General Services Administration and the Department of Defense to survey existing U.S.-Government-owned surplus equipment for possible cost-effective use in the SEED Program, and authorizes such assistance with certain limitations.

TITLE XI—REPORTS TO CONGRESS

Sec. 1101. Report on Initial Steps Taken by United States and on Poland's Requirement for Agricultural Assistance.—This section, enacted in SEED I, required a report on early actions and needs under the SEED Program.

Sec. 1102. Report on Confidence-Building Measures by Poland and Hungary.—This section, enacted in SEED I, required a report concerning certain measures that could be taken by Poland and Hungary.

Sec. 1103. Report on Environmental Problems.—This section, enacted in SEED I and modified by SEED II, elaborates on the environmental reporting required to be included in the annual reports submitted under section 1104.

Sec. 1104. Annual SEED Program Report.—This section requires and describes an annual SEED Program report to be submitted beginning not later than January 31, 1991.

Sec. 1105. Reports on Certain Activities.—This section requires a simultaneous classified report on any espionage activities against the U.S. and its allies by any country receiving assistance under this act.

Sec. 1106. Notifications to Congress Regarding Assistance.—This section requires notifications concerning reprogramming of funds in accord with established procedures under the Foreign Assistance Act of 1961.

TITLE XII—SEED PROGRAM FUNDING

Sec. 1201. Authorization of Appropriations.—This section authorizes:

a $465 million in FY91 funding for various kinds of bilateral SEED Progrm assistance to eligible countries;

a $70 million FY 91 contribution to the European Bank for Reconstruction and Development as the first of five equal annual contributions; and

a $50 million in additional FY 91 funding for the Department of State and other foreign affairs agencies.

The $465 million for bilateral aid is further allocated (without specific earmarks) among various titles of the SEED Act, and three activities are established as mandatory:

the Parliamentary Partnership program (required by sec. 601);

the Books-for-Eastern-Europe program (required by sec. 406); and

two model American Business Centers (required by sec. 703).

Sec. 1202. Technical Provisions.—This section contains certain technical provisions relating to the use of funds authorized by section 1201.

TITLE II—PEACE CORPS

Mr. PELL. Mr. President, this title of the International Affairs Authorization Act is derived from S. 2436, introduced on April 5 by Senators CRANSTON, PELL, BOREN, DECONCINI, and ROCKEFELLER.

Its essential purpose is to authorize Peace Corps appropriations of some $215 million for fiscal year 1991 and $228 million for fiscal year 1992. These amounts are based on levels called for in the plan submitted by former Peace Corps Director Loret Ruppe to attain the congressionally mandated goal of 10,000 volunteers, a goal added to the Peace Corps Act in 1985. An additional $17 million for each fiscal year is provided for the expansion of Peace Corps programs, especially in Eastern Europe.

But here I would emphasize that while the Foreign Relations Committee wholeheartedly endorses the emerging Peace Corps role in Eastern Europe, committee members are concerned that the Peace Corps should pursue balanced expansion worldwide—by responding to opportunities in new countries and by expanding existing programs. The committee most emphatically does not wish to see the Peace Corps expand its efforts in Eastern Europe through the diversion of resources from current programs or new programs possibilities elsewhere.

The committee avoided earmarking funds for particular regions or countries, in recognition of the need to insulate the Peace Corps from short-term pressures. Overall, the committee's aim is to maintain the Peace Corps' full credibility as a nonpolitical, person-to-person expression of the Nation's commitment to international peace and understanding—and not as a normal tool of American foreign policy. In the words of Secretary of State Dean Rusk, spoken when the Peace Corps was launched in 1961, the committee continues to believe that "to make the Peace Corps an instrument of foreign policy is to deprive it of its contribution to foreign policy."

This section also would prohibit funds appropriated pursuant to this authorization from being used in the United States to refer to the agency by any name other than "Peace Corps."

TITLE III—AFRICA DEVELOPMENT FUND

Title III of the International Affairs Authorization Act provides a permanent authorization for the Development Fund for Africa [DFA].

In 1987 Congress embarked on an experiment by replacing the traditional functional accounts for African development aid with new Development Fund for Africa. The DFA was designed to improve the quality of American aid to sub-Saharan Africa by providing considerably greater flexibility to the Agency for International Development.

Current law, however, provides only general recommendations and basic guidelines for the DFA. This new legislation provides clearer policy guidance and sound mechanisms for congressional oversight. The legislation does so by adding a new chapter 10 to the Foreign Assistance Act of 1961. This chapter authorizes and describes project and program assistance to help Africans participate in a development process that emphasizes equitability, participation, environmental sustainability, and self-reliance.

This title, I am pleased to report, has strong bipartisan support. It is based on legislation first introduced in 1987 by Senators SIMON and KASSEBAUM and cosponsored by Senators KENNEDY and KASTEN, authors of the first bill to create a development fund for Africa. This language has been passed three times by the House and the Foreign Relations Committee. It has been negotiated in close consultation with AID, and the administration does not oppose it.

TITLE IV—INTERNATIONAL DEVELOPMENT ASSOCIATION

Title IV of the International Affairs Authorization Act contains the administration's requested authorization of U.S. participation in the ninth replenishment of the resources of the International Development Association [IDA], the concessional lending affiliate of the World Bank. It provides an authorization of $3.2 billion—representing the U.S. contribution to the $15 billion replenishment. These funds are to be appropriated in three equal installments beginning with fiscal year 1991.

IDA was first established in 1960, as a result of strong American leadership. At that time, the United States provided more than 42 percent of the startup funding. This new replenishment, known as IDA-9, would augment IDA's resources by some $15 billion over the next 3 years, with the United States providing 21 percent of the funds.

By way of contrast, in 1960 Japan's share of the initial IDA funding represented a mere 4.4 percent of the total. In the IDA-9 replenishment, Japan will assume nearly 19 percent of the funding burden. We have come a long way toward more equitable burden-sharing among IDA participants, in large measure as a result of U.S. efforts.

The Multilateral Development Banks, including IDA have in the past come under criticism for not adequately considering environmental concerns and for failing to involve affected citizens and nongovernmental organizations in the development process advocated by these institutions. Having reviewed the IDA-9 agreement that sets forth the goals for IDA lending over the next 3 years, I find real progress in addressing some of these concerns, at least on paper. Now the Bank must give substance to the agreement.

This title also includes an important provision concerning IDA lending to the People's Republic of China. Unless there is measurable improvement in the human rights practices of that government, the United States contribution to IDA-9 will be reduced on a proportionate basis equal to what would have been the United States share of any IDA lending to the People's Republic of China, with the exception of lending primarily aimed at basis human needs of the Chinese people.

Finally, this title incorporates technical changes requested by the administration with respect to the International Finance Corporation [IFC]—also a World Bank affiliate. These technical changes to United States securities laws will allow IFC borrowings in the United States to receive the same exemptions from United States securities laws as those currently enjoyed by the International Bank for Reconstruction and Development and regional development banks such as the Asian and African Banks.

EXHIBIT 1

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, July 12, 1990.

Hon. LAWRENCE EAGLEBURGER,
Deputy Secretary of State, Washington, DC.

DEAR MR. SECRETARY: I enjoyed meeting with you yesterday, and believe we accomplished a great deal in eliminating areas of serious disagreement in the Committee's SEED II legislation. The purpose of this letter is to record our discussion and to convey the amended text that reflects our understanding.

FUNDING LEVELS

On funding levels, we agreed to disagree. The Administration supports a total of $300 million. Congressional authorizers and appropriators are now heading toward a considerably larger figure, on the premise that a well devised program of technical assistance and democratic institution-building in Eastern Europe represents a highly cost-effective allocation of national security dollars.

DEFINITION OF COUNTRIES TO BE INCLUDED

On the question of which countries will be included in the scope of SEED Program activities, I believe you concluded—after fo-

cusing on our text—that the formulation in the Committee bill is congruent with Administration policy.

The SEED Program defined by the bill consists predominately of activities of a kind the President has stated he is prepared to consider not only for Poland, Hungary, and Czechoslovakia, but also for the Soviet Union. The bill comports with this policy by authorizing the President to use any particular authority or program in any European country "seeking to emerge from the tyranny and legacy of communist rule" if the President determines that such action would "assist the emergence or transition of that country from communist rule through the development or strengthening of democratic institutions and the practices of a free-market economy."

To underscore that none of the SEED Program funds in this bill will be used for loans or grants to the Soviet Government—a policy on which Congress and the President are currently in substantial agreement—the bill states this explicitly in the funding provisions of Title XIII.

EARMARKS

At your strenuous behest, Senator Pell and I have agreed to remove all funding-level earmarks from Title XII of the Committee bill, and also to eliminate all "notional" funding levels from particular programmatic activities recommended elsewhere in the bill. This was a significant alteration. Congress has every constitutional right to designate funding levels for specific programs, but in the overall context of our constructive discussion, I was prepared to accept these changes in this case.

AGREED-PERFORMANCE ACTIVITIES

I was very glad to have your pledge to implement in good faith four provisions in the bill, even though they will not carry funding-level earmarks:

1. Parliamentary Partnership Program. This two-part program, which I put forward in concert with Senator Pell, consists of:

a. Start-Up Support.—This will use a $12 million direct pass-through from AID to a new congressional Joint Task Force, which will oversee material and advisory aid to new East European parliaments using the personnel resources of Congress and its support agencies. This activity is actually already under way on an ad hoc basis vis-a-vis the Polish Sejm, and this provision will formalize it and expand its scope.

The provision is designed, in accord with a concern you expressed, to avoid getting bogged down with AID. It does not involve an earmark that limits Presidential flexibility, but rather is simply a device for funding a congressional activity under the general—and I believe appropriate—umbrella of the SEED Program. If another method of achieving a prompt appropriation for this purpose appears more suitable, we will use it. But meanwhile this should be regarded not as an earmark but as a funding device for a congressional effort, technically fundable in other ways, to participate constructively in the SEED effort.

b. Parliamentary Exchanges.—On this part of the program, to be administered by USIA, we have removed the $4 million "notional" funding level.

2. Books for Eastern Europe Program. On this program, which I proposed in concert with Senator Bradley, I was pleased that you appeared to accept as sound the program's premise, which is that the countries of Eastern Europe need a massive transfusion of new political and economic literature, and a focused effort to help them produce it will pay dividends both in the educational value of the books themselves and in the intended goodwill. The earmark we removed was for "not less than $8 million."

3. American Business Centers. I was particularly pleased to reach an understanding that the Administration will "build" two of these Centers, for which the draft bill earmarked "not less than $10 million." This is a concept I developed over the course of a number of hearings. I view it as a low-risk undertaking which could result in a high pay-off and which therefore warrants top-level attention and a serious effort. As described in section 703, which I believe reflects our discussion, the two Centers will:

be built at locations (perhaps Warsaw and Prague) to be selected by the President,

be staffed as the Administration finds appropriate to support American business in this new and potentially very productive way,

fully embody the goal of providing to American businesses (on a user fee basis) modern, centrally located office facilities in key East European cities.

4. SEED Foundation. This proposal, to which I understood you to be favorably disposed, would replicate in Eastern Europe the small-scale highly effective "grass roots" private sector aid model represented by the Inter-American Foundation. I share your concern that any such activity be configured to avoid bureaucratic pitfalls. I think you will agree that the provision accomplishes that by creating, on the established model, an oversight board that will operate autonomously and in direct consultation with you as Coordinator of the SEED Program.

MISCELLANEOUS ITEMS

1. Governors' SEED Fund. In keeping with your concern, the draft provision for an American Governors' SEED Fund has been altered so as to reflect no more than congressional encouragement for state agency participation in support of the SEED Program.

2. Reduction of Export Restrictions. You expressed concern that section 309 might, conceptually at lest, put the United States at odds with its allies by encouraging a bilateral superpower negotiation that bypassed COCOM. I think this has been accommodated by a change in the section title, because the text itself simply calls for a conference, with a multinational participation, to discuss a simultaneous and mutually beneficial East-West reduction of controls on sensitive technology. Thus, the operative concept is not "bilateral negotiation" but "multilateral conference."

I appreciated your constructive and cooperative attitude, and trust you will recognize that our own efforts are similarly motivated. I have endeavored to reflect the tenor of our discussion in this letter and in the revised bill text. Having removed points of major disagreement, I hope we can now move forward with the Administration's support.

Sincerely,

JOSEPH R. BIDEN, JR.,
Chairman,
European Affairs Subcommittee.

DEPARTMENT OF STATE,
Washington, DC, July 17, 1990.

Hon. JOSEPH R. BIDEN, Jr.,
Chairman, European Affairs Subcommittee, Committee on Foreign Relations, U.S. Senate.

DEAR SENATOR BIDEN: Thank you very much for your letter of July 12 concerning the SEED II legislation that the Foreign Relations Committee plans to mark up this week. I share your view that our meeting last week helped to remove several areas of disagreement. In my judgment, the bill has been much improved, and I am confident that our staffs will continue to work in a constructive spirit on issues that were either unresolved or not discussed at our meeting.

I would like to take this opportunity to offer a few comments on your record of our discussion. First, I must clarify for the record that, even with the changes that have been made in the Committee's legislation, we prefer the House authorization and appropriations bills as currently drafted. In particular, we prefer the House authorization language on overall policy, since it is closer to the Administration position. We do not seek to authorize SEED assistance to the USSR.

As you know, the President has stated that the United States is prepared to provide limited technical assistance to the Soviet Union to support political and economic reform. Therefore, while we do not oppose the discretionary authority given to the President in this legislation to accomplish this goal, we do oppose the application of any SEED program authority to the Soviet Union that would exceed the scope of technical assistance. We strongly support the provision in Title XII that no SEED program funds may be used for loans or grants to the Soviet Government. It should be further noted that we have no intention of providing any SEED program assistance to the Soviet Union beyond that which might support limited technical assistance designed to advance political and economic reform, and that the President may not decide to use SEED program funds for this purpose.

I greatly appreciate your agreement to remove funding-level earmarks for the three programs in which you expressed particular interest. Our understanding concerning these programs is as follows:

1. Parliamentary Partnership Program. We are prepared to implement this program. We continue to believe that it would be preferable to implement the program through an authorization of funds within the direct control of the Congress, but we will work with you, if necessary, on an AID passthrough.

2. Books for Eastern Europe. We agree with this program and will work with USIA to implement it. However, we suggest a small change in the current language to provide specific authority to use funds for copyright purchase, translation service, and direct purchase of paper or newsprint. Because of the absence of such authority, we are now missing opportunities to get books printed in translation in Eastern Europe.

3. American Business Centers. We agree to establish two American Business Centers in locations determined by the President and will be in touch with the Commerce Department on implementation. Decisions on whether to build the centers or to rent existing facilities will depend upon circumstances at each site, and establishment of the two centers will not necessarily be simultaneous.

Although we are favorably disposed toward the concept of a SEED Foundation and will explore it seriously, it is not my impression that this initiative came out in the category of "agreed performance." A decision to go ahead will depend upon reaching agreement within the Administration on whether receipts of official debt repayment may be used to provide operating capital, as well as upon consultations with potential recipient governments. We therefore cannot endorses the proposal at this time.

As I explained during our meeting, there are a number of additional provisions in the bill which we oppose and will seek to change as the legislative process proceeds. These provisions include, but are not necessarily limited to, the following:

Section 302(c).OPIC. We strongly oppose this section. OPIC worked closely with the AFL-CIO and Committee staff on the language contained in the original SEED Act concerning worker rights. The Administration continues to support this language. By contrast, the language contained in Section 302(c) would have a chilling effect on OPIC-supported private sector investment in Eastern Europe by raising uncertainty about the actural term of OPIC guarantees, thereby diluting their value. OPIC has agreed to a recommendation by the AFL-CIO to incorporate in its insurance contracts in Eastern Europe language which is intended to insure that investors receiving OPIC insurance coverage respect internationally recognized worker rights.

Section 309—U.S.-Soviet negotiation on export restrictions. We appreciate your clarification that the intent of this section is to convene a multilateral conference rather than to mandate a bilateral negotiation. We continue to be concerned, however, that this initiative would amount to a superpower negotiation that bypassed COCOM. We believe that the recommendation in section 309 that the President frequently reassess the COCOM lists encompasses the concerns addressed in Section 309. We oppose the creation of any bilateral forum for consideration of these issues.

Section 310—Non-discriminatory shipping practices. We oppose this provision because it would circumscribe the President's responsibility to protect the national security. In addition, this provision could interfere with the application of certain laws administered by the Federal Maritime Commission which are designed to deal with maritime trade related problems, and it may also interfere with the the application of U.S. visa requirements.

The Administration has in progress a review of the security requirement of closed and request ports with a view to determining changes in access for East European countries, and further liberalization of port access, as has already occurred for Poland, is likely. We believe strongly, however, that access rules for the East European countries must continue to be based upon national security considerations as well as the criterion of safety, which is the only one identified in Section 310.

We believe that the section should be revised as follows to reflect the above concerns:

"(a) FINDING.—Congress finds that—

(1) by traditional practice, embodied in laws and regulations, vessels from East European countries have been subject to discriminatory treatment based on national security and reciprocity that has impeded the access of such vessels to United States ports;

(2) the purposes of the SEED Program would be furthered by the elimination of unnecessary discriminatory practices with regard to eligible East European countries.

(b) Elimination of Discriminatory Practices.

The President shall regularly review the port access requirements for eligible East European flag cargo, passenger, and fishing vessels and crews with a view to ensuring that access granted is consistent with the U.S. national security, reciprocity, and the objectives of the SEED Program."

As I noted during our meeting, there are concerns about a number of the financial provisions of the bill. These are under review at the Department of the Treasury, which will be in touch with the Committee separately.

There also are a number of provisions in the bill which call upon the President to establish programs or set up new institutions which we do not consider necessary or which we are pursuing by other means. Examples of such programs are the Free Enterprise Corps, the Center for Law Reform and Comparative Law, and the Clearinghouse for Cooperation in Higher Education. I appreciate your description of these programs as a menu from which the Administration can choose in setting priorities for FY 1991. In that spirit, we will not argue the merits of individual proposals, but we will not feel obligated to implement them if they do not fit with our overall strategy.

I welcome the opportunity you have provided to highlight informally some of the key concerns that have arisen with respect to this legislation. The Office of Management and Budget will provide an official statement of the Administration's position. I also appreciate the constructive atmosphere of our meeting and look forward to working with you and your staff as the legislative process develops.

Sincerely,

LAWRENCE S. EAGLEBURGER,
Acting Secretary.

PHILIPPINE DISASTER AID

Mr. AKAKA. Mr. President, last Friday the Senate adopted Senate Resolution 315, expressing the sense of the Senate that President Bush should provide relief to the Philippines in the aftermath of the devastating July 16 earthquake. I introduced both Senate Resolution 315 and an earlier bill, S. 2883, because the Philippine people are our oldest allies in Asia, and are deserving of our help in this hour of great need.

Earlier today, I had the privilege of meeting with the Philippine Secretary of Finance, who advised me that although the initial relief efforts are largely complete, the toughest part of the job remains. Massive repairs must be undertaken to put the earthquake-damaged region back on its feet again. The death toll will ultimately reach several thousand. Property losses are estimated at $300 million. The Philippine people are pleading for assistance in meeting this crisis.

I understand the Department of State is looking for ways to help fund the rehabilitation efforts and is considering using money available under the authority of the Foreign Assistance Act. I commend the administration for moving to lend assistance to the Philippines, but I would urge President Bush to act quickly to provide additional assistance under authority of the Foreign Assistance Act.

Mr. President, we must bear in mind the overall situation in the Philippines. The freely elected Government faces many problems that have strained resources to the limit. Unemployment and poverty remain very high. The Government must still contend with threats from rural insurgents and rebel elements of the military. On top of all this, a crushing foreign debt takes up to 40 percent of the national budget for repayment.

Given these facts, an event like the recent earthquake is a heavy bodyblow that could undermine the stability of the Philippine Government at a time when it is particularly vulnerable. It is imperative that the United States act compassionately and quickly to provide funding to one of our most trusted allies in this time of need. I urge my colleagues to join me in this effort.

THE INVASION OF KUWAIT BY IRAQ

Mr. DIXON. Mr. President, should we be surprised that Saddam Hussein invaded Kuwait? Should we be surprised that he stormed out of talks with Kuwait, and sent his army rolling across the Kuwaiti border en route to Kuwait City?

I am not.

While many of us may not have thought that President Hussein would have moved his troops into Kuwait last night, all of us knew he was giving every indication that he had little patience for negotiations. Saddam Hussein has never been one to negotiate. Bullies do not negotiate.

His history of finding justification for acts of aggression, against Iran, against his own Kurdish minority, is well known. In that sense, Mr. President, no one should be surprised that he found justification for invading Kuwait.

Saddam Hussein has been amassing his troops and his weapons stockpiles for some time in his effort to become the biggest kid on the block. His country is deeply in debt from the Iran-Iraq War, and he saw a way to regain some lost revenues. His motives may be as bald as that.

His decision to invade Kuwait is a breach of international law and should be condemned by all civilized countries.

Anyone with a knowledge of Iraqi affairs knows that Iraq has engaged in aggressive behavior for years. In 1982, my distinguished colleague Senator BOSCHWITZ and I spoke on the floor of this Chamber against the sale of military equipment to Iraq. A number of

my colleagues and I strongly protested the administration decision to remove Iraq from the list of terrorist nations. Then, as now, Iraq has posed a threat to Israel, and her Arab neighbors.

So, Mr. President, I am not surprised at the invasion. I am deeply saddened by the loss of life suffered by our good friends the Kuwaitis. They need our support and assistance.

While the Kuwaitis have requested military intervention, I do not believe that is a path we should take. We need the pressure of the United Nations and the Arab League brought to bear on President Hussein to remove his troops from Kuwait.

Additionally, the administration must urge our allies in Europe and Japan to agree not to purchase any Iraqi oil until Iraq removes its troops from Kuwait. We must make it clear that acts of aggression will have the international community in united opposition.

The Persian Gulf states have long opposed the use of military force to settle disputes among Arab states. They can be a key element in the success of a economic embargo by the industrialized nations of the world. They, and we, must ensure that Saddam Hussein removes his troops, and ends his occupation of Kuwait. I urge their cooperation in this effort.

I thank my colleagues.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE NATIONAL INSTITUTE OF BUILDING SCIENCES—MESSAGE FROM THE PRESIDENT—PM 134

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

In accordance with the requirements of section 809 of the Housing and Community Development Act of 1974 (12 U.S.C. 1701j-2(i)), I transmit herewith the thirteenth annual Report of the National Institute of Building Sciences for 1989.

GEORGE BUSH.

THE WHITE HOUSE, *August 3, 1990.*

NATIONAL EMERGENCY WITH RESPECT TO IRAQ—MESSAGE FROM THE PRESIDENT—PM 135

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

Pursuant to section 204(b) of the International Emergency Economic Powers Act, 50 U.S.C. section 1703(b), and section 201 of the National Emergencies Act, 50 U.S.C. section 1621, I hereby report that I have exercised my statutory authority to declare a national emergency and to issue two Executive orders that:

—prohibit exports and imports of goods and services between the United States and Iraq and the purchase of Iraqi goods by U.S. persons for sale in third countries;
—prohibit transactions related to travel to or from Iraq, except for transactions necessary for journalistic travel or prompt departure from Iraq;
—prohibit transactions related to transportation to or from Iraq, or the use of vessels or aircraft registered in Iraq by U.S. persons;
—prohibit the performance of any contract in support of Government of Iraq projects;
—ban all extensions of credit and loans by U.S. persons to the Government of Iraq;
—block all property of the Government of Iraq now or hereafter located in the United States or in the possession or control of U.S. persons, including their foreign branches; and
—prohibit all transfers or other transactions involving assets belonging to the Government of Kuwait now or hereafter located in the United States or in the possession or control of U.S. persons, including their foreign branches.

The Secretary of the Treasury is authorized to issue regulations implementing these prohibitions. These two orders were effective 5:00 a.m. e.d.t., August 2, 1990.

I am enclosing a copy of each Executive order that I have issued making these declarations and exercising these authorities.

I have authorized these measures in response to the Iraqi invasion of Kuwait, which clearly constitutes an act of aggression and a flagrant violation of international law. This action is in clear violation of the national sovereignty and independence of Kuwait and the Charter of the United Nations. It threatens the entire structure of peaceful relations among nations in this critical region. It constitutes an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States.

The measures we are taking to block Iraqi assets will have the effect of expressing our outrage at Iraq's actions, and will prevent that government from drawing on monies and properties within U.S. control to support its campaign of military aggression against a neighboring state. Our ban on exports to Iraq will prevent the Iraqi government from profiting from the receipt of U.S. goods and technology. Our ban on imports, while not preventing sales of Iraqi oil to third countries, denies Iraq access to the lucrative U.S. market for its most important product.

At the same time, in order to protect the property of the legitimate Government of Kuwait from possible seizure, diversion, or misuse by Iraq, and with the approval of the Kuwaiti government, we are blocking Kuwaiti assets within the jurisdiction of the United States or in the possession or control of U.S. persons.

We are calling upon our friends and allies, and all members of the world community who share our interest in the peaceful resolution of international disputes, to join us in similar actions against Iraq and for the protection of Kuwait.

GEORGE BUSH.

THE WHITE HOUSE, *August 3, 1990.*

FEDERAL ACTIONS WITH RESPECT TO PETROLEUM AND NATURAL GAS USE AND CONSERVATION—MESSAGE FROM THE PRESIDENT—PM 136

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

As required by section 403(c) of the Powerplant and Industrial Fuel Use Act of 1978, as amended (42 U.S.C. 8373(c)), I hereby transmit the eleventh annual report describing Federal actions with resptct to the conservation and use of petroleum and natural gas in Federal facilities, which covers calendar year 1989.

GEORGE BUSH.

THE WHITE HOUSE, *August 3, 1990.*

REGULATORY PROGRAM OF THE U.S. GOVERNMENT—MESSAGE FROM THE PRESIDENT—PM 137

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

The annual *Regulatory Program of the United States Government* sets forth the Administration's regulatory priorities for the coming year. This is my Administration's first *Regulatory Program* published pursuant to Executive Order No. 12498. It represents my long-standing commitment to prudent and cost-effective Federal regulation.

The decade of the nineties will demand governmental action to meet a broad range of challenges and opportunities. Cleaning up the environment, encouraging the use of new technologies, maintaining America's global competitiveness—these are just a few of the issues that will vitally affect the quality of life of all Americans.

My Administration is committed to using necessary Federal regulation, reasonably applied, as an effective tool for positive change. At the same time, imprudent and unnecessary regulation can create greater cost than benefit. Further, many regulations burden the economy by staying on the books long after their useful life is over.

Federal regulations impose estimated direct costs on the economy as high as $175 billion annually—more than $1,700 for every taxpayer in the United States. These costs are in effect indirect "taxes" on the American public—taxes that should only be levied the benefits clearly exceed the costs.

I strongly believe in the commonsense regulatory principles that I helped develop and implement when as Vice President I chaired the Task Force on Regulatory Relief. These principles provide that regulations should be issued only when they are necessary, economically sensible, responsive to public comments and concerns, and understandable. Except where prevented by law, agencies should not take regulatory actions unless the benefits outweigh the costs. Regulations should also improve the quality of life for all Americans, rather than benefit a narrow special interest.

Agencies need to consider the effect of new regulations in the context of existing ones. The overall regulatory structure should be coherent, and obsolete regulations should be eliminated or revised. After considering all of these factors, agencies should select the best regulatory options from among the available alternatives. In doing so, they should select alternatives that minimize paperwork burdens on the public. Agencies should, where appropriate, establish performance standards that allow American businesses (and the marketplace) to choose the most cost-effective way to reach those standards; they should avoid command-and-control regulations that dictate specific solutions. I count on our Cabinet Secretaries and agency heads to use these principals of prudence and cost-effectiveness in developing regulations consistent with law.

To ensure that this Administration continues to remove unnecessary regulatory burdens from the American people, I have asked the Council on Competitiveness, chaired by Vice President Quayle, in conjunction with the Office of Information and Regulatory Affairs, to oversee the regulatory review process established by Executive Order Nos. 12291 and 12498. Such review should bolster our Nation's competiveness and strengthen the economy.

Regulatory reform is a continual, dynamic process. In the coming months, agencies within the executive branch will propose, under the guidance of the Council on Competitiveness, new and revised regulatory reforms to reflect the priorities and policies of this Administration. I expect our agency heads to report to me on their progress in these areas. I also expect our regulatory review process will continue to lead to important improvements in the regulatory program of the United States.

GEORGE BUSH.

THE WHITE HOUSE, *August 3, 1990.*

MESSAGES FROM THE HOUSE

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

At 10:12 a.m., a message from the House of Representatives announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 1046. An act to amend the Wild and Scenic Rivers Act of 1968 by designating a segment of the Merrimack River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes;

S. 1524. An act to amend the Wild and Scenic Rivers Act of 1968 by designating segments of the Pemigewasset River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes;

S. 1543. An act to authorize the Board of Gunston Hall to establish a memorial to George Mason in the District of Columbia;

S. 1875. An act to redesignate the Calamus Dam and Reservoir Recreation Area;

S.J. Res. 77. Joint resolution recognizing the National Firefighters' Memorial at the National Fire Academy in Emmitsburg, MD, as the official national memorial to volunteer and career firefighters who die in the line of duty;

S.J. Res. 256. Joint resolution to designate the week of October 7, 1990, through October 13, 1990, as "Mental Illness Awareness Week";

S.J. Res. 316. Joint resolution to designate the second Sunday in October 1990 as "National Children's Day"; and

H.R. 293. An act to direct the completion of the research recommended by the Technical Study Group on Cigarette and Little Cigar Fire Safety and to provide for an assessment of the practicality of a cigarette fire safety performance standard.

The enrolled bills and joint resolutions were subsequently signed by the Acting President pro tempore [Mr. CONRAD].

At 12:12 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5432. An act to extend the expiration date of the Defense Production Act of 1950.

At 4:54 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 1199) to amend title 38, United States Code, to improve recruitment and retention of nurses in the Department of Veterans Affairs by providing greater flexibility in the pay system for those nurses and to authorize the Secretary of Veterans Affairs to provide certain procreative services for married veterans with service-connected disabilities which impair their ability to procreate.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 360. A concurrent resolution providing for an adjournment of the House from the legislative day of August 3 to September 5, 1990, and a recess of adjournment of the Senate from any day between August 3 and August 10 to September 10, 1990.

At 12:59 a.m. (Saturday, August 4, 1990), a message from the House of Representatives announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5350. An act to provide for a temporary increase in the public debt limit.

At 2:42 a.m. (Saturday, August 4, 1990), a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 1594) to extend nondiscriminatory treatment to the products of the People's Republic of Hungary for 3 years.

The message also announced that the House agrees to the report of the committee on conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2240) to amend the Public Health Service Act to provide grants to improve the quality and availability or care for individuals and families with HIV disease, and for other purposes, and that the House recedes from its amendment to the title of the said bill.

The message further announced that the House diagrees to the amendments of the Senate to the bill (H.R. 987) to amend the Alaska National Interest Lands Conservation Act, to deisgnate certain lands in the Tongass National Forest as wilderness, and for other purposes; it asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

From the Committee on Interior and Insular Affairs, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Mr. UDALL, Mr. MILLER of California, Mr. SHARP, Mr. MARKEY, Mr. RAHALL, Mr. VENTO, Mr. GEJDENSON, Mr. KOSTMAYER, Mr. YOUNG of Alaska, Mr. MARLENEE, Mr. CRAIG, Mr. RHODES, and Mr. ROBERT F. SMITH.

From the Committee on Agriculture, for consideration of titles I, II, and IV of the House bill, and titles I and III and section 402 of the Senate amendment, and modifications committed to conference: Mr. DE LA GARZA, Mr. VOLKMER, and Mr. MORRISON of Washington.

As an additional conferee, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Mr. MRAZEK.

The message also announced that the Speaker makes the following additional appointments of conferees in the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1630) entitled "An Act to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes":

As a conferee from the panel from the Committee on Energy and Commerce for consideration of title II of the Senate bill and title II of the House amendment: Mr. TAUKE, in lieu of Mr. BILIRAKIS.

As a conferee from the second panel from the Committee on Public Works and Transportation for consideration of that portion of section 301 adding new section 112(n) to the Clean Air Act of the Senate bill, and that portion of section 301 adding a new section 112(n)(1) to the Clean Air Act of the House amendment: Mr. OBERSTAR, in lieu of Mr. ROE.

As conferees for consideration that portion of section 401 of the House amendment adding a new section 402(b)(3) to the Clean Air Act: The third panel from the Committee on Ways and Means.

As an additional conferee for consideration of section 715 of the House amendment and modifications committed to conference, in lieu of section 709: Mr. COOPER.

As a conferee from the panel from the Committee on Merchant Marine and Fisheries: Mr. HUGHES, in lieu of Mr. TAUZIN.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4877. An act to redesignate the Austin Dam located near Austin, TX, as the "Tom Miller Dam"; and

H.R. 5400. An act to amend the Federal Election Campaign Act of 1971 and certain related laws to clarify such provisions with respect to Federal elections, to reduce costs in the House of Representatives elections, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, August 3, 1990, he had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 1046. An act to amend the Wild and Scenic Rivers Act of 1968 by designating a segment of the Merrimack River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes;

S. 1524. An act to amend the Wild and Scenic Rivers Act of 1968 by designating segments of the Pemigewasset River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes;

S. 1543. An act to authorize the Board of Gunston Hall to establish a memorial to George Mason in the District of Columbia;

S. 1875. An act to redesignate the Calamus Dam and Reservoir authorized under the Reclamation Project Authorization Act of 1972 as the Virginia Smith Dam and Calamus Lake Recreation Area;

S.J. Res. 77. Joint resolution recognizing the National Firefighters' Memorial at the National Fire Academy in Emmitsburg, MD, as the official national memorial to volunteer and career firefighters who die in the line of duty;

S.J. Res. 256. Joint resolution to designate the week of October 7, 1990, through October 13, 1990, as "Mental Illness Awareness Week"; and

S.J. Res. 316. Joint resolution to designate the second Sunday in October 1990 as "National Children's Day."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers; reports, and documents, which were referred as indicated:

EC-3385. A communication from the President and Chief Executive Officer of the Farm Credit System Assistance Board, transmitting, pursuant to law, the report on progress of the Board over the past eighteen months; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3386. A communication from the Assistant Secretary of Health and Human Services (Health) and the Assistant Secretary of Agriculture (Science and Education), transmitting, pursuant to law, a progress report on the Human Nutrition Research and Information Management System; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3387. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Thailand for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-3388. A communication from the Acting Deputy Secretary of the Army (Programs and Installation Assistance), transmitting, pursuant to law, a report on the conversion of the custodial services function at Matin Army Community Hospital, Fort Benning, Georgia, to performance by contract; to the Committee on Armed Services.

EC-3389. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Air Force's proposed letter of offer to the Coordination Council for North American Affairs for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-3390. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize the transfer by lease of a specified naval landing ship dock to the Government of Brazil; to the Committee on Armed Services.

EC-3391. A communication from the Secretary of Defense, transmitting a draft of proposed legislation to provide translation assistance to military personnel separated from the Armed Services during force reductions, and for other purposes; to the Committee on Armed Services.

EC-3392. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on the disposition of coinsured multifamily housing projects held by the Government National Mortgage Association; to the Committee on Banking, Housing, and Urban Affairs.

EC-3393. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend section 3413 of title 12, United States Code, to add an exception authorizing financial institutions to disclose to the Department of Veterans Affairs the names and current addresses of their customers who are receiving payments, by direct deposit or Electronic Funds Transfer into their accounts, of Compensation, Dependency and Indemnity Compensation or pension benefits under title 38, United States Code; to the Committee on Veteran's Affairs.

EC-3394. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, the report on

offsets in military exports; to the Committee on Banking, Housing, and Urban Affairs.

EC-3395. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on progress in establishing a program to demonstrate the effectiveness of disposing of distressed HUD-owned projects through a partnership with State housing finance agencies; to the Committee on Banking, Housing, and Urban Development.

EC-3396. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on alternatives for adjusting contract rents for projects which are assisted under the Section 8 Housing Assistance Payments Program and are subject to annual adjustment factors; to the Committee on Banking, Housing, and Urban Affairs.

EC-3397. A communication from the Secretary of Transportation, transmitting, pursuant to law, a study regarding the exchange of information between the Federal Government and State law enforcement officials on all arrests for drunk driving offenses in all States; to the Committee on Commerce, Science, and Transportation.

EC-3398. A communication from the Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report on the proposed use of fiscal year 1989 research and development funds for the design and construction of an addition to the Avionis Systems Laboratory, Building 16, at the Johnson Space Center; to the Committee on Commerce, Science, and Transportation.

EC-3399. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize the Technology Administration in the Department of Commerce to provide certain services to the Advisory Council on Federal Participation in Sematech; to the Committee on Commerce, Science, and Transportation.

EC-3400. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3401. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-3402. A communication from the Secretary of Energy, transmitting, pursuant to law, a report entitled "Summary of Expenditures of Rebates from the Low-Level Radioactive Waste Surcharge Escrow Account for Calendar Year 1989"; to the Committee on Energy and Natural Resources.

EC-3403. A communication from the Administrator of the General Services Administration, transmitting, pursuant to law, an informational copy of a construction prospectus for the Federal Bureau of Investigation, Washington Field Office, Washington, D.C.; to the Committee on Environment and Public Works.

EC-3404. A communication from the Interagency Task Force of the National Acid Precipitation Assessment Program, transmitting, pursuant to law, the annual report of the Program for 1989; to the Committee on Environment and Public Works.

EC-3405. A communication from the Assistant Attorney General (Office of Justice Programs), transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-3406. A communication from the Assistant Comptroller (Insurance) of the Army and Air Force Exchange Service, transmitting, pursuant to law, the retirement annuity plan for employees of the Army and Air Force Exchange Service and the Supplemental Deferred Compensation Plan for Members of the Executive Management Program; to the Committee on Governmental Affairs.

EC-3407. A communication from the Acting Executive Director of the National Commission on Libraries and Information Science, transmitting, pursuant to law, the annual report required under the Inspector General Act for fiscal year 1989; to the Committee on Governmental Affairs.

EC-3408. A communication from the Chief, Insurance and Employee Benefits, Directorate of MWR Operations, Air Force Military Personnel Center, transmitting, pursuant to law, the annual report on the Air Force Nonappropriated Fund Plan for Civilian Employees for the plan year ended September 30, 1989; to the Committee on Governmental Affairs.

EC-3409. A communication from the Postal Rate Commission, transmitting, pursuant to law, the summary of the Commission's advisory opinion on first-class standards realignment; to the Committee on Governmental Affairs.

EC-3410. A communication from the Archivist of the United States, transmitting, pursuant to law, a report on the administration of the functions of the Archivist, the Administration, the National Historical Publications and Records Commission, the National Archives Trust Fund, and a report concerning records management activities; to the Committee on Governmental Affairs.

EC-3411. A communication from the Administration of the Small Business Administration, transmitting, pursuant to law, a report on the Administration's plan to enhance competition and reduce sole source contacts in fiscal year 1990; to the Committee on Governmental Affairs.

EC-3412. A communication from the Secretary of Labor, transmitting, pursuant to law, the annual Training and Employment Report of the Secretary of Labor; to the Committee on Labor and Human Resources.

EC-3413. A communication from the Assistant Attorney General (Civil Rights Division) as Chairperson of the Interagency Coordinating Council, transmitting, pursuant to law, the 1990 annual report of the Interagency Coordinating Council; to the Committee on Governmental Affairs.

EC-3414. A communication from the Secretary of Education, transmitting, pursuant to law, notice of final funding priority for fiscal year 1990—The Program of Special Projects and Demonstration for Providing Vocational Rehabilitation Services to Individuals with Severe Handicaps; to the Committee on Labor and Human Resources.

EC-3415. A communication from the Assistant Secretary of the Interior (Territories and International Affairs), transmitting a draft of proposed legislation to eliminate "substantial documentary evidence" requirement for minimum wage determination in American Samoa; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-565. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Agriculture, Nutrition, and Forestry.

"HOUSE CONCURRENT RESOLUTION No. 153

"Whereas Friday, December 22, 1989, was the beginning of the coldestg arctic blast ever experienced in the state of Louisiana, with continuous subfreezing temperatures extending for a record eighty hours; and

"Whereas the United States Department of Agriculture Sugarcane Field Laboratory ih Houma, Louisiana, registered a record low temperature during this time of 8.9 degrees Fahrenheit; and

"Whereas the previous recorded low temperature was 13.5 degrees set during the Christmas freeze of 1983, when continuous subfreezing temperatures lasted for fifty-nine hours and, as a result, the 1984 sugarcane crop production was reduced by over twenty-five percent; and

"Whereas given the longer duration and colder temperatures experienced in the December, 1989 freeze compared to 1983, the potential for as much or even greater loss in production for the coming sugarcane crop year is apparent; and

"Whereas the Louisiana Emergency Response Committee has completed evaluating parish sugarcane damage assesment reports and has found that the most recent freeze will prove to be the worst disaster to hit the Louisiana sugarcane industry since disease nearly wiped out the industry in the 1920's with estimates indicating yield losses could run as high as one hundred percent in some areas; and

"Whereas the Louisiana sugar industry accounts for over ten percent of the gross farm income in our state; and

"Whereas the industry includes eight hundred growers, twenty sugar factories, three refineries, several support industries, and provides over twenty thousand year-round and seasonal jobs: Now, therefore, be it

Resolved, That the legislature of Louisiana does hereby memorialize the Congress of the United States, and in particular the members of the Louisiana congressional delegation, to provide federal disaster relief for the sugarcane industry in Louisiana: Be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate, the clerk of the United States House of Representatives, and each member of the Louisiana congressional delegation."

POM-566. A joint resolution adopted by the Legislature of the State of California; to the Committee on Commerce, Science, and Transportation:

"JOINT RESOLUTION No. 78

"Whereas California is the third largest user of transportation fuel in the world, behind only the United States and the Soviet Union, consuming over 12 billion gallons of transportation fuels per year; and

"Whereas approximately 257 million barrels of crude oil are transported by tanker into California's refining facilities each year; and

"Whereas approximately 310 million barrels of petroleum products and 290 million barrels of crude oil are moved between California ports and coastal facilities each year; and

"Whereas the continued reliance on petroleum as a major component of California's energy use is forecasted by the State Energy Resources Conservation and Development Commission; and

"Whereas the movement by sea of petroleum and petroleum products involves both interstate and international transportation; and

"Whereas the federal government has the sole constitutional authority to conduct foreign affairs and regulate interstate and international transportation; and

"Whereas the federal government is currently either considering or conducting numerous activities related to marine safety; now, therefore, be it

Resolved by the Assembly and Senate of the State of California, jointly, That the President and Congress of the United States are respectfully memorialized to support and enact legislation which would do all of the following:

"(1) Require the United States Coast Guard to make a thorough review of tanker design, construction, and operating procedures to lessen the potential for human error resulting in loss of oil or tanker cargo, and revise the applicable requirements or standards where appropriate.

"(2) Require the Coast Guard to evaluate coastal tanker traffic and routes to ensure that tankers operate at a sufficient distance from the coast to minimize the possibility for oil to reach the shoreline in case of an accidental spill.

"(3) Require the Coast Guard to evaluate alarm interlocks on all automatic steering devices, which will activate visual and audible warnings sufficient to warn personnel on a tanker's bridge whenever manual operation of a steering system set in automatic steering is attempted.

"(4) Require a minimum of two licensed officers to be on a tanker's bridge whenever the ship is closing with a port, navigating in difficult or congested waters, or operating under reduced visibility, and direct the Coast Guard to enforce this requirement.

"(5) Require the Coast Guard to implement new certification and training requirements for maritime personnel designed to improve personnel selection and training for vessels of today and tomorrow.

"(6) Support the efforts of the Coast Guard to review requirements for expanded vessel traffic systems (VTS) throughout the couintry, provide adequate funding for a national VTS program to include uniform standards for operations and training of VTS personnel, and require participation by all commercial vessels, both United States and foreign, in the VTS program.

"(7) Since English is the internationally recognized language of the sea, require that all vessels operating within the territorial waters of the United States have navigation personnel and radio operators on duty who are able to communicate in English.

"(8) Establish a national marine safety and emergency response inspection program for all tankers operated in United States territorial waters and provide for input and participation by the states, where appropriate.

"(9) Ratify the International Convention of Standards of Training and Certification of Watchkeepers.

"(10) Provide adequate funding for the Coast Guard to carry out its mission, as defined in federal law, with regard to oilspill prevention and response; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-567. Joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"JOINT RESOLUTION No. 86

"Whereas experts in the field of radiation and radioactivity disagree as to whether, for public health purposes, there is any safe level of exposure to radiation or radioactivity; and

"Whereas exposure to radiation and radioactivity can result in leukemia and other types of cancer; and

"Whereas it is difficult to distinguish radiation-induced biological damage from similar damage caused by other types of environmental insults, including exposure to chemical contaminants, particularly where both types of environmental insults have occurred; and

"Whereas the half-lives of radionuclides range from seconds to millions of years; and

"Whereas contamination of soil and groundwater involving both radioactive and chemical contamination presents special problems for cleanup; and

"Whereas the Federal Resources Conservation and Recovery Act has granted broad authority to states to regulate the release of chemical contaminants from private and federal facilities, providing the states have established regulatory programs which meet specified criteria; and

"Whereas the Federal Atomic Energy Act has largely preempted state and local agencies in the regulation of federal agencies carrying out activities authorized by the provisions of the act which involve the use of radioactive materials, the federal Environmental Protection Agency is not empowered to regulate federal facilities, and the federal Department of Energy has regulated its own activities through the use of internal procedures manuals known as "Department of Energy Orders," which are not subject to the federal Administrative Procedures Act; and

"Whereas the guidance provided by the Department of Energy Orders has failed to prevent serious environmental contamination problems at more than 40 Department of Energy facilities nationwide, where chemical and/or radioactive releases will now require costly and difficult environmental restoration work; and

"Whereas at least five of these sites are located in California near major population areas; now therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation amending the Atomic Energy Act to allow the states to regulate federal facilities to prevent the release of both radioactive and chemical contaminants which threaten the environment and the health of nearby communities; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-569. Joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"JOINT RESOLUTION No. 87

"Whereas the Presidential Medal of Freedom was instituted by President Harry S. Truman in 1945 to recognize Americans who have made especially meritorious contributions to world peace, the security or national interest of the United States, or other public or private endeavors; and

"Whereas during World War II while touring with the USO, Martha Raye entertained American troops in North Africa, Europe, the South Pacific, and on Navy warships; she also entertained American troops during the Korean War; and

"Whereas from 1965 to 1974, Miss Raye spent over two years in Vietnam entertaining American troops, often venturing to the most remote outposts, for which she became known affectionately as "The Old Lady of the Boondocks;" her close association with the Special Forces earned her the honorary rank of lieutenant colonel, a tiger suit with Special Forces insignia, a green beret, and their love and respect; and

"Whereas while on tour in Vietnam, she often found herself in combat situations; she was wounded twice and on numerous occasions she tended American wounded near the battlefield; and

"Whereas Miss Raye has also been awarded other well deserved honors such as the Combat Field Medical Badge, but has yet to receive from the United States government recognition in commensurate with her valuable contributions and her courageous and unselfish commitment to this country during three wars; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President of the United States to award Martha Raye the Presidential Medal of Freedom in recognition of her distinguished record of lifetime service to this country; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representatives from California in the Congress of the United States."

POM-569. Resolution adopted by the City Council of Lakewood, Ohio supporting S. 2112 which amends the National Labor Relations Act to prevent discrimination based on participation in labor disputes; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 2648. A bill to amend title 28, United States Code, to provide for civil justice expense and delay reduction plans, authorize additional judicial positions for the courts of appeals and district courts of the United States, and for other purposes (Rept. No. 101-416).
